SUPER FAMICOM / SNES

Dragon Quest V

Comprehensive Guide

Tenkuu no Hanayome

Enix, 1992

Contents

Part I: Foundations and Game Systems

1 Game Version, Names, and Guide Conventions
- 1.1 Game Version
- 1.2 Names

2 Controls, Exploration, and Progression
- 2.1 Controller inputs, field commands, and menu navigation
- 2.2 Data and status screens: attributes, experience, and equipment
- 2.3 Dialogue, searching, drawers, pots, chests, and hidden objects
- 2.4 Day and night: access, shops, events, and changing time
- 2.5 Doors, keys, moving obstacles, floor hazards, and puzzles
- 2.6 Inventory ownership, item transfer, capacity, and equipment use
- 2.7 Inns, churches, saving, revival, and status recovery
- 2.8 Banks, gold storage, shopping, and selling
- 2.9 Travel progression: walking, wagon, ship, carpet, castle, and dragon
- 2.10 Return destinations, Outside, maps, and safe backtracking

3 Combat, Tactics, and Party Management
- 3.1 Battle commands, target groups, turn order, and escape
- 3.2 Physical attacks, critical hits, multi-target weapons, and damage
- 3.3 Spells, special abilities, MP, and reusable battle items
- 3.4 Status ailments, buffs, debuffs, resistance, and spell reflection
- 3.5 AI tactic modes and when to use direct commands
- 3.6 Intelligence, obedience, and monster command restrictions
- 3.7 The three-member active party and wagon reserves
- 3.8 Changing members, wagon access, experience, and dungeon restrictions
- 3.9 Healing economy, resource conservation, and boss preparation
- 3.10 Enemy summoning, metal enemies, defeat, and recovery

Part II: Complete Three-Generation Walkthrough

4 First Generation: Childhood
- 4.1 Birth scene, the opening ship, and Vista Port
- 4.2 Santa Rosa: Sancho, Bianca, supplies, and the missing herbalist
- 4.3 Santa Rosa Cave: rescue route, treasure, and early training
- 4.4 Alcapa / Alkapa: Bianca's home and the captive panther
- 4.5 Lenoire Castle: entry, separated companions, darkness, and the torch
  - 4.5.1 Ghost-boss preparation and battle strategy
  - 4.5.2 Golden Orb, the panther's names, and Bianca's departure
- 4.6 Santa Rosa revisited: Bella and the route to the faerie realm
- 4.7 Faerie Village and the Dwarves Cave: Thieves' Key knowledge
- 4.8 Ice Mansion: sliding-floor route, Zaile, and the final boss
- 4.9 Flute of Spring, returning home, and childhood loose ends

4.10 Reinhart Castle: Henry's disappearance and the kidnapping
4.11 Thieves Cave: Henry's rescue, Gema, and the scripted transition
4.12 First-generation treasure and pre-transition checklist

5 Second Generation: Escape and Reinhart
5.1 Captivity, Maria, Henry, and escape from the Great Temple
5.2 The Nameless Nunnery: recovery and the first travel objective
5.3 Oracleberry / Oracle Valley: shops, wagon, map, and monster storage
5.3.1 First monster recruits and party-building opportunities
5.3.2 Casino introduction and optional early prize planning
5.4 Santa Rosa Ruins and the adult return to Santa Rosa Cave
5.4.1 Papas' Letter, the Zenithian Sword, and deeper treasure
5.5 Alcapa revisited: the inn, rumors, and preparations for Reinhart
5.6 Reinhart Castle basement: entry route, prisoners, and the key
5.7 Nunnery return and Maria's role at the Southern Tower
5.8 Southern Tower: floor route, Mirror of Ra, and treasure
5.9 The False Queen, restored Reinhart, and Henry's departure
5.10 Reinhart-region cleanup and the next continent

6 Second Generation: Port Selmi and Marriage
6.1 Port Selmi: the tavern confrontation and Kabochi request
6.2 Kabochi and the West Kabochi Cave
6.2.1 Bianca's Ribbon and reunion with the Killer Panther
6.2.2 Papas' Sword, the village reward, and available recruits
6.3 Ruraphin: Benett, the Lunar Herb, and learning Return
6.4 Ruraphin South Cave and the road to Salabona
6.5 Salabona: Ludman, Flora, and the wedding prerequisites
6.6 Volcano Cave: route, hazards, treasure, and the Ring of Flames
6.6.1 Lava Men battle and sustainable healing
6.7 Mountain Village: Duncan, Bianca, and opening the river route
6.8 Waterfall Cave: treasure route and the Ring of Water
6.9 Choosing Bianca or Flora
6.9.1 Party availability, spell progression, and route differences
6.9.2 Wedding preparations, Silk Veil, and the ceremony
6.9.3 Post-wedding gifts, ship access, and what the choice does not change
6.10 Marriage-region treasure and optional-objective checklist

7 Second Generation: The Road to Granvania
7.1 The first sea journey and optional coastal stops
7.2 Medal King Castle, islands, shrines, and travel planning
7.3 Telepador: desert approach and the Zenithian Helmet test
7.4 Mountain Cave, west side: ascent, treasure, and resources
7.5 Chizod / Chizot: the village and the mountain crossing
7.6 Mountain Cave, east side: descent and hidden treasure
7.7 Granvania / Granbania: Sancho, Ojiron, family, and castle searches
7.8 Cave of Trials: puzzles, the Symbol of Royalty, and Kandar
7.9 Coronation, the twins, and the missing queen
7.10 Flying Shoes, the Northern Shrine, and the Demon Tower approach
7.11 Demon Tower: moving floors, treasure, and gatekeeper battles
7.11.1 Orc and Wyvern gatekeepers

7.11.2 Jami, the final confrontation, and the generation transition
7.12 Second-generation completion and carryover checklist

8 Third Generation: Reunion and El Heven
8.1 The years in stone, rescue, and the return to Granvania
8.2 The twins, Sancho, Pippin, and rebuilding the active party
8.3 Zenithian equipment checklist and the son's role
8.4 Reinhart revisited: Henry, Del, and family-related rewards
8.5 Northern Church, small shrines, and northeast exploration
8.6 Water Shrine / Water Cave: the passage to El Heven
8.7 El Heven: family history, the Magic Key, and the Magic Carpet
8.8 Newly accessible towns, islands, treasure, and monster recruits
8.9 Return to Telepador and collection of the Zenithian Helmet
8.10 Route-order options and prerequisites for restoring Zenithia

9 Third Generation: Restoring Zenithia
9.1 Sky Tower: floor route, treasure, and the Magma Staff
9.2 Opening the mountain barrier and entering Torokko Mines
9.3 Torokko Mines: trolley switches, loops, Pusan, and the lake
9.4 The sunken Zenithian Castle and the missing Golden Orb
9.5 Forest of Illusions: navigating the maze with a child
9.6 Faerie Village, the Horn of the Fairies, and Faerie Palace
9.7 The childhood return and the Golden Orb exchange
9.8 Restoring Zenithia and unlocking castle travel
9.9 Salabona's sealed jar, Buorn / Bohen, and the Final Key
9.10 Final Key cleanup and the Royal Cloak side route
9.11 Tower of Boble: Grappling Hook, dragon statue, and floor route
9.11.1 Gonz, Gema, and the two Dragon Eyes
9.11.2 Dragon Orb, Zenithian Armor, and remaining tower treasure
9.12 The Master Dragon and Zenithian Bells
9.13 Great Temple: entry, captivity rooms, and party restrictions
9.13.1 Temple guardians, the high priest, and the wife's rescue
9.13.2 Ring of Life and preparations for the Demon World

10 Third Generation: The Demon World and Ending
10.1 Water Shrine revisited and the three-ring portal
10.2 The Demon World overworld: routes, encounters, and recruitment
10.3 Shahanna: shops, inn, final equipment, and safe preparation
10.4 Evil Mountain: entrance, summit route, and family reunion
10.5 Sacred Pitcher, lava removal, floor loops, and navigation puzzles
10.6 Sage's Stone, Sands of Time, and the final treasure sweep
10.7 Final guardians and preparation for Mildrath
10.8 Mildrath's first form: tactics and summoned enemies
10.9 Mildrath's second form: healing, defenses, and sustained damage
10.10 Ending tour, credits, clear-state behavior, and postgame access
10.11 Final-dungeon and pre-ending completion checklist

11 Postgame and the Bonus Dungeon
11.1 Bonus Dungeon entrance and access prerequisites
11.2 Floor-by-floor route, branching passages, and puzzle solutions

11.3 Bonus treasure, the Drum of War, and unique equipment
11.4 Rare companions and postgame recruitment routes
11.5 Estark / Esterk: party setup, resistances, healing, and strategy
11.6 Repeat battles, challenge goals, and remaining completion tasks

Part III: Characters, Monster Companions, and Abilities

12 Human and Temporary Characters
12.1 Profile fields: availability, role, attributes, spells, and equipment
12.2 The Hero: childhood, adulthood, and event-learned spells
12.3 Bianca: childhood carryover and the adult marriage route
12.4 Flora: second-generation restrictions and later progression
12.5 The Son: Zenithian equipment, support magic, and combat role
12.6 The Daughter: offensive magic, support, and equipment
12.7 Sancho: recruitment, utility, and party role
12.8 Pippin: recruitment, equipment, and physical combat
12.9 Temporary and AI-controlled companions
12.9.1 Papas
12.9.2 Bella / Vera
12.9.3 Henry
12.10 Human spell-learning tables and event-dependent progression
12.11 Marriage comparison and family availability by generation
12.12 Supporting characters and relationship glossary

13 Monster Recruitment and Party Planning
13.1 Recruitment unlocks, wagon ownership, and eligibility
13.2 Battle resolution, enemy groups, recruitment chances, and exceptions
13.3 Guaranteed story companions and random monster recruitment
13.4 Intelligence, direct commands, and improving obedience
13.5 Monster Gramps: storage, retrieval, capacity, and releases
13.6 Repeated species, default names, and roster organization
13.7 Recruitment routes by generation and region
13.7.1 Oracleberry, Santa Rosa, and Reinhart
13.7.2 Port Selmi, Kabochi, Ruraphin, and Salabona
13.7.3 Telepador, mountain routes, and Granvania
13.7.4 El Heven, Zenithia routes, and the sea
13.7.5 Demon World and Bonus Dungeon
13.8 Party roles: damage, healing, support, resilience, and utility
13.9 Recommended teams for each story phase and major boss
13.10 Level caps, training priorities, and late-game replacements
13.11 Rare recruits, metal companions, and realistic collection planning

14 Complete SNES Monster Companion Catalog
14.1 Companion profile fields
14.2 Individual monster profiles
14.2.1 Attackbot
14.2.2 Big Eye
14.2.3 Blizzard Hawk
14.2.4 Bomb Baby

14.2.5 Bomb Crag
14.2.6 Brownie
14.2.7 Centaurus
14.2.8 Curer
14.2.9 Dancing Jewel
14.2.10 Dancing Needle
14.2.11 Dragon Pup
14.2.12 Drakee
14.2.13 Eigerhorn
14.2.14 Eliminator
14.2.15 Farewell Crag
14.2.16 Gigantes
14.2.17 Golem
14.2.18 Great Dragon
14.2.19 Healer
14.2.20 Hellbattler
14.2.21 Hork
14.2.22 Killer Panther: childhood and adult story recruitment
14.2.23 King Healer
14.2.24 King Slime
14.2.25 Kukkle
14.2.26 Leaonar
14.2.27 Lionex
14.2.28 Mad Dragon
14.2.29 Magician
14.2.30 Messala
14.2.31 Metal Babble
14.2.32 Minidemon
14.2.33 Neileus
14.2.34 Orc King
14.2.35 Puppet Man
14.2.36 Slime
14.2.37 Slime Knight
14.2.38 Soldier Bull
14.2.39 Springer
14.2.40 Wyvern
14.2.41 Yeti
14.3 Recruitment-location and availability tables
14.4 Starting abilities, learned abilities, and maximum-level tables
14.5 Equipment groups, resistance comparisons, and party roles
14.6 Companion names and aliases

15 Spells and Special Abilities
15.1 Alphabetical index: MP cost, targets, effects, and users
15.2 Healing, revival, sacrifice, and status recovery
15.3 Offensive magic by family and target pattern
15.4 Instant death, sleep, confusion, silence, and other control effects
15.5 Attack and defense changes, barriers, reflection, and dispelling
15.6 Breath attacks, dances, physical skills, and monster-only abilities

15.7 Travel and field utility: Return, Outside, Stepguard, and time changes
15.8 Event-learned spells: Return and Chance
15.9 Learning-level tables for humans and monster companions
15.10 Item-cast equivalents, AI use, resistance, and reliability

Part IV: Items, Equipment, Enemies, and Bosses

16 Items, Keys, and Story Objects
16.1 Alphabetical item index and acquisition cross-reference
16.2 Healing, status cures, revival, and MP-restoration consumables
16.3 Seeds, acorns, permanent growth, and allocation planning
16.4 Battle items, reusable effects, limited uses, and breakage
16.4.1 Sage's Stone, Drum of War, and Sands of Time
16.4.2 Rings, stones, waters, bells, and situational tools
16.5 Keys and access progression
16.5.1 Thieves' Key knowledge, Reinhart Key, Magic Key, and Final Key
16.6 Childhood and faerie-realm objects
16.6.1 Torch, Golden Orb, Flute of Spring, and Bianca's Ribbon
16.7 Wedding, royal, and rescue objects
16.7.1 Papas' Letter, Mirror of Ra, wedding rings, and Silk Veil
16.7.2 Symbol of Royalty, Flying Shoes, and Ring of Life
16.8 Zenithia and Demon World objects
16.8.1 Magma Staff, faerie horn, orbs, Grappling Hook, and Dragon Eyes
16.8.2 Dragon Orb, Zenithian Bells, and Sacred Pitcher
16.9 Maps, wagon, vehicles, and non-inventory unlocks
16.10 Where to obtain, retain, use, or revisit each key object

17 Weapons, Armor, Shields, Helmets, and Accessories
17.1 Catalog fields: power, prices, locations, users, and special effects
17.2 Complete weapon catalog
17.2.1 Single-target weapons and character restrictions
17.2.2 Whips, boomerangs, repeated attacks, and unusual damage effects
17.2.3 Weapon-cast spells and reusable support tools
17.3 Complete body-armor catalog
17.4 Complete shield catalog
17.5 Complete helmet catalog
17.6 Complete accessory catalog
17.7 Human and monster equipment-compatibility matrices
17.8 Cursed equipment, drawbacks, removal, and sale restrictions
17.9 Elemental protection, status protection, and special properties
17.10 Zenithian equipment: acquisition, eligibility, and checklist
17.11 Casino prizes, Medal King rewards, unique finds, and monster drops
17.12 Recommended upgrades by generation, role, and budget
17.13 Endgame and postgame loadouts for each party member

18 Enemy Bestiary, Encounters, and Treasure Drops
18.1 Bestiary fields: names, HP, rewards, drops, behavior, and locations
18.2 Alphabetical enemy catalog
18.2.1 Enemies A–F

18.2.2 Enemies G–L
18.2.3 Enemies M–R
18.2.4 Enemies S–Z
18.3 Overworld encounter tables by region and generation
18.4 Dungeon encounters by floor and route
18.5 Sea encounters and vehicle-dependent access
18.6 Metal enemies: locations, escape behavior, and training tactics
18.7 Mimics, trapped chests, summoned enemies, and fixed encounters
18.8 Drop tables and item-to-monster reverse index
18.9 Recruitable flags and differences between enemy and companion data
18.10 Boss entries and variant encounters

19 Boss and Scripted-Battle Strategy Compendium
19.1 Strategy format: access, party, equipment, patterns, and recovery
19.2 First-generation battles
19.2.1 Lenoire ghost boss
19.2.2 Zaile and the Ice Mansion boss
19.2.3 Gema and the childhood scripted confrontation
19.3 Second-generation battles
19.3.1 False Queen
19.3.2 Killer Panther reunion: resolution without defeating it
19.3.3 Lava Men
19.3.4 Kandar and the Cave of Trials confrontation
19.3.5 Demon Tower gatekeepers and Jami
19.4 Third-generation battles
19.4.1 Buorn / Bohen
19.4.2 Gonz and Gema at the Tower of Boble
19.4.3 Great Temple guardians and high priest
19.5 Final-dungeon encounters and both Mildrath forms
19.6 Estark / Esterk and repeat postgame challenges
19.7 Low-resource recovery plans and common causes of failed attempts

Part V: Optional Content, Economy, and Completion

20 Small Medals and Medal King Rewards
20.1 Medal collection, exchange rules, rewards, and planning
20.2 Chronological location checklist
20.2.1 Early adulthood and the Reinhart region
20.2.2 Port Selmi, Kabochi, Ruraphin, and Salabona
20.2.3 Mountain routes, Granvania, Cave of Trials, and Demon Tower
20.2.4 Sea routes, shrines, El Heven, and key-gated revisits
20.2.5 Zenithia routes, Tower of Boble, and Great Temple
20.2.6 Demon World, Evil Mountain, and Bonus Dungeon
20.3 Searchable objects, fixed rewards, and enemy-drop medals
20.4 Location-to-map index and the final collection audit
20.5 Version-specific Mimic encounters

21 Casino, Shops, and Resource Planning
21.1 Oracleberry casino access, coins, stakes, and prize exchange

21.2 Slime races
21.3 Slot machines
21.4 Monster arena betting
21.5 Prize catalog, acquisition priorities, and equipment tradeoffs
21.6 Ordinary-play budgeting versus optional emulator-assisted methods
21.7 Town-by-town weapon, armor, and item shop inventories
21.8 Day/night availability, marriage-route support, and special vendors
21.9 Gold, experience, healing costs, and efficient purchase routes
21.10 Banks, retained valuables, sale decisions, and late-game funding

22 Secrets, Side Quests, and Optional Objectives
22.1 Reinhart revisits, family rewards, and travel privileges
22.2 Ruraphin follow-up, Benett's experiments, and Chance
22.3 Medal King Island, optional sea stops, and newly opened doors
22.4 Buorn / Bohen: timing, sealed-jar events, and Final Key access
22.5 Emblem Cave / Cave of Seals and the Royal Cloak
22.6 Hidden mountain-path treasure and the Staff of Punishment
22.7 Optional recruits, unique equipment, and reusable support items
22.8 Inventory-order Easter egg: requirements and effects
22.9 Version-specific Mimic encounters
22.10 Emulator save-state casino methods, clearly separated from normal play
22.11 Postgame secrets and version-specific misconceptions

23 Completion Checklists and Efficient Routes
23.1 Before leaving childhood: treasures, companions, and irreversible events
23.2 Before marriage and before the second-generation transition
23.3 Third-generation unlock and backtracking checklist
23.4 Every town and dungeon treasure checklist
23.5 All Small Medals and reward selections
23.6 All recruitable monster types and story companions
23.7 All unique equipment, key objects, and reusable battle tools
23.8 Spell progression, event spells, and companion level-cap goals
23.9 Before Mildrath and before entering the Bonus Dungeon
23.10 Postgame completion, repeat challenges, and optional personal goals
23.11 Suggested save checkpoints and recovery routes

Part VI: World, Town, and Dungeon Atlas

24 World Map, Towns, Services, and Travel Routes
24.1 Overworld map, region names, and location index
24.2 Travel-unlock and access-dependency diagrams
24.3 Ports, landings, Return points, carpet limits, and dragon access
24.4 Town and settlement profiles
24.4.1 Vista Port, Santa Rosa, and Alcapa / Alkapa
24.4.2 Reinhart, Nameless Nunnery, and Oracleberry
24.4.3 Port Selmi, Kabochi, and Ruraphin
24.4.4 Salabona and Mountain Village
24.4.5 Telepador, desert stops, and Medal King Castle
24.4.6 Chizod / Chizot, mountain stops, and Granvania

24.4.7 Northern Church, small shrines, and El Heven
24.4.8 Faerie Village, Faerie Palace, and Zenithian Castle
24.4.9 Shahanna and the Demon World
24.5 Service matrix: shops, inns, churches, banks, and monster storage
24.6 Generation changes, day/night differences, and key-gated searches

25 Dungeon Atlas, Puzzles, and Treasure Routes
25.1 Atlas conventions: floors, entrances, exits, switches, and treasure
25.2 First-generation maps
25.2.1 Santa Rosa Cave, including the adult revisit
25.2.2 Lenoire / Linoire Castle
25.2.3 Dwarves Cave
25.2.4 Ice Mansion
25.2.5 Thieves Cave / Reinhart Cave
25.3 Reinhart, regional side quests, and marriage maps
25.3.1 Reinhart Castle basement
25.3.2 Southern Tower
25.3.3 Ruraphin South Cave
25.3.4 West Kabochi Cave
25.3.5 Volcano Cave
25.3.6 Waterfall Cave
25.4 Mountain crossing, royal trials, and rescue maps
25.4.1 Mountain Cave, west side
25.4.2 Mountain Cave, east side
25.4.3 Cave of Trials
25.4.4 Demon Tower
25.5 Third-generation travel, Zenithia, and temple maps
25.5.1 Water Shrine: El Heven route and ring portal
25.5.2 Emblem Cave / Cave of Seals
25.5.3 Sky Tower
25.5.4 Torokko Mines / Trolley Cave
25.5.5 Forest of Illusions
25.5.6 Tower of Boble
25.5.7 Great Temple
25.6 Final and postgame dungeon maps
25.6.1 Evil Mountain
25.6.2 Bonus Dungeon
25.7 Treasure, Small Medal, key-object, and encounter overlays
25.8 Text routes and additional locations

Part VII: Appendices

26 Name Cross-Reference and Glossary
26.1 People, family relationships, and temporary companions
26.2 Towns, dungeons, regions, and vehicles
26.3 Monster species and default companion names
26.4 Spell names and aliases
26.5 Items, equipment, key objects, and naming collisions
26.6 Alternate names for lookup

27 Quick Reference Tables

27.1 Story milestones and next-objective lookup
27.2 Keys, travel unlocks, and access requirements
27.3 Human and monster spell-learning summaries
27.4 Monster level caps, recruitment regions, and party roles
27.5 Equipment compatibility, upgrades, and resistance priorities
27.6 Boss preparation, status counters, and reusable-item lookup
27.7 Small Medal rewards, casino prizes, and high-value purchases
27.8 Shops, safe recovery points, and final completion checklists

1 Game Version, Names, and Guide Conventions

Dragon Quest V begins aboard a ship, with a young boy travelling alongside his father, Papas. The first visits to Santa Rosa and Alcapa establish a comfortable rhythm of talking to townspeople, searching houses, buying equipment, and venturing into the countryside. As the journey grows, the party gains new companions and new ways to travel. Familiar places remain part of the adventure, and return visits give them fresh significance.

The game rewards attention to small details. A drawer can hold a useful healing item. A conversation can point toward the next destination. A new key can make several earlier stops worth revisiting. Keeping track of these connections makes exploration satisfying and helps the party arrive ready for the next challenge.

1.1 Game Version

Dragon Quest V: Tenkuu no Hanayome is Enix's 1992 role-playing game for the Super Famicom / SNES.

The subtitle is commonly rendered as *The Bride of the Sky* or *Bride of Heaven*. The names *Dragon Quest V*, *Dragon Quest 5*, and *DQ5* identify the same game.

Exploration, party development, and monster recruitment are central to the adventure. Several features shape the journey:

- The normal active battle party has three members. Choosing their roles and equipment is an important part of preparing for a dungeon.
- The wagon carries additional companions. Access to those companions depends on the location and the party's current circumstances.
- Each recruitable monster species has its own growth, abilities, equipment options, and maximum level.
- Keys and vehicles expand the accessible world throughout the game. A new travel ability can make an earlier destination worth another visit.

1.2 Names

One place, several names

Alcapa, Alkapa, and Arukapa identify the same town. Lenoire and Linoire are alternate spellings of the same castle. Common place names include the following:

Primary name	Alternate names
Santa Rosa	Santa Rose, Santorez
Alcapa	Alkapa, Arukapa
Lenoire Castle	Linoire Castle, Lenule, Linule
Oracleberry	Oracle Valley
Salabona	Sarabona
Granvania	Granbania, Glanvania
El Heven	Elheaven
Torokko Mines	Trolley Cave

Surroundings provide another useful way to identify a place. Its position relative to a port, mountain pass, river, or nearby town helps confirm the match. Dungeon landmarks, floor connections, and the current objective provide similar clues when a place has an unfamiliar name.

People and companion names

The *Hero* is the player-named protagonist who travels with Papas at the beginning of the adventure.

Monster companions have both a species and an individual name. A Slime Knight's species determines its growth, spells, and equipment options. Individual companions can have their own nicknames, and the roster may contain more than one member of a species.

A character's appearance, location, and abilities help establish its identity. These details are useful when several enemy or companion names resemble one another.

Spells and equipment

Blaze, *Firebal*, and *Bang* belong to separate spell families. MP cost, target pattern, and effect help identify a spell and its role in battle.

Weapons and armor have individual names, power values, eligible users, and special properties. Certain rings and staves also have item-use effects alongside their equipment properties.

2 Controls, Exploration, and Progression

A visit to town gives the party a chance to recover, hear local news, and prepare for the next trip. Out in the countryside, the same small decisions continue to matter. Healing before a difficult stretch, keeping useful items with the right companion, and remembering a convenient resting place can make a long journey considerably more comfortable.

Game-long achievement plan

The achievement route has **70 goals worth 410 points**. Keep ordinary in-game save slots for the marriage branches and the separate final-boss lineups. Confirm an unlock in the achievement list before reloading a protected checkpoint.

Achievement	Points	Start early and finish at
I Don't Want Your Help	10	From the start of adulthood, defer the wagon and all wild recruitment until Kitty rejoins in 6.2. Continue with Hero and Henry, then prepare the Hero for solo travel.
Monster Tamer / Recruiter / Hunter / Collector	2 / 3 / 5 / 10	After Kitty, track distinct recruitable species toward the 1, 5, 10, and 16 milestones. Confirm each distinct-species milestone in the achievement list.
Small Medal Hunter	25	Record the 29 fixed searches separately from chests and enemy drops. The last search is Shahanna's outer-wall barrel.
Small Medal Collector	25	Record the 19 fixed chest pickups. The last is the Bonus Dungeon entrance chest beside the Restoration Orb.
King Metal Shield	4	Reserve 43 unspent medals and buy the shield at the Medal King. Collected-location progress remains separate from balance.
King Metal Sword	5	Build 50,000 casino coins through ordinary play, then buy the sword. The balance alone is preparation.
Let's Cuddle / Special Delivery	3 / 3	Preserve the pre-bride church save. Finish Bianca's two-person Alcapa stay and Flora's two courier gifts on separate branches before Granvania.
Kandar's Henchmen	5	Defeat the Reinhart and Mountain Village guards during reunion visits, then the Shahanna exterior guard.
The Sacred Raiment	5	Keep Sun Crown, Dragon Staff, and Royal Cloak until the Bonus Shield of Radiance. Equip all four on the Hero and remove accessories.
There and Back Again	2	After learning Return, track the actual 17 destination entries. Finish registration on reaching Evil Mountain.
That's Got To Hurt	5	Develop a strong focused attacker and normal attack support. A single hit must show at least 500 damage.
A Family Matter / Heroic Trainer	10 / 25	Develop family and monster recovery teams separately. Keep the prepared pre-Mildrath church save for one restricted lineup through both forms per attempt.
Underworld Challenge	25	Save the Bonus equipment and develop Drum, Barrier, and strong recovery. Defeat Estark within 25 turns using ordinary play.

Early missable checkpoints

Defeat Lenoire's Walking Statue before Boss Ghost. Search the slavery camp's sleeping-room pot before the escape. Complete the nighttime Reinhart inn inquiry, Ludman's alternative proposal, both marriage branches, the Hero's failed Helmet fitting, and Flora's courier gifts before advancing their associated story windows.
Before defeating Ivol, attempt the Staff of Stoross on the wife's statue and use the purchased Ivol's Book during his battle. Keep the six-item critical/recruitment shortcut and early-patch trap repetition outside the ordinary achievement route. The 500-damage and 25-turn goals explicitly require a no-cheating attempt.

2.1 Controller inputs, field commands, and menu navigation

Moving and choosing an action

Use the directional pad to walk and to move the cursor through menus. Approach a person or object and face it before choosing an interaction. A staircase, entrance, or passage generally connects to the next area when the party walks onto the appropriate square.

Press **A** to open the field command menu. Choose a command with the directional pad and confirm it with A. In menus, **B** cancels the current selection or closes the current window. Some actions lead through several choices, such as selecting a companion, an item, and its recipient. Read the current prompt before confirming the next choice.

The field commands

Talk: Speak to the person the leading character is facing. Shop counters and service desks are approached in the same way.

Spell: Choose a companion and one of that companion's field spells. Healing, status recovery, and travel spells appear as they become available. Select the recipient when the spell requests a target.

Status: Inspect a companion's level, attributes, HP, MP, equipment, and other personal information. Use this screen when comparing an upgrade or checking the party's condition before leaving town.

Item: Choose an owner and an object from that owner's inventory. The available actions include using, transferring, and discarding ordinary items. An item's available actions depend on the object.

Equip: Select a companion and assign suitable weapons, armor, shields, and headgear. Check the resulting attack and defense values after making a change.

Tactics: Manage party-related commands and battle behavior. Party arrangement determines the companions travelling at the front.

Door: Open the door directly ahead when the party has the required access. Approach the door square and face it before using the command.

Search: Examine the current position or the object directly ahead. This command is useful for chests, drawers, pots, and specific places on the ground.

A character-selection window identifies the companion whose spell, equipment, or inventory is being used. Confirm the owner carefully when several companions carry similar objects. Giving a Medical Herb to a front-line companion places that herb among the items that companion can use during a battle.

Working through menus

Shops, inns, churches, and storage counters lead through a short sequence of questions. Select the service, choose the companion or object involved, and review the price or destination before accepting. A purchase may also ask which companion should receive the item.

When the party has accumulated several spells or items, move through the list to inspect the available choices. Returning to the previous window lets you choose another owner or action. This is useful when distributing new equipment or preparing several companions for a dungeon.

The opening data menu handles starting an adventure and managing its save slots. Copying creates another copy of the selected adventure record. Deleting removes the chosen record. Check the displayed slot and character name carefully before confirming either operation.

2.2 Data and status screens: attributes, experience, and equipment

Checking a companion

The Status command gives a compact view of a companion's development and current condition. Begin with the name and level, then check HP and MP. Their current values show the resources available for the next trip, and their maximum values show the companion's capacity when fully recovered.

A character with ample maximum MP can still be nearly exhausted after a long dungeon. Check the current value before relying on another healing spell or planning a magical escape. The same habit helps identify a companion who needs treatment before the next battle.

Experience records progress toward the next level. Level gains can improve attributes and add spells or abilities. Check the Spell menu after a useful level gain to see which new field abilities are available. A priest's experience advice gives the amount still needed for the next level.

Attributes and equipment

Strength, agility, base defense, intelligence, and luck describe the companion's current development. Strength contributes to physical attack power. Agility influences the order of actions in battle. Base defense contributes to protection from physical attacks. Intelligence affects a monster companion's command obedience.

Attack and defense show the current results of character development and equipment. When considering a purchase, inspect the intended user's existing weapon or armor first. After equipping the replacement, check the new total and decide where the old piece will be most useful.

Special equipment properties deserve a separate look. Protection from certain attacks or status effects can be valuable in the next dungeon. Some weapons have unusual attack patterns, and some objects provide a spell-like effect when used as an item. Choose equipment with the area's enemies and the companion's role in mind.

Growth and the active party

Monster species have individual level caps. A companion approaching its cap may already have most of its available abilities. Consider its healing, support, equipment, and durability when deciding how long to keep it in the active party.

After a recruitment or party change, inspect the new companion's status, spells, and equipment. Supply suitable gear and place useful consumables in its inventory. This makes the new member ready to contribute on the next journey.

The opening data menu also provides message-speed and sound settings. Choose a comfortable text speed so that shop prices, service prompts, and conversations remain easy to follow.

2.3 Dialogue, searching, drawers, pots, chests, and hidden objects

Talking through a town

Speak to residents as you explore. Their conversations introduce nearby places, local problems, unusual visitors, and changes in the town. A shopkeeper may offer a useful destination, while another resident explains why a building or route matters.

Conversations can change after an event or at another time of day. Return to the people involved in the current objective after completing its immediate task. The next instruction, reward, or permission to proceed often comes through that follow-up conversation.

Face the person before using Talk. Across a counter, face the clerk from the customer side. When a person has moved to another room or a building has closed, check the time of day and look around the surrounding area.

Searching houses and shops

Drawers, pots, barrels, and chests can hold useful objects. Approach and face the container, then use Search. Check accessible rooms above or behind shops as well as the obvious ground-floor rooms. A small find can save a purchase or supply an item for the next trip.

The opening ship offers an immediate example. Search the drawer in the cabin for a Medical Herb. In Santa Rosa, household searches provide early supplies and equipment. These discoveries make it worth examining a new room before leaving it.

Keep some inventory space available while exploring. Transfer spare objects between companions or deposit them before a long treasure run. A party carrying a full assortment of old equipment can run short of space just as a useful new object is found.

Ground searches and unusual containers

Some objects lie on a particular square of ground. Stand on the indicated square and use Search. Details such as a flower patch, grave, well, bucket, or conspicuous corner can help identify the correct position. NPC dialogue may point toward the search area.

During a return visit, check rooms that have become accessible through a new key or event. A newly opened cellar or side room may contain several objects close together. Finish the searches in that room before returning to the main route.

Some containers begin a fixed encounter. Keep the party reasonably healed while opening unfamiliar containers in a dungeon, and have a recovery item ready in an active companion's inventory.

2.4 Day and night: access, shops, events, and changing time

A town at two different times

Day and night affect the daily life of towns. Residents move, businesses open or close, and certain people offer their services at a particular time. The change in lighting also makes it easy to recognize which part of the day the party has reached.

Oracleberry provides a useful early example. Its special merchant conducts business at night, and the fortune teller also has a nighttime routine. Visit the town during both periods to see the available services and conversations.

When a person is absent or a counter is closed, check nearby rooms and consider another time of day. A resident may explain the schedule. Some story events have their own timing and require a conversation or action before the party can continue.

Letting time pass

Travel around the countryside until the lighting changes, then enter the town at the desired time. Choose a manageable area near the entrance when waiting for night. Encounters during the walk give the party a chance to earn experience and gold, so keep healing supplies available.

An ordinary stay at an inn restores the party and brings the day around to morning. A story-directed stay may include an event. Once the party is free to move again, check the surroundings and continue the current objective.

Changing the time directly

The Day-Night spell costs 3 MP and switches between day and night when used in an appropriate field location. Select a companion who knows it through the Spell command. This becomes convenient when returning to a shop or searching for a person with a particular schedule.

The Lamp of Darkness changes day into night. Use it through the owner's Item menu when that effect is needed. Enter or revisit the town afterward to reach the nighttime activity.

2.5 Doors, keys, moving obstacles, floor hazards, and puzzles

Opening a route

Approach a closed door and face it, then use Door. Locked doors require the relevant key or learned unlocking ability. Keep important access items available to the travelling party.

The Thieves' Key knowledge opens the ordinary locks associated with that ability. The Reinhart Key is used for the castle's relevant locks. The Magic Key opens its red-framed doors, and the Final Key provides access to prison cells and other remaining key-locked doors.

A new key can make several older destinations worth revisiting. Complete the newly accessible searches in one town before moving on to the next. An entrance controlled by a story event or a mechanism requires that particular action as well.

Rocks, switches, and connected passages

Some movable obstacles can be pushed by walking into them from a suitable side. Check the clear space around the object before moving it. A passage can depend on where an obstacle ends up, so pay attention to nearby walls, doors, and floor connections.

Inspect visible switches, levers, and unusual structures. Look for the gate, track, staircase, or passage affected by the mechanism. After an action, examine the changed area before moving farther away.

In dungeons with holes, sliding floors, or one-way connections, keep track of the stairs and entrances that reconnect the rooms. A fall can lead to a different section of the same dungeon. Locate the return path before spending too many healing resources exploring its branches.

Crossing damaging terrain

Hazardous floors can reduce HP while the party moves. Check the party's condition after crossing them, especially when a battle may begin nearby. Poison can also drain HP during travel and deserves prompt treatment.

Stepguard costs 2 MP and protects the party from damaging floor tiles. Cast it before crossing an appropriate hazard. Check the party's condition as the route moves into another area, and renew the protection when needed.

If the caster is short of MP, choose a route with fewer hazardous steps and heal after the crossing. Keeping the party healthy before opening a door or entering a new room gives more room to handle an unexpected battle.

2.6 Inventory ownership, item transfer, capacity, and equipment use

The twelve-item inventory

Each companion has twelve inventory slots. Equipment occupies those slots along with consumables, spare gear, and other carried objects. Separate copies of a consumable occupy separate slots.

Leave room for discoveries before entering a treasure-rich area. Deposit unused possessions, sell ordinary spare gear when it is safe to do so, and share the carrying load among available companions. Keep the active party's recovery supplies convenient to reach.

Item ownership matters in battle. A companion uses objects from its own inventory during its turn. Give healing or status-recovery items to active members who can use them when needed. A companion with a useful reusable item should also be available for the encounter where it will be used.

Transferring and equipping

Open Item, select the current owner, choose the object, and select the transfer action. Choose the recipient and confirm the transfer. Check the recipient's remaining space when moving several objects at once.

Use Equip to assign a suitable weapon, armor piece, shield, or headgear. After a change, inspect the companion's attack and defense values. The old equipment remains a possession until it is transferred, sold, stored, or otherwise removed.

An older weapon or armor piece may suit another companion. Check the recipient's equipment options before selling it. When moving equipped gear, review both companions' equipment afterward so that each has the intended loadout.

Using objects and conserving valuables

Select Use from the object's available item actions. The game may ask for a recipient or apply the effect to the field. Medical Herbs provide healing, Antidotes treat poison, and Full Moon Herbs treat paralysis. Their availability can help preserve a healer's MP during a long trip.

Certain weapons and other objects produce a spell-like effect when used. Their useful action may be available alongside their equipment function. Inspect the object's effect and give it to a companion who can make good use of it.

Keep important keys, event objects, and unique possessions safe. Store objects that are temporarily unnecessary when the depository accepts them. Resolve cursed equipment through the appropriate church service before trying to change an affected loadout.

2.7 Inns, churches, saving, revival, and status recovery

Resting before the next journey

An inn restores the living party's HP and MP. Speak to the innkeeper, review the cost, and accept the stay. Free resting opportunities are particularly useful during early training or while gathering enough gold for an equipment upgrade.

Check the party's condition after resting. Treat persistent ailments and revive fallen companions before setting out. A fully supplied healer and healthy front line make the next journey much more comfortable.

Church services

Speak to the priest and select the service needed:

Record Adventure: Save the current adventure. Confirm the chosen record and wait for the priest to finish the saving dialogue.

Experience advice: Learn how much experience a companion needs to reach the next level.

Revival: Restore a fallen companion to life. Select the companion and review the required payment.

Poison treatment: Remove poison from the selected companion.

Curse removal: Resolve a curse affecting a companion or its equipment through the priest's service.

Save after an important acquisition, a difficult dungeon, or a substantial party change. Before a longer expedition, visit the inn and church so that the saved record reflects the prepared party.

Recovery away from town

Healing spells and consumables let the party recover between battles. Antidote costs 2 MP and treats poison. Numboff costs 2 MP and treats paralysis. Carrying Antidotes and Full Moon Herbs gives additional options when the appropriate caster is unavailable or short of MP.

Vivify costs 10 MP and attempts to revive a fallen ally. A failed attempt requires another cast, so allow enough MP when relying on it. Revive costs 20 MP and restores a fallen ally with full HP. A Leaf of the World Tree also provides revival and is a valuable emergency possession.

After a revival, check HP, MP, and remaining supplies. A recovery spell can make it possible to finish a short route or reach the exit. A return to town provides a comfortable chance to rest, replenish items, and save.

Recovering from defeat

When the party is defeated, half of the gold being carried is lost. Banked gold remains protected. Check the party's condition after returning to the recovery point, then arrange revival, treatment, and rest.

Revisit the equipment and supply plan before trying the area again. A protective item, a different active companion, or an extra recovery object may give the party the help it needs on the next attempt.

2.8 Banks, gold storage, shopping, and selling

Depositing gold and possessions

The depository offers storage for gold and items. Oracleberry has one near Monster Gramps. Gold deposits are made in increments of 1,000 G. Keep enough spending money for the next inn stay, treatment, and planned purchases, then deposit the amount that can be set aside.

Stored gold is protected from the loss caused by defeat. Withdraw it when an equipment purchase or recovery expense is due. Keeping a reserve in the bank makes rebuilding a defeated party easier.

The item-storage service is useful for spare equipment and possessions that are being kept for later. Select the owner and object when depositing, then use the withdrawal service when the object is needed again. Leave space with the intended recipient before collecting several stored items.

When a monster is left with Monster Gramps, its carried equipment and items are transferred to the depository. Retrieve the needed possessions and equip the companion again when bringing it back into the travelling party.

Making a purchase

Speak to the shopkeeper, choose the item, and review its price and the intended recipient. Consider which active companion gains the most from the upgrade. A dependable weapon for a frequent attacker or protective gear for a vulnerable member can have an immediate effect on the next trip.

After buying equipment, assign it through Equip and check the resulting status values. Transfer useful older gear to another eligible companion. Keep enough cash for recovery and essential consumables after the purchase.

Oracleberry's nighttime merchant sells the wagon for 300 G. Having the required cash ready makes that visit convenient. Purchases tied to travel or party access are worth accounting for alongside ordinary equipment.

Selling and keeping useful objects

The selling service quotes a value before the transaction is completed. Review the object and its owner carefully. Ordinary gear that has been replaced throughout the party can provide money and free inventory space.

Keep unique objects, useful reusable items, and equipment intended for a companion who will be trained later. The depository provides space for possessions that are worth retaining. Store them together with a clear idea of which companion or journey they will support.

2.9 Travel progression: walking, wagon, ship, carpet, castle, and dragon

Walking and the wagon

On foot, follow paths through the countryside and look for the entrances to towns, caves, towers, and other destinations. Mountains and other obstacles define the available routes. Encounters along the way consume healing supplies and MP, so consider the journey to the entrance when preparing for a dungeon.

The wagon follows the party during appropriate field travel and provides room for additional companions. Arrange the active members and distribute their equipment before entering an area with restricted wagon access. Keep the supplies needed inside that area with the companions who will be available there.

Sailing

The ship opens sea routes between continents and islands. Board at its docking point and sail toward the desired coast. Choose an accessible landing place near the destination, then continue on foot.

Sea travel has its own encounters. Maintain enough healing for the voyage and the exploration after landing. A nearby town or inn can provide a convenient starting point for a longer island trip.

Remember the landing point before entering a dungeon or making a detour. The coastline and nearby landmarks help locate the ship again when the party is ready to continue.

Using the Magic Carpet

Use the Magic Carpet from its owner's inventory on suitable open ground. It carries the party across plains and water, making several routes more direct. Forests and mountains constrain its movement.

Choose a clear approach to the destination and a suitable place to land. After dismounting, walk into the town or dungeon. While travelling by carpet, X opens the world map and helps identify nearby land and routes.

The flying castle

Once Zenithia is available for travel, its movement opens another way to cross the world. Use the directional pad while controlling the castle. Press X to view the world map and check the destination before choosing the approach.

The castle's interior also provides a place to regroup during that part of the adventure. Keep the party ready for the destination reached after leaving it, especially when continuing directly into a dungeon.

Dragon travel

The Zenithian Bells summon the flying ride when they are available. Use the item outdoors and choose the desired route through the world. This form of flight provides access across terrain such as forests and mountains.

Choose a suitable landing point near the destination, then dismount and continue on foot. Check the active party and healing supplies before entering the next area. A fast flight can place the party close to a demanding dungeon with little travel in between.

2.10 Return destinations, Outside, maps, and safe backtracking

Return and Outside

Return costs 8 MP and transports the party to an available destination in its list. Towns and other eligible stops become available through the journey. Select the desired destination from the Spell command while standing in a suitable outdoor location.

Outside costs 8 MP and takes the party out of a dungeon that allows magical escape. It is useful after collecting treasure or when healing resources are running low. Once outside, the party can choose the next overland route or use Return.

If the same companion will cast both spells, keep at least 16 MP available for that trip home. Allow additional MP for any healing still needed before reaching the exit. The remaining value on the Status screen is useful when deciding whether to explore another branch.

Other travel aids

A Wing of Wyvern provides an item-based journey back to the last town visited. Carry one with an available companion and use it from a suitable outdoor position when that destination is useful.

Repel costs 4 MP and helps avoid random battles with weak enemies. Holy Water also helps ward off weak encounters. These aids can make a familiar journey more convenient as the party grows stronger.

Use the Wayfarer's Map to examine the overworld when the item is available. Compare the party's position with the coast, rivers, mountains, and nearby settlements. The map is particularly useful when a new vehicle opens a route across water or around a large obstacle.

Returning for earlier discoveries

A new key or travel ability can open several useful return visits. Choose one town or region, collect its newly accessible treasure, and then move to the next nearby stop. Visit shops that have become useful to the current party and retrieve any stored equipment needed for the trip.

Keep a short mental route through the area: the landing or Return point, the rooms to search, the services to use, and the way back to the vehicle or next destination. This makes a return visit comfortable even when the town was last explored much earlier in the adventure.

Finish a longer outing by treating ailments, restoring HP and MP, reorganizing useful possessions, and recording the adventure at a church. The party is then ready to begin its next journey from a convenient stop.

3 Combat, Tactics, and Party Management

Three active companions give every action a noticeable place in a battle. A timely heal can keep an attacker on its feet, a group spell can clear a dangerous cluster, and a defensive action can buy the party the round it needs to recover. The available companions and their equipment give the player several ways to handle the same encounter.

Watch the enemy groups, the party's condition, and the resources needed for the rest of the journey. A comfortable victory leaves enough HP, MP, and useful items to continue exploring. Against a stronger opponent, the same habits help the party settle into a sustainable sequence of attacks, support, and recovery.

3.1 Battle commands, target groups, turn order, and escape

The opening battle menu

The first battle menu offers four main actions:

Fight: Begin choosing the party's actions for the round. The current tactics determine which companions receive direct orders.

Change: Adjust the active members when reserve companions and the encounter's conditions allow it.

Tactics: Choose the battle behavior of computer-controlled companions or use the direct-command setting.

Run: Attempt to leave an encounter that permits escape.

For a companion receiving direct orders, the available commands include Attack, Spell, Parry, and Item. Attack uses the equipped weapon. Spell opens the companion's battle abilities. Parry is the defensive action, reducing incoming damage during that turn. Item opens the objects carried by that companion.

Select the action and its target, then continue through the other directly controlled members. Check the party's HP while choosing the round. A companion who is already badly injured may need healing or a defensive action before taking another heavy hit.

Reading the enemy groups

The enemy display identifies the species present and the number remaining in each group. The target menu uses those entries when selecting an offensive action. A single-target attack affects one creature in the chosen group, a group attack affects that group, and an all-enemy action reaches across the opposing formation.

Choose targets according to their immediate threat. An enemy that heals, calls reinforcements, drains MP, or inflicts a disabling condition can be worth removing early. Concentrating several attacks on its group helps reduce the number of dangerous actions the party faces in later rounds.

Group attacks are useful when several creatures of the same kind are present. An all-enemy attack becomes useful when the opposing formation contains several groups. Check which enemies remain as each new round begins and choose the next targets accordingly.

Action order and recovery timing

Agility influences when companions and enemies act. The order can vary between rounds, so allow for an enemy reaching an injured ally before the planned heal. A fast companion carrying a Medical Herb can provide another recovery option when the main healer is slower or needs a different action.

At the start of a difficult round, identify the most urgent job. This may be restoring a vulnerable ally, curing a disabling condition, reducing incoming damage, or finishing a dangerous enemy. Assign the remaining members around that action.

Parry gives a threatened companion a defensive turn while another member handles recovery. After the party is healthy enough to resume its attack, return that companion to its usual role. Keep enough recovery available to handle the next unfavorable sequence of enemy actions.

Choosing to escape

Run is useful when an encounter threatens the party's remaining supplies or the journey has already become too expensive in HP and MP. A successful escape lets the party continue from the field.

A failed attempt gives the enemies an opportunity to act. Consider the party's condition before attempting another escape, especially when one more enemy attack could bring down a companion. Healing or protecting the party can make the next attempt safer.

Some fixed battles and boss encounters restrict escape. Prepare for those encounters with a recovered party, accessible items, and a clear plan for the first few rounds.

3.2 Physical attacks, critical hits, multi-target weapons, and damage

Attack power and the enemy's defense

An ordinary physical attack uses the companion's strength and equipped weapon against the enemy's physical defense. The resulting damage varies between strikes. A stronger weapon improves the attacker's opportunities, and lowering the enemy's defense can make the whole party's physical attacks more effective.

Watch the damage produced by the current equipment. A sturdy enemy may be easier to handle after Sap or Decrease has reduced its defense. Bikill strengthens an ally's physical offense and is useful when that ally will spend several rounds attacking.

For a short encounter, attacking immediately may finish the group quickly. In a longer battle, a successful support action has time to improve several later attacks. Choose the setup according to the opponent's durability and the party's condition.

Choosing an attack pattern

Weapon properties determine how far an attack reaches:

Single-target weapons: Ordinary swords, spears, claws, and similar weapons concentrate their attack on one creature in the selected group. They suit focused attacks against a dangerous enemy or a boss.

Group weapons: Whips and weapons such as the Morning Star attack grouped enemies. They are useful when several creatures share a target entry. The Gringham Whip is a powerful example of this pattern.

All-enemy weapons: Boomerangs, including the Bladed Boomerang and Flame Boomerang, reach across the enemy formation. The Iron Ball of Decimation also attacks all enemies.

Repeated attacks: The Falcon Sword and Killer Earring produce two attacks from an attack action. Their usefulness depends on the wielder's strength, the enemy's defense, and the damage of each strike.

A Boomerang's 15 attack power and a Bladed Boomerang's 25 attack power can be useful early because their attacks reach the whole opposing formation. Give a group-clearing weapon to a companion who frequently handles ordinary encounters. Keep a suitable focused weapon available for a battle with one durable opponent.

Equipment compatibility remains important. Match the weapon's attack pattern to a companion who can equip it and use it effectively. After a change, check the resulting attack value and observe the next few battles.

Critical hits and special weapon effects

Critical hits produce heavy physical damage and are especially valuable against enemies with very high defense. They can also make an enemy's ordinary attack suddenly dangerous. Keep enough HP available to survive an unfavorable hit when exploring an unfamiliar area.

Some weapons have additional effects. The Poison Needle can produce a one-hit kill, the Demon Spear also has a possible one-hit-kill effect, and the Demon Claw can poison an enemy. Their special properties deserve consideration alongside their attack power and eligible users.

The Dragon Killer is useful against dragons. Other equipment may add an elemental property or an item-use action. Choose those properties for the opponents the party is actually fighting, and review the result when moving to another area.

3.3 Spells, special abilities, MP, and reusable battle items

Matching a spell to the formation

The Spell command includes the companion's available battle spells and abilities. Check the target pattern before choosing the action. Blaze costs 2 MP and targets one enemy, Firebal costs 4 MP and targets a group, and Bang costs 5 MP and attacks all enemies.

Use a single-target spell to concentrate damage on one important opponent. A group spell is useful against a cluster of the same species. An all-enemy spell helps when several groups are present. Enemy resistances affect the result, so watch how well the selected spell works in the current encounter.

A well-chosen offensive spell can shorten a battle and reduce the healing needed afterward. Keep the journey's remaining demands in mind when deciding how much MP to spend on an ordinary group.

Monster abilities

Monster companions bring abilities such as breath attacks, dances, physical techniques, and disruption effects. Breath attacks and many monster-specific actions provide useful options with no MP cost. Their target patterns and effects still matter when choosing an action.

A breath user can contribute consistent damage through a long dungeon. A companion with sleep, paralysis, or disruptive abilities can help control a dangerous group. Inspect the available abilities after recruitment and after level gains so that the new options become part of the party's plan.

An ability's usefulness depends on the opponent. Switch to another useful action when a creature resists the chosen effect. Physical damage, another spell family, support, or an item can give that companion a productive turn.

Healing spells and their costs

Heal costs 2 MP, Healmore costs 5 MP, and Healall costs 7 MP. Healall restores one ally's HP completely. Choose a recovery spell that suits the injury and leaves enough resources for the next rounds.

Healus costs 18 MP and restores HP across the active party. Healusall costs 36 MP and provides full-party HP recovery. These spells become valuable when an enemy damages several companions at once.

Revival and status treatment add to the healer's workload. Keep another recovery option available so that the party can handle an injury while the main healer deals with a fallen or disabled companion.

Reusable item actions

Certain possessions provide battle effects through the Item command:

Staff of Benediction: Provides a Healmore effect when used in battle. It gives its eligible user an additional recovery action.

Staff of Antimagic: Provides a Stopspell effect, useful against an enemy that depends on spells and is vulnerable to the effect.

Sage's Stone: Restores HP to the active party and can be used repeatedly during battle.

Drum of War: Strengthens the active party's physical offense, making it useful when several members will continue attacking.

Give a useful reusable object to an available companion and select its item action during that companion's turn. Its use occupies an action, so include that action in the round's plan. A fast user can be useful when the effect needs to arrive early.

Reusable recovery can preserve a caster's MP for revival, strong healing, or support. Keep consumables available for urgent situations where another companion needs to handle the same job.

3.4 Status ailments, buffs, debuffs, resistance, and spell reflection

Responding to disabling effects

Poison, paralysis, sleep, confusion, and spell sealing can change the party's priorities in a single round. Check which companions can still act and which recovery tools are available to them.

Antidote and Antidote items treat poison. Numboff and Full Moon Herbs treat paralysis. An Angel's Bell cures confusion, has unlimited uses, and works during battle. Carry the relevant items with active members who can use them when an important caster is disabled.

Sleep and confusion can make a planned action unreliable. Protect the remaining available companions, keep recovery ready, and remove the enemy causing the condition when practical. If spell sealing affects the healer, use accessible item recovery while handling the encounter.

Some enemy effects drain MP. Removing that enemy early can preserve the resources needed for the rest of the dungeon. Check the healer's remaining MP after the battle before continuing.

Strengthening the party and weakening an enemy

Upper raises one ally's physical defense, and Increase strengthens the party's physical defense. They are useful against an opponent that relies on ordinary physical attacks. Bikill improves an ally's physical offense. Choose a companion likely to keep attacking for several rounds when using it.

Sap lowers a single enemy's defense, and Decrease works against a group. A successful defense reduction can improve the results of several party members' attacks. A resistant opponent may require a different plan.

Some enemies remove beneficial effects during battle. Watch for that action and reassess which support effects are worth restoring. Keep healing and immediate survival ahead of rebuilding a full set of boosts when the party has just taken heavy damage.

Breath protection and equipment resistance

Barrier helps protect the active party from breath attacks. It is useful when a strong fire or cold breath is a regular part of the opponent's attack pattern. Combine that protection with equipment suited to the same threat and enough party healing to cover the remaining damage.

Armor and accessories can provide protection from particular attacks or status effects. Inspect these properties when preparing for an area. A companion who repeatedly loses its turn to a condition may benefit from a protective item as well as a ready cure.

Enemy resistance also affects offensive spells and disabling actions. Watch the battle messages and damage results. A spell that works well against one species can have a different result against another.

Using Bounce carefully

Bounce reflects spells and can help protect a companion from a spell-heavy opponent. Plan recovery for the protected member before relying on it. Item-based healing provides a useful option while reflection is active.

An enemy using reflection also changes offensive spell selection. Physical attacks and suitable abilities or item actions give the party other ways to continue. Check the target's current condition before committing a powerful spell.

3.5 AI tactic modes and when to use direct commands

Choosing a policy

Tactics set the behavior of computer-controlled companions. The Hero's own actions are chosen through the ordinary command menu. Choose the policy that suits the current opponents, remaining resources, and length of the journey.

The six policies cover the following approaches:

All-out attack: Prioritizes strong offensive actions and powerful available spells or abilities. It suits a group that the party wants to remove quickly. Watch MP and the need for a separate healing action.

Balanced fighting: Mixes offense with recovery and useful support according to the situation. It is convenient for familiar ordinary encounters with a healthy, well-equipped party.

Support the Hero: Emphasizes assistance for the Hero through recovery, strengthening, protection, and hindering the opposition. Use it with the Hero active, able to attack, and suitably equipped.

Conserve MP: Uses physical attacks and available MP-free actions. It is useful during manageable encounters on the way to a demanding area. Keep an emergency recovery action available.

Protect life: Places greater priority on healing and defensive support. It can help a party facing dangerous ordinary groups, and its frequent recovery can consume a substantial amount of MP.

Follow orders: Gives direct control over eligible companions' actions. It is useful for precise targets, planned item use, and coordinated boss strategies.

Under an MP-conserving policy, the Hero's manually selected spells still use their normal MP costs. Check the party's resources as the route continues and change the policy when its priorities need to change.

When direct orders are useful

Use Follow orders when a specific companion needs to heal, revive, use a particular item, or apply a support effect at a planned moment. Direct orders also help coordinate several attacks against a selected enemy group.

A reusable healing item has a particular owner and uses that owner's turn. Selecting the action directly makes it easy to account for both. A second member can handle single-target recovery while the item user restores the active party.

For a boss encounter, decide the first few rounds in advance. Assign the initial defense or offense boosts, identify the main recovery member, and leave room for an urgent cure or revival. Adjust the plan as the opponent reveals its pattern.

3.6 Intelligence, obedience, and monster command restrictions

Developing reliable companions

A monster's intelligence affects its ability to follow commands consistently. A low-intelligence recruit can act on its own or fail to carry out the intended action. Keep a reliable recovery member available when training such a companion.

Raising intelligence above 20 provides a practical target for reliable obedience. Check the Status screen as the monster gains levels and review its available spells and equipment at the same time.

Intelligence Seeds provide permanent increases. Use them on the intended companion and check the resulting value after each use. This is useful for a promising species whose natural intelligence growth or level cap leaves its command reliability short of what the party needs.

Bianca's Ribbon also raises intelligence when equipped by an eligible monster. Check the resulting Status value when assigning it and keep the Ribbon available for the later journeys.

Level caps and a companion's role

Maximum level varies by species. The Dancing Jewel reaches its cap at level 7, the Orc King at 30, and the Curer at 50. A Slime Knight can continue to level 99. Those limits give the companions different growth schedules.

Consider the complete set of abilities available at the current level. A companion with a low cap can still have useful support or protection, and a longer-growing species may need several levels before an important healing spell becomes available.

Keep an unreliable new recruit in a suitable training role while another member handles essential recovery. Once its intelligence and abilities support the intended job, move it into a position with more responsibility.

Temporary companions

Temporary companions have different battle behavior. Papas fights autonomously. Bella provides healing and support during the faerie journey. Check the selected tactic and each companion's available commands when planning the Hero's actions around their assistance.

Review the lineup after a temporary companion joins or leaves. Check the available healing, item owners, and equipment before continuing into the next difficult area.

3.7 The three-member active party and wagon reserves

Filling the active positions

The normal active party has three members. With the wagon available, the travelling roster can contain eight members, leaving five reserve positions behind the active three.

Choose a lineup whose abilities work together. Useful jobs include physical damage, recovery, support, and attacks that reach several enemies. One companion can cover more than one job, depending on its spells, equipment, and current level.

For ordinary exploration, a group-clearing attacker, a reliable recovery member, and a durable companion make a comfortable combination. Before a stronger opponent, review its likely threats and adjust the roles. Several physical attackers can benefit from offensive support, while frequent party-wide damage creates more work for recovery.

Companions with useful combinations

A Slime Knight combines physical equipment options with healing. It starts with Heal, learns Healmore at level 5, and gains Healall at level 20. Robmagic can draw MP from susceptible enemies. Antidote at level 9 and Numboff at level 18 add poison and paralysis treatment. These tools give it useful recovery work alongside its attacks.

An Orc King starts with Vivify, learns Healus at level 8, and gains Revive at level 11. Its developing spell list can cover both revival and party-wide healing. Keep enough MP available for those jobs when relying on it during a longer encounter.

A Curer begins with Healall and later learns additional recovery and support. Healmore at level 3 provides a cheaper single-target recovery choice, and Upper at level 8 protects one ally. It gains Increase at level 10, Vivify at 12, Healus at 18, Revive at 23, and Healusall at 30. Its role can expand substantially as it grows.

Use these combinations when distributing the party's responsibilities. A companion capable of fighting and healing can cover an urgent injury while the usual healer revives another member or restores the group.

Making the reserves useful

Reserve positions can hold another healer, an alternative attacker, a companion with a particular support ability, or a recruit being trained. Keep their equipment and condition suitable for the job they may need to perform.

Where the wagon is available, changing members can bring fresh MP or a more useful ability into the active lineup. A reserve holding an important battle item must be brought into an available position to use it during its turn.

Review both the active party and reserves before leaving town. Healing and supplies distributed across the travelling roster give more options during a long sequence of battles.

3.8 Changing members, wagon access, experience, and dungeon restrictions

Changing the lineup

Use the battle menu's Change command when the wagon and encounter permit it. Select the available companions needed for the next part of the fight, then review the new lineup before choosing its actions.

A fresh healer can take over when the original member has spent most of its MP. A durable attacker can help after a vulnerable companion has taken heavy damage. A specialist can enter to supply a protective spell or a particular item action.

The incoming companion needs its own equipment, available MP, and useful possessions. Prepare these before the fight so that the change provides an immediate benefit.

Areas with restricted wagon access

Some areas admit only the active party. Choose the three companions needed for the dungeon before entering, and give them the supplies they will need inside. Include reliable healing and a way to handle the area's important status threats.

Check access when the route moves through an entrance, floor connection, or fixed encounter. The companions available in an open-field battle can differ from the members available deeper in a dungeon.

Keep a useful battle item with a companion who will actually enter the area. The same preparation applies to required keys, recovery supplies, and any field spell needed for the way out.

Experience and training

Victories award experience to eligible living companions. In battles where the wagon is available, reserves can gain experience alongside the active members. This gives newly recruited companions a way to develop while a dependable front line handles the encounters.

Choose manageable groups when training a fragile recruit. Keep it alive and recovered, and inspect its new abilities as levels increase. A useful healing or support spell may arrive well before its final level cap.

For a dungeon with restricted access, arrange the party around the members participating in that area. Use accessible wagon battles when the goal is to develop companions waiting in reserve.

3.9 Healing economy, resource conservation, and boss preparation

Keeping a dungeon run sustainable

The journey uses HP, MP, and consumables across several encounters. Keep the main healer's remaining MP visible when deciding how far to explore. Medical Herbs can handle smaller injuries and preserve spells for the next difficult stretch.

MP-free abilities and reusable items can provide steady work through a long route. Assign those actions to companions who can use them reliably, and keep a stronger recovery option available for a dangerous round.

When escape spells are part of the return plan, reserve their cost. Outside and Return each cost 8 MP. A companion casting both needs 16 MP available for that journey home, plus any healing still needed beforehand.

Preparing for a boss

Rest the party, treat ailments, and check equipment before the approach. Fill the available inventories with useful recovery and status-treatment items. Arrange item ownership so that several active members can help when the regular healer is occupied.

Use the opponent's attack pattern to choose support. Increase helps with physical pressure, Barrier helps with breath attacks, and suitable armor can provide further protection. Offensive strengthening becomes useful when the party can keep an attacker working for several rounds.

Some enemies perform several actions in a round. Allow enough HP for the possible sequence of attacks before relying on the next heal. Keep a second recovery action available for a round in which one companion must be revived or cured.

A workable rhythm for a long fight

Begin by securing the party's immediate safety and applying useful support. Continue with focused attacks while watching HP and MP. A single-target healer can handle an isolated heavy hit, and party-wide recovery can cover a breath or spell that injures all three members.

The Sage's Stone is useful for repeated party recovery when it is available. Its user spends an action restoring the group while another companion handles a more urgent single-target heal, revival, or support spell.

The Drum of War supports a physically focused active party when available. After an enemy removes strengthening effects, restore the most useful ones as the party's condition allows. Keep the recovery plan working through those changes.

If a healer is running low on MP and the wagon is accessible, bring in a prepared reserve. Check the incoming member's item ownership and abilities before relying on the next round.

3.10 Enemy summoning, metal enemies, defeat, and recovery

Handling reinforcements

Some enemies call additional creatures into the battle. Reinforcements increase the number of actions the party must handle and can prolong an encounter that initially looked manageable.

Remove the summoner early when the party can do so safely. Keep track of the remaining groups and the abilities of newly arrived creatures. A called healer can make an enemy group harder to finish, while another disabling enemy can increase the need for recovery items.

Called creatures can also matter during recruitment. Healing monsters can appear through summoning, so watch for the species being pursued and manage the battle with that goal in mind. Keep the party healthy enough to finish the encounter.

Fighting metal enemies

Metal enemies offer valuable experience and can flee quickly. Their high defense and strong resistance to offensive magic make physical actions and critical hits important parts of the plan.

Use direct commands to concentrate suitable attacks on the metal group. A fast companion has a useful chance to act before the enemy escapes. Repeated-attack weapons such as the Falcon Sword or Killer Earring can provide additional physical strikes when an eligible user has them.

Keep ordinary enemies in the encounter under control as well. A harmful status effect or a badly injured companion can interrupt the attempt. After a successful battle, check the levels and abilities of companions who gained experience, including eligible wagon reserves.

Choose a hunting area the party can handle comfortably. Nearby recovery and dependable equipment help make repeated attempts worthwhile, and ordinary victories along the route still contribute to development.

Recovering after a difficult encounter

Treat poison and other persistent conditions, restore enough HP for the next stretch, and check the remaining MP and items. Reorganize the active party when another companion is better prepared to continue.

If the party is defeated, half of the carried gold is lost. Banked gold remains protected. Arrange revival, treatment, and rest after returning to the recovery point, then reconsider the equipment and supplies for the next attempt.

Before returning to the difficult area, identify what caused the collapse. Repeated breath damage may call for protection and group recovery. Spell sealing makes accessible healing items valuable. A sequence of heavy physical hits may require better defense, a sturdier companion, or earlier healing.

Record the recovered adventure at a church once the party is ready. The next attempt can then begin with its equipment, recovery roles, and travel plan already in place.

4 First Generation: Childhood

The childhood journey begins with Papas close at hand. Townspeople remember him, sailors speak warmly of him, and his strength makes the roads feel safe. The Hero's first independent adventures grow out of ordinary village life: a missing herbalist, a sick friend, and Bianca's determination to help an animal in trouble.

Take time to explore the houses and speak with the people along the way. The early finds have immediate value, and the shops offer enough choices to shape how comfortably the young party handles its first dungeons. Free resting places make it easy to prepare a little at a time.

4.1 Birth scene, the opening ship, and Vista Port

A name and a voyage

Choose the Hero's name when starting the adventure. The opening scene shows Papas waiting anxiously for news of a birth. When he reaches Martha, the conversation turns to their new son and the name she has chosen. The scene closes as Martha becomes unwell and Papas calls to her.

The Hero then wakes in a ship's cabin with his father. Papas suggests some fresh air, and the deck becomes the first place to explore freely. The crew's conversations establish a little of their history with Papas. The captain remembers an old kindness, the sailors know that father and son are travelling together, and the cook has his own opinion about Papas' cooking.

The cabin's Medical Herb

Search the dresser in the cabin where the Hero wakes to obtain a **Medical Herb**. Keep it for the first independent trip into a cave. The barrels around the ship are empty, and the chests in the lower crew quarters are locked during this voyage.

Walk around the deck and speak to the sailors, including the man at the helm. Visit the captain's cabin and the lower rooms with the cook and crew. After the conversations, the ship reaches Vista and the captain asks the Hero to fetch Papas.

Return to the cabin, speak to Papas, and follow him onto the deck. When he asks whether the drawers have been checked, confirm after collecting the herb. Father and son disembark, and the ship departs.

Vista Port and the first battle

At the port, Papas stops to speak with a friend and leaves the Hero free to wander nearby. The woman upstairs remembers an earlier visit by Papas and a small child. Explore the building and then leave through the port's exit when ready to continue.

Three Slimes attack as the Hero steps outside. Choose Attack and let the encounter play out. Papas arrives during the battle and quickly takes control of the situation. He heals the Hero afterward and leads the way to Santa Rosa.

Any encounters on that escorted journey are handled with Papas in the party. His post-battle healing keeps the Hero ready for the next steps. Save the Medical Herb for the time when the Hero is exploring alone.

4.2 Santa Rosa: Sancho, Bianca, supplies, and the missing herbalist

A homecoming

Papas' arrival sets the village in motion. A guard runs ahead with the news, old acquaintances greet him, and Sancho welcomes both travellers into his house. Bianca and her mother are visiting while seeking medicine for Duncan, who is ill at home in Alcapa.

Bianca takes the Hero upstairs and tries to read a book about the sky. After her mother calls her away, search the room's dresser for a **Leather Hat** and equip it on the Hero. This is the first useful piece of free defensive equipment.

Downstairs, Papas announces that he has business elsewhere. Sancho offers a place to rest, giving the Hero a convenient recovery point for his first solo adventure.

Santa Rosa's household finds

Collect these objects while looking around the village:

Leather Hat: The upstairs dresser in Sancho's house, in the room where Bianca reads to the Hero. Equip it immediately.

Medical Herb: The dresser on the ground floor of Sancho's house.

Strength Seed: The pot in Sancho's basement.

Medical Herb: The dresser upstairs in the weapon shop.

The Strength Seed permanently improves strength. The Hero is a useful recipient because he will be doing the attacking during the cave rescue. Using it now gives that improvement time to contribute to the early fights.

Together with the ship's herb, the two village herbs provide a small recovery supply. Sancho's free rest makes it practical to keep those items for occasions when the Hero is several floors from safety.

Purchase guide: Santa Rosa

The weapon shop stocks the following early weapons:

Weapon	Price	Buying advice
Cypress Stick	10 G	2 attack. Compare this basic option with the Hero's current weapon.
Bamboo Pole	50 G	5 attack. An inexpensive immediate improvement for the first cave trips.
Sharpened Bone	70 G	6 attack. Check the intended user's equipment options before purchasing.
Oak Cudgel	130 G	9 attack. A useful intermediate purchase when 130 G is available.
Copper Sword	270 G	13 attack. The strongest weapon in this shop and a useful goal for early training.

A **Bamboo Pole** is an inexpensive immediate upgrade for 50 G. It makes the first cave encounters more comfortable while the Hero builds levels and earns money. The **Oak Cudgel** is a stronger intermediate choice if 130 G is already available.

The **Copper Sword** offers the strongest attack in this shop at 270 G. It is a useful target for players who enjoy a little early training. Sancho's free rest allows repeated short trips through the upper cave, so the savings can grow safely. Choose a purchase that fits the current funds, then equip it before returning to the cave.

The cave itself contains a Leather Shield and Wayfarer's Clothes. Those finds will improve the Hero's defense during the rescue. Keep the Leather Hat equipped and focus the village's spending on a useful weapon.

Learning what has happened

Speak with the villagers and visit Bianca's mother at the inn. The man who went into the nearby cave to gather medicinal herbs has failed to return. The household in the mountain north of Sancho's home also has news of the missing herbalist.

Papas is occupied, and the Hero remains within Santa Rosa at this point. The cave entrance lies on the west side of town, near the church. Rest with Sancho, save at the church, and approach the entrance with the new weapon equipped and the herbs available.

4.3 Santa Rosa Cave: rescue route, treasure, and early training

The first independent expedition

The cave is close enough to home for the Hero to prepare in short trips. Spend some time fighting near the entrance, then return to Sancho whenever HP runs low. The gold contributes toward a better weapon, and the early levels give the Hero a little more room to survive an unlucky attack.

Level 4 is a useful first target because the Hero learns Heal. Level 4 or 5, a purchased weapon, and the Leather Hat make a comfortable starting point for the rescue. Keep the Medical Herbs available as a second form of recovery, especially once the Hero is two floors below the village.

Slimes and the small creatures near the entrance provide gentle early training. Deeper encounters include Drakees, Horned Rabbits, and Whackamoles. The latter can land a critical hit worth roughly 10 HP at this stage. Heal promptly when the Hero's remaining HP approaches that amount, and check his condition after each battle.

The entrance floor and its Medical Herb

From the entrance, follow the passage north. Take the first branch to the west and open the chest for a **Medical Herb**. Return to the main passage and continue north until the route divides around the water.

The eastern side has a boat beside an island with stairs. The rescue route follows the western passage, where another staircase leads down to the first basement. This is a convenient point to turn back for a rest if the entrance encounters have already used much of the Hero's HP.

50 G and the Leather Shield

On the first basement floor, take the passage toward the southeast of the stairs and collect **50 G** from its chest. Return to the stairs and follow the western route past the warning sign. The northward branch leads to the chest containing a **Leather Shield**.

Equip the shield immediately. Its protection helps throughout the rest of the cave and remains useful during the next journey. The chest's location also makes the shield a worthwhile goal for a short supply trip before attempting the deepest floor.

From the shield route, continue south through the floor. At the lower junction, the western passage leads to the stairs down. The nearby eastern branch ends locally. Descend once the Hero is healthy enough to continue.

Freeing the herbalist

On the second basement floor, follow the passage east and north. Continue past the first eastern side branch until the trapped man comes into view. A boulder pins him to the ground. Walk into the rock from the upper side to push it away, then speak to him.

Achievement Alert: The Lost Herbologist (4 points)

RA 40046
Requirement: Free the trapped herbologist
Push the boulder away from above and speak to the freed man to finish the rescue.

The herbalist thanks the Hero and hurries back to deliver the medicine needed by Duncan's household. His relief gives this first expedition a satisfying conclusion, and there is still a useful chest nearby to collect before climbing home.

Continue north from the rescue spot and open the chest for **Wayfarer's Clothes**. Equip them on the Hero. Together with the Leather Hat and Leather Shield, this gives him a practical set of defenses assembled largely through exploration.

Return toward the place where the herbalist was trapped. A passage to the east and southeast leads to a friendly Slime. Speak to it for its searching advice, then retrace the route to the basement stairs.

Treasure check and the trip home

Before leaving the cave, confirm these four collections:

Santa Rosa Cave collections

Medical Herb: The entrance-floor chest on the first western branch of the northward passage.

50 G: The first-basement chest reached southeast of the stairs.

Leather Shield: The first-basement chest north of the route past the warning sign.

Wayfarer's Clothes: The second-basement chest north of the herbalist's rescue spot.

Climb back through the two staircases and return to the village. Rest with Sancho. In the morning, Bianca and her mother have received the medicine and are ready to return to Alcapa. Papas offers to escort them and invites the Hero along.

Agree to join the journey. The party travels under Papas' protection, and his strength makes the road encounters comfortable. The Hero can arrive in Alcapa with his new armor equipped, a useful weapon, and the remaining herbs ready for the next adventure.

4.4 Alcapa / Alkapa: Bianca's home and the captive panther

Duncan's household and the inn's finds

Papas takes the travellers straight to the inn, where Duncan is resting. While the adults attend to him, the Hero has time to explore. Bianca joins him as he leaves the room, and the town becomes the first place the two children can wander together.

Search the upstairs dressers before spending money. The dresser on the second floor contains a **Defense Seed**, and the one on the upper floor contains a **Wing of Wyvern**. Use the seed on a companion whose defense needs help, then check the resulting value. Keep the wing available as a travel item.

Speak to the people around the inn and shops. A woman describes the weeping heard at Lenoire Castle after dark. Near the town entrance, two children are tormenting a small animal. Bianca insists they release it, and their condition is an adventure at the haunted castle.

Return to Papas after exploring. Duncan's wife persuades the visitors to stay overnight. Bianca wakes the Hero during the night, ready to follow through on the promise and rescue the animal. Papas is asleep, and the two children leave together.

Purchase guide: Alcapa

Alcapa offers the first substantial choice of equipment for two active companions. Inspect Bianca's starting gear and the Hero's cave equipment, then plan purchases around the pieces that will provide the most help.

Weapon shop

Weapon	Price	Buying advice
Bamboo Pole	50 G	5 attack. Check existing weapons before spending on this basic option.
Oak Cudgel	130 G	9 attack. An affordable intermediate weapon when the current equipment needs help.
Bronze Knife	150 G	12 attack. An inexpensive improvement for Bianca while saving toward the Thorn Whip.
Copper Sword	270 G	13 attack. Keep the Hero's useful Santa Rosa purchase available if it is already owned.
Thorn Whip	350 G	18 attack. Useful group coverage for Bianca during the castle expedition.
Boomerang	420 G	15 attack. Whole-formation coverage for the Hero against ordinary castle encounters.

The **Boomerang** is a valuable choice for the Hero. Its attacks reach the whole enemy formation, helping clear the castle's ordinary groups with fewer turns. At 420 G, it is a substantial early purchase. A Copper Sword already bought in Santa Rosa remains perfectly useful while the money for a Boomerang is being gathered.

The **Thorn Whip** gives Bianca a useful group attack and costs 350 G. This is an attractive long-term purchase for the castle expedition. The **Bronze Knife** provides a cheaper improvement at 150 G when her current weapon needs immediate help and the full whip budget is still some distance away.

Armor shop

Equipment	Price	Buying advice
Wayfarer's Clothes	70 G	The Santa Rosa Cave chest supplies the Hero's piece.
Silk Apron	110 G	An inexpensive body-armor option for Bianca.
Leather Armor	180 G	Compare with the Hero's current body armor before purchasing.
Leather Dress	380 G	Consider Bianca's current protection and the available budget.
Scale Shield	180 G	Compare with the Hero's free Leather Shield from the cave.
Wooden Hat	120 G	Useful head protection for an eligible wearer, including the panther after recruitment.

The Hero already has Wayfarer's Clothes and a Leather Shield from the cave. Compare **Leather Armor**, the **Scale Shield**, and a **Wooden Hat** against his current equipment to find the most useful next improvement. Bianca can use the **Silk Apron** as an inexpensive body-armor purchase. The Leather Dress is another option when the budget allows it.

Item shop

Item	Price	Buying advice
Medical Herb	8 G	Give both children accessible recovery items.
Antidote Herb	10 G	Keep poison treatment ready for the approach and castle exploration.
Holy Water	20 G	A situational aid against weak field encounters.
Wing of Wyvern	25 G	Check the wing found upstairs in the inn before buying another.
Fragrance Bag	80 G	Budget for essential equipment and recovery before this situational battle item.
Hairband	150 G	Inspect Bianca's current headgear before buying.

Give both companions a few **Medical Herbs**. Bianca can use hers while the Hero spends a turn attacking or casting a spell. An **Antidote Herb** provides a convenient answer to poison during the walk or the dungeon. Check Bianca's current headgear before considering the Hairband.

A comfortable equipment goal is a Boomerang for the Hero and a Thorn Whip for Bianca, followed by sensible defensive improvements and herbs. For a shorter preparation session, keep the Hero's existing purchased weapon, improve Bianca's weakest equipment, and leave enough money for recovery supplies. The two group weapons together cost 770 G, so approach that target in manageable trips.

Training with a free resting place

The inn provides free recovery during this part of the visit. After a rest, Papas has caught Duncan's cold and remains in bed. Speak to Bianca near Duncan's room to arrange the next nighttime outing. This gives the children time to train and improve their equipment before tackling the castle.

Fight close to Alcapa while learning what the party can handle. Forest groups can be considerably rougher than the nearby open ground. Enemies may inflict sleep, obstruct spells, or drain MP. Return to the inn when recovery runs low, then make the next purchase with the earnings.

Around level 7 or 8 is a comfortable goal for the castle expedition. Bianca's Surround and defense-lowering spell become useful preparations for its stronger opponents. Keep her MP available for those actions and let the herbs handle some of the ordinary injuries.

4.5 Lenoire Castle: entry, separated companions, darkness, and the torch

Reaching the haunted castle

Leave Alcapa during the nighttime outing. Follow the northward route and the bridge around the intervening terrain toward the castle. The western route around the mountains also connects with the approach. Arrive with both companions healed and their equipment assigned.

The main door is locked. Walk around the eastern side and climb the exterior ladder to the upper entrance. The gate closes behind the children, and the route begins by descending through the castle.

In the bedroom below, skeletons rise from their beds as the children approach the stairs. When the disturbance clears, Bianca has disappeared. Continue carefully with the Hero alone until she can be found.

The first chests and Bianca's grave

On the next floor, open the northern chest for a **Wing of Wyvern**. The other chest is empty. Take the stairs or the floor opening down, then leave through the southern doorway onto the exterior terrace.

There are two graves here, and a moan points toward Bianca's whereabouts. Search the left grave to release her. She is shaken and impatient to rejoin the adventure, and the party once again has both children available.

Return through the doorway to the room with bookcases. Speak to the ghost there, and a bookcase moves aside to reveal stairs. Bianca can read the message asking for the graves to be returned. Descend, enter the nearby bedroom, and speak to Sophia, the former queen.

Sophia explains that she and Erik need help reclaiming their resting places. Her request gives the strange rooms and threatening inhabitants a purpose: the children must reach the creature controlling the castle.

Finding Erik and lighting the dark room

Leave Sophia's room and take the stairs into the darkened floor. Follow the walls to the small lit doorway at the far side. The door leads into another room and a series of stairs descending toward the kitchen.

At the lower room, a male ghost moves away as the children approach. Search the kitchen pot for a **Medical Herb** before following him up the nearby stairs. Speak to Erik on the balcony and agree to help. He mentions a torch left in the kitchen.

Return downstairs and search the kitchen pot for the **Torch**. Bring it back to the dark room and use it through the Item command. The light reveals enough of the floor to find the stairs in the northeast corner. Take those stairs to continue toward the upper passages.

The Walking Statue and the second Medical Herb

Achievement Setup: The Stalker

RA 40116
Missable. Defeat the Walking Statue during this visit, before defeating Boss Ghost. Restore both children before examining the statue that follows them.

A statue begins following the children along the corridor. Examining it starts the optional **Walking Statue** battle, required for **The Stalker**. Its physical blows can be heavy at this stage, so heal before approaching it if the party is already injured.

Have Bianca use Surround, then her defense-lowering spell if available. The Hero can attack while she supports the fight and uses herbs as needed. Keep enough HP to withstand a strong hit. The battle awards experience and gold and can provide a **Defense Seed** as its item reward.

Achievement Alert: The Stalker (3 points)

RA 40116
Requirement: Defeat the Walking Statue in Lenoire Castle
Missable. Examine and defeat the following statue before the Boss Ghost confrontation.

Continue south to the stairs. In the pot room above, Erik indicates the container that leads onward. Search the other pots first, including the southern pot containing the castle's second **Medical Herb**. Search Erik's pot to reach the next part of the castle.

Opening the front door and using the castle inn

From the new room, take the western doorway and the stairs leading down toward the lower hall. Walk south and open the castle's front door from inside. This creates a much shorter way back into the building.

The surrounding rooms reveal the castle's unpleasant hospitality. Skeletons are waiting for their feast, and a nearby ghost hints at a hidden treasure. Return upstairs and follow the northward route toward the inn and the throne room.

The castle inn restores the party, then leaves the children outside the castle when they wake. With the front door open, walk straight back through the lower hall and retrace the short route upstairs. This is a useful recovery opportunity before the final confrontation.

Continue north past the inn. Follow the passage through the western side, then the southern stairs and the route east into the throne room. Speak to the cloaked creature. Its trap drops the children into the dining area, where **four Demon Candles** attack.

Clear the candle group, heal, and return to the throne room. The creature retreats onto the balcony. Follow it when both companions are ready for the first full boss battle.

4.5.1 Ghost-boss preparation and battle strategy

The **Boss Ghost** has roughly 200 HP. It uses physical attacks, offensive magic, and Sap to lower a companion's defense. A prepared pair of children can handle it through steady attacks, useful support, and prompt recovery.

Open with Bianca's **Surround** to hinder ordinary physical attacks. Use her defense-lowering spell as well, then let the Hero keep attacking. Bianca can add damage when recovery and support are already under control.

The Hero learns **Upper** at level 9. If it is available, use it to restore protection when Sap has left a companion vulnerable. Keep the party's HP high enough to handle the next attack while assigning that support action.

Medical Herbs let Bianca heal during a round when the Hero needs to attack or strengthen a defense. The Hero's Heal spell supplies another recovery option. Check both companions after a damaging spell, and give the most threatened member priority.

Winning gives **300 experience** to each participating companion and **180 G**. The Ghost promises to restore the graves if spared. Accept its surrender, and Erik and Sophia lead the children back to their resting places.

Achievement Alert: The Haunted Housekeeper (5 points)

RA 40117
Requirement: Defeat the Boss Ghost in Lenoire Castle
Defeat Boss Ghost on the balcony and finish the surrender and graves scene. Check that the Walking Statue achievement registered before this victory.

4.5.2 Golden Orb, the panther's names, and Bianca's departure

The king and queen thank the children and finally find peace together. A **Golden Orb** appears between their graves. Collect it and keep it safe with the party's important possessions.

Before leaving Lenoire, check these finds:

Lenoire Castle collections

Wing of Wyvern: The northern chest after Bianca disappears.

Empty chest: The other chest on that same floor.

Medical Herb: The kitchen pot reached while following Erik.

Torch: The kitchen search after Erik explains where it was left.

Medical Herb: The southern pot in the room containing Erik's hidden pot passage.

Defense Seed: The possible item reward from the optional Walking Statue battle.

Golden Orb: The gift appearing by the king and queen's graves after the Boss Ghost is defeated.

Return to Alcapa. News of the children's success has spread by morning, and Bianca demands that the two boys honor their promise. The little panther joins the party. Choose a name from the suggestions Bianca offers, accepting the one that suits the new companion.

The panther's early defense needs attention. A **Wooden Hat** from Alcapa costs 120 G and makes a useful purchase before leaving. Check its equipment and distribute remaining herbs while the shops are nearby.

Speak to Papas at the inn once the shopping and farewells are complete. Transfer useful equipment and items from Bianca to the Hero or panther before agreeing to leave. As the party departs, she gives **Bianca's Ribbon** to the Hero and places it with the panther. Papas then leads the travellers home.

4.6 Santa Rosa revisited: Bella and the route to the faerie realm

The herbalist's hidden gift

Sancho has a letter waiting for Papas, and the Hero wakes after another rest at home. The panther is now available for the next independent outing. Before investigating the village's new disturbances, visit the herbalist's house in the mountain north of Sancho's home.

The man rescued from the cave thanks the Hero and offers a gift. Search his dresser for the **Handwoven Cape**. Equip it on the panther, whose defensive equipment has become an immediate concern. This

household search is easy to overlook among the new conversations, so collect it before following the next invitation out of town.

Achievement Alert: Reward for the Rescue (2 points)

RA 40277
Requirement: Acquire the Handwoven Cape
Search the rescued herbalist's dresser in his mountain house and collect the cape before following Bella into the faerie realm.

The traveller and the village mischief

Speak to the traveller near the church. He asks to see the Golden Orb, examines it, and returns it. Finish the conversation and his request concerning Papas, then continue exploring the village.

Residents complain about objects going missing or being moved. At the inn, a faint figure stands by the bar. Speak to her. She is surprised that the Hero can see her and asks him to meet her in Sancho's basement.

Rest and save if needed, then go downstairs at Sancho's house. The visitor introduces herself as **Bella** and admits to the tricks around town. She has been trying to attract someone's attention because her own village needs help.

Agree to accompany her. A luminous staircase appears in the basement. Follow it with the panther to reach the faerie realm, where winter has continued well beyond its proper season.

4.7 Faerie Village and the Dwarves Cave: Thieves' Key knowledge

Lady Powan's request and the village search

Bella escorts the Hero to **Lady Powan**. The Flute of Spring has been stolen, and the faeries need it to bring the season around. Agree to recover it. Bella accompanies the Hero and panther, bringing battle magic and healing to the three-member party.

Explore the village before setting out. The church beneath Powan's meeting area offers saving, and the people around the inn explain where the thieves have gone. Their hideout is the Ice Mansion to the north, whose entrance requires the unlocking knowledge held in the western cave.

Search the pots beside the inn for **Holy Water**. Inside, speak to the skeleton for the account of the dwarves and their Thieves' Key. The dwarf on the bed runs the general store, and the armor merchant provides another opportunity to improve the young party's equipment.

Purchase guide: Faerie Village

Focus the village's purchases on the Hero and panther. Bella's equipment is fixed, and her healing is available during battle. The Hero supplies field healing between encounters, so keep his MP and herbs in good order.

General store inside the inn

Item or weapon	Price	Buying advice
Stone Fang	240 G	A strong first weapon purchase for the panther.
Copper Sword	270 G	Check the Hero's earlier purchased weapon before buying another.
Boomerang	420 G	Early group coverage. The Ice Mansion also supplies one in its reward chests.
Medical Herb	8 G	Keep healing accessible to the Hero and panther.
Antidote Herb	10 G	Poison treatment for the snowy country and cave expedition.
Wing of Wyvern	25 G	Check the current supply before buying extras.

The **Stone Fang** is a strong first purchase for the panther. Equip it before training outside the village so that the new companion can contribute more effectively. The Hero's Copper Sword or Boomerang from the earlier towns remains useful for this expedition.

A Boomerang is also found at the end of the Ice Mansion. Purchasing one here brings its group-clearing ability into the cave and the mansion approach. Saving the 420 G leaves more money for protection and supplies while working toward that chest. Choose according to the Hero's current weapon and how comfortably the party handles ordinary groups.

Armor shop

Equipment	Price	Buying advice
Piece of Cloth	25 G	Compare with the clothing and free equipment already available.
Leather Armor	180 G	Check earlier armor purchases before buying another piece.
Leather Loincloth	220 G	Compare with the panther's Handwoven Cape.
Scale Armor	350 G	A useful target for the Hero when the budget supports another body-armor purchase.
Bronze Shield	370 G	Compare with the Hero's current shield.
Fur Hood	400 G	Check the intended user's existing hat or hood before spending the remaining savings.

The panther should already be wearing the Handwoven Cape from the herbalist's dresser. Compare the **Leather Loincloth** and **Fur Hood** with its current defenses before committing the remaining savings. For the Hero, **Scale Armor** and a **Bronze Shield** are useful targets when the budget is comfortable.

Give the new Stone Fang priority if the panther is still attacking with its starting equipment, then improve the weakest defensive slot. Keep enough money for Medical Herbs and Antidote Herbs. The next dungeon's gold chests provide another chance to complete an upgrade before the Ice Mansion.

The inn restores the party and returns the Hero to Sancho's house. Use the basement staircase to rejoin the faerie journey afterward. This gives a familiar route back to recovery while training or shopping.

Preparing the panther and entering the western cave

Train near the village until the panther can withstand the local groups comfortably. Its early command obedience can be unreliable, so let the Hero handle essential recovery. Bella contributes support during battle. The Hero's level 11 **Healmore** is a valuable target for the coming Ice Mansion fights.

Travel west across the snowy country to the Dwarves' Cave. Babble and other troublesome creatures make poison treatment useful on the approach. Inside, watch for enemies with disruptive magic or dangerous explosive actions and keep the active members healthy.

The first gold chests and Zaile's grandfather

Follow the entrance passage south to the warning sign. Turn west, then take the northward branch into the chest room. Collect **25 G** and **100 G** before returning to the main passage.

Continue south and enter the small room branching to the east. A dwarf and a friendly Slime explain the theft. **Zaile** took the flute because he believed Lady Powan had wronged his grandfather. The grandfather asks the Hero to recover the unlocking secret sealed deeper in the cave and help bring the young thief home.

Leave the room and follow the southern route to the stairs. On the next floor, the nearby downward stairs and northern hole lead to a small area occupied by another treasure hunter. Return from that detour and use the western opening to reach the stairs into the large branching floor. Keep clear of the poisonous ground where practical.

The Agility Seed and the unlocking secret

Explore the eastern side branch on the large lower floor for an **Agility Seed**. The Hero or panther makes a useful recipient. Using the seed also frees its inventory slot for the discoveries still ahead.

Return to the corridor and take the next eastern branch below that chest route. Its stairs lead to the lowest chamber. A large locked door stands beside the arrival area. Follow the passage north and open the chest containing the **Secrets of the Key**.

Achievement Alert: Secret of the Key (3 points)

RA 61361
Requirement: Learn how to unlock wooden doors
Open the Secrets of the Key chest on the lowest floor, then use Door on the nearby wooden door to continue the treasure route.

This teaches the party how to open the relevant ordinary locks. Return to the large door and use Door. In the room beyond, collect **120 G** and an **Acorn of Life**. The Acorn permanently raises maximum HP and can help a companion who is struggling to survive the local battles.

The southern stairs reconnect with another branch of the floor above. Retrace the route toward the entrance, speaking to the grandfather again if desired. The five ordinary treasure finds and the learned secret are:

Dwarves' Cave collections

25 G and 100 G: The two chests in the northern room reached from the western branch near the entrance sign.

Agility Seed: The eastern side branch on the large lower floor.

Secrets of the Key: The north chest on the lowest treasure floor.

120 G and Acorn of Life: The two chests behind the large door opened with the newly learned

> ability.

Return to Faerie Village, rest, and save. The cave's money can support another defensive purchase or a fresh supply of herbs. Check the Hero's MP and the panther's equipment before travelling north toward the mansion.

4.8 Ice Mansion: sliding-floor route, Zaile, and the final boss

The outdoor Intelligence Seed

Travel north from Faerie Village, then around the mountains toward the west to find the Ice Mansion. Before entering the front door, follow the ice around the western side to the northwest chest. It contains an **Intelligence Seed**.

Check the panther's intelligence before choosing a recipient. A permanent increase can help an early companion become more reliable. The unlocking ability from the cave opens the mansion's entrance.

Understanding the sliding floors

Movement on the ice carries the party along the selected direction. Walls, rocks, and the ends of the open runs provide stopping points. Let each slide finish before choosing the next direction.

The holes in the entrance floor drop the party into a recovery basement. Its stairs return to another part of the main floor. A separate basement contains three treasure chests, so include that staircase in the route before climbing to the upper level.

After the initial fall, climb the recovery basement's stairs. From the return position on the main floor, use this sequence to reach the stairs to the treasure basement:

> Down, down, left, left, up, up, left, down, down, down.

Each repeated direction represents another move along the sliding route. If a hole returns the party to the recovery basement, climb back to its stairs and begin again from the same position.

The three basement chests

In the treasure basement, the upper-left chest holds **5 G**, the upper-right chest is **empty**, and the lower-left chest holds a **Wing of Wyvern**.

From the treasure stairs, move left twice, up, right, and up to reach the upper chests. From the empty chest, move down twice and left to reach the Wing of Wyvern. Work back to the stairs after collecting the finds.

Back on the main floor, use the route up, right, right, up, and right from the treasure-stair position to reach the stairs toward the upper level. On that level, the route to Zaile is:

> Left, up, left, up, left, left, down, right, down, left, down, right, up.

Zaile stands near two chests. Heal the party before speaking to him. The upcoming battles follow one another, so approach with enough MP and items for both opponents.

Zaile and the Snow Queen

Zaile has roughly **160 HP**. He can recover his own HP and drain MP, but steady attacks from the Hero and panther make this the shorter of the two fights. Bella's support can help reduce physical pressure. Keep the party healthy as Zaile approaches defeat so that the next battle begins in good condition.

The victory gives **105 experience** and **50 G**. Zaile can also leave **Magic Water** as an item reward. The conversation reveals that he has been misled about Lady Powan. The **Snow Queen** appears, abandons her disguise, and attacks the party herself.

The Snow Queen has **600 HP** and presents a much longer fight. Her physical attacks, cold magic, and breath require the party to maintain recovery throughout the battle. She can also heal herself and gather strength for a dangerous attack.

Let the panther contribute physical damage while the Hero divides his turns between attacks and necessary recovery. **Healmore**, learned at level 11, makes an injured companion much easier to restore. Bella's healing and support help, and the Hero's herbs provide another answer when the party needs several recovery actions close together.

Upper improves protection from physical blows. Use it when the party has room for a support turn, especially for a vulnerable member. Cold breath damages the group, so check all three companions after it and recover the most threatened member first. When the Queen gathers strength, prepare for the heavier blow with healing or a defensive action.

A defense-lowering effect can improve the Hero's and panther's physical damage when it takes hold. Keep the recovery plan working while pressing the attack. The Queen's 600 HP means the party needs enough resources to sustain that rhythm through several rounds.

Winning gives **650 experience** and **200 G**, with a possible **Wing of Wyvern** item reward. Speak to Zaile afterward. He understands the deception and leaves to return to his grandfather.

The reward chests and the return route

Open both chests near the battle site. The left contains a **Boomerang**, and the right contains the **Flute of Spring**. Both belong in the party's inventory before leaving.

Achievement Alert: The Sound of Birds (5 points)

RA 61362
Requirement: Retrieve the Flute of Spring
After defeating Zaile and the Snow Queen, open the right reward chest and collect the Flute of Spring before returning to Lady Powan.

If the Hero has been using a Copper Sword, the found Boomerang supplies a useful group-clearing weapon. If he already owns one, keep the extra safe until deciding how to use or sell the spare.

Check the mansion's collections:

Ice Mansion collections

Intelligence Seed: The northwest chest outside the main door.

5 G: The upper-left chest in the treasure basement.

Empty chest: The upper-right chest in that basement.

Wing of Wyvern: The lower-left treasure-basement chest.

Magic Water: The possible item reward from Zaile.

Wing of Wyvern: The possible item reward from the Snow Queen.

Boomerang and Flute of Spring: The two chests beyond the bosses.

Heal before retracing the ice route. Ordinary encounters can still occur during the journey out, and the walk back to Faerie Village needs enough recovery to keep the party safe.

4.9 Flute of Spring, returning home, and childhood loose ends

Bringing spring back

Return to Lady Powan with the Flute of Spring. Complete any remaining village shopping or searches before speaking to her, including the Holy Water beside the inn if it is still waiting there.

Powan thanks the Hero and promises help if he ever needs it. Bella says farewell, and the flute's music brings spring to the faerie realm. Blossoms replace the long winter as the Hero and panther return to Sancho's basement.

Bella's farewell and Papas at the church

Upstairs, Sancho explains that the King of Reinhart has summoned Papas. The Hero's father wanted to bring him along and has been looking for him. Visit the inn for Bella's message in the guest register, then go to the church.

Papas is there offering a prayer. Speak to him and record the adventure with the priest. He will wait at the village entrance while the Hero finishes his preparations.

Before meeting him, equip the new Boomerang if useful and check the panther's Stone Fang and protective gear. Make sure the Handwoven Cape has been collected from the herbalist's dresser and that important possessions such as Bianca's Ribbon remain with the party.

The village's small errands have given the Hero a sturdy beginning: free equipment, a rescued herbalist, a new companion, and experience handling several quite different dungeons. Restock herbs if needed, then meet Papas at the entrance for the journey to Reinhart.

4.10 Reinhart Castle: Henry's disappearance and the kidnapping

An audience with the king

Papas leads the travellers east through the passage connecting the two regions. The guard recognizes the royal summons and allows them through. At Reinhart, the castle guards bring father and son directly to the king.

The king asks to speak privately with Papas, leaving the Hero time to explore. The corridors are full of opinions about the royal family. Prince Henry has a reputation for mischief, his younger brother Dale

has little enthusiasm for the throne, and the queen has strong ideas about which child should inherit it.

Visit the princes' rooms and the kitchen. The cook explains that Henry lost his mother while very young and has found little sympathy in the new household. These conversations give the prince's pranks a little context before the Hero is asked to become his companion.

The hidden Acorn of Magic

Find the palace chapel in the eastern part of the lower castle. The priest can record the adventure. Go into the room above the altar and search the left dresser for an **Acorn of Magic**.

The Acorn permanently raises maximum MP. The Hero is a useful recipient because his healing will support the next independent journey. Using it now also leaves another inventory slot available.

The chest below Henry's room is **empty**. Another room contains three chests behind a locked door. That treasury remains inaccessible during this childhood visit, so collect the Acorn and continue exploring the rooms that are open.

Henry's badge and the hidden stairs

Return to the throne room once the conversations are complete. The king explains that Papas is to protect Henry and asks the Hero to befriend him. Papas waits outside the prince's room while the children talk.

Henry offers to make the Hero his personal goon and sends him to retrieve a badge from the chest in the adjacent room. Search it, then return. The chest is empty and Henry has vanished. Tell Papas and accompany him back to the room, where Henry has reappeared in his usual place.

Repeat the badge errand when Henry insists. After his next disappearance, search the stool or square where he was sitting. A concealed staircase leads into the room below.

Henry is annoyed that his hiding place has been discovered, but the conversation is interrupted by two men arriving through the side door. They seize the prince and carry him toward a boat. Follow the scene, then go upstairs and tell Papas.

Papas immediately sets off after the kidnappers. Follow him out of the castle. He runs ahead in town, leaving the Hero and panther to learn where the search has gone. A girl near the drawbridge mentions the large cave to the northeast.

Purchase guide: Reinhart

The first part of the cave will be travelled by the Hero and panther, so use the town's shops before pursuing Papas. Their current faerie-world equipment provides a useful starting point, and the new counters offer stronger weapons and armor.

Weapon shop

Weapon	Price	Buying advice
Copper Sword	270 G	13 attack. Check the Hero's earlier equipment before purchasing.
Boomerang	420 G	15 attack. The Ice Mansion reward may already provide the party's copy.
Iron Staff	850 G	22 attack. A stronger focused weapon for the Hero when funds are available.
Chain Cross	1,200 G	28 attack. Group coverage when the weapon budget is generous.
Stone Fang	240 G	12 attack. Check the panther's Faerie Village weapon before buying another.
Iron Claw	550 G	19 attack. A useful improvement for the panther still using a Stone Fang.

The **Iron Claw** is an attractive upgrade for the panther if it still has the Stone Fang. Its 550 G price makes it easier to fund than several of the town's other major purchases. The **Iron Staff** gives the Hero a stronger focused attack when 850 G is available.

The **Chain Cross** is the 1,200 G chain weapon with a group attack. Consider it when the Hero's weapon budget is generous. A Boomerang already obtained from Alcapa or the Ice Mansion remains useful against ordinary formations, so keep it available while choosing any stronger weapon.

Traveling armor merchant

Equipment	Price	Buying advice
Fur Coat	550 G	Compare with the panther's current body armor.
Bronze Armor	700 G	Check the Hero's existing protection before choosing this piece.
Half Plate Armor	1,200 G	A larger body-armor purchase to consider within the Hero's equipment budget.
Fur Hood	400 G	Check the hat or hood already equipped.
Iron Helm	1,100 G	An expensive headgear goal after more urgent equipment gaps are covered.

Compare the **Fur Coat** with the panther's current body armor. The **Bronze Armor** and **Half Plate Armor** are possible improvements for the Hero, while the headgear choices depend on the hat or hood already equipped.

Choose the weakest defensive slot to improve first. A companion who has been taking heavy physical damage gains more immediate help from that purchase than from another upgrade to an already satisfactory slot. Sell ordinary replaced gear when neither active member needs it, and keep enough money for the recovery supplies below.

Item shop

Item	Price	Buying advice
Medical Herb	8 G	Give both active members accessible healing.
Antidote Herb	10 G	Keep poison treatment available for the approach and the first cave passages.
Holy Water	20 G	A situational weak-encounter aid for field travel.
Wing of Wyvern	25 G	Keep a return option ready if the approach exhausts the party's supplies.
Full Moon Herb	30 G	Additional paralysis recovery for an available item's owner.
Fragrance Bag	80 G	Consider after the equipment and recovery budget is covered.

Give the Hero and panther accessible **Medical Herbs**. Carry **Antidote Herbs** for the journey and consider a Full Moon Herb as additional protection against a disabling encounter. Keep a Wing of Wyvern for a return from the countryside if the approach goes badly.

A Hero around level 13 or 14 and a healthy panther with useful equipment make a comfortable pair for the first cave passages. Save, rest, and leave with enough recovery to reach Papas.

4.11 Thieves Cave: Henry's rescue, Gema, and the scripted transition

The northeast approach

Follow the route around the mountains north and east of Reinhart, then turn toward the swamp and the cave beyond it. Use the clear ground around the swamp when approaching the entrance.

Slime Knights and other local enemies can hit hard, while Dancing Needles can drain MP. Keep the Hero ready to heal and check both companions after a difficult group. A return to town is sensible if the approach has already exhausted the intended cave supplies.

Enter the first room and continue north. Papas is visible fighting monsters on another part of the cavern. The route to him follows the eastern passages around the intervening rooms.

180 G, the Antidote Herb, and the kidnappers

Take the eastern path and descend the first downward stairs. Go north through the doorway and open the chest for **180 G**. Return to the junction and take the upper stairs east across the small bridge.

Follow the southern branch to the chest containing an **Antidote Herb**. From there, go north into the kidnappers' room. Their conversation connects the abduction with the queen and reveals that Henry has been brought here to be sold.

Leave through the same doorway. Circle around the room's northern and eastern sides, then follow the southern branch to the next chest. It contains a **Strength Seed**. Use it on the Hero or panther if that companion is the intended recipient.

Take the nearby western stairs and continue through the large door. The prison can be seen along another branch, but the route to Papas follows the western side and the southern doorway. Work back around the cavern to reach the doorway beside his fight.

Papas rejoins the party

Approach Papas and finish the conversation. He clears the monsters, expresses pride in the Hero's courage, and joins the party for the rescue. His attacks and post-battle healing make the following passages much more comfortable.

This is also a useful opportunity for a little additional training. Keep the Hero and panther healthy during each encounter and let Papas handle much of the opposition. Any time spent here can strengthen the young companions before the story advances.

The Hero learns Outside at level 14, but a magical force blocks its use in this cave. Keep the walking route to the entrance in mind when choosing whether to explore farther.

The two boat-access chests

Step on the floor symbol to open the northern door, then go through to the docked boat. Board it and sail west, then south to reach the chest that was visible from an earlier passage. It contains a **Monster Lure**.

Sail back north and follow the water east. Stop at the northern chest for **Elven Medicine**. Keep this valuable recovery object safe with the party's supplies.

Before entering the prison approach, check the cave's five chests:

Thieves Cave collections

180 G: The room north of the first downward staircase on the eastern route.

Antidote Herb: The chest south of the upper stair-and-bridge route, near the kidnappers' room.

Strength Seed: The southern chest reached by circling the kidnappers' room from the outside.

Monster Lure: The chest reached by sailing west and south from the boat's first dock.

Elven Medicine: The northern water-route chest reached before the prison area.

Finish the treasure searches and any desired training now. The childhood collection checklist in the next subsection can be checked before moving the boat east and north through the opening toward Henry's cell.

The rescue and the retreat

At the prison, Papas forces open Henry's cell. The prince's first reaction is bitter, and Papas reminds him that his father cares for him. As the party prepares to leave, three monsters arrive.

Achievement Alert: The Missing Prince (5 points)

RA 61364
Requirement: Rescue Prince Henry
Finish Papas' opening of Henry's cell and the rescue conversation, then follow the retreat with Henry. Complete the childhood searches before this scene.

Papas stays to hold them off and tells the Hero to take Henry to safety. Board the boat and retrace the water route toward the entrance. Continue through the earlier passages with Henry. The kidnappers' room is now quiet, and the retreat leads to a new encounter at the exit.

The encounter with Gema

Gema blocks the way out. This encounter advances through a scripted defeat. Let the battle play out, keeping rare recovery items for occasions where they can affect the result.

Papas reaches the children and defeats Gema's two followers. Gema then threatens the Hero, forcing Papas to stop defending himself. Before his death, Papas tells his son that Martha is still alive and asks him to find her.

Gema destroys the Golden Orb and takes the Hero and Henry away. The panther is left behind. Papas' last request remains with the Hero as the childhood journey ends.

4.12 First-generation treasure and pre-transition checklist

Check these collections before entering Henry's prison area in the northeast cave. Used herbs and seeds still count as collected finds. Event objects such as the flute have their own completed handover.

Childhood collections before the rescue

Opening ship: One Medical Herb from the cabin dresser.

Santa Rosa's first visit: Leather Hat, two Medical Herbs, and a Strength Seed from Sancho's house and the weapon-shop dresser.

Santa Rosa Cave: Medical Herb, 50 G, Leather Shield, and Wayfarer's Clothes from the four accessible childhood chests.

Alcapa inn: Defense Seed and Wing of Wyvern from the upstairs dressers.

Lenoire Castle: Wing of Wyvern, two Medical Herbs, Torch, Golden Orb, the empty chest, and the optional Walking Statue's possible Defense Seed reward.

Alcapa departure: The named panther and Bianca's Ribbon. Useful possessions should have been transferred from Bianca before the party left her household.

Santa Rosa's herbalist: Handwoven Cape from the dresser in the mountain house.

Faerie Village: Holy Water from the pot beside the inn.

Dwarves' Cave: 25 G, 100 G, Agility Seed, Secrets of the Key, 120 G, and Acorn of Life.

Ice Mansion: Intelligence Seed, 5 G, basement Wing of Wyvern, the empty chest, Boomerang, and Flute of Spring. Zaile and the Snow Queen can also provide their listed battle-item rewards.

Faerie return: The Flute of Spring delivered to Powan and Bella's farewell message available at the Santa Rosa inn.

Reinhart Castle: Acorn of Magic from the dresser above the chapel and the empty chest used in Henry's badge prank.

The northeast cave: 180 G, Antidote Herb, Strength Seed, Monster Lure, and Elven Medicine.

Keep the party's useful purchased equipment assigned and its recovery items accessible before the rescue. A recorded adventure before the cave expedition also provides a convenient point for revisiting the childhood route.

5 Second Generation: Escape and Reinhart

Achievement Setup: I Don't Want Your Help

RA 61418
Missable. From Oracleberry onward, accept no wild monster until the adult Kitty reunion with Bianca's Ribbon in Section 6.2. The safest route defers the wagon purchase until after that reunion, then returns to Oracleberry. Travel with Hero and Henry through Reinhart, then with Hero alone after Henry leaves. Accepting a wild recruit permanently closes this route, even if the monster is later released. The childhood story panther is allowed.

Ten years pass after the childhood journey. The Hero and Henry have grown up together in captivity, carrying the memory of Papas and the hope of another escape. Their friendship gives the next journey its starting point, and Henry now understands much more of what the Hero lost while trying to help him.

Achievement Alert: Ten Years Later (3 points)

RA 61363
Requirement: Become a teenager
Continue through the ten-year transition until the teenage Hero is controllable at the slavery camp.

The first task is to regain their freedom. Once they reach the coast, the two companions can rebuild their equipment, explore the towns to the north, and begin travelling with a wider party.

5.1 Captivity, Maria, Henry, and escape from the Great Temple

A day at the construction site

The Hero begins in the work area with very little HP and his belongings confiscated. Move around the site and speak to the workers and guards. The boulders and laboring prisoners establish the routine of the temple, and the conversations explain the Order of Light's hold over the place.

Take the eastern stairs through the upper work areas. Speak to Henry, recognizable by his green hair, and continue toward the northwest stairs. A guard there mentions his sister. Follow the southern doorway through the graveyard and the nearby prison area, then return to the temple roof. The day's work comes to an end, and the prisoners are sent to sleep.

Achievement Setup: What Did You Expect to Find?

RA 61365
Missable. Examine the sleeping-quarters pot during this overnight interval, before returning to work and beginning the escape sequence.

The Hero wakes with his HP and MP restored. Speak to Henry and the other prisoners, including **Maria** in the eastern part of the sleeping area. She has also been imprisoned and has begun to understand the suffering caused by the Order.

Search the **pot in the sleeping quarters** before leaving the room.

Achievement Alert: What Did You Expect to Find? (2 points)

RA 61365
Requirement: Examine the pot in the sleeping quarters at the slavery camp.
Missable. Search the bedroom pot now, while the camp's sleeping quarters remain accessible. Finish this search before the return to work and escape.

After the conversations, a guard orders the prisoners back to work. Return through the upper areas to the original construction floor. Maria is being punished by the overseers, and Henry steps forward to help her. Approach the remaining overseer to begin the battle.

The two Whip Men

The Hero and Henry fight without their stored weapons and armor. The Whip Men can restore HP and drain MP with their dance, so make productive use of the Hero's available spells early in the battle.

Gale reaches their group and is an effective opening attack. The Hero's **Upper** can help protect a threatened companion, and Heal supplies recovery when needed. Henry contributes his available attacks while the Hero handles most of the spell work.

Once one overseer falls, concentrate on finishing the survivor with attacks and any spell use that remains worthwhile. The victory awards **100 experience** and **120 G**.

More guards arrive and send the Hero and Henry to a cell. Maria is taken for treatment. Speak to Henry repeatedly, continuing through his comments until he hears someone approaching.

Joshua's escape plan

Maria arrives with her brother, **Joshua**, who opens the cell. He thanks the companions for helping her and asks them to take her away from the temple. He fears what will happen to the prisoners when the building is finished and has arranged a way through the water duct.

Finish the conversation and accept the escape. Joshua returns the confiscated belongings, then directs the group to the barrel waiting beside the water. Enter it with Henry and Maria. He opens the sluice, and the barrel carries the three fugitives out toward the sea.

Achievement Alert: Flushed (5 points)

RA 61367
Requirement: Escape from the slavery camp
Enter Joshua's barrel with Henry and Maria and complete the escape to the coast. Collect the sleeping-quarters pot achievement before this departure.

5.2 The Nameless Nunnery: recovery and the first travel objective

Recovery by the coast

The Hero wakes in a nunnery after three days of unconsciousness. A nun explains that the group washed ashore in the barrel and offers a safe place to recover. Walk through the building and speak to its

residents once the Hero is ready to move.

The returned possessions are available again. Inspect the Hero's inventory and equipment, then assign the weapon and protection suited to the northern road. Keep **Bianca's Ribbon** safe among the important possessions recovered from childhood.

Maria is in the southeastern part of the building. Speak to her to receive **1,000 G**, money Joshua gave her that she offers to support the journey. This is the nunnery's important fixed reward.

The priest records the adventure, and the nun who tended the Hero provides free recovery. These services make the nunnery a useful base while Henry gains his first levels.

Equipping Henry and leaving together

Henry waits near the exit. Speak to him and agree to travel together. He remembers the search for the Hero's mother and wants to help. After he says his farewells, the residents see the companions off.

Henry begins this part of the journey at **level 1**. Give him suitable spare equipment from the returned possessions and keep Medical Herbs available to the active pair. His early HP needs care, particularly when crossing into the stronger groups farther from the coast.

Travel north toward **Oracleberry**. A few manageable encounters close to the nunnery help Henry develop, and the free recovery makes it easy to prepare in short outings. Surround at level 3 and Decrease at level 6 give him useful support as he grows.

The nearby southern tower and travel shrine become relevant later. Continue north once the pair can handle the local groups comfortably. Day and night now affect the towns along the route, so take note of the changing light while approaching Oracleberry.

Before the northern road

- Collect Maria's 1,000 G and assign the returned equipment.
- Protect Henry with suitable spare gear and accessible recovery.
- Restore HP and MP with the nun, then record the adventure.
- Keep 300 G available for Oracleberry's wagon purchase. On the **I Don't Want Your Help** route, buy it after the adult Kitty reunion.

5.3 Oracleberry / Oracle Valley: shops, wagon, map, and monster storage

Achievement Setup: I Don't Want Your Help

RA 61418

Missable. Defer the wagon purchase and every wild recruitment step below until Kitty rejoins through Bianca's Ribbon in Section 6.2. Continue with Hero and Henry. If the wagon is already owned, refuse every recruitment prompt, including Hork and summoned Healers. Releasing a recruit preserves the earlier recruitment and cannot restore this achievement opportunity.

A town worth visiting twice

Oracleberry is a busy place to begin the new journey. Its shops offer equipment for people and monsters, the casino draws a lively crowd, and Monster Gramps provides a home for companions waiting outside the active roster. Visit during both day and night to reach the town's different services.

During the day, look through the shops, examine the wall map, and visit the southwestern stairs leading to Monster Gramps. At night, the special merchant in the northwest opens his stall and the fortune teller receives visitors. Her advice points the Hero north toward Santa Rosa.

The five hidden finds

Search the town before buying replacement equipment:

Pot Cover: One of the pots in Monster Gramps' underground rooms. It is also called a Pot Lid and can provide an eligible companion with inexpensive protection.

Monster Lure: Another pot in the same underground rooms.

Defense Seed: The dresser upstairs in the armor shop.

Silk Robe: A dresser in the casino dancers' dressing room.

Silver Barrette: Another dressing-room dresser. This headpiece is also called a Silver Tiara.

Check eligible users before assigning the free clothing or headpiece. Store a useful object when the present party has no suitable wearer. The Defense Seed can help a companion whose current defense needs improvement.

Buying the wagon and meeting Monster Gramps

Visit the northwestern merchant after dark. His offer brings the wagon's price down to **300 G**. For **I Don't Want Your Help**, return for this purchase after the adult Kitty reunion. Buy it and leave town to find it following the party. This unlock gives the journey room for additional companions.

Achievement Alert: Party Wagon (2 points)

RA 61366
Requirement: Purchase the caravan
Buy the 300 G wagon from Oracleberry's northwestern merchant at night. On the **I Don't Want Your Help** route, make this purchase after the ribbon reunion in Section 6.2, then begin wild recruitment.

Speak to Monster Gramps in the underground rooms as well. He explains recruitment and the care of stored monsters. His assistant discusses intelligence and obedience. Once companions begin joining, Gramps can store extras and return them to the travelling roster.

Keep track of the difference between storing and releasing a monster. Stored companions can be picked up again. The parting action dismisses the chosen companion permanently. Check the selected individual before confirming that action.

The depository nearby stores gold in **1,000 G increments** and accepts possessions being kept for later. Banked gold stays protected when the party is defeated. When a monster is stored, retrieve its deposited equipment as needed before assigning that gear elsewhere.

Purchase guide: Oracleberry

Start by reserving the wagon's 300 G, then outfit Henry and the first recruit with the returned equipment and free finds once recruitment is appropriate for the chosen route. For **I Don't Want Your Help**, equip Hero and Henry and retain the wagon money until after Kitty. A reliable three-member party can build the remaining budget through short trips near town.

Weapon shop

Weapon	Price	Buying advice
Stone Fang	240 G	Buy for an eligible recruit whose starting attack needs help.
Boomerang	420 G	Useful group coverage for an eligible user. Check the weapons recovered from childhood first.
Chain Whip	900 G	Consider for a compatible companion handling grouped enemies.
Chain Cross	1,200 G	A stronger group-attack purchase when the available budget supports it.
Bladed Boomerang	1,500 G	A worthwhile goal for the Hero's ordinary encounter clearing, with 25 attack power.

The **Bladed Boomerang** is a useful medium-term goal. Equip a recovered weapon while saving for it, and let an affordable improvement for Henry or a recruit come first when that member is struggling. Spreading useful equipment across the active party helps every encounter.

Small armor counter

Equipment	Price	Buying advice
Leather Loincloth	220 G	An affordable body option for a compatible recruit.
Scale Shield	180 G	Useful protection when an eligible member has a weak shield slot.
Pointed Hat	70 G	A low-cost headgear option for its eligible users.
Wooden Hat	120 G	A practical early improvement for a compatible companion needing head protection.
Piece of Cloth	25 G	Check the free and returned clothing before spending on this basic piece.

The other armor shop

Equipment	Price	Buying advice
Chain Mail	500 G	Consider for Henry or another eligible wearer with weak body armor.
Bronze Armor	700 G	A sturdy option when the wearer needs an immediate improvement.
Breastplate	1,000 G	The adult Santa Rosa Cave contains a free Breastplate on this route.
Half Plate Armor	1,200 G	Check the Hero's returned gear. Reinhart's treasury also provides one later in this section.
Iron Helm	1,100 G	A substantial headgear purchase after basic party equipment is in good order.
Slime Clothes	330 G	A useful body-armor purchase for an eligible slime companion.

The approaching cave's **Breastplate** and Reinhart's later **Half Plate Armor** help plan the budget. Buy enough protection to reach those finds comfortably. A weak new companion may need its own inexpensive armor sooner than the Hero needs another costly piece.

Item shop

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Full Moon Herb	30 G
Fragrance Bag	80 G

Give active companions accessible Medical Herbs and keep poison recovery available. A Wing of Wyvern provides a convenient return from the field. Preserve enough of the Hero's MP for healing while Henry and the first recruits gain their footing. On **I Don't Want Your Help**, keep Hero and Henry as the travelling pair until Henry leaves.

First purchases in Oracleberry

Reserve 300 G for the wagon, use the hidden finds and returned equipment, and improve the weakest active member. Keep the next inn stay and recovery items covered before saving toward a 1,500 G Bladed Boomerang.

5.3.1 First monster recruits and party-building opportunities

For **I Don't Want Your Help**, postpone this entire recruitment step until the adult Kitty reunion in Section 6.2. Refuse any wild monster that asks to join before then.

With the wagon purchased and Monster Gramps visited, defeat eligible monsters in ordinary encounters. After victory, a monster may ask to join. Accept and inspect the new companion's status, equipment, and abilities.

Achievement Alert: Monster Tamer (2 points)

RA 61414
Requirement: Recruit your first wild monster
Accept an eligible wild monster's post-battle request to join. On **I Don't Want Your Help**, defer this first acceptance until after the adult Kitty ribbon reunion in Section 6.2.

Slimes and **Brownies** are useful early prospects on the routes around Oracleberry and the coast. Slimes gain support abilities as they grow. Brownies provide physical damage and HP, making straightforward use of suitable weapons and armor. **Drakees** become another option around the northern route.

On a recruitment route, the active party now has room for the Hero, Henry, and one recruit. For **I Don't Want Your Help**, continue with the two humans until Henry leaves, then with Hero alone until the adult Kitty reunion. Choose a member who helps the present encounters, then keep additional companions healthy in the wagon for accessible reserve training. Use the town's recovery services between short recruitment outings.

Check intelligence if a recruit acts unreliably. Growth and Intelligence Seeds can improve its command obedience. Keep a dependable healer or item user responsible for urgent recovery while the new companion develops.

5.3.2 Casino introduction and optional early prize planning

Oracleberry's casino offers slots, slime races, and monster-arena betting. Coins cost **20 G each**. In a slime race, choose the predicted first-and-second-place pairing. In the arena, choose the creature expected to survive the match. Review the stake before confirming a wager.

The prize counter offers the following rewards:

Prize	Coins	Practical value
Elven Medicine	300	Valuable MP recovery to keep for a demanding trip.
Leaf of the World Tree	1,000	Emergency revival for an active item's owner.
Armband of Sacrifice	5,000	A situational sacrificial effect for its wearer.
Killer Earring	10,000	Repeated attacks for an eligible user.
King Metal Sword	50,000	A powerful 130-attack sword for a compatible companion.
Gringham Whip	250,000	A strong group weapon requiring a large coin goal.

The **King Metal Sword** is a major optional prize and can greatly increase an eligible companion's damage. Its 50,000-coin goal may require a substantial casino session. Shop weapons and the free equipment along this route provide a comfortable loadout for the coming dungeons.

Achievement Alert: King Metal Sword (5 points)

RA 61423
Requirement: Purchase the King Metal Sword
At the casino prize counter, spend **50,000 coins** on the King Metal Sword and collect the sword. Confirm registration after the prize pickup. This purchase can be completed on a later casino visit.

Keep a chosen gambling budget separate from the wagon, equipment, and recovery money. Collect the dressing-room finds even during a short casino visit. When the party is ready, follow the northern road toward Santa Rosa.

5.4 Santa Rosa Ruins and the adult return to Santa Rosa Cave

The village after ten years

Follow the road north and northwest from Oracleberry. The return brings the Hero to a damaged Santa Rosa, with ruined homes and marshy ground where much of the familiar village once stood. The surviving residents explain that Reinhart's soldiers blamed Papas for Henry's disappearance.

Visit the church and speak to the nun. The herbalist's mountain house now provides an inn, giving the party a place to recover before searching the cave again.

Enter the house that was blocked by an old man during childhood, on the northern side of the village. Search its pot for an **Intelligence Seed**, visiting during the day if necessary. Speak to the old man behind the house. He remembers that Papas hid something important deep in the cave.

Prepare the active party for the lower passages, using Hero and Henry alone on **I Don't Want Your Help**. Take poison recovery, accessible herbs, and enough of the Hero's MP to heal. The wagon's extra members should be prepared for whichever encounters allow access to them.

The boat and the 850 G chest

Enter the cave and take the boat along the water to the island staircase that the young Hero could see during his first visit. Descend, then take the next stairs into the new lower passage.

Follow the route north, west, and north to the junction. The eastern branch leads to a chest containing **850 G**. Return to the junction and use the western route, then continue north to the next stairs down.

The lower cave includes sturdier enemies and useful training opportunities. Metal Slimes can appear and give **1,350 experience** when defeated. **Hork** is another possible recruit in these deeper areas. Keep the party ready for ordinary groups while pursuing either opportunity. On **I Don't Want Your Help**, defer Hork until after the adult Kitty reunion and refuse any request to join during this cave visit.

The two chests before the upper-floor loop

On the next floor, collect the two northern chests that are already accessible. They contain an **Agility Seed** and a **Breastplate**. Check eligible users and assign the Breastplate where it improves the active party's protection.

Green water or floor obstructions separate the party from another chest and the onward stairs. The route continues by climbing to the broad room above them. The surface there changes as the party walks over it.

Walking the room above to open the path below

Cover the broad floor systematically, walking over the squares that correspond to the blocked route underneath. Each changed square clears the matching part of the floor below. Crossing the whole patch is a straightforward way to open both the chest approach and the path to the eastern stairs.

Descend again and check the result. Collect the **Lamp of Darkness** from the newly accessible chest, then reach the onward staircase. If the route is still interrupted, return upstairs and cover the remaining part of the patch.

The Lamp has repeated uses and changes day into night. Keep it available for town visits with nighttime services, including Oracleberry's special merchant.

The lowest room and its household finds

On the next lower floor, follow the western route, turn south, and take the first eastern branch back toward the central passage. Continue south around the connected corridors until reaching the staircase to the small final room.

Search the pot for a **Strength Seed** and the dresser for a **Leather Loincloth**. These two searches are easy to pass while approaching the important objects beyond the doorway. Give the clothing to an eligible companion and use or retain the seed according to the party's development plan.

5.4.1 Papas' Letter, the Zenithian Sword, and deeper treasure

Go through the doorway and collect the **Zenithian Sword** and **Papas' Letter**. The sword's restrictions prevent the present party from wielding it, so keep it safe as part of the search.

Achievement Alert: A Father's Legacy (5 points)

RA 61368
Requirement: Collect the sword and the letter from Papas
Collect both the Zenithian Sword and Papas' Letter from the lowest room before leaving Santa Rosa Cave.

Papas' letter explains the purpose of his long travels. Martha was kidnapped because of a mysterious power connected with the Demon World. He sought the legendary warrior who could use the Zenithian equipment and reach that realm. The sword was the part of that search he managed to leave for his son.

The discovery gives the Hero a clearer direction and brings Henry into the purpose of the journey. Collect both objects, then retrace the route or use Outside when the Hero has the required MP.

Santa Rosa collections

Village house: Intelligence Seed from the pot.

Lower cave chest: 850 G on the northern side branch.

Accessible paired chests: Agility Seed and Breastplate.

Floor-puzzle chest: Lamp of Darkness.

Lowest room: Strength Seed in the pot and Leather Loincloth in the dresser.

Papas' hiding place: Zenithian Sword and Papas' Letter.

Rest and save in the village. Speak to the old man and the nun after the discovery. The next useful lead is **Alcapa**, west of Santa Rosa, where someone may know more about the legendary warrior.

5.5 Alcapa revisited: the inn, rumors, and preparations for Reinhart

News of Bianca's household

Travel west to Alcapa and speak to the people around the inn and town. The inn changed hands seven years earlier. Duncan and his family moved to a mountain village across the sea, leaving the Hero with another destination to pursue when travel opens farther west.

A Reinhart soldier has returned home with troubling news of the kingdom. Although Dale is king, the Empress holds much of the power. Henry listens carefully as the conversations reveal what has happened in his absence.

The storyteller and the first Small Medal

Visit the northwestern bar. Speak to the woman at the counter and answer no to her first offer. She then lets the party through to her father's room, where the story of the legendary warrior can be heard.

Search the room's pots for a **Small Medal**. Accept the opportunity to send it to the Medal King, keeping its collection recorded without using an inventory slot. The nearby locked treasure remains reserved for later access.

Achievement Setup: Small Medal Hunter

RA 61420
Record this pot medal with the hidden searches. Keep hidden searches and fixed chest medals tracked separately throughout the journey, including medals sent to the Medal King.

The storyteller describes a warrior equipped with the Zenithian arms who defeated a great threat long ago. His account raises the possibility that the warrior's bloodline has survived. Finish the conversation and visit the remaining services before resting.

Purchase guide: adult Alcapa

The town's counters have changed since Bianca's childhood adventure. Use the returned possessions, Oracleberry purchases, and the cave's Breastplate as the starting point for improvements.

Weapon shop

Weapon	Price	Buying advice
Big Mallet	220 G	An affordable improvement for an eligible physical recruit with weak starting gear.
Iron Claw	550 G	Useful for a compatible companion who needs a stronger fang or claw weapon.
Chain Whip	900 G	A group-attack option for an eligible user.
Chain Cross	1,200 G	A stronger grouped-enemy choice when the party has the budget.
Bladed Boomerang	1,500 G	Continue saving toward it if the Hero still needs stronger all-enemy coverage.
Fruit Knife	50 G	A basic spare weapon. Compare it with the intended user's current equipment.

Armor shop

Equipment	Price	Buying advice
Bronze Armor	700 G	Useful for a compatible member whose body protection remains weak.
Half Plate Armor	1,200 G	Account for the free Reinhart treasury piece available soon.
Scale Shield	180 G	A modest shield upgrade for an eligible user.
Iron Shield	720 G	A worthwhile defensive target for a companion who can equip it.
Wooden Hat	120 G	An inexpensive way to fill a weak headgear slot.
Iron Helm	1,100 G	Consider after the active party's more urgent equipment gaps are covered.

The **Iron Shield** is a useful target for the forthcoming physical pressure. Equip the free Breastplate where it helps, then compare the remaining armor gaps before purchasing another body piece. The 850 G from the cave can fund a meaningful improvement while leaving some money for recovery.

Item shop

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Pot Cover	40 G
Clothes	30 G

Restock herbs for the active party and keep poison treatment available. A recruit who can use the Pot Cover may already have Oracleberry's free find. Check that inventory before buying another.

Henry's decision

Stay at the inn. During the night, Henry wakes the Hero and speaks about the reports from Reinhart. His father's death and the kingdom's treatment of its people make him determined to see what has become of home.

In the morning, save and travel east toward the river passage connecting the regions. Henry recognizes the guard, **Tom**, and reminds him of their childhood encounters. Tom recognizes the missing prince and lets the party through. Continue to Reinhart with Henry ready to investigate.

5.6 Reinhart Castle basement: entry route, prisoners, and the key

A prince travelling quietly

The people of Reinhart describe high taxes, hunger, and the Empress's growing reliance on mercenaries. Speak to the townspeople and inspect the services before entering the castle. Henry asks the party to keep his identity quiet while he discovers what has happened.

The main entrance gives access to only part of the building. Speak to the guards and soldiers in the rooms that remain open. Their accounts include the attack on Santa Rosa. When the party tries to leave, Henry remembers the passage associated with his childhood kidnapping.

Purchase guide: adult Reinhart

The shops offer focused weapons and useful equipment for recruits. The basement will provide a free Steel Fang and Shell Hat, so include those finds when deciding how much to spend.

Weapon shop

Weapon	Price	Buying advice
Stone Axe	700 G	Consider for an eligible physical member with a weak weapon.
Iron Staff	850 G	A 22-attack option for a compatible companion.
Chain Cross	1,200 G	Group coverage when the intended user can equip the chain weapon.
Broad Sword	2,000 G	A strong focused purchase for the Hero or another eligible physical member.
Steel Fang	2,000 G	Collect the free basement piece before deciding whether another is useful.
Poison Needle	2,900 G	A specialized weapon with a possible one-hit kill. Fund ordinary party equipment first.

A **Slime Knight** is a useful recruitment goal around Reinhart. For **I Don't Want Your Help**, pursue it only after the adult Kitty reunion and keep Hero and Henry together for this visit. Its healing and equipment options suit the coming dungeons. Give a new member affordable returned gear while it develops, then consider the Broad Sword or another suitable improvement as the budget grows.

Item and light-equipment counter

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Shell Hat	150 G
Fur Hood	400 G

The free **Shell Hat** in the basement can fill a compatible companion's headgear slot. Buy an additional one when another user needs it, and compare the Fur Hood with the equipment already available. Keep healing and poison recovery distributed across the active party.

The boat beneath the drawbridge

The raised drawbridge at night reveals the opening beneath it. For the boat approach, return during the day and walk around the eastern side of the castle to the old docking area. Board the boat, sail south and west toward the drawbridge, then turn north while underneath it.

Inside the hidden passage, land by the pedestal and use Search. Press the concealed control to open the northern entrance. The western door farther ahead is locked, so follow the eastern passage and its southern stairs down.

On the lower floor, move west past the first northward branch and take the second. Its two chests contain a **Steel Fang** and a **Shell Hat**. Collect both before returning to the first branch.

The prisoner claiming to be the queen

Follow the prison corridor and speak to the prisoners. An old man describes the queen's responsibility for Henry's disappearance and the way Papas was blamed. Farther along, a woman insists that she is

the real queen and admits the earlier plot against Henry.

The discovery gives the party a serious reason to question the woman now ruling from upstairs. Continue along the corridor to the stairs back toward the upper basement. Step on the marked tile to open the door that blocked the western route. This creates a convenient shortcut for later returns.

Climb into the courtyard outside the kitchen. Two Dragon Pups guard the approach in fixed encounters. Defeat them, recover if needed, and enter the kitchen to continue into the castle proper.

Dale, the Reinhart Key, and the treasury

Work through the newly accessible corridors to the throne room. Henry reveals himself privately to **King Dale**, who dismisses the chancellor and is delighted that his brother is alive. Henry explains what the party found in the prison.

Dale mentions a mirror that reveals the true nature of things and gives the party the **Reinhart Key**. The castle's locked rooms are now available to explore.

Achievement Alert: Key to the Kingdom (4 points)

RA 61369
Requirement: Obtain the Reinhart's Key
Receive the Reinhart Key from Dale after Henry reveals his identity, then use it for the treasury and storage-room route.

Open the treasure room that the Hero saw during childhood. Its three chests contain **1,200 G**, an **Acorn of Life**, and **Half Plate Armor**. The floor damages companions as they cross, so heal beforehand, use direct routes to the chests, and check HP during the return. Assign the free armor after reaching safe ground.

Return through the kitchen to the exterior passage and enter the other northern doorway. Open the storage-room door with the key. Search the pot for a **Small Medal** and examine the bookshelves for the diary. It describes the **Mirror of Ra** in a southern tower whose access depends on the nunnery.

Take the storage-room stairs to the warp gate. The gate leads to the shrine near the coast where the companions recovered after escaping. Continue north to the nunnery to seek help with the tower entrance.

Reinhart finds before the tower

Basement side room: Steel Fang and Shell Hat.

King Dale: Reinhart Key.

Locked treasury: 1,200 G, Acorn of Life, and Half Plate Armor.

Storage room: Small Medal in the pot and the diary's tower clue.

5.7 Nunnery return and Maria's role at the Southern Tower

Asking for help

From the warp shrine, travel north across the nearby bridge toward the nunnery. Speak to Maria, then to the nun at the organ. Explain that the party needs to enter the southern tower to find the mirror.

The nun explains that a maiden's prayer can open the entrance. Maria volunteers to accompany the companions who helped her escape. Once permission is granted, she follows the party for the tower journey.

Maria provides the entrance access and remains a travelling companion for this part of the route. Prepare the active combat members' gear, spells, and inventories for the encounters inside.

Preparing at a free recovery point

Restore HP and MP at the nunnery and record the adventure. Give herbs to active members who can assist while the Hero or a healing recruit handles spells. On **I Don't Want Your Help**, the Hero handles spell recovery and Henry carries accessible herbs. Check the free Half Plate Armor, Steel Fang, and Shell Hat from Reinhart and equip suitable users.

Travel south toward the tower beyond the shrine. At the front entrance, attempt to open the door. Maria prays, and the gate opens for the party.

5.8 Southern Tower: floor route, Mirror of Ra, and treasure

The entrance and 650 G

Inside the tower, take the northeastern stairs from the first floor. The southwestern stairs lead toward a drop back to the entrance garden. The northeastern route begins the climb toward the mirror.

On the second floor, take the southern branch to the chest containing **650 G**. Return toward the stairs and use the western and southern walkway to reach the next upward staircase. Keep the party aligned on the narrow path while crossing the open floor.

The third-floor chests and Magic Water detour

On the third floor, the central opening separates several passages. The northern walkway leads to two chests containing a **Scale Shield** and an **Acorn of Magic**. Collect both and give the shield to an eligible member if it improves the current slot.

The northeastern stairs lead to a fourth-floor detour. Follow that area south and search the jar for **Magic Water**. Return to the third floor after collecting it.

Work around the central opening toward the northwestern staircase. That staircase reaches a different fourth-floor passage, which continues to the stairs for the fifth floor. A fall returns the party to a lower area, so use the floor connections to resume the climb when needed.

The tower includes useful encounters for training and recruitment. Slime Knights and other opponents can appear, and Metal Slimes provide another experience opportunity. The armored knight enemies can summon **Healers**. Defeating a summoned Healer provides a recruitment opportunity for another recovery companion. Keep the party healthy while collecting the treasure and preserve MP for the

return route. For **I Don't Want Your Help**, refuse all recruitment prompts here, including those from summoned Healers, until after the adult Kitty reunion.

Crossing the gap to the mirror

At the top, a gap interrupts the narrow northward path. Align the party with the **far-left side of the walkway** and walk straight north across the gap. An invisible section supports that line.

Continue to the object at the end and collect the **Mirror of Ra**. Keep it with an available member for the upcoming castle event.

Use Outside when the Hero has 8 MP available, or descend through the tower. The nunnery provides a convenient free rest and save before returning to Reinhart through the warp shrine. Use the shrine during the day for that return.

Southern Tower collections

Second floor: 650 G chest on the southern branch.

Third floor: Scale Shield and Acorn of Magic in the paired northern chests.

Fourth-floor detour: Magic Water in the jar.

Fifth floor: Mirror of Ra beyond the gap's far-left crossing.

5.9 The False Queen, restored Reinhart, and Henry's departure

The two empresses

Return to the castle and speak to the chancellor. Dale has brought the imprisoned woman upstairs, and the court now has two claimants to the same identity.

Restore the active party before going to the empresses' room. Henry participates in the confrontation, so keep his equipment and recovery items ready. On a recruitment route, the Hero and a dependable third member complete the lineup. For **I Don't Want Your Help**, enter with Hero and Henry alone and give both humans herbs before using the mirror.

Use the **Mirror of Ra** on the women. The woman on the right is human. Use it on the woman on the left to reveal the impostor and begin the battle.

The False Queen battle

The **False Queen**, also called the Impostor, has about **350 HP**. She uses physical attacks, fire breath, and calls additional monsters. Those summons can include creatures that interfere with the party's spell use or prolong the encounter through healing.

Have Henry begin with **Surround** to hinder physical attacks. A successful defense reduction also helps the Hero and any third member produce steady physical damage. Keep one reliable recovery action ready for the damage that reaches the party.

Fire breath affects the active group, so watch each active member's HP. When the Queen gathers strength, prepare for a heavier physical blow with recovery or a defensive turn. Surround helps with physical accuracy, and healing supplies cover the party's continued injuries.

Trick Bags can seal spells. Remove them when their interference threatens the recovery plan, and use accessible herbs if a healer is disabled. A called healer deserves attention when it begins restoring the enemy. Continue focusing damage on the Queen while keeping those extra threats under control.

A **Slime Knight** makes a useful third member through its attacks and healing once recruitment is appropriate for the chosen route. On **I Don't Want Your Help**, continue with Hero and Henry alone. The Hero can alternate between damage and urgent recovery, with Henry providing support and item use. Keep the fight moving while protecting the most threatened companion.

The victory awards **760 experience**. Reinhart's people learn what happened, and the following morning brings a relieved court.

Achievement Alert: A Tale of Two Empresses (5 points)

RA 61370
Requirement: Defeat the impostor Empress
Use the Mirror of Ra to reveal the false queen and defeat her. On **I Don't Want Your Help**, complete this battle with Hero and Henry while continuing to refuse wild recruits.

Saying goodbye to Henry

Dale thanks the party and asks Henry to take the throne. Henry chooses to stay and help his brother govern. Their conversation settles his part of this journey, and he leaves the active party.

Speak to Henry afterward. He explains that **Vista Port** is open to shipping again. His carried equipment and possessions are sent to the **Oracleberry depository**. Maria also completes her part in the tower expedition.

Before leaving Reinhart, record the adventure and review the active lineup. The Hero's next journey will depend more heavily on the monster companions who have been developing alongside the two friends on a recruitment route. For **I Don't Want Your Help**, Hero travels alone from Henry's departure until the adult Kitty reunion in Section 6.2.

5.10 Reinhart-region cleanup and the next continent

Recovering equipment and arranging the wagon

Return to Oracleberry to collect Henry's deposited belongings. Reassign suitable equipment to the Hero and the companions who will take the next active positions. Check weapons, armor, headgear, and the owner of each useful item after the transfers.

Use Monster Gramps to organize the travelling roster. Keep a reliable recovery member, useful attackers, and any developing recruit worth training on the next route once the chosen route permits recruitment. For **I Don't Want Your Help**, equip and restore Hero alone and leave the wagon purchase for the return after Kitty. Restore the whole available party and record the adventure before travelling farther.

The region remains useful for additional recruitment. Slime Knights near Reinhart are particularly convenient if the party still needs a fighting healer. Hork in the deeper Santa Rosa Cave and other

available species provide further roster options. Pursue the companions that fit the current party and recovery budget after Kitty on **I Don't Want Your Help**.

After the false queen's defeat, revisit **Lenoire Castle** when the new settlers are present. Speak to **both residents**. If they have not arrived yet, return when the castle is inhabited.

Achievement Alert: A Warm Welcome (2 points)

RA 61397
Requirement: Talk to the new inhabitants of the haunted castle
Visit Lenoire after Reinhart is restored, or as soon as its new inhabitants are available, and finish conversations with both residents.

Regional treasure check

Account for these finds before sailing:

Reinhart-region collections

Nunnery: Maria's 1,000 G reward.

Oracleberry: Pot Cover, Monster Lure, Defense Seed, Silk Robe, and Silver Barrette from the town searches. Wagon purchased for 300 G, deferred until after Kitty on **I Don't Want Your Help**.

Santa Rosa village: Intelligence Seed from the northern house.

Adult Santa Rosa Cave: 850 G, Agility Seed, Breastplate, Lamp of Darkness, Strength Seed, Leather Loincloth, Zenithian Sword, and Papas' Letter.

Alcapa: Small Medal from the storyteller's room.

Reinhart basement: Steel Fang and Shell Hat.

Reinhart Castle: Reinhart Key, 1,200 G, Acorn of Life, Half Plate Armor, and the storage-room Small Medal.

Southern Tower: 650 G, Scale Shield, Acorn of Magic, Magic Water, and Mirror of Ra.

Henry's belongings: Retrieve and reassign them through Oracleberry's depository.

Optional casino prizes can be collected whenever the chosen coin goal has been reached. Keep the travelling party supplied after any additional shopping, and retain important possessions such as Bianca's Ribbon.

Returning to Vista Port

Travel back through the western region to **Vista Port**, where the Hero's childhood voyage first ended. Arrive during the day and board the waiting ship. The crossing carries the party to **Port Selmi** and the next stretch of the journey.

6 Second Generation: Port Selmi and Marriage

Achievement Setup: I Don't Want Your Help

RA 61418

Missable. Henry has left, so continue with the human Hero alone until the adult Kitty reunion in Section 6.2. Keep Bianca's Ribbon in the Hero's inventory and refuse every wild recruitment prompt. Buy the wagon after the reunion, then return to Oracleberry to begin recruitment.

The western voyage brings the Hero to a busy port and a countryside filled with new possibilities. A farming village needs help, a scholar is restoring an old travel spell, and the road farther south leads to Salabona. The party's growing roster and the belongings recovered from Henry make a useful foundation for this part of the journey.

Keep the active members equipped and the recovery supplies accessible. Several valuable free finds lie along the route, and the town shops offer enough choice to improve the party gradually as those discoveries and rewards arrive.

6.1 Port Selmi: the tavern confrontation and Kabochi request

The harbor and its useful services

The voyage from Vista ends at Port Selmi. From the landing, walk north to the lighthouse. A local warning gives its resident an alarming reputation, but the building can be explored safely. Climb to the room at the top of the ladder and search the dresser for a **Small Medal**.

Monster Gramps has a branch south of the lighthouse. Use it to adjust the travelling roster if Henry's departure left a gap in the active party on a recruitment route. For **I Don't Want Your Help**, keep Hero alone until the ribbon reunion. The church's basement provides a depository, and the inn gives the party a convenient place to recover.

Flower searches and the inn's treasures

A resident recommends searching the flowers around the church. Search the **eastern flower patch** for another **Small Medal** and the **western flower patch** for **100 G**. Stand on the relevant square and use Search.

At the inn, the upstairs western room has a pot containing **50 G**. The stage leads north into the dancers' dressing room, where a dresser contains a **Silk Apron**. Check these rooms while exploring, and leave the locked chests for their later access.

These five finds are worth collecting before the next countryside trip. The two cash searches contribute to supplies, and the clothing may be useful to an eligible companion or worth keeping in the depository.

The two bandits and the village's request

On **I Don't Want Your Help**, fight this encounter with the human Hero alone. Restore his HP and MP, equip the best available armor, and carry Medical Herbs. Use manageable local battles and inn recovery to prepare if his current equipment or level leaves him vulnerable.

Restore the active party before entering the inn's eastern tavern area. Two bandits are harassing a peasant who is trying to protect his village's money. Speak to the man and confront the bandits to begin a battle with **two Bandit Wolves**.

They are ordinary enemies for a party that has completed Reinhart. Use the Hero's attacks and suitable group damage, keeping recovery available if the party arrived injured. A **Copper Sword** can appear as a battle-item reward.

After the victory, accept the peasant's request. A large creature is destroying the fields of **Kabochi**, a village to the south. He offers **3,000 G** for resolving the problem and gives **1,500 G** immediately. He will meet the party at the village.

Purchase guide: Port Selmi

Inspect the active party after collecting the advance payment. The western cave contains a Stone Axe and Iron Helm, and its story reward provides a powerful weapon for the Hero. Buy enough equipment to reach those finds comfortably, with the greatest attention on companions whose present defenses or weapons are weak.

Weapon shop

Weapon	Price	Buying advice
Club	60 G	Basic gear for an eligible companion. Check returned and stored weapons first.
Stone Axe	700 G	20 attack. The nearby western cave contains a free piece.
Bladed Boomerang	1,500 G	Stronger whole-formation coverage for the Hero if this upgrade is still needed.
Sledge Hammer	1,800 G	A focused weapon for a compatible physical companion who needs more damage.
Broad Sword	2,000 G	33 attack. Compare the Hero's current gear with the 40-attack sword obtained on the coming cave route.
Morning Star	3,000 G	Group coverage for an eligible member, including a recruit whose equipment options suit it.

Armor shop

Equipment	Price	Buying advice
Breastplate	1,000 G	Check the free adult Santa Rosa piece and the active party's eligible users.
Half Plate Armor	1,200 G	Check the Reinhart treasury piece and reassigned belongings before buying another.
Full Plate Armor	2,300 G	A useful body-armor goal for an eligible member facing heavier physical attacks.
Slime Clothes	330 G	Affordable protection for a compatible slime companion.
Scale Shield	180 G	Fill a weak shield slot on an eligible user.
Iron Helm	1,100 G	The western cave supplies one. Consider a purchase when another member also needs it.

Item and special-equipment counter

Item	Price	Buying advice
Medical Herb	8 G	Distribute recovery among the active members.
Full Moon Herb	30 G	Paralysis treatment when the caster is unavailable or occupied.
Wing of Wyvern	25 G	A convenient field return while the party is still working toward Return.
Angel's Bell	500 G	Repeated battle use to cure confusion. Assign it to an available item user.
Turtle Shell	2,500 G	Check the intended monster's equipment options and current body armor.
Magic Shield	3,400 G	A substantial protective purchase for an eligible wearer with the budget to support it.

The **Angel's Bell** is a useful lasting addition when confusion is causing trouble. Keep it with a companion who can use it during the affected battle. For ordinary purchases, cover the active party's most urgent equipment gaps and retain enough money for recovery.

Magicians can be recruited around Port Selmi. They begin with offensive and spell-sealing magic, providing another option for the developing roster. Check the new recruit's equipment and MP before giving it an active role in the longer cave expedition. For **I Don't Want Your Help**, defer these recruits until after the adult Kitty reunion and continue to Kabochi with Hero alone.

Before the road to Kabochi

Lighthouse: Small Medal from the dresser above the ladder.

Church flowers: Small Medal on the east and 100 G on the west.

Inn: 50 G in the upstairs western pot and Silk Apron in the dancers' dressing-room dresser.

Village request: Accept the job and collect the 1,500 G advance.

Important possession: Keep Bianca's Ribbon with the travelling party for the western cave visit.

Rest, save, and follow the road south toward Kabochi. The fields and mountains around the village lead into the next local adventure.

6.2 Kabochi and the West Kabochi Cave

The damaged fields and village searches

Follow the southern road into the mountain country around Kabochi. Arriving at night brings a glimpse of a large animal in the fields. It runs away when approached. Stay at the inn, then speak to the villagers in daylight to hear what the crop losses have meant for their households.

Search the village thoroughly before setting out:

Armband of Sacrifice: Push aside the plate or slab on the ground near the water, descend the hidden stairs, and open the chest. An equipped wearer who falls in battle triggers its explosion against ordinary enemies. The effect does not work on bosses, so choose its use as a deliberate part of a regular-encounter plan.

Strength Seed: The pot in the house across the small bridge, near the boy and his grandmother.

Leather Hat: A barrel in the storage building or barn.

Magic Water: A pot upstairs in the elder's house.

Small Medal: Another upstairs pot in the same house.

Small Medal: Search the upper-left corner of the underground general store and church beneath the grassy mound.

The elder's house is recognizable by the horses outside. Speak to the man who hired the party and the elder. Their discussion reveals how anxiously the village has committed its savings to the task. The elder says the creature appears to come from the west.

Purchase guide: Kabochi

The general store shares its underground space with the church. Use the saving service and inspect the stock during the day.

Item	Price	Buying advice
Holy Water	20 G	A situational weak-encounter aid for the field.
Wing of Wyvern	35 G	Check the current travel-item supply before buying another.
Iron Claw	550 G	Useful for an eligible companion with a weaker fang or claw weapon.
Breastplate	1,000 G	Check the adult Santa Rosa piece and the active party's body protection.
Iron Helm	1,100 G	The western cave contains a free piece.
Poison Needle	2,900 G	A specialized possible one-hit-kill weapon. Cover ordinary equipment and recovery needs first.

The incoming Iron Helm and Stone Axe make it useful to carry a workable loadout to the cave, then assign those finds as they arrive. Bring poison recovery from the earlier towns and enough HP recovery for the stronger groups along the western route.

Before the western cave

Keep **Bianca's Ribbon** in the travelling party's inventory. Restore the active members, record the adventure, and leave space for the cave's equipment. The ribbon needs to be available through the Hero's Item command at the encounter ahead.

Achievement Setup: I Don't Want Your Help

RA 61418
Missable. Reach the panther with zero wild recruits accepted since Oracleberry. Keep Hero alone until the ribbon encounter, including while exploring this cave. A previously accepted and released wild monster still closes the achievement route.

The skeleton's medal and the Stone Axe

Leave Kabochi and follow the mountains west to the cave. From the entrance, take the eastern passage and turn south at the junction. The remains of a campfire and a skeleton provide a landmark for a ground search.

Stand **one square north of the skeleton** and use Search for a **Small Medal**. Take the western branch nearby to the chest containing a **Stone Axe**, then return and use the southern stairs to descend.

The Stone Axe provides 20 attack for an eligible physical companion. Assign it where useful and keep the active members recovered while exploring the next floor's bridges and drops.

The fallen traveller and free Iron Helm

From the arrival stairs, work west across the bridges, then north and east toward the traveller. Speaking to him startles him into falling to the floor below. Follow the drop and speak to him until he explains the dangerous creature deeper in the cave.

Search the southern chest on that lower floor for an **Iron Helm**. Equip a suitable companion, then use the northern stairs to return to the bridge level. Review the floor connections before choosing the route into the final chamber.

The optional Man-Eater Chest

A chest on the western side of the bridge floor is a **Man-Eater Chest**. Opening it starts an optional battle. It has about **90 HP** and can use dangerous magic, including Beat's instant-death effect.

Approach with a healthy active party and available revival if pursuing the encounter. Concentrate suitable attacks on the chest and handle urgent recovery promptly. A **Small Medal** can appear as its battle-item reward.

Continue around the southern and eastern route to the onward stairs. The final chamber contains the beast and the sword it has been guarding.

6.2.1 Bianca's Ribbon and reunion with the Killer Panther

Approach the **Killer Panther**. The encounter has familiar behavior: the animal watches the Hero, reacts uncertainly, and seems to be trying to remember something.

Choose the Hero's **Item** command and use **Bianca's Ribbon**. Its scent restores the recognition, and the battle ends with an affectionate reunion. Speak to the panther afterward to bring the childhood companion back into the travelling party.

Achievement Alert: Beware of Kitty (4 points)

RA 61371
Requirement: Stop the beast terrorizing Kabochi
Use Bianca's Ribbon through the Hero's Item command during the panther encounter, then speak to Kitty to complete the reunion.

Achievement Alert: I Don't Want Your Help (10 points)

RA 61418
Requirement: Reunite with your kitty before recruiting any monsters
Missable. Complete this adult ribbon reunion with no wild monster previously accepted. The childhood story panther is allowed. Confirm registration before accepting the first wild recruit.

After the reunion registers, wild recruitment can begin. If the wagon purchase was deferred, return to Oracleberry, buy it from the night merchant, and visit Monster Gramps before seeking the first wild recruit.

Check its level, equipment, and available inventory. The new journey has moved well beyond the creatures fought during childhood, so give the panther suitable gear and let it develop through manageable battles alongside the current roster.

6.2.2 Papas' Sword, the village reward, and available recruits

Search the sword the panther was guarding to collect **Papas' Sword**. The crest identifies it as his father's weapon. Its **40 attack** makes a valuable focused weapon for the Hero. Keep the Boomerang or Bladed Boomerang available for ordinary formations when that attack pattern remains useful.

The cave's fixed finds are the skeleton's Small Medal, Stone Axe, Iron Helm, and Papas' Sword. The optional Man-Eater Chest has its own possible medal reward. **Big Eye** is also a recruitment prospect here, providing another developing companion for the roster.

Return to Kabochi and speak to the elder. The villagers are frightened to see the party accompanied by the same creature and suspect that the job was arranged from the beginning. Collect the remaining **1,500 G** reward, completing the agreed **3,000 G** payment, then leave with the panther.

Kabochi and western cave collections

Hidden village room: Armband of Sacrifice beneath the movable slab.

Village houses: Strength Seed and Leather Hat.

Elder's upstairs room: Magic Water and Small Medal.

Underground shop and church: Small Medal in the upper-left corner.

Cave entrance floor: Small Medal north of the skeleton and Stone Axe in the western chest.

Lower floor: Iron Helm in the southern chest.

Final chamber: Panther reunited through Bianca's Ribbon, with Papas' Sword collected afterward.

Village reward: The remaining 1,500 G from the elder.

Port Selmi's services provide a convenient stop for equipment changes and recovery. Visit its tavern at night for conversations about Papas and a scholar in the western town of **Ruraphin** who studies travel magic.

6.3 Ruraphin: Benett, the Lunar Herb, and learning Return

A town of stairs, tunnels, and smoke

Travel west from Port Selmi toward Ruraphin. Its connected walkways and tunnels take a little exploration to understand. The inn is a convenient starting point, and the large building north of it leads to the tavern, church, and depository.

Speak to the residents while visiting both day and night. They describe **Benett**, also called Bennet, and the smoke from his experiments. His work concerns a spell that can transport a traveller back to places already visited.

The seven town finds

Collect the objects around the town as the route opens:

Small Medal: A pot upstairs in the inn.

Wing of Wyvern: The barrel behind the bar, reached by going upstairs and descending the other staircase.

Acorn of Magic: The barrel upstairs in the tavern during the nighttime visit.

Agility Seed: A pot in the small sunken dwelling or pit area.

Small Medal: Another pot in that same sunken area.

Medical Herb: A pot in Benett's house.

Magic Water: A barrel in Benett's house.

The Acorn can help the Hero's MP reserve, especially once the travel spell is available. Give permanent stat increases to companions whose roles make good use of them, and keep the Magic Water for a demanding expedition.

Purchase guide: Ruraphin

The weapon counter opens during the day, and the same building offers armor at night. The item counter also has a daytime schedule. Use the Lamp of Darkness and the town's recovery services when planning both shopping visits.

Daytime weapons

Weapon	Price	Buying advice
Saw Blade	1,200 G	Consider for an eligible physical recruit whose present weapon needs improvement.
Sledge Hammer	1,800 G	A focused option for a compatible attacker.
Broad Sword	2,000 G	Compare with the Hero's free Papas' Sword before buying for him.
Steel Fang	2,000 G	Check the free Reinhart fang and the panther's current equipment.
Snake Sword	3,900 G	A larger weapon investment after the active party's recovery and defensive needs are covered.

Nighttime armor

Equipment	Price	Buying advice
Full Plate Armor	2,300 G	A useful body-armor target for an eligible member facing stronger groups.
Turtle Shell	2,500 G	Compare with a compatible monster's current protection.
Iron Helm	1,100 G	Assign the western cave's free piece before considering another.
Iron Mask	3,500 G	A strong headgear goal for an eligible physical companion with the budget available.
Scale Shield	180 G	A modest shield option for a weak equipment slot.
Magic Shield	3,400 G	Consider its protective properties for an eligible wearer and the coming ring quests.

The **Iron Mask** and **Magic Shield** are useful larger targets. Improve one important defensive slot at a time while retaining money for supplies and the 1,000 G map offered through the next errand. Papas' Sword gives the Hero a useful opportunity to direct savings toward protection or another companion's weapon.

Daytime item shop

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Full Moon Herb	30 G
Monster Lure	200 G

Puppet Man can be recruited around Ruraphin. Its disruptive abilities provide another roster option. Keep the active party comfortable against the local enemies while exploring or training the returned panther.

Achievement Alert: Monster Recruiter (3 points)

RA 61415
Requirement: Recruit five unique monsters
Use the Ruraphin fields to add a new species if needed after the Kitty reunion. Count **five distinct recruited species**, including stored monsters. Different nicknames for the same species do not add species. This threshold may already have registered on an earlier recruitment trip.

Finding Benett and the glowing herb

From the inn, follow the western route around the large northern building and use the connecting stairs and tunnel to reach the remaining houses. The weapon-and-armor shop is on the southeastern side of that area. The other house, with smoke rising from it, belongs to Benett.

Speak to him and answer no when he asks whether the Hero has come to complain about the smoke. Agree to help and follow him upstairs. He shows the party a map of the **Rura Moon Herb**, the ingredient needed to complete the travel spell.

The herb shines at night on the peninsula west of town. Leave Ruraphin, climb the western steps, cross the bridge, and descend on the other side. Continue south toward the peninsula's tip. Use the Lamp of Darkness if daylight has returned, then stand on the glowing patch and Search. Collect the **Rura Moon Herb**.

Learning Return and buying the map

Bring the herb to Benett upstairs. Follow him back to the experiment and finish the conversation after the burst of magic. The Hero learns **Return**, costing **8 MP** per use.

Cast it once when Benett asks for the test. An available destination such as Oracleberry demonstrates the result and makes the next errand convenient. Return now changes the rhythm of the journey by putting visited towns within a short spell trip.

Achievement Alert: I'm Outta Here! (3 points)

RA 61372
Requirement: Demonstrate your skill with the Return spell
Actually cast Return when Benett asks for his test, choosing an available town such as Oracleberry. Restore enough MP for the next trip afterward.

Visit Oracleberry's northwestern merchant at night. He offers the **Wayfarer's Map** for **1,000 G**. Buy it when the budget allows and use it outdoors to examine the world and the party's position. Restore the Hero's MP before returning to Ruraphin for the southern road.

Achievement Alert: You Are Here (2 points)

RA 61376
Requirement: Purchase the Wayfarer's Map
Buy the Wayfarer's Map from Oracleberry's northwestern merchant at night for **1,000 G**, then keep it available for outdoor travel.

Ruraphin before the southern road

- Collect the two town Small Medals, Wing of Wyvern, Acorn of Magic, Agility Seed, Medical Herb, and Magic Water.
- Complete Benett's nighttime herb errand and test Return.
- Visit both shopping schedules if equipment upgrades are needed.
- Purchase the Wayfarer's Map in Oracleberry when funds allow.
- Keep enough MP for the travel and recovery planned next.

6.4 Ruraphin South Cave and the road to Salabona

The roadside inn and Henry's invitation

Travel south from Ruraphin to the small roadside building, also known as the Rumor Shrine. Its residents discuss Flora of Salabona and news from Reinhart. Search the **well** for a **Small Medal**, then use the available recovery and saving services as needed.

Continue south to the passage cave. A Reinhart soldier stops the party and asks the Hero to visit Henry.

Achievement Setup: A Pretty Little Thing

RA 61373
Missable. Before choosing a wife, make it nighttime and cast Return to Reinhart. Go upstairs in the inn and speak to the Bunny Girl during that visit. The scene requires arriving by Return at night.

Use the Lamp of Darkness outside if needed, then **cast Return to Reinhart at night**. Enter the inn, go upstairs, and finish the Bunny Girl's conversation about puff puff. Check registration before continuing.

Achievement Alert: A Pretty Little Thing (3 points)

RA 61373
Requirement: Inquire about puff puff
Missable. Arrive in Reinhart by a nighttime cast of Return and speak to the upstairs Bunny Girl at the inn. Complete this visit before bride confirmation.

Cast Return to Reinhart, entering the castle during the day.

Speak to Dale in the throne room. His scholars have connected the **Zenithian Shield** with Salabona, giving the southern trip another important purpose. Upstairs, Henry introduces **Maria** as his new wife. Finish the conversations and their congratulations, then return to the western road.

The passage cave's Small Medal

Return to Ruraphin and retrace the southern approach. The soldier's message has been resolved, and the cave route can continue.

From the northern entrance, follow the passage east and then south into the next chamber. Take the southeastern branch to the chest containing a **Small Medal**. Return to the main passage and follow the western route through the remaining turns to the southern exit stairs.

The two fixed finds on this approach are the roadside well's medal and the cave chest's medal. Heal after any difficult encounter, continue toward the nearby bridge, and enter **Salabona**.

6.5 Salabona: Ludman, Flora, and the wedding prerequisites

The puppy and the town searches

A friendly dog runs up as the Hero enters Salabona. Its owner catches up and thanks him, surprised by the puppy's enthusiasm. This is **Flora**, the young woman at the center of the town's current excitement.

Explore before gathering at the mansion:

Iron Shield: The dresser in the inn. Assign it to an eligible member who needs the protection.

Small Medal: The dresser in Andy's house south of the inn and entrance area.

Intelligence Seed: The dresser in Ludman's small guesthouse on the southwestern side of town, surrounded by water.

Silver Barrette: The dresser in Flora's upstairs room in Ludman's mansion, accessible after the first meeting.

The free **Iron Shield** is particularly useful for the next dungeon. Its protection helps an eligible wearer face physical damage and elemental attacks. Review the active party's shields before buying another expensive defensive piece.

Ludman's offer

Enter the mansion and speak to the waiting suitors, including **Andy**, who has known Flora since childhood. When Ludman calls everyone in, listen to his request.

He wants a prospective husband to recover two magic rings, the **Ring of Flames** and **Ring of Water**. The successful traveller will also receive his family's heirloom shield. Flora objects to the danger involved, but Ludman continues with the arrangements.

Speak to the family upstairs after the meeting and collect the Silver Barrette. Ludman points toward a lava-filled cave southeast of Salabona for the first ring. The two gift chests in the mansion remain locked until their later handover.

Purchase guide: Salabona

Visit the weapon and item counters during the day. The town's shops offer several larger upgrades, and the volcano contains another free Iron Helm and a useful staff.

Weapon shop

Weapon	Price	Buying advice
Chain Cross	1,200 G	Group coverage for an eligible companion whose present weapon needs help.
Broad Sword	2,000 G	Compare with the Hero's 40-attack Papas' Sword and other returned gear.
Morning Star	3,000 G	A stronger grouped-enemy weapon for a compatible user.
Sword of Malice	4,400 G	45 attack and an item-use attack spell. Useful beyond the volcano's fire-resistant opponents.
Steel Fang	2,000 G	Check the panther's equipment and the free fang collected beneath Reinhart.

Papas' Sword gives the Hero dependable focused damage for this stage. A compatible monster may gain more from a weapon purchase than he does. Keep the group-clearing weapon available for ordinary encounters on the approach.

Armor shop

Equipment	Price	Buying advice
Dancer's Clothes	1,300 G	Compare with the intended user's current body armor and compatibility.
Full Plate Armor	2,300 G	A useful physical-defense upgrade when the active wearer still needs one.
Turtle Shell	2,500 G	Check a compatible monster's present body protection.
Cloak of Evasion	3,000 G	Its evasion property adds another option for an eligible wearer.
Silver Barrette	450 G	Collect the free mansion piece before deciding whether another is useful.
Silk Hat	2,000 G	A larger headgear purchase for a compatible member whose current slot is weak.

Give protection and recovery a firm place in the volcano budget. The free Iron Shield, earlier Magic Shield purchases, suitable body armor, and healthy reserves all contribute to a comfortable expedition.

Item shop

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Full Moon Herb	30 G
Leather Shield	70 G

Restore the active members and reserves, distribute useful recovery, then record the adventure. A party in the low to mid twenties has more room to handle the volcano's stronger enemies and ring guardians. Good equipment and reliable healing remain important at any chosen level.

6.6 Volcano Cave: route, hazards, treasure, and the Ring of Flames

The approach and 450 G

Leave Salabona by the western bridges, then follow the route south and east around the mountains before turning north into the volcano. The countryside includes **Wyvern** and **Bomb Crag** recruitment opportunities. Keep the party recovered around Bomb Crags, whose sacrificial action can make an encounter suddenly dangerous.

Inside, Andy wishes the party luck. The wagon is available during this expedition, so use the prepared roster and reserves as needed. Follow the entrance route west and take the second southern bridge branch to the chest containing **450 G**.

Return north over the bridge, follow the passage around the lava, and continue south and east along the main route. Take the lower branch at the junction and descend to the next floor.

The trapped chest, staff, and Iron Helm

From the lower-floor arrival, follow the northern and eastern route. The northward side branch contains an optional **Man-Eater Chest**. Its dangerous spell and possible Small Medal reward deserve the same preparation as the earlier trapped chest.

The isolated chest across the lava contains a **Staff of Antimagic**. Use Stepguard before crossing when the party has an available caster. Otherwise, count the hazardous steps and heal before taking another encounter. The walkable lava patches remove HP as the party moves.

The staff provides **40 attack** for an eligible user and a Stopspell effect when used as an item. Keep it available for appropriate spell-using enemies and the party changes ahead.

Return to the earlier junction and follow the southern route around the floor's perimeter. The southeastern chest contains an **Iron Helm**. Assign it to a suitable member, then use the western of the northward branches to reach the next stairs.

The Defense Seed, 1,500 G, and healing chamber

On the next floor, short lava crossings connect the dry passages. The northeastern chest contains a **Defense Seed**. Continue through the western and northern branches, crossing the southern lava route to the chest containing **1,500 G**.

The central northern route leads to two stair choices. The lower or southeastern branch reaches a small **healing chamber**. Step on the center tile to restore the active party's HP and MP.

Rotate reserves into the active lineup and use the tile again to recover them too. This makes the chamber a valuable base while finishing the treasure or preparing for the guardians. The other stair route continues toward the ring.

The volcano also has useful recruitment prospects. A Beast Master can call a **Curer**, and **Dancing Jewel** can appear as another possible companion. Keep the party healthy while pursuing these encounters and inspect any recruit's equipment and abilities.

Volcano finds before the ring

Entrance floor: 450 G on the second southern bridge branch.

Next floor: Staff of Antimagic across the lava and Iron Helm on the southeastern route.

Lower treasure floor: Defense Seed and 1,500 G.

Optional encounter: Man-Eater Chest with a possible Small Medal.

Recovery: Heal active members and reserves on the chamber's center tile before approaching the ring.

6.6.1 Lava Men battle and sustainable healing

Use the remaining upward or northern branch from the lower junction to descend toward the ring chamber. Approach the **Ring of Flames** only after assigning the intended active members and recovery supplies. Examining it begins the battle with **three Lava Savages**, also called Lava Men, with about **400 HP each**.

The group puts sustained pressure on the whole party through fire breath and ordinary attacks. Focus physical damage on one Savage at a time. Each defeated guardian reduces the number of dangerous actions the party has to absorb in later rounds.

Use cold attacks where suitable. Wyvern and Yeti learn **Cold Breath at level 5**, and Yeti gains **Snowblast at level 15**. Check those abilities before assigning the attacking member. The guardians' fire resistance makes physical and cold actions practical offensive choices.

Increase or Upper helps with physical blows. Protection from fire breath and equipment resistance address the other pressure. Keep the healing plan ready even when a support action has been successful.

The Hero and a Slime Knight can share single-target healing. A suitable group-healing companion provides another answer when breath has injured all three active members. Rotate an exhausted or badly injured member out when an available reserve is better prepared to continue.

If several members are vulnerable, spend the round restoring the group and protecting the most threatened companion. Resume focused damage when the party has enough HP to handle the next sequence of attacks. The healing chamber has supplied a full reserve roster for that purpose.

Winning awards **1,050 experience** and **750 G**. Collect the **Ring of Flames** and leave through the route or Outside. Restore the party and return to Ludman during the day.

Achievement Alert: From the Heart of the Volcano (5 points)

RA 61374
Requirement: Collect the Ring of Flames
Defeat all three Lava Savages and collect the Ring of Flames from the chamber before returning it to Ludman.

He takes the first ring and permits the party to borrow his boat outside Salabona for the search for the Water Ring. The ship now opens the northern river route. Andy has also returned injured, with Flora attending him in his family's house, if the party visits before leaving.

6.7 Mountain Village: Duncan, Bianca, and opening the river route

The Water Gate and village finds

Board Ludman's boat and sail north until the **Water Gate** blocks the river. Land nearby and read the sign directing travellers to the Mountain Village for permission. Visit the village during the day to explore its services and households.

The following searches provide supplies and two medals:

Strength Seed: The left pot in the cave-like general store near the entrance.

Demon Jar: The right pot in that store begins an optional battle. Prepare before searching it.

Medical Herb: The dresser upstairs in the inn.

Small Medal: A barrel in the inn's basement tavern area.

Small Medal: Search the right-hand grave marker outside, near the woman paying her respects.

The **Demon Jar** has about **200 HP** and can use Beat. Its physical blows can also be dangerous. Restore the active party, keep recovery available, and use focused attacks if pursuing it. A Small Medal can appear as a battle-item reward.

Finding Duncan and Bianca

Enter the northern house and speak to the man in bed. It is **Duncan**, who gradually recognizes the visitor as Papas' son. The conversation catches him up on the Hero's disappearance and Papas' fate. Duncan has also lost his wife and is being cared for by Bianca.

Bianca returns from her mother's grave. She is delighted that the Hero is alive and remembers their promise to adventure together again. The childhood visit to Lenoire becomes part of a long conversation as the two friends catch up through the night.

The next morning, Duncan confides that Bianca is his adopted daughter and speaks about his wish for her happiness. At breakfast, Bianca offers to help find the Water Ring. Accept, finish the village's shopping and searches, then speak to her when ready to leave.

Purchase guide: Mountain Village

Bianca returns with her earlier development and needs equipment suited to the current enemies. Check any weapons and armor stored or transferred from her childhood visit. The **Staff of Antimagic** from the volcano is a useful available weapon for her.

Weapon counter

Weapon	Price	Buying advice
Poison Knife	900 G	The 24-attack paralysis knife, also labeled Poison Needle. Check its properties when purchasing.
Sledge Hammer	1,800 G	A focused weapon for a compatible physical companion whose current gear needs help.
Broad Sword	2,000 G	Check Papas' Sword and the intended user's eligible equipment.
Snake Sword	3,900 G	A larger focused-weapon investment within the current party's budget.
Battle Axe	4,000 G	Consider for an eligible strong attacker.
Sword of Malice	4,400 G	A useful attack weapon and item-use spell option for a compatible user.

The paralysis knife is a separate weapon from the 1-attack instant-kill needle sold for 2,900 G in earlier towns. Its attack value and effect help identify the correct purchase.

General store

Item	Price
Medical Herb	8 G
Antidote Herb	10 G
Holy Water	20 G
Wing of Wyvern	25 G
Full Moon Herb	30 G
Leather Hat	65 G

Give Bianca useful headgear and body protection, then place herbs with her so she has a recovery action while the Hero attends to another job. The Waterfall Cave contains a **Robe of Serenity**, which will provide a valuable free body piece during the trip.

Short training outings can help Bianca catch up, especially toward **Bikill at level 13**. Keep the Hero and a dependable companion available while she develops. If Return moves the borrowed boat back to Salabona during a shopping trip, board it there again for the northern river.

Opening the gate

With Bianca travelling alongside the party, board the boat and return to the Water Gate. She opens it and lets the journey continue north. Follow the river into the lake and approach the waterfall entrance to reach the next cave.

6.8 Waterfall Cave: treasure route and the Ring of Water

The descent and the bridge view

Enter through the waterfall and follow the entrance passage south to the stairs. On the next floor, work around the water to the next descent. Continue west at the lower junction and take the onward stairs.

The route opens onto a bridge across the waterfall. Bianca remarks on its beauty and the excitement of travelling together again. A chest can be seen on a lower ledge, providing a reason to explore the connected drops farther ahead.

Cross the bridge into the next cave chamber. The pale, shallow water is walkable. Use it to work around the pool toward the northwestern route, where stairs and a nearby hole offer different floor connections.

The Robe of Serenity detour

Take the **hole** near that route. After the first fall, use the southern doorway and walk along the exterior ledge to the chest seen from the upper bridge. It contains the **Robe of Serenity**.

Equip it on Bianca if it improves her current protection. Return through the doorway and drop through the next hole. The nearby upward stairs reconnect with the earlier room. For the onward route, take the northern passage and follow its stairs down.

The deepest chest and hidden ring room

Follow the lower route south to another exterior bridge. Cross the walkable shallow water and work around the rock toward the southern connection. Take the eastern branch and climb onto the separate rock ledge to reach the stairs leading farther down.

The deepest chest contains **Elven Medicine**. Collect it and retrace the stairs to the lower exterior pool.

Wade toward the small beach near the waterfall. Search the underwater chest for **1,200 G**, then enter the concealed opening behind the falls. The **Ring of Water** is inside that room. Collect it and complete Bianca's conversation about the approaching wedding.

Achievement Alert: The Second Ring (3 points)

RA 61375
Requirement: Collect the Ring of Water
Enter the concealed room behind the waterfall and collect the Ring of Water, then finish Bianca's conversation before returning to Salabona.

This ring is obtained through the route and hidden room. Restore the party as needed, then use Outside or retrace the cave to leave.

Waterfall Cave collections

Lower bridge ledge: Robe of Serenity, reached after the first drop and southern doorway.

Deep eastern stair detour: Elven Medicine.

Waterfall pool: 1,200 G in the underwater chest.

Hidden room behind the falls: Ring of Water.

Return to Salabona with both friends recovered and the ring available for Ludman's handover.

6.9 Choosing Bianca or Flora

Marriage checkpoint: both bride routes

After the Waterfall Cave, return to Salabona and make an **ordinary in-game church save before handing the Ring of Water to Ludman** and keep that pre-choice file unchanged. Use another adventure slot for the route being played. Confirm each achievement in the achievement list before reloading the protected file.
Bianca's branch requires the **Hero and Bianca alone at Alcapa's inn** for **Let's Cuddle**. Flora's branch requires **both of Ludman's later deliveries**, including the mountain courier, for **Special Delivery**. Store every other companion with Ruida or Monster Gramps so Bianca's entire travelling party has exactly two members. Finish that inn stay before entering Granvania. With Flora, collect the **2,000 G courier chest at Telepador** and **Water Flying Clothes on the upper western mountain route**, both before Granvania. The 2,000 G wedding gift is separate from those deliveries.
Complete the alternate branch's required events, then reload the pre-choice save and choose the wife intended for the main journey. The wedding ceremony completes **'Til Death Do Us Part**, while these two branch events need their own visits.
For a Bianca main route, complete Flora's delivery branch first and then reload for Bianca. For a Flora main route, complete Bianca's Alcapa stay first and then reload for Flora. Keep the protected save until both branch achievements have registered. Use only ordinary in-game saves in separate adventure slots throughout this Hardcore branch workflow.

Achievement Setup: Let's Cuddle

RA 61379
Missable. On Bianca's branch, store all other companions and stay at Alcapa's inn with exactly Hero and Bianca in the entire travelling party before entering Granvania.

Achievement Setup: Special Delivery

RA 61381
Missable. On Flora's branch, complete her jar-permission errand and collect both later courier gifts at Telepador and the upper western mountain before Granvania. For a Bianca main journey, finish this full delivery branch first, then reload the protected pre-choice church save and marry Bianca. For a Flora main journey, finish Bianca's inn scene first, then reload and marry Flora.

The evening before the choice

Present the Ring of Water at Ludman's mansion. He accepts it and begins arranging the wedding. Flora notices Bianca and asks about the friendship between her and the Hero.

Ludman gives the Hero the night to decide between **Bianca** and **Flora**. Bianca stays in his small guesthouse, while the Hero has a room at the inn. Walk around town during the restless night and speak to the people involved.

Andy is thinking of Flora, Bianca tries to set her own feelings aside, and Ludman reassures the Hero that he will sponsor the wedding with either choice. When the conversations are finished, speak to the innkeeper and rest.

Achievement Setup: I'm Flattered, But...

RA 61377
Missable. Keep the protected church save. During the morning proposal selection, speak to Ludman himself before confirming either bride and explore his proposal response. Check the achievement list while the choice remains open.

The next morning, return to the mansion. While the proposal choice remains open, speak to **Ludman himself** and try declaring love for him before approaching either prospective bride.

Achievement Alert: I'm Flattered, But... (2 points)

RA 61377
Requirement: Declare your love for another
Missable. Speak to Ludman during the morning bride-selection scene and choose the response that proposes to him. Finish his flattered refusal before confirming either woman. Keep the pre-choice church save and check registration before committing.

Speak to the woman the Hero will marry and confirm the choice. This decision selects the bride for the remainder of the adventure.

6.9.1 Party availability, spell progression, and route differences

Bianca carries her existing growth into the married journey and can continue developing during the second generation. Her useful spells include **Bikill at level 13**, **Stepguard at 17**, and **Bounce at 18**. The earlier reunion has already provided time to train and equip her.

Flora joins with **Healmore at level 10**. During this part of the SNES adventure she has restricted command control and remains at level 10. She becomes fully trainable later. Her eventual spell list also includes strong fire magic, support, and additional healing.

Plan the active party around those immediate conditions. Bianca can take directly assigned actions as she grows, while Flora's early role works alongside a dependable combat roster. Give either bride suitable protection and keep recovery distributed among the available members.

Bride	Immediate party role	Route detail
Bianca	Existing level and training continue, with direct actions and developing offensive and support magic.	Optional Alcapa inn visit after the wedding and a visit to Duncan.
Flora	Starts with Healmore and restricted level-10 behavior during the current generation.	Complete Ludman's jar inspection before beginning the unrestricted sea journey.

Both choices provide the wedding, the Zenithian Shield, and access to Ludman's ship. Choose the character whose story and immediate party role appeal to the player, then follow the relevant preparations below.

6.9.2 Wedding preparations, Silk Veil, and the ceremony

After the decision, Ludman asks the Hero to collect the **Silk Veil** ordered from the Mountain Village craftsman. Travel back by the river and speak to the general-store owner in the village's cave shop to

receive it.

If marrying Bianca, visit Duncan to share the news. Finish any remaining village searches or preparations, then return to Salabona with the veil.

Enter Ludman's small guesthouse, where the bride is preparing. Present the veil and escort her to the church. Henry and Maria arrive to celebrate with the couple. Complete the ceremony's conversations and vows, including the exchange of the two rings.

Achievement Alert: 'Til Death Do Us Part (5 points)

RA 61378
Requirement: Get married
Complete the wedding ceremony with the chosen bride. Keep the protected pre-choice save for the other marriage branch's separate achievement event.

The celebration continues through the night. The following morning, the new wife joins the Hero for the next part of the adventure. Inspect her equipment and the returned rings before leaving town.

The **Ring of Flames** and **Ring of Water** each provide an elemental attack when used through Item during battle. Keep them with an available user to add fire or cold damage while conserving spell MP.

6.9.3 Post-wedding gifts, ship access, and what the choice does not change

Visit Ludman after the wedding. Henry has told him about the search for the legendary warrior, and he opens the two gift chests for the couple. The left chest contains **2,000 G**, and the right contains the **Zenithian Shield**.

The **2,000 G in these wedding chests** is the wedding gift. Flora's **Special Delivery** requires the two later courier presents at Telepador and on the upper western mountain route.

Collect both gifts and keep the shield with the important equipment for the search. Ludman also gives access to his ship at **Port Selmi**, allowing the party to choose its own sea routes.

With **Flora**, finish her request to travel and Ludman's additional test. He supplies access to a shrine west of the Mountain Village, on the island reached by the borrowed boat north of Salabona. Flora opens its door. Inspect the jar and observe its peaceful **blue** light, then report the color to Ludman. Complete the conversation granting permission for her to continue travelling.

Achievement Setup: Let's Cuddle

RA 61379
Missable. Before Granvania's pregnancy scene, store every other human with Ruida and every other monster with Monster Gramps. Hero and Bianca must be the only two members of the entire travelling party for the Alcapa inn stay.

With **Bianca**, an optional visit to Alcapa's inn provides a quiet scene recalling the childhood stay. Put the Hero and Bianca alone in the entire travelling party for that stay, storing all other companions with Ruida or Monster Gramps. Stay at the inn and complete the nighttime scene before entering Granvania. A return to the Mountain Village also lets them visit Duncan after the wedding.

Achievement Alert: Let's Cuddle (3 points)

RA 61379
Requirement: Have a romantic getaway with Bianca
Missable. After marrying Bianca, stay at Alcapa's inn with Hero and Bianca as the entire two-person travelling party. Store all other companions with Ruida or Monster Gramps and finish the scene before Granvania removes her from the party. On a Flora main route, confirm this achievement, reload the protected pre-choice church save, and choose Flora.

Restore the travelling roster and use the depository if possessions need rearranging. The 2,000 G gift can fund a useful upgrade or remain available for recovery and the next region's purchases.

6.10 Marriage-region treasure and optional-objective checklist

Before taking the ship from Port Selmi, account for the region's searches, event rewards, and ring handovers:

Collections from Port Selmi to the wedding

Port Selmi: Two Small Medals, 100 G in the church flowers, 50 G upstairs at the inn, and Silk Apron. Collect the 1,500 G village-job advance.

Kabochi: Armband of Sacrifice, Strength Seed, Leather Hat, Magic Water, and two Small Medals. Collect the remaining 1,500 G after resolving the creature problem.

Western cave: Ground-search Small Medal, Stone Axe, Iron Helm, reunited panther, and Papas' Sword. The trapped chest has its own possible Small Medal reward.

Ruraphin: Two Small Medals, Wing of Wyvern, Acorn of Magic, Agility Seed, Medical Herb, and Magic Water. Complete the Rura Moon Herb errand and learn Return.

Travel errands: Henry and Maria's wedding visit, the roadside well's Small Medal, and the southern cave chest's Small Medal. Purchase the Wayfarer's Map when affordable.

Salabona searches: Iron Shield, Small Medal, Intelligence Seed, and Silver Barrette.

Volcano: 450 G, Staff of Antimagic, Iron Helm, Defense Seed, 1,500 G, and Ring of Flames. The trapped chest is a separate optional encounter.

Mountain Village: Strength Seed, Medical Herb, two Small Medals, and Bianca's river-gate help. The Demon Jar is an optional battle.

Waterfall Cave: Robe of Serenity, Elven Medicine, 1,200 G, and Ring of Water.

Wedding: Silk Veil, both rings returned, 2,000 G, Zenithian Shield, and ship permission. Complete the jar inspection with Flora when that route is chosen.

Keep **Bianca's Ribbon** safe after the panther reunion and retain the Zenithian equipment collected so far. Reassign useful weapons and armor, prepare the bride and developing companions, and distribute recovery across the next active lineup.

Return to Port Selmi during the day and speak to the man guarding Ludman's ship. Confirm the Hero's identity to board. The ship and the Wayfarer's Map open the next stage of exploration across the inner

sea.

7 Second Generation: The Road to Granvania

Achievement Setup: Special Delivery

RA 61381
Missable. With Flora, collect both courier gifts before entering Granvania: 2,000 G at Telepador and Water Flying Clothes on the upper western mountain route. Keep the protected pre-choice church save until both bride achievements register. On Bianca's branch, complete the two-person Alcapa inn stay before the Granvania visit that removes her from the party.

The ship makes the journey feel much larger. The towns already visited remain useful for recovery and supplies, while the southern desert and islands offer new companions, valuable equipment, and another lead in the search for the legendary warrior. Beyond them, the eastern mountains hold the route to Granvania.

Prepare the travelling roster before sailing. Equip the bride and the companions who will handle the next encounters, keep healing and revival available, and leave some inventory space for the discoveries along the mountain road.

7.1 The first sea journey and optional coastal stops

Leaving Port Selmi

At the docks, confirm the Hero's identity to the man beside Ludman's ship. Visit the tavern for the reports of a southern desert kingdom with a shrine to the legendary warrior, then board when ready.

Steer with the directional pad and use the Wayfarer's Map to identify the desert south of Port Selmi. Reefs define the area currently open to the ship. The inner sea has several possible landings, and the route toward Telepador follows the accessible southern coastline.

Sea encounters have their own opponents and can consume recovery resources before the party reaches land. Keep the active members healthy and choose a convenient town or inn stop if supplies run low. A developing companion can travel in the wagon while a dependable front line handles the voyage.

The desert oasis

Land by the southern desert and look for the small pool surrounded by trees toward its eastern side. Enter the **Desert Oasis** and speak to the old man. He points toward **Telepador** to the west and the Medal King's island off the southeastern coast.

Search the oasis pot for a **Small Medal**. The oasis gives a useful landmark for the desert approach, and that medal contributes to the equipment choices at the nearby island.

Choosing the next stop

The Medal King's island and Telepador can be visited in either order. A visit to the island first lets the party examine the exchange equipment before spending more gold on defensive upgrades. Telepador provides the story lead needed for the eastern journey.

If earlier town errands remain, use the ship and available Return destinations to finish them while the party still has convenient access to the western region. Keep the purchased map, important rings, Bianca's Ribbon, and collected Zenithian equipment safe with the travelling party.

7.2 Medal King Castle, islands, shrines, and travel planning

The island and its companions

Sail to the small island southeast of the desert and enter the castle near its center. The surrounding encounters include useful recruitment prospects such as **Curer** and **King Slime**.

Curer begins with Healall and develops further recovery and support. King Slime brings its own growth and revival options. Either can be worth pursuing when the roster needs another specialist. Keep the active party prepared for the island's heavier groups while training or attempting recruitment.

The castle has a depository, allowing the party to withdraw stored medals and rearrange possessions. Its locked treasure area contains three chests reserved for later key access.

Exchanging Small Medals

Achievement Setup: King Metal Shield

RA 61422
Reserve **43 unspent Small Medals** for the shield. Each exchange spends medals, so smaller purchases reduce the balance available for this reward. Delay them while building the shield fund, or allow for collecting their costs again.

Speak to the **Medal King**. He adds carried medals to the account and offers the equipment exchange. Each purchase spends the listed number of medals, so check the remaining balance before confirming a reward.

Medal King equipment exchange

Reward	Medals	Planning advice
Combat Pajamas	5	A body-armor option for an eligible wearer. Compare the active party's current equipment.
Mysterious Bolero	10	Converts some magical punishment into MP for an eligible wearer.
Sword of Miracles	16	A strong physical weapon that restores HP from part of the damage inflicted.
Mystic Armor	21	Restores HP after battle turns and provides useful protection for a compatible companion.
Falcon Sword	30	Two attacks from an attack action, useful with an eligible strong physical user.
King Metal Shield	43	A major defensive reward to plan for when the medal balance is sufficient.

Once **43 unspent medals** are available, purchase the **King Metal Shield** from the Medal King and collect it. Return on a later visit if the current balance is still below the price.

Achievement Alert: King Metal Shield (4 points)

RA 61422
Requirement: Purchase the King Metal Shield
Spend **43 Small Medals** at the Medal King's exchange and collect the shield. Reserve that unspent balance while planning other rewards.

The **Sword of Miracles** is a tempting immediate improvement when the party has 16 medals. Its attack and recovery property can help a frequently attacking companion through the mountain encounters. Saving toward **Mystic Armor** provides another strong option when body protection is the more urgent need.

For example, a balance of 20 medals leaves four after a Sword of Miracles purchase. Consider the next reward before spending the balance, and give the chosen equipment to the companion whose role benefits most from it.

Fixed treasure searches and ordinary enemy drops provide opportunities to build the account as the journey continues. Use the current balance as the basis of the purchase plan, with the next dungeon's supplies and equipment already in good order.

Before the eastern mountain journey

- Collect the Desert Oasis Small Medal.
- Visit the Medal King and review the exchange balance.
- Assign any purchased reward to an eligible travelling companion.
- Prepare the bride, healers, and reserves for the longer land route.
- Visit Telepador for its searches and the Zenithian Helmet event.

7.3 Telepador: desert approach and the Zenithian Helmet test

The desert castle and its searches

From the oasis, travel west across the desert to Telepador. Visit during the day to enter the castle and meet its queen. The town's services give the party a useful chance to recover before the longer eastern crossing.

Collect the accessible finds as the party explores:

Wing of Wyvern: A pot in the basement of the weapon shop.

Defense Seed: The left pot in the castle kitchen.

Small Medal: Search the well in the lower garden area.

Demon Jar: The other kitchen pot begins an optional encounter. Prepare the active party before searching it.

The kitchen's trapped pot can use dangerous magic. Keep available revival and recovery if pursuing the battle, and collect the Defense Seed separately from that optional encounter.

Achievement Setup: Special Delivery

RA 61381

Missable. Collect this Telepador courier's 2,000 G, then collect the Water Flying Clothes from the courier before the upper western mountain cave. Finish both deliveries before Granvania. The wedding-house 2,000 G is a separate gift.

With Flora as the Hero's wife, a courier near the castle entrance brings a chest from Ludman containing **2,000 G**. Speak to him and collect the delivery before continuing the desert visit.

Purchase guide: Telepador

Consider the rewards bought from the Medal King and the active party's current equipment before spending. Suitable protection and dependable recovery matter throughout the coming mountain dungeons.

Weapon shop

Weapon	Price	Buying advice
Staff of Force	2,500 G	Uses MP to support its attack property. Consider the intended user's other MP duties.
Morning Star	3,000 G	Group coverage for a compatible companion.
Battle Axe	4,000 G	A focused upgrade for an eligible physical attacker whose present weapon needs help.
Sword of Malice	4,400 G	45 attack and an item-use offensive spell for a suitable wearer.
Saw Blade	1,200 G	Check the physical recruit's current weapon before buying this intermediate piece.
Steel Fang	2,000 G	Compare with the panther's current gear and the free fang from Reinhart.

Armor shop

Equipment	Price	Buying advice
Breastplate	1,000 G	Check the free Santa Rosa piece and existing body-armor assignments.
Cloak of Evasion	3,000 G	Its evasion property can help an eligible wearer during ordinary encounters.
Silver Mail	4,800 G	A substantial body upgrade for a compatible physical companion.
Lace Bisuche	5,500 G	Compare with the bride's present robe and the free piece available in Granvania.
Magic Shield	3,400 G	Useful protective properties for an eligible member facing the route's elemental attacks.
Silk Hat	2,000 G	A possible headgear improvement for a suitable user. Check the wedding veil and current hats first.

Improve the active member taking the heaviest damage, then review the reserves. A useful group weapon and a reliable healing companion make the ordinary journey comfortable. Leave enough gold for resting and the next town's purchases.

Queen Isis and the guarded helmet

Explore the castle's rooms and speak to the scholars and soldiers. They describe Telepador's connection with the legendary warrior and the equipment protected here. Find **Queen Isis** in the lower garden and speak to her.

Achievement Setup: Not the Hero

RA 61380
Missable. During this second-generation visit, have the Hero attempt the helmet fitting with Queen Isis. Complete his failed test before continuing to Granvania and before the third-generation helmet visit with the Son.

She leads the party to the sealed shrine guarding the **Zenithian Helmet**. Follow her through the opened door and down the stairs, then examine the helmet when invited to try it. The attempt fails, and the helmet remains in the shrine.

Achievement Alert: Not the Hero (3 points)

RA 61380
Requirement: Try on the Zenithian Helm
Missable. Follow Isis into the shrine and examine the helmet for the Hero's failed fitting during the second generation. Complete this test before Granvania.

Return to Isis in the garden and explain the search. She recognizes Papas' name and tells the Hero that he was King of **Granvania**, across the sea to the east. Finish the conversation and the castle searches, then return to the ship with that destination in mind.

7.4 Mountain Cave, west side: ascent, treasure, and resources

Ned's Inn at the foot of the route

Sail east along the accessible coast until reaching the small landing and building at **Ned's Inn**. Rest and record the adventure. The mountain road is long enough that both the active party and reserves deserve a full recovery before entry.

Mad Dragon can be recruited around the approach. Train new companions through manageable outings near the inn if the present lineup needs strengthening. Carry accessible healing and poison treatment, and keep revival available for the more dangerous encounters farther along the mountain.

Travel north across the marsh toward the mountain entrance. Use Stepguard when an available companion knows it, and check HP after any damaging ground crossed during the approach.

550 G, the first medal, and the Ring of Prayer

Follow the climbing route until two northward paths are available. The eastern branch and its ledges lead to a chest containing **550 G**. Return to the main route and continue on the western side toward the next junction.

Achievement Setup: Small Medal Collector

RA 61421
Record each fixed medal chest on this mountain route. Keep these chest collections separate from medals obtained through hidden searches or trapped-container battle rewards.

Take the southern branch at that junction for a **Small Medal** chest. Return and use the northward route, working along the eastern ledges to the **Ring of Prayer**. The ring provides a useful MP-restoration option, with its possible breakage worth accounting for when relying on repeated uses.

The underground rest and strength increase

Achievement Setup: The Mimics of Mountain Pass

RA 61383
Before searching these western pots, prepare to defeat the Demon Jar. Complete all six mountain traps: this western Demon Jar and the eastern descent's three Mimics and two Man-Eater Chests. Each trap battle is required for this achievement. Finish all six before leaving the mountain pass.

Descend the stairs near the ring route. The first room has two pots: one contains a **Small Medal**, and the other is a **Demon Jar**. Treat the trapped pot as a separate optional battle, required for **The Mimics of Mountain Pass**, and keep recovery ready before opening it.

The next stairs lead to an old woman's resting place. Accept the stay when she offers help. During the night, the Hero's wife notices a strange sound, and the woman explains that she has sharpened the weapon and ensured a deep sleep. The event gives the Hero a permanent **5-point strength increase**.

Achievement Alert: What's That Sound? (2 points)

RA 61382
Requirement: Spend the night deep under the mountain pass
Accept the underground old woman's offer to stay and finish the overnight scene with the Hero's wife and the strength increase.

Return to the mountain path after the rest. Follow the upper western route toward the cave entrance that continues to Chizod.

The last medal before Chizod

With Flora, collect the courier's Water Flying Clothes **before entering this upper western cave**. Check that the Telepador courier's 2,000 G has also been collected before continuing toward Granvania.

Inside that upper cave, go west first and open the chest for the route's third **Small Medal**. Return toward the junction, follow the northward passage, and climb the stairs.

Work around the raised ledges and continue past the travelling priest to the exit. With Flora, speak to Ludman's courier before entering the upper cave to receive **Water Flying Clothes**. Check the eligible wearer before assigning that gift. The clothes provide **55 defense and fire-damage reduction**.

Achievement Alert: Special Delivery (3 points)

RA 61381
Requirement: Collect both presents sent by Ludman for marrying Flora
Missable. Collect the Telepador courier's 2,000 G and this upper western mountain courier's Water Flying Clothes before Granvania. Confirm both pickups and registration. For a Bianca main route, reload the protected pre-choice church save after this achievement and complete Bianca's inn branch.

Western mountain collections

Cliff branches: 550 G, Small Medal, and Ring of Prayer.

Underground pots: Small Medal and the separate Demon Jar encounter.

Resting place: Accept the stay for the Hero's 5-point strength increase.

Upper cave: Small Medal from the western chest.

Flora route: Water Flying Clothes from Ludman's courier.

7.5 Chizod / Chizot: the village and the mountain crossing

A necessary overnight rest

The party emerges into **Chizod**, the village high in the mountains. As the Hero moves through it, his wife falls behind and becomes unwell. Speak to her and follow the scene as the townspeople help bring her to the inn.

After a night's rest she feels better and is ready to continue. Search the inn's barrel for a **Monster Lure**, then take time to explore the shops and the remaining houses.

Below the shopping building, collect a **Fighter's Hair** from the pot and a **Small Medal** from the barrel. The Fighter's Hair **doubles one selected companion's attack** when used in battle. Keep it with an available user for a suitable longer encounter.

Purchase guide: Chizod

The eastern descent contains useful equipment and cash, but its ordinary monsters and trapped containers also make protection and revival important. Upgrade the weakest active member and keep the recovery budget covered.

Weapon shop

Weapon	Price	Buying advice
Morning Star	3,000 G	Group coverage for a compatible companion.
Battle Axe	4,000 G	A focused physical upgrade when the user's present weapon needs improvement.
Sword of Malice	4,400 G	Useful attack and item-use options for an eligible member.
Flame Claw	4,700 G	A strong claw option for the panther or another compatible user, with an offensive item effect.
Sword of Slumber	6,300 G	An expensive focused weapon with a possible sleep effect. Cover essential protection first.

The **Flame Claw** is worth considering when the panther remains a frequent attacker. Keep useful earlier weapons available for other companions before selling replaced gear.

Armor shop

Equipment	Price	Buying advice
Silver Mail	4,800 G	Stronger body protection for a compatible physical member.
Lace Bisuche	5,500 G	Compare with the bride's current robe and the free Granvania piece ahead.
Blood Mail	6,500 G	A larger defensive purchase for an eligible user with sufficient funds.
Wizard's Robe	6,800 G	Spell protection for a suitable caster. Compare with the current body slot.
Magic Shield	3,400 G	Useful protection against elemental pressure for an eligible wearer.
Iron Mask	3,500 G	A worthwhile headgear target for a compatible member with a weak slot.

Speak to the residents for more news of Granvania, Papas, and Martha. Visit the northern church to save, then cross the long bridge east. Granvania can be seen beyond the mountain, and the next cave begins the descent toward it.

7.6 Mountain Cave, east side: descent and hidden treasure

Achievement Setup: The Mimics of Mountain Pass

RA 61383
Check that the western Demon Jar has been defeated. Defeat all three Mimics and both Man-Eater Chests on this descent, including the upper return loop, before leaving for Granvania. Keep recovery and revival available for each trap.

The first cash and trapped chest

Descend the first two stair connections from the Chizod side. Near the pool, take the northeastern branch to two chests. The left holds **1,500 G**, and the right is a **Mimic**. Choose the optional battle, required for **The Mimics of Mountain Pass**, only with a healthy party and useful recovery available.

Mimics can use dangerous instant-death magic, including Defeat. Their defeat can provide a **Small Medal**. Keep track of fixed medal chests separately from these battle rewards while collecting the mountain's treasure.

Return to the main stairs and take the southwestern branch for a fixed **Small Medal**. Continue along the southeastern route, speaking to the traveller if desired, then leave through the exterior opening and drop to the ledge below.

Rogue Armor and the middle-floor branches

Enter the next opening, work west and south through its passage, and take the next exterior drop. The ledge chest contains **Rogue Armor**, also called Roaming Armor. It is cursed and affects the wearer's controllability, so keep it unequipped while arranging the ordinary travelling loadout.

Return through the ledge's opening to the main chamber. Its northern side branch leads to a **Leaf of the World Tree**. Return to the route and work east for a paired set containing a **Mimic** and a fixed **Small Medal**.

Continue south and take the western exterior doorway to another **Small Medal** chest on the lower ledge. Re-enter through the opening behind that ledge, follow the passage north, and climb back to the main third-floor chamber. Take its eastern passage to the chest containing **270 G**. Follow the exterior connection around the cliff to the next cave opening.

The Bomb Stone and news of Sancho

Continue through the lower passages to the junction with stairs and a nearby drop. Use the western or blue-tiled stair branch for a chest containing a **Bomb Stone**. Return to the junction after collecting it.

The southern exterior branch has a bard who remembers a traveller named **Sancho** on his way to Granvania. His account gives the Hero a welcome connection with the household left behind in childhood.

1,600 G and the hidden Staff of Punishment

Take the eastern stair route and climb through the connected rooms to the chest containing **1,600 G**. Keep climbing for the next room's optional **Mimic**, required for **The Mimics of Mountain Pass**.

On that same upper floor, walk **east through the apparent wall** to reach the hidden side room. Its chest holds a **Staff of Punishment**, providing a Tornado effect when used as an item by an appropriate user.

Achievement Alert: Hidden Treasure - Mountain Pass (5 points)

RA 61384
Requirement: Find the hidden treasure in Mountain Pass
Walk east through the apparent wall on the upper return-loop floor and open the hidden room's chest for the Staff of Punishment.

Climb once more to the paired chests. One contains a **Wing of Wyvern**, and the other is a **Man-Eater Chest**. Defeat that chest for **The Mimics of Mountain Pass**. The onward upper connection loops back toward the Chizod side. For the route to Granvania, retrace the stairs to the room with the 1,600 G chest and the nearby drops.

The final drop and ground-level exit

Use the descent opening from that room, continue south outside, and drop to the mountain's lower ledge. Open the chest for a **Stone of Life**, then enter the nearby cave opening.

The first accessible chest inside contains an **Agility Seed**. The other is another optional **Man-Eater Chest**, required for **The Mimics of Mountain Pass**. Open and defeat this final chest, then check that all six mountain trap battles have been completed.

Achievement Alert: The Mimics of Mountain Pass (5 points)

RA 61383
Requirement: Defeat all three mimics, both man-eater chests, and the demon jar in the mountain pass
Defeat the western Demon Jar, all three eastern Mimics, and both eastern Man-Eater Chests, including the upper return-loop chest and this final chest. Confirm all six victories before leaving the pass.

Follow the southern route out to the countryside and head north toward Granvania.

The descent also offers recruitment opportunities such as **Messala**, **Minidemon**, **Mad Dragon**, and the very rare **Metal Babble**. Pursue them through encounters the party can handle comfortably, with dependable recovery ready.

Achievement Alert: Monster Hunter (5 points)

RA 61416
Requirement: Recruit ten unique monsters
Use the Chizod and eastern mountain encounters to add missing species if needed. This unlocks when the total reaches **ten distinct recruited species**, including stored monsters, and may register earlier. Count each species once across the roster, regardless of individual nicknames.

Eastern mountain collections

Upper branches: 1,500 G and the fixed Small Medal.

Exterior drop: Cursed Rogue Armor from the ledge chest.

Middle route: Leaf of the World Tree, two fixed Small Medals, and 270 G.

Lower stair branch: Bomb Stone.

Upper return loop: 1,600 G, hidden Staff of Punishment, and Wing of Wyvern.

Final drop: Stone of Life, followed by Agility Seed inside.

Optional battles: Three Mimics and two Man-Eater Chests along the route, with battle rewards recorded separately. Defeat all five and the western Demon Jar for **The Mimics of Mountain Pass**.

7.7 Granvania / Granbania: Sancho, Ojiron, family, and castle searches

The castle town and Sancho's house

Granvania's town lies within the castle walls. Enter the outer grounds, then visit the small house on the eastern side before the formal audience. Important possessions carried by the Hero's wife can be transferred to an available companion before the next scene.

Search the house's pot for an **Acorn of Life** and the dresser for **Boxer Shorts**. Speak to the man living there. It is **Sancho**, who recognizes the young master he last knew as a child and is overwhelmed to see him alive.

After learning of the marriage, Sancho leads the couple to **Ojiron**, Papas' younger brother and the acting king. Ojiron recognizes his nephew. During the audience, the Hero's wife becomes unwell and is taken to the royal rooms.

The examination explains her recent exhaustion: she is pregnant. She remains in Granvania to rest, and the active party needs another member for the expedition ahead. Retrieve any necessary supplies, then prepare a suitable companion from the travelling roster.

Royal-room and terrace finds

Once the scene has finished, explore the available rooms:

Stone of Life: One of the dressers in the royal sleeping rooms.

Lace Bisuche: Another dresser in the same group of rooms.

Defense Seed: The dresser in the adjoining royal room.

Small Medal: Search the far northeast corner of the terrace reached from those rooms.

Keep the Stone of Life with an available companion and inspect the free clothing's eligible users. The terrace medal is a ground search, so examine the corner before returning downstairs.

Town-floor searches and the concealed treasure room

The item shop has an **Intelligence Seed** in its barrel. Reach the shop's side or rear area to perform the search. West of the church, examine the row of pots for a **Strength Seed** and another **Small Medal**.

East of the church, approach the large staircase. Walk into the wall beside and below the steps to find a concealed room. Its three chests contain a **Ring of Prayer**, **Naughty Underwear**, and **Hat of Happiness**. Collect all three before returning to the public hall.

Achievement Alert: Hidden Treasure - Granvania (5 points)

RA 61385
Requirement: Find the hidden treasure in Granvania
Enter the concealed room beside and below the staircase east of the church. Open all three chests and collect the Ring of Prayer, Naughty Underwear, and Hat of Happiness before leaving the room.

The Hat's walking MP recovery can help a compatible caster. Compare the clothing with the wearer's current equipment and keep the additional Ring of Prayer safe as a recovery resource.

The soldier rooms on the next floor also contain a **Small Medal** in the eastern bathing-room dresser. Complete these searches as access to that floor opens. The remaining locked treasure rooms belong to a later key visit.

Purchase guide: Granvania

The shops offer strong equipment for the trial and tower ahead. Consider the bride's temporary absence, the available free clothing, and the replacement member's current loadout before spending.

Weapon shop

Weapon	Price	Buying advice
Bladed Boomerang	1,500 G	Useful ordinary-group coverage when an eligible active member still needs it.
Sledge Hammer	1,800 G	Compare with a compatible physical companion's current weapon.
Steel Fang	2,000 G	Check the panther's gear and the free Reinhart piece.
Snake Sword	3,900 G	A focused improvement for an eligible attacker when the budget supports it.
Flame Claw	4,700 G	A useful claw and item-effect option for a compatible companion.
Sword of Slumber	6,300 G	Stronger physical attack with a possible sleep effect. Cover essential recovery and protection first.

Armor shop

Equipment	Price	Buying advice
Dress of Radiance	8,800 G	Spell protection for an eligible wearer, with a substantial cost to plan around.
Silver Mail	4,800 G	Compare with existing body armor and Medal King purchases.
Silver Breastplate	5,000 G	A strong body option for a compatible active member.
Dragon Mail	7,500 G	Useful fire protection for an eligible wearer approaching the tower's stronger encounters.
Aeolus' Shield	4,700 G	Protective properties and an item-use option for a compatible shield user.
Iron Mask	3,500 G	Fill a weak headgear slot after assigning the free helmets already collected.

Item and monster-equipment counter

Item	Price
Wing of Wyvern	25 G
Bomb Stone	450 G
Fighter's Hair	600 G
Scale Shield	180 G
Fur Hood	400 G
Turtle Shell	2,500 G

Keep a Fighter's Hair available for a suitable longer battle if its attack-strengthening action fits the party's plan. Assign the free helmets, robes, and body pieces before buying duplicates. Recovery and revival should remain accessible after the shopping.

Ojiron's request

Speak to Ojiron after the family scene. He wishes to return the throne to Papas' son, but the chancellor insists on the traditional trial. The Hero must recover the **Symbol of Royalty** from the cave east of Granvania.

Complete the castle searches, speak to Sancho for more of Papas' history, and restore the active three. An **Orc King** can be recruited in the region and offers useful recovery as it grows. Leave the castle, cross the bridge east, and turn north toward the cave.

7.8 Cave of Trials: puzzles, the Symbol of Royalty, and Kandar

The four-door entrance

The cave opens with four doors and a room that repeats through different connections. Use the following sequence from the entrance:

1. Enter the **far-right door**, then leave through that same doorway.
2. Enter the **second door from the left**, then leave through that same doorway.
3. Return south toward the entrance area to reach the newly accessible descending stairs.

On the floor below, take the northward side route to the chest containing a **Small Medal**. Return to the main path and continue toward the reservoir door and nearby boulder.

The reservoir and Swordedge Armor

Opening the reservoir releases a current that sweeps the Hero toward the lower hole. Push the boulder upward into the same vertical line as the door's latch, a few squares directly below it.

Stand at the latch and open the door. The water pushes the Hero against the boulder, which holds him in place until the flow drains. The path to the chest is then accessible.

Collect the **Swordedge Armor**, also called Blade Armor. It provides useful defense and can return part of an attack's damage to the opponent. Check the eligible wearer and current body piece, then continue through the doorway behind the chest.

The floor plate and broken pillar

Descend to the room with two bird-marked plates. Step on the **left plate** to reveal the onward route and stairs.

On the lowest trial floor, approach the **broken pillar** on the western side of the row. Search it and examine its protrusion. A new marked tile appears. Step on that tile to form the path across the water, then follow it north to the **Symbol of Royalty**.

Collect the symbol and prepare to walk back. Magical escape is restricted while leaving this part of the trial, and an ambush waits on the return route.

Kandar and the Shield Hippo

Kandar and a **Shield Hippo** confront the party and demand the symbol. Kandar has about **600 HP**, while the accompanying Hippo has roughly **90 HP** and can block some physical attacks.

Recover the party before committing to damage. Upper or Increase helps with physical pressure, and a useful defense reduction can support the attackers. Kandar can heal himself, so maintain damage once the party is in a stable position.

The smaller guard can be removed early with suitable attacks or magic when its guarding slows physical progress. Then concentrate on Kandar, keeping healing available for a heavy hit.

After victory, retrace the reservoir route and the entrance rooms. Outside becomes available near the entrance area. Return to Granvania with the symbol and recover before the court events.

Cave of Trials collections

North side branch: Small Medal.

Reservoir chamber: Swordedge Armor behind the drained door.

Final trial room: Symbol of Royalty beyond the pillar puzzle.

7.9 Coronation, the twins, and the missing queen

Returning with the symbol

If the party returns at night, the castle guards direct the Hero to Sancho's house. Speak to Sancho and accept the rest, then visit the castle in the morning.

Speak to Ojiron and the chancellor to report the completed trial. Ojiron confirms that the Hero will become king. The preparations are interrupted when a maid announces that his wife is in labor.

Follow the scene upstairs, speak to her, then return downstairs when the attendants ask. Speak to Ojiron, Sancho, and the guards as the court waits. The maid eventually brings news of the birth.

Return upstairs to meet the **twins**, a boy and a girl. Choose their names and confirm them. The couple's conversation closes the family scene as the new mother rests.

The ceremony and nighttime search

The next day, return to the throne room. Complete the coronation and the greeting of Granvania's people. The celebration fills the castle through the evening.

Achievement Alert: A Kingdom of Your Own (5 points)

RA 61386
Requirement: Be crowned king
Complete the coronation in the throne room and the greeting of Granvania's people after returning with the Symbol of Royalty.

When control returns during the night, visit the royal bedroom. The queen is missing. Search **under the bed** to find the attendant and the twins in hiding. She explains that the queen sensed danger and had the children protected before the intruders took her away.

Sancho arrives, and the following council discusses the kidnapping. The chancellor has disappeared as well. Complete the conversations and begin checking the rooms opened by the new circumstances.

7.10 Flying Shoes, the Northern Shrine, and the Demon Tower approach

The chancellor's dresser

Visit the chancellor's now-accessible room northeast of the council area. Search the dresser for the **Flying Shoes**. Speak to Doris for her account of seeing him fly away.

The shoes lead to the northern region, but the party benefits from a full preparation before following. Choose three dependable members, equip them, and give each suitable recovery items. The Demon Tower restricts wagon access, so place the important battle supplies with those entering it.

Keep the Zenithian Sword and Shield, Bianca's Ribbon, the wedding rings, and other important possessions safe through the journey. Reassign needed items before a companion leaves the active party, and record a prepared adventure before undertaking the tower.

The shrine's recovery and saving services

Use the Flying Shoes outdoors to arrive near the **Northern Shrine**. Its inn and upstairs church provide recovery and saving. The residents report monsters travelling north with a human among them.

Rest and record the adventure. Check the active members' HP, MP, equipment, revival, and status-treatment options. A party around the low thirties with reliable healing has a comfortable foundation for the tower, although its hazards still deserve care.

Travel north from the shrine toward the Demon Tower once the chosen three are ready.

7.11 Demon Tower: moving floors, treasure, and gatekeeper battles

The three entrances and first teleporter

The tower has a large central entrance and smaller side doors. The left entrance leads to a spring that restores the leading companion's HP. Reorder the party when using it for another member, and check the remaining MP before relying on further healing spells. The nearby basement has a treasure hunter waiting for his brother.

Begin the main ascent through the **right-hand entrance**. Climb the stairs and approach the marked teleporter. A fixed **Leaonar** encounter blocks the way. Defeat it, recover as needed, and step on the tile to reach the next treasure area.

The early robe, seed, and medal

The first teleported room has two chests containing a **Wizard's Robe** and a **Strength Seed**. The **western pot** contains a **Small Medal**, while the **eastern pot** is a **Demon Jar**.

Assign the robe to a compatible companion if its spell protection improves the current loadout. Use or retain the seed according to the active attackers. Treat the trapped pot as a separate optional battle and keep revival available if opening it.

Defeat the **two Hawk Men** guarding the onward teleporters, then use either tile. A **Leaonar and Orc King** encounter waits near the next stairs. Continue upward after winning by taking the nearby ascent. The northern stair branch reconnects with the main entrance.

The spear room and eastern treasure loop

The next room appears open until metal spears rise from the floor as the party moves. Work around the revealed barriers to its chest, which contains an **Armband of Sacrifice**. This is another situational possession to keep available for an appropriate plan.

Take the **eastern stairs** for the treasure loop. Follow the route east and north, climb the connected stairs, and use the exterior doorway and descent to reach the three-chest room. Collect **880 G** and **Magic Water**. The third container is an optional **Mimic**.

Return to the spear room afterward. Its other staircase continues the main climb. This loop is worth completing before committing to the more hazardous upper passages.

Zombie Mail and the flame approach

Take the **western stairs** from the spear room and work around the floor opening to the next ascent. At the upper doorway, step outside for the chest containing **Zombie Mail**, then return and continue upward.

A small room on the next approach is exposed to dangerous dragon-head flames. Use the **exterior door and bridge** to reach the other side of this level and the safe stairs upward.

On the larger flame floor, stay behind the barriers and existing cover while moving toward the stairs to the rock room. Stepguard helps with damaging floor patches. The dragon-head jets require physical cover along their firing lines.

Dropping rocks to block the flames

In the upper rock room, first take the western and southern route to the two chests. They contain a **Leaf of the World Tree** and a **Small Medal**.

Return to the loose boulders and push several into the central opening. Some apparent rocks are **Bomb Crags**, so keep the party recovered while working through this area.

Descend to the flame floor again. Move the dropped rocks west and south into the lines directly in front of the dragon heads. Use each boulder to block a jet before crossing its path. Drop additional rocks from above if another firing line still needs cover.

Once the route is protected, reach the stairs on the far side and continue into the next upper section.

The bridge switches and isolated room

Climb to the level with the exterior bridge. The crossing is incomplete until its corridor controls have been operated. Continue upstairs to **Corridor Switch Number One**. Defeat the guarding encounter when it appears and operate the switch.

Use the nearby teleporter to reach the isolated room. Its **left chest** holds a **Wing of Wyvern**, the **right chest** is another **Mimic**, and the **pot** contains the tower's third fixed **Small Medal**. Operate **Corridor Switch Number Two** before taking the teleporter back.

Return downstairs and cross the newly connected exterior bridge. The chancellor lies on the route ahead. Speak to him for his confession about the agreement with the monsters, then continue toward the guarded chambers.

Restore the three active members before each confrontation. The tower's three main battles come in sequence, and the recovery plan needs to keep working across all of them.

7.11.1 Orc and Wyvern gatekeepers

The first guardian is the **Level 20 Orc**, with about **950 HP**. Its physical attacks and defense reduction can make a weakened companion vulnerable. Use Upper or Increase when protection needs restoring, and apply suitable support before settling into steady focused attacks.

Keep healing available as the Orc's HP is worn down. Victory awards **350 experience** and **300 G**, and a Fur Coat can appear as the battle-item reward. Recover before following the newly opened route west.

The next guardian is the **Level 35 Wyvern**, with about **800 HP**. Its offensive spells, breath, and healing create a different kind of pressure. Watch the condition of all three companions after an attack that reaches the group.

A successful defense reduction supports the physical attackers. Use equipment protection and an appropriate recovery action to handle the spells and breath, then maintain focused damage while the guardian occasionally restores its own HP.

Victory awards **450 experience**, with a possible **Wing of Wyvern** item reward. Heal before returning toward the middle connection and descending to the queen's chamber.

7.11.2 Jami, the final confrontation, and the generation transition

Speak to the Hero's wife, who is being held with **Jami**, also called Jahmi or Centarsus. She explains that the kidnapping was intended to lure the king away from Granvania. Finish the conversation and prepare for the battle.

Jami begins protected by a barrier that heavily reduces the party's attacks. Use **Parry** and necessary healing during that opening stage. Keep rare consumables available for the later part of the encounter.

After Jami boasts of his protection, the queen intervenes with a burst of light that breaks the barrier. Resume ordinary damage and useful support once the opening has appeared.

His offensive magic and cold breath can injure several companions. Maintain a dependable recovery member while the others attack. Restore the most threatened ally promptly, and use the second healer or accessible herbs when one recovery action is insufficient.

A successful defense reduction can speed the physical damage. **Fighter's Hair** strengthens an appropriate attacker when its item action fits the round. Protective equipment and repeated recovery from Mystic Armor, if already purchased, can help keep that attacker working.

Continue the attack-and-recovery rhythm until Jami falls. The victory provides **3,500 experience**. Jami recognizes the queen's light as a sign of the legendary warrior's bloodline, then uses his final spell. The Hero and queen are turned to stone before the rescue can bring them home.

Achievement Alert: Guardian of the Tower (10 points)

RA 61387
Requirement: Defeat Jahmi
Defeat Jami, also called Jahmi, after the queen breaks his barrier, then finish the concluding scene and generation transition.

The treasure hunters remove the statues, and the following scenes separate the parents while Granvania searches for its missing royal couple. This closes the second-generation route. The twins remain in Granvania's care as the years begin to pass.

7.12 Second-generation completion and carryover checklist

Complete the remaining searches before crossing the tower bridge to the guardians, or before advancing any earlier one-time court event that closes its local opportunity.

Sea and mountain collections

Desert Oasis: Small Medal from the pot.

Telepador: Wing of Wyvern, Defense Seed, and well Small Medal. The kitchen's Demon Jar is a separate optional encounter.

Flora delivery: 2,000 G near Telepador and Water Flying Clothes on the western mountain route.

Western ascent: 550 G, Ring of Prayer, three fixed Small Medals, and the Hero's 5-point strength event.

Chizod: Monster Lure, Fighter's Hair, and Small Medal.

Eastern descent: 1,500 G, Rogue Armor, Leaf of the World Tree, three fixed Small Medals, 270 G, Bomb Stone, 1,600 G, hidden Staff of Punishment, Wing of Wyvern, Stone of Life, and Agility Seed.

Optional mountain battles: Record rewards from the trapped containers separately from fixed medal chests.

Granvania and the royal trial

Sancho's house: Acorn of Life and Boxer Shorts.

Royal rooms: Stone of Life, Lace Bisuche, Defense Seed, and northeast terrace Small Medal.

Town and soldier rooms: Intelligence Seed, Strength Seed, pot Small Medal, and bathing-room dresser Small Medal.

Concealed room beside the stairs: Ring of Prayer, Naughty Underwear, and Hat of Happiness.

Cave of Trials: Small Medal, Swordedge Armor, and Symbol of Royalty.

After the kidnapping: Flying Shoes from the chancellor's dresser.

Demon Tower before the final chambers

First teleported room: Wizard's Robe, Strength Seed, and western-pot Small Medal.

Spear floor: Armband of Sacrifice.

Eastern treasure loop: 880 G and Magic Water, with a separate Mimic encounter.

Exterior ledge: Zombie Mail.

Upper rock room: Leaf of the World Tree and Small Medal.

Switch-room teleporter: Wing of Wyvern and pot Small Medal, with a separate Mimic encounter.

Route controls: Both corridor switches operated and the bridge opened.

8 Third Generation: Reunion and El Heven

The Hero's return brings a family together after years of searching. The children who were left in Granvania as infants have grown up with Sancho's stories and the hope of finding their parents. They now have their own part in the adventure, alongside the companions who travelled with the Hero before the tower.

Begin with the familiar services in Granvania. The new human companions, the Son's equipment, and the ship prepared by Ojiron give the party several useful choices for the next journey.

8.1 The years in stone, rescue, and the return to Granvania

The statue in the garden

After the tower, the treasure hunters sell the Hero's statue at an auction. A household places it outside as a good-luck possession. The scenes that follow show the family's child growing while the Hero remains unable to move.

Monsters eventually take the child away, leaving the household despondent. Seasons continue to pass around the abandoned statue. Eight years after the tower events, Sancho arrives with two children who recognize what they have found.

The twins break the curse

The Daughter uses the **Staff of Stoross** to restore the Hero. Sancho introduces the two children as his Son and Daughter. They have searched for him and want his help finding their mother.

Achievement Setup: A Stronger Curse

RA 61401
Keep the Staff of Stoross available for the search for the queen. At the Great Temple, use it on your wife's statue while her curse remains, before defeating Ivol. Make the attempt before Ramada for a safe point in that visit.

Complete the reunion conversations. The Daughter casts Return, bringing the family back to Granvania. The kingdom celebrates the missing king's return, and the Hero rests before the next morning's meeting with Ojiron.

The queen is still missing. The renewed search now includes the children and the information Granvania gathered while looking for the royal couple.

8.2 The twins, Sancho, Pippin, and rebuilding the active party

The family joins the journey

Leave the royal room and continue toward Ojiron. The twins meet the Hero on the way and insist on accompanying him. Finish their conversation to add both children to the travelling roster.

Achievement Setup: A Family Matter

RA 61410
Begin developing the Hero, Son, and Daughter now, then include your wife after her rescue. For the later family-only Mildrath attempt, store all monsters and leave Sancho and Pippin at the tavern. Use three active family members with any human reserve also drawn from the family. Develop the Son's healing and assign recovery items to the wife or Daughter. Prepare HP, MP, equipment, and supplies for both consecutive forms.

Achievement Setup: Heroic Trainer

RA 61411
Keep developing wild-recruited monsters alongside the children for a separate Mildrath attempt later. Build a durable physical role with Golem or Slime Knight and a healing role with King Healer or a developed Slime Knight. Inspect actual healing spells, HP, MP, and protection as they grow. Before that attempt, store every human except the mandatory Hero and keep him inactive. Use only wild-recruited monsters in the active positions through both forms. The Hero must perform no attack, healing, item, or substitute action. Rotate only within the eligible monster pool and check the achievement unlock before reloading a protected normal church save for another attempt.

Speak to **Ojiron**. Granvania's search has located Martha's birthplace, **El Heven**, on the northeastern continent. He marks the region on the map. Sancho explains that a ship is ready and that the tavern now offers services for arranging both human and monster companions.

Ruida and the expanded roster

Visit **Ruida** at the second-floor tavern to organize human companions. Speak to **Sancho** for his offer to travel, and meet **Pippin**, also called Pipin or Nello, in the room behind the inn. Return to the tavern to add available members to the travelling party.

Monster Gramps is also present. Arrange the roster and inspect the returning monsters' levels, spells, and equipment. The services make Granvania a convenient base for preparing several different lineups.

The new human companions

Companion	Available role	Preparation
Son	Physical combat, Zenithian equipment, and developing recovery and support spells.	Assign the collected sword and shield, then provide body armor and useful items.
Daughter	Developing offensive and support magic, with Return available for travel.	Give compatible protective gear and keep a recovery item accessible.
Sancho	Starts at level 20 with physical combat and useful support.	Inspect his equipment and spell list before selecting the active role.
Pippin	Starts at level 1 and develops as a physical fighter.	Supply suitable spare gear and begin with manageable training or accessible wagon experience.

Giving the children a comfortable start

Inspect the twins' current HP, MP, spells, and equipment. The trained monsters provide useful partners while the children develop. Equipment already purchased for eligible companions can be reassigned as the new lineup takes shape.

The Son learns **Increase at level 8** and **Healmore at level 12**, giving him useful support and recovery as he grows. The Daughter's **Outside at level 9** adds another way to handle eligible dungeon returns.

Use manageable field or sea battles for early training. Where the wagon is available, living reserves gain experience alongside the active members. Keep a dependable front line ready for stronger groups on the new continent.

If Granvania's concealed treasure room beside the first-floor stairs was missed, collect its **Ring of Prayer**, **Naughty Underwear**, and **Hat of Happiness**. Those are the same room's finds from the earlier visit, so check the existing inventory and storage before planning another purchase.

8.3 Zenithian equipment checklist and the son's role

The equipment recognizes its wearer

Give the **Zenithian Sword** and **Zenithian Shield** to the Son and equip them. The gear collected during the earlier search now has a wearer in the travelling party.

The **Zenithian Shield casts Bounce** when used as an item in battle. Choose that spell-reflection action deliberately and keep item-based recovery available. The **Zenithian Sword** can remove an opponent's magical effects through its battle item action, providing a response to defensive spell boosts.

The Son is the legendary warrior sought by Papas. His equipment and growing abilities make him valuable, and his low early level still calls for ordinary care with HP, recovery, and stronger enemies.

Zenithian equipment at the family reunion

Piece	Where it was found	Current action
Sword	Papas' hiding place beneath Santa Rosa.	Retrieve it from the current owner or storage and equip the Son.
Shield	Ludman's wedding gift in Salabona.	Give it to the Son and check the equipment assignment.
Helmet	The shrine guarded by Queen Isis in Telepador.	Return with the Son for the fitting and handover.
Armor	Its location is still part of the continuing search.	Use suitable purchased or found body armor for the Son meanwhile.

Preparing a flexible three-member party

The Hero and Son can share physical damage and recovery, with another companion providing offensive magic, stronger healing, or support. The Daughter is a useful developing caster, and the existing monster roster offers other combinations for specific encounters.

Keep active members' recovery items available and inspect their equipment after transfers. A strong weapon helps the Son attack, while suitable body armor and headgear help him survive the return visits and the journey toward El Heven.

Before the third-generation errands

- Speak to Ojiron and Sancho for the ship and Martha's birthplace.
- Visit Ruida and Monster Gramps to arrange the travelling roster.
- Assign the collected Zenithian Sword and Shield to the Son.
- Equip and recover the active party, including developing children.
- Record the adventure before beginning the return visits.

8.4 Reinhart revisited: Henry, Del, and family-related rewards

Henry and Maria's household

Return to Reinhart with the children available to accompany the visit. The guards recognize the Hero, and Dale welcomes him back. Upstairs, Henry and Maria are relieved to see their old friend again.

Their son **Del**, also called Collins, has inherited a familiar enthusiasm for pranks. Speak to Henry and the boy, then let him take the twins on a tour. When the children return without their guide, go to Henry's old childhood room.

Search the stool or square that concealed the stairs during the first-generation visit. Descend to find the boy in his hiding place. A servant returns him to the family. Go back upstairs and speak to him for the **Hat of the Wind**.

Achievement Alert: Just Like His Father (4 points)

RA 61388
Requirement: Acquire the Hat of Wind
Complete Del's hidden-stair prank, then return upstairs and receive the hat from him. Check the unlock after the handover.

The Hat provides a reusable Wing-of-Wyvern-like item effect. Give it to an available traveller and check the relevant destination before using it during a field journey.

The guarded Demon Armor chest

On the western side of Reinhart's castle grounds, a man guards a chest. Speak to him or approach the treasure to fight a **Kandar Henchman**, with about **500 HP**.

Achievement Setup: Kandar's Henchmen

RA 61419
Record this Reinhart grounds victory toward the three guards. The other two guard the chest behind Duncan's Mountain Village house and the exterior chest at Shahanna. Defeat each guard and keep all three victories in the saved adventure.

Prepare the active members before triggering the encounter. He can use Sleep, so keep another recovery or item action available if an important companion loses a turn. The Hero and a reliable attacker can maintain focused damage while the third member handles support and injuries.

Victory gives **750 experience** and **150 G**. Open the chest for **Demon Armor**. The armor is cursed. Keep it unequipped until choosing an intentional use and accounting for the curse-removal service.

Duncan and the Mountain Village reward

Return to Salabona and sail north to the Mountain Village. Visit Duncan and introduce the children. With Bianca as the Hero's wife, the household conversation concerns the continuing search for her. With Flora, Bianca is present for the return visit and is pleased that the Hero is safe.

If the Hero married Flora, speak to Bianca here in the Mountain Village during this third generation. If he married Bianca, visit Flora in the Salabona guesthouse and finish her conversation during this generation.

Achievement Alert: After All These Years (2 points)

RA 61390
Requirement: Check in on the woman that you didn't marry
Speak to the unchosen woman on the matching third-generation visit. Flora's husband checks on Bianca in the Mountain Village, and Bianca's husband checks on Flora in Salabona's guesthouse.

Behind Duncan's house, another **Kandar Henchman** guards a chest. Recover before approaching him and use the same reliable attack-and-healing plan. After the battle, collect **Silk Bisuche**, also called Silk Bustier, from the chest. Check the eligible user and current body armor before assigning it.

Achievement Setup: Kandar's Henchmen

RA 61419
Record the guard behind Duncan's house as the Mountain Village victory. Check the Reinhart grounds guard too, then finish the three-guard route at Shahanna's exterior chest later.

Family-visit rewards

Henry's household: Find the hidden-stair prankster and return upstairs for the Hat of the Wind.

Reinhart grounds: Defeat the guarded-chest henchman and collect the cursed Demon Armor.

Mountain Village: Visit Duncan, then defeat the guard behind his house and collect Silk Bisuche.

8.5 Northern Church, small shrines, and northeast exploration

The northern recovery point

The **Northern Church**, reached by the Flying Shoes during the tower journey, remains a useful resting and saving point. Its services help prepare the party for the northeast, and the available stronger weapons are worth comparing with the equipment already collected.

Northern Church weapon choices

Weapon	Price	Buying advice
War Hammer	6,500 G	60 attack for an eligible physical user. Compare with existing weapons before spending.
Ice Blade	9,000 G	70 attack for a compatible member whose current weapon needs improvement.
Zombie Killer	11,500 G	Extra damage against undead for a compatible attacker.
Spear of Zeus	13,500 G	85 attack for an eligible spear user when the party's budget supports the purchase.
Dragon Killer	15,000 G	A focused dragon-fighting weapon for an eligible physical member.

These are substantial investments. Inspect the Son's newly assigned Zenithian weapon and the Hero's existing equipment, then improve the member whose current offense or protection is holding the party back. Leave enough money for the next armor choices in El Heven.

The house where the Hero was restored

Board the ship prepared at Granvania and sail toward the small house on the southeastern island. This is the household where the Hero stood as a statue while **Gigo**, also called Jijo, grew up.

Speak to the residents for their account of the missing boy. Inside, search the dresser in the mother's room for a **Small Medal**. Collect it before returning to the ship.

The northeastern continent and small shrine

Follow Ojiron's marked destination toward the northeastern continent. The new sea and land encounters are stronger than the earlier western groups. Use trained active members while the children gain experience, and stop for recovery when the voyage becomes expensive.

On the voyage, visit the **Farthest Shrine** on the eastern peninsula of the large northern continent, north of El Heven's landmass. Its resident describes the **Crown of the Sun**, a helm said to protect its wearer against Megante. Three searches provide useful finds:

Intelligence Seed: The jar on the main floor.

Small Medal: Search the ground just below the water bucket beside the well.

Stone of Life: The chest downstairs.

Return to the boat and sail south toward El Heven's continent. Follow its eastern coast to the cave opening accessible from the water. That passage leads through the mountains to the lake beside El Heven.

8.6 Water Shrine / Water Cave: the passage to El Heven

The northern landing and Satan Helm

Sail into the cave with the ship. The boat and wagon remain available through the water passage. Keep poison treatment ready for enemies such as Zombie Knights, and check the party after a troublesome group.

Follow the main water route north past the first western branch. Land at the nearby dry passage and walk north, then west to the chest containing the **Satan Helm**.

The helmet is cursed. Collect it as treasure and keep it unequipped while using the ordinary protective gear assigned to the party. Return to the boat after the search.

The eastern medal branch

Continue east along the water and turn north toward the next junction. Take the eastern branch and its northward turn to the chest containing a **Small Medal**.

Retrace that side route to the main channel and continue west under the bridge associated with the earlier landing. Follow the connected waterways toward the final north-and-south junction.

The southern exit to the lake

The northern branch leads toward a sealed silver doorway. For the current journey, take the **southern channel** and leave through the cave's other end.

The exit opens onto the lake within the surrounding mountains. Sail south toward **El Heven**, also called Elhebun, and land for the town visit.

The northeast approach

The island household: Small Medal from the bedroom dresser.

Small shrine: Intelligence Seed, bucket-side ground Small Medal, and downstairs Stone of Life.

Water Shrine: Cursed Satan Helm from the northern landing and Small Medal from the eastern side branch.

Onward route: Southern water exit to the lake beside El Heven.

8.7 El Heven: family history, the Magic Key, and the Magic Carpet

The old couple and the four elders

El Heven is built above a network of lower paths. Climb the entrance stairs and explore the raised town, including the shops east of the inn. A resident directs the Hero toward the four elders.

Climb the long ladder to the old couple's room and search the pots for a **Defense Seed** and **Small Medal**. Their conversations recall Martha and the arrival of Papas. Continue toward the elders' chamber and speak to all four women.

They welcome Martha's son and explain the village's role in guarding the boundaries between the worlds. Its people's old power has weakened with time, but Martha possessed an unusually strong gift. They believe she was taken so that her power could be used to force open the way to the Demon World.

The elders' warning gives the search urgency. Rescue Martha and the missing queen while pursuing the means to reach that realm. Finish the village conversations, including the man with a cane who offers the hidden key and carpet if the party can find them.

Purchase guide: El Heven

The shops offer important upgrades for the next dungeons. Inspect the children's reassigned equipment and the trained monsters before choosing a purchase. Protective properties and a reliable recovery member are useful companions to stronger weapons.

Weapon shop

Weapon	Price	Buying advice
Sword of Slumber	6,300 G	A focused weapon with a possible sleep effect for a compatible user.
War Hammer	6,500 G	A physical upgrade for an eligible attacker whose current weapon needs improvement.
Steel Whip	7,400 G	Group coverage for a suitable wearer. Compare the party's existing attack patterns.
Ice Blade	9,000 G	70 attack for a compatible wearer who needs a stronger focused weapon.
Sword of Temptation	9,800 G	A stronger weapon with a possible confusion effect, subject to the user's equipment options.
Staff of Force	2,500 G	Its MP-consuming attack property needs a place in the intended user's resource plan.

The Son already has a strong free sword. Consider another active member's weaker weapon before spending on his replacement. An eligible physical monster or the Hero may gain more immediate help from the available focused upgrades.

Armor shop

Equipment	Price	Buying advice
Silver Breastplate	5,000 G	Compare with the user's present body armor and Medal King rewards.
Magical Armor	12,000 G	Stronger protection with resistance to spell damage for a compatible wearer.
Dress of Radiance	8,800 G	Spell protection for an eligible member whose present robe or clothing needs help.
Sage's Robe	12,000 G	A substantial caster-protection purchase for a suitable user.
Dragon Shield	7,100 G	Useful fire protection for a compatible shield wearer.
Helm of Wisdom	13,000 G	Strong head protection and an intelligence property for an eligible companion.

Choose a meaningful improvement for the member taking the most damage, and keep enough money for recovery. The Magic Key will soon open Granvania's 3,000 G chest, providing another useful contribution to this equipment budget.

The western ground-level chest

Return to the town entrance. Use the lower path all the way west, then turn north toward the chest visible beneath the raised rooms. Open it for the **Magic Key**.

Keep the key with the travelling party. It opens the red-framed magic locks encountered in earlier towns and provides access to several useful treasure rooms.

The passage beneath the walkways

Return to the entrance again and walk north beneath the raised town. Follow the lower paths toward the man beside a fire. His conversation includes the legend of a tower reaching toward the heavens.

Continue east and north through the lower opening, work west beneath the next walkway, then go north to the stairs near the water. Descend to the chest containing the **Magic Carpet**.

Open this chest and receive the Carpet before leaving the passage.

Achievement Alert: A Whole New World (3 points)

RA 61391
Requirement: Acquire the Magic Carpet
Open the stair-accessed chest beneath El Heven's walkways and collect the Carpet. Check the unlock after the pickup.

The carpet travels over suitable open land and water. Forests, mountains, and hills define its available routes. Leave the enclosed lake by ship or Return, then use the carpet from an open outdoor position when planning a wider field journey.

El Heven collections

Old couple's room: Defense Seed and Small Medal from the pots.

Western ground path: Magic Key from the chest beneath the raised town.

Lower eastern passage: Magic Carpet from the stair-accessed chest.

Elders: Complete all four conversations about Martha and the boundaries between worlds.

Recover and save before the return visits. The new key and vehicle make several earlier destinations more useful to the present party.

8.8 Newly accessible towns, islands, treasure, and monster recruits

The Magic Key treasure circuit

Use Return and the available sea routes to revisit the following rooms with the Magic Key:

Granvania: Open the second-floor magic-locked treasure room near the depository. Its two chests contain **3,000 G** and the **Meteorite Armband**.

Port Selmi: Enter the inn's dressing area behind the stage, open the eastern magic door, and climb to the chests containing a **Thorn Whip** and **Acorn of Life**.

Alcapa: Ask the woman at the northwestern bar to let the party through, then open the magic door behind the counter. Collect **15 G** and a **Stone Fang**.

Oracleberry: Open the magic-locked prison approach and speak to the accessible prisoner for his casino advice. The barred cells remain a later key objective.

The **Meteorite Armband doubles agility**. A healer who needs to act sooner or a companion assigned an important item action can make good use of it. Inspect the intended wearer and keep the remaining recovery roles covered.

Santa Rosa's stronger weapon stock

Santa Rosa's renewed weapon service offers the following choices:

Third-generation Santa Rosa weapons

Weapon	Price	Buying advice
Poison Knife	900 G	The 24-attack paralysis knife, also labeled Poison Needle. Inspect its properties when purchasing.
War Hammer	6,500 G	A stronger physical choice for a compatible companion with a weaker weapon.
Zombie Killer	11,500 G	An undead-focused upgrade for an eligible active attacker.
Spear of Zeus	13,500 G	85 attack for a compatible user with a weaker weapon and sufficient purchase money.
Dragon Killer	15,000 G	A specialized dragon-fighting choice when the current party's budget supports it.
Ice Blade	9,000 G	70 attack for an eligible member whose current focused weapon needs improvement.

Use the free sword and shield assigned to the Son, the equipment already owned by the Hero, and the new 3,000 G find to decide which member most needs help. Keep El Heven's protective armor in mind when splitting money between offense and defense.

Ruraphin and additional companion development

Visit Benett in Ruraphin after the reunion. Finish his conversation and check the Hero's spell list for **Chance**, another event-learned spell. If Benett has yet to teach it, return after further story progress and check the spell list again. It costs **20 MP** and produces an unpredictable result. Use it deliberately with a recovered party and suitable resources.

Achievement Alert: Another Ancient Spell (4 points)

RA 61398
Requirement: Learn the Chance spell
Complete Benett's teaching conversation when it becomes available and confirm Chance in the Hero's spell list. Learning the spell is the action to check for the unlock. Casting it is unnecessary.

The northeastern fields introduce strong recruitment prospects, including **Golem** and **Eliminator**. Golem provides physical strength and durability. Eliminator offers another physical role as its abilities develop. Inspect starting gear and command reliability before assigning a new recruit essential recovery work.

Achievement Setup: That's Got To Hurt

RA 61426
Recruit Golem on these fields and develop it to level 11 for ChargeUp. Equip a strong compatible weapon and prepare a companion to provide Bikill, or use the Drum of War after collecting it in the Bonus Dungeon. Save the recruitment and training progress at a normal church.

For the single-attack damage attempt, enter an ordinary fight with Golem and the support user active. Apply Bikill or the Drum's attack boost, choose ChargeUp with Golem, then use its next attack on one enemy. Keep healing available while preparing the strike. The Drum and Bikill fill the same boost role. Judge one displayed hit on one enemy, with a target of at least 500 damage. Repeat after further training or a weapon upgrade if needed, in any later suitable fight. Use ordinary training and combat throughout. Hitoshikonomi, the early trap glitch, save-state cheating, and cheats are excluded.

Achievement Alert: That's Got To Hurt (5 points)

RA 61426
Requirement: Do at least 500 damage to one enemy with a single attack (no cheating)
Check for the unlock when this prepared attack displays a hit of 500 damage or more on one enemy. Count a single hit independently. Separate hits from a two-hit attack each need their own damage check. The attempt can be completed in a later fight with the same procedure.

The older roster remains useful for supporting the children's growth. Sea and open-field battles with the wagon available let eligible reserves gain experience while trained members handle the encounters. Choose manageable groups and recover before a difficult new dungeon.

Using the carpet for new field routes

Cast Return to an accessible town, step onto clear outdoor ground, and use the Magic Carpet through its owner's Item command. Move across open plains and water toward the desired landing area. Flight avoids ordinary encounters while the carpet is moving.

Use a clear landing near the destination, then continue on foot. For an area surrounded by trees or mountains, choose a suitable approach through the terrain the carpet can cross. The central continent's plains now provide a route toward the **Sky Tower**.

8.9 Return to Telepador and collection of the Zenithian Helmet

The Son meets Queen Isis

Keep the Son available for the visit. Return to Ned's Inn and use the ship to reach the desert, or choose another convenient landing with the current travel tools. Enter Telepador during the day and speak to **Queen Isis** in the lower garden.

She remembers the Hero's earlier visit and notices the power in his son. Follow her through the opened shrine route to the **Zenithian Helmet**.

Examine the helmet and let the Son try it. It changes to fit him, confirming the equipment's new wearer. Collect and equip it, then finish the queen's conversation and blessing before leaving.

Achievement Alert: Bloodlines (3 points)

RA 61389
Requirement: Acquire the Zenithian Helm
Bring the Son to Queen Isis, complete the helmet fitting, and receive the Helm for him. Check the unlock after the fitting and handover.

The three acquired pieces

Check the Son's assigned **Sword**, **Shield**, and **Helmet** after the handover. Give him suitable body armor and keep useful recovery items available. The remaining Zenithian Armor is still part of the continuing search.

The helmet trip can be made soon after the reunion or combined with these return visits. Its free protection is useful while the children train and the party prepares for the route toward Zenithia.

8.10 Route-order options and prerequisites for restoring Zenithia

A comfortable preparation circuit

Complete the Granvania party setup, the equipment fitting, and the return visits in an order that suits the current resources. The new ship connects the northeastern approach, and Return keeps the earlier towns convenient for recovery and purchases.

The important travel unlocks here are the **Magic Key** and **Magic Carpet**. Their treasure circuit adds gold, a strong agility accessory, and useful extra equipment while the party develops.

The **Sky Tower** is reached from the central continent's open plains. Land north of its surrounding marsh and approach on foot with the chosen active members prepared. The wagon stays outside, so equip all three active companions for an independent dungeon journey and assign their healing items before entering.

The tower holds the **Magma Staff**. Its power clears the rocks blocking the cave south of El Heven. That passage's railway continues the route toward the submerged Zenithian Castle.

Choosing when to investigate Salabona's warning

Ludman has a new concern about the old jar shrine north of Salabona. The Magic Key provides the relevant shrine access. His request leads toward a demanding confrontation, so prepare the active party before reporting the changed jar and visiting the viewing tower.

More training, protection, and the children's developing support spells make that confrontation easier to sustain. The Sky Tower route provides another journey on which the party can develop first. Prison-bar treasure, including the Medal King's locked area, remains reserved for the Final Key obtained through that separate challenge.

Before the route toward Zenithia

Family visits: Hat of the Wind, guarded Demon Armor, and guarded Silk Bisuche.

Small searches: Gigo's house Small Medal, the northeastern shrine's Intelligence Seed, ground Small Medal, and Stone of Life.

Water passage: Satan Helm and Small Medal, followed by the southern exit to El Heven.

El Heven: Defense Seed, Small Medal, Magic Key, and Magic Carpet.

Magic Key circuit: 3,000 G and Meteorite Armband in Granvania, Thorn Whip and Acorn of Life in Port Selmi, and 15 G and Stone Fang in Alcapa.

Son's equipment: Zenithian Sword and Shield assigned, Zenithian Helmet collected from Telepador.

Optional spell errand: Chance learned from Benett in Ruraphin.

Preparation: Restore the active party, arrange the roster, assign useful items, and record the adventure.

9 Third Generation: Restoring Zenithia

The central continent's ruined tower preserves a route toward the castle that once stood above the world. Follow its surviving stairs, then the railway beneath the mountains, to discover why Zenithia fell. The family search continues through the faerie realm and the strongholds responsible for the years the Hero has lost.

Keep the children developing alongside reliable companions. This journey includes several places where the wagon remains outside, making the equipment and recovery items carried by the three active members especially important.

9.1 Sky Tower: floor route, treasure, and the Magma Staff

The central-continent approach

Use the Magic Carpet from open ground and travel to the central continent. Land on the clear plains north of the poisonous marsh, then walk toward the tower to the north.

Recover before entering. The wagon stays outside, so choose three members who can sustain the whole climb. The Hero and Son provide a useful foundation when their healing is ready. The Daughter gains valuable experience here if her protection and the party's recovery can support the encounters. A trained monster can fill either supporting position as needed.

Give the active members healing supplies and keep a revival option available. Enemy groups can include King Healers, whose recovery extends a fight, so concentrate damage on a healer when its actions are keeping the opposing group alive. The tower also provides recruitment opportunities for companions such as King Healer, Centaurus, and Soldier Bull.

A recruited **King Healer already knows HealUsAll**. It gains Barrier at level 7 and Revive at level 10, making it a valuable recovery reserve as its MP and equipment develop. Budget its larger healing spells for the encounters that need them.

The eastern stairs and the Leaf

Enter the main first-floor room and take the eastern passage toward the stairs in its northeastern corner. Climb to the eastern part of the second floor.

Enter the first doorway along this branch and open the chest for a **Leaf of the World Tree**. Assign it to a member who can use it if another companion falls. Continue up the nearby stairs to hear the resident's account of the treasure in the tower.

Return down this branch to the main first-floor room. The remaining treasures are reached through the other ascent.

The western ascent and the Small Medal

Cross the first floor toward the northwestern staircase. Climb through the separate second-floor section, follow its southern exit onto the exterior walkway, and take the next stairs upward. Continue through the third-floor room and its exterior connection to the broad fourth-floor walkway.

Open the chest on this walkway for a **Small Medal**. Continue east to the room above the resident visited on the eastern branch. Inside, choose the northern of the two stair routes and follow it through the fourth and fifth floors to the sixth.

The upper walkways and the Magma Staff

Leave the sixth-floor room for the exterior path and go west. The winged resident and treasure enclosure are visible farther up the tower. Follow the doorway and stairs leading toward them. The other downward branch is a short dead end that can be left for a curiosity visit.

Climb to the seventh-floor approach and continue onto the upper walkway. Open the chest for the **Magma Staff**, then speak to the winged resident.

He explains that the tower once reached Zenithian Castle. The castle now lies beneath the lake, and the staff can clear the rock barrier hiding the route toward it. Keep the staff with the travelling party and leave the tower with Outside or the return path when the searches are complete.

Sky Tower collections

Eastern second-floor branch: Leaf of the World Tree.

Fourth-floor exterior walkway: Small Medal.

Upper treasure enclosure: Magma Staff and the resident's directions toward the submerged castle.

9.2 Opening the mountain barrier and entering Torokko Mines

Return to El Heven's region and approach the rock-blocked cave **south of the town**. Use the **Magma Staff** from its owner's Item menu while standing outside the obstruction. The rocks crumble and uncover the mine entrance.

Recover and save before descending. The mines also leave the wagon outside, so arrange the three active members and transfer their recovery items while still on the field. Check their MP after the tower journey and provide enough healing for a longer series of track puzzles.

Enter the passage, take the first stairs downward, and approach the mine carts. Torokko Mines, also called Trolley Cave, uses levers to change junctions and carts to cross routes that walking cannot reach. Inspect the connected track before boarding each cart and collect the nearby chests before leaving a landing.

9.3 Torokko Mines: trolley switches, loops, Pusan, and the lake

The first rides and three western chests

On the first basement floor, walk south from the entrance stairs and board the first cart. Ride it north to the next landing. Before taking the second cart, walk north through the narrow path and east to the lever. Change the junction, then return to the cart and ride to the western part of the floor.

Walk west past the next cart to the chest containing **950 G**. Return along the path and walk south past the cart. Take the steps west to the paired chests containing a **Small Medal** and an **Acorn of Life**.

From this treasure platform, move toward the cart on the right. Change the nearby junction and board the cart to jump the broken track. At the next landing, change **both switches**, including the second one farther north, before boarding again. The resulting ride crosses the gap and reaches the stairs to the second basement floor.

The second basement and the two-cart puzzle

Before travelling onward, follow the lower path around the room to the northern chest for **750 G**. Return to the arrival area, then explore east for the **Magic Water** chest.

Set the nearby junction so the onward track points northeast. Use the lower steps or ladder to reach the other lever and set its track west. Return to the cart and take the ride across the water and broken track.

Two carts are available at the next landing. Take the **left cart** first, cross the gap, and change the lever on the far side so the right-hand track points north. Drop through the nearby hole and follow the stairs back to the two-cart landing.

Board the **right cart**. Its longer route reaches the third basement floor. A chest passes beside the ride, providing a useful landmark for the next detour.

The Staff of Benediction detour

From the third-floor landing, go west, climb the steps or ladder, and follow the stairs back up to the isolated second-floor treasure platform. Open the chest passed during the cart ride for the **Staff of Benediction**.

Used as an item in battle, the staff casts **Healmore** without spending the holder's MP. Give it to an active member whose turn can support the party's healing. The staff is useful for conserving resources through the remaining journeys.

Return down the same stairs to the third basement floor. Satan Helm enemies in the mines can inflict a curse, so use CurseOff when an available member has learned it, or arrange church treatment during the next recovery stop.

Pusan's looping cart

Follow the path south to the man circling endlessly in a cart. Use the lever inside the loop. The rusted mechanism takes an effort to move, and the cart finally leaves its circular track and crashes beside the wall.

Speak to the passenger. He introduces himself as **Pusan** and explains that he has been trapped here for twenty years. He was travelling toward Zenithia and accompanies the party as a guide for the remaining route.

Board his crashed cart and ride north across the gap. At the next landing, climb the northern steps to the onward cart. The closer cart returns toward the earlier stairs. Take the onward ride, then board the final cart in the next chamber. It carries the party through the water to **Zenithian Castle**.

Torokko Mines collections

First basement: 950 G, Small Medal, and Acorn of Life.

Second basement main route: 750 G and Magic Water.

Return stair from the third basement: Staff of Benediction.

Looping track: Rescue and speak to Pusan before taking the final carts toward the castle.

9.4 The sunken Zenithian Castle and the missing Golden Orb

The hidden stair behind the throne

Most of the castle lies below the water. Walk around the remaining dry approach, climb to the large double doors, and continue through the next doors and stairs to the throne room.

Pusan recalls a concealed stair behind the throne. Search there to reveal it, then descend the long ladder to the castle's orb chamber.

The **Silver Orb** remains on the western pedestal. The eastern pedestal is empty, and Pusan realizes that the missing **Golden Orb** caused the castle to fall. Speak to him again so he can trace the lingering power of the lost orb.

The orb's journey through the Hero's childhood

The vision follows the orb into Lenoire Castle and back through the Hero's childhood. It recalls the treasure found with Bianca, the meeting with a mysterious adult in Santa Rosa, and Gema's destruction of the orb after Papas's death.

Pusan remembers that the faeries created the orbs. He suggests finding their hidden village and asking for help, then waits in the castle while the Hero investigates.

Achievement Alert: The Sunken City (5 points)

RA 61392
Requirement: Find out why there's a palace under the water
Finish the Golden Orb vision and Pusan's explanation of Zenithia's fall in the orb chamber. Complete that scene and check the unlock before leaving the castle.

Zenithia is now a Return destination. Use Outside to leave through the mine entrance, recover in a convenient town, and prepare the family for the forest journey.

9.5 Forest of Illusions: navigating the maze with a child

The forest approach and the dwarf's home

Bring **at least one of the children in the active party**. The hidden guide can be seen by a child, and the journey is much easier with a reliable fighter and healer supporting that child. The woodland encounters include hard-hitting Eigerhorns and Farewell Crags. Recover before entering and concentrate damage on a dangerous opponent when its special abilities threaten the party.

Return to Salabona and use the carpet east across the marsh. Follow the river northeast to the sandy landing between the forests. Land, walk south across the two bridges, and enter the differently colored patch of woodland.

From the forest entrance, take the northern path to the small home in the hillside. Search the **jar for a Small Medal** and the **dresser for Elven Medicine**. The dwarf explains that people who can see faeries can find the hidden village. His companion remembers seeing them during her own childhood.

The Faerie Sword and gold detours

Return south to the clearing by the entrance. Change screens **east, south, then north** to reach the treasure trail with the **Faerie Sword** chest. Check the Daughter's weapon and the sword's eligible users before assigning it.

Go north through the fork and take its northern exit toward the campfire clearing. Before approaching the fire, take the southern exit to the small hollow with the **1,500 G** chest. Return north to the campfire.

The forest's exits have unusual connections, so use the dwarf's home, sword trail, fork, and campfire as landmarks when revisiting a screen. The gold hollow is reached by leaving the campfire clearing to the south.

The invisible guide

Approach the fire with the child present. The children notice someone standing beside it. Face the space immediately to the **right of the fire** and use Talk to begin the encounter.

Ask to visit the faerie village, then follow the child and the guide through the maze. Their path leads to a cave entrance. Enter it to reach the village the Hero helped during childhood.

Forest of Illusions collections

Dwarf's home: Small Medal from the jar and Elven Medicine from the dresser.

Treasure trail: Faerie Sword.

South of the campfire: 1,500 G.

Campfire: Speak to the hidden guide with a child present and follow the child to the village entrance.

9.6 Faerie Village, the Horn of the Fairies, and Faerie Palace

Powan's promise and the returning shops

The village's familiar residents remember the Hero. Speak to Bella and **Lady Powan**, explain the missing orb, and accept Powan's help. She gives the **Horn of the Fairies**, also called Faerie Horn, in gratitude for the restoration of spring.

Speak to Luna downstairs for the directions. The Faerie Palace lies in a secluded lake surrounded by forest and mountains. Blowing the Horn there will reveal it to human visitors.

The returning armor shop has six expensive choices:

Third-generation Faerie Village armor

Equipment	Price	Buying advice
Flame Armor	15,000 G	70 defense with cold protection for an eligible wearer.
Water Flying Clothes	14,800 G	55 defense and useful fire protection for a compatible caster or companion.
Silk Bisuche	18,800 G	60 defense for an eligible wearer. Compare with the guarded chest reward already collected.
Flame Shield	17,000 G	40 defense and cold protection for an eligible shield wearer.
Shield of Strength	25,000 G	Its reusable self-healing effect helps a suitable wearer conserve spell MP.
Helm of Wisdom	13,000 G	40 defense and an intelligence property for a compatible companion.

Prioritize an active member's weak protection and the elemental damage expected in the next battles. The Shield of Strength is a large investment, while the free Staff of Benediction already provides a useful battle-healing action. Keep the staff assigned when deciding which purchase gives the party the most immediate help.

Walk south out of the village and forest when ready. Recover and save before returning to the central continent.

The misty lake and the lily pad

Travel to the **lake north of the Sky Tower**. Enter the lake area and board its small boat. Sail north to the **lily pad**, then use the Horn from its owner's Item menu.

The music clears the mist and reveals the palace. Continue north and enter. A church is available on the right, and the residents' conversations connect the Hero's El Heven ancestry with the Son's legendary role.

The Queen's orb and two basement chests

Speak to the Faerie Queen. Her ancestors made the original Gold and Silver Orbs, and she creates a matching **Glowing Orb**. It has the appearance needed for the Hero's next task, and she believes he can reach the moment when the original orb was still intact.

Enter the western room and speak to the guard so he opens the way onward. Pass the stairs leading upstairs and take the next stairs down to the basement. Open both chests for a **Staff of Thunder** and **Princess Robe**.

Compare the free robe with the Daughter's current protection and assign it to an eligible wearer before the next difficult journey. Its defensive value helps stretch the equipment budget.

Return to the upper stairs. On the second floor, the eastern painting commemorates the legendary warrior. The western room holds the painting needed for the journey through time.

9.7 The childhood return and the Golden Orb exchange

The painting and Santa Rosa

Transfer the **Glowing Orb to the Hero's own inventory** before speaking to the woman beside the western painting. Finish her explanation, then stand before the painting and examine it. The Hero arrives in the Santa Rosa of his childhood.

Explore the village and speak to its residents, including the northwestern guard. Sancho welcomes a visitor who knows Papas. Go upstairs in the house to speak to the Hero's father again. The conversation recalls the warning heard during childhood and the family the Hero has spent these years trying to recover.

Complete the village conversations and find the young Hero near the church with his panther companion. Speak to him and accept his offer to show the **Golden Orb**.

Exchanging the two orbs

Choose the exchange when prompted. The adult Hero keeps the powered Golden Orb and returns the Queen's Glowing Orb to his younger self. The encounter fulfils the strange meeting remembered from the first-generation visit.

Achievement Alert: Sleight of Hand (5 points)

RA 61393
Requirement: Trick a boy out of his treasure
Carry the Glowing Orb in the adult Hero's own inventory, accept the young Hero's offer, and complete the exchange. Check the unlock after receiving the real Golden Orb.

After the exchange, leave through the town exit to return to the Faerie Palace. Keep the Golden Orb with the travelling party and use Return to reach Zenithia.

The faerie journey

Forest: Small Medal, Elven Medicine, Faerie Sword, and 1,500 G.

Powan: Horn of the Fairies.

Palace basement: Staff of Thunder and Princess Robe.

Queen and painting: Glowing Orb carried by the Hero into the childhood visit.

Young Hero: Exchange completed and the Golden Orb recovered.

9.8 Restoring Zenithia and unlocking castle travel

The restored orb chamber

Return to the throne room and use the hidden stair behind the throne. Descend to Pusan, speak to him, and hand over the **Golden Orb**. He restores it to its pedestal and asks the party to follow him to the control tile.

Zenithia rises from the lake. The water drains, its residents return, and the castle becomes a new travelling base. Explore the recovered rooms before beginning the next field journey.

The Medal, fireplace, Hook, and healing pool

Leave the throne room through the southern door and enter the door on the right. Speak to the resident and climb to the second floor. Search the dresser in the grandson's room for a **Small Medal**.

Walk through the **fireplace on the northern side** of that room to reach the grandfather's concealed room. He explains that the Master Dragon's sealed power is in Boble Tower. Search his dresser for the **Grappling Hook**.

Visit the room west of the fireplace room and search its water pool for **Sap of the World Tree**. It restores the party's HP, and the party can carry one at a time. After using it, revisit the pool for another supply.

The library east of the throne-room entrance adds another conversation about Pusan. Return to the throne room and finish his dialogue after the searches.

Flying the castle

Use the hidden stair and step onto the control tile to pilot Zenithia. It crosses mountains and other terrain that limited the carpet. The castle drifts while airborne, so steer toward a clear landing and complete the landing before stepping out.

X opens the world map during castle travel. Use the moving castle to reach the mountain-enclosed island south of Salabona, where Boble Tower stands. The Hook supplies the tower's rooftop entry route.

Restored Zenithia searches

Grandson's second-floor room: Small Medal in the dresser.

Room through the fireplace: Grappling Hook in the dresser.

Western pool room: Sap of the World Tree, replenishable after the carried supply is used.

Orb chamber: Castle controls available after restoring the Golden Orb.

9.9 Salabona's sealed jar, Buorn / Bohen, and the Final Key

Ludman's request and the red jar

Return to Salabona and speak to Ludman upstairs in his mansion. He is worried about the ancient jar in the island shrine **northwest of Salabona, west of the Mountain Village**. He asks the Hero to check its color.

Reach the shrine by ship or carpet, enter with the Magic Key, and descend to the jar. Examine it to confirm the red glow, then return to Salabona. The guard directs the party to Ludman in the **Tower of Viewing beside the town**.

Recover, save, and deposit spare gold before climbing to him. His final conversation starts the confrontation. The Hero and both twins form the watchtower battle group, so prepare all three for the encounter while arranging the party's equipment.

Buorn preparation

- Develop the Hero toward the mid-thirties and give the children enough HP to survive a strong group attack.
- The Son learns **Barrier at level 23**. Its breath protection is especially useful here, alongside Increase and healing.
- The Daughter learns **Bikill at level 16** and **Decrease at level 22** to support physical damage.
- Equip appropriate fire protection and give an active member the Staff of Benediction for additional healing.
- Bring Sap of the World Tree for a group-healing emergency, plus a revival option and enough MP for sustained recovery.
- Keep the Zenithian Sword with the Son. Its battle item effect can remove the opponent's defensive magic.

The watchtower confrontation

Speak to Ludman at the top. He explains that his ancestor Rudolph defeated the demon long ago and sealed it in the jar. The weakening seal has released **Buorn**, also called Bohen, who is approaching the town to settle that old grievance.

Ludman leaves to make preparations. Remain at the tower as the approaching shape grows above the horizon. The demon's arrival begins a long battle, with about **4,500 HP** to overcome.

Barrier, defense changes, and sustained damage

Start with the Son's **Barrier** and the Daughter's **Bikill on the Hero**. The Hero can attack when the party's HP allows it. On the next safe turns, apply **Increase** to the party and **Decrease** to Buorn.

Buorn uses powerful physical attacks, raging fire, and thunder. Barrier reduces the breath damage, while the other attacks still require a healthy reserve of HP. Restore a threatened member before continuing the attack plan. The Hero and Son can share spell healing, and the staff adds a recovery action to its holder.

When Buorn lowers the party's defense, restore Increase as needed. When he raises his own defense, use Decrease or the **Zenithian Sword as a battle item** to remove that protection. A Son occupied with urgent healing can leave the immediate defense response to the Daughter.

Use safe turns to put Bikill on the Son and add his physical attacks. Reserve sufficient MP for protection and recovery through the whole fight. Additional attack spells can be used when that reserve is secure.

Victory awards **9,500 experience**.

Achievement Alert: Rude Awakening (5 points)

RA 61394
Requirement: Defeat Buorn
Defeat Buorn in the watchtower battle and check the unlock after victory. Collect the Final Key from the resulting chest.

Open the chest that appears for the **Final Key**, then return to Ludman and finish the household conversations. Rest and save before using the key for the next treasure circuit.

9.10 Final Key cleanup and the Royal Cloak side route

Oracleberry's prisoner and the Medal King treasury

Return to Oracleberry and take the northern stairs down to the prison. Open the occupied middle cell with the Final Key and speak to the prisoner. Search the stool or its adjacent square immediately to the left for a **Small Medal**.

At **Medal King Castle**, open the barred treasure room. Its three chests contain **two Small Medals** and a **Golden Tiara**. Compare the Daughter's present helmet with the Tiara. Keep the Hat of Happiness available when its MP recovery is useful during a longer journey.

Emblem Cave and the upper seals

The **Royal Cloak** side route is in Emblem Cave, also called Cave of Seals, **northwest of Santa Rosa and east of Lenoire Castle**. Reach it by carpet or a convenient ship landing. Carry the Final Key with an active member and enter with a fully recovered three-person party. The wagon remains outside.

Achievement Setup: Monsters, Begone!

RA 61395
Keep the entrance seal covered, seal the exposed face on each of the two upper floors, and cover all four faces in the final chamber. Complete every seal for this achievement during the Royal Cloak route. Check their positions before leaving.

The cave's monster faces govern its random encounters. Cover an exposed face with a stone tile to seal the local enemies. Keep a tile already covering a face in position. The final chamber requires all four of its faces to be covered.

Open the entrance gate and follow the path north to the stairs. On the next level, follow the western and southern path to the loose tile. Push it back onto the exposed face for the all-monsters achievement, then continue to the next downward stairs.

Moon Faces can cast Chance, producing effects that include severe damage or drained MP. The Eaters and Sauruslords also make this a dangerous place for an underprepared group. Use Outside for a recovery trip when the party's remaining resources become too low for the deeper rooms.

The treasure floor's four southern branches

On the larger treasure floor, follow the path south and west toward the four southern branches. The westernmost branch contains this floor's exposed seal. Move the available tile onto it for the all-monsters achievement before searching.

The next branch to the east holds a **Small Medal**. The third southern branch holds an **Elven Amulet**. Collect both, then take the **easternmost branch** and its stairs down to the deepest floor. The other upper stair branch is a short dead end.

The Demon Hammer and four final tiles

From the deepest floor's arrival area, go north and follow the eastern side path to the **Demon Hammer** chest. Return to the main junction and follow the northern route toward the altar and four-face chamber.

Move each tile to a free face, keeping space behind the tile for the next push and leaving the main passage available:

1. Use the tile on the approach immediately south of the four-face chamber to cover the first face.
2. Return toward the arrival junction and explore the room on its western branch. Push its northern tile up the passage into the seal chamber.
3. Follow the southern branch from that western area for the next tile. Push it north along the same approach and cover a third face.
4. Go west from the four-face chamber, then north to the remaining tile. Bring it back to cover the last face.

Once all four faces are sealed, the monsters vanish and the **Royal Cloak** appears at the altar.

Achievement Alert: Monsters, Begone! (4 points)

RA 61395
Requirement: Banish all monsters from the Emblem Cave
Check that the entrance face remains covered, both upper-floor faces are sealed, and all four final faces are covered. Confirm the unlock with the complete cave sealed before leaving.

Collect it and equip the Hero. Its **90 defense** and protection against fire, cold, and spell damage make it a valuable free upgrade for the remaining battles.

Achievement Alert: Sealed Away (4 points)

RA 61396
Requirement: Acquire the Royal Cloak
Collect the Royal Cloak that appears at the altar after the final four-face puzzle. Check this pickup's unlock separately.

Achievement Setup: The Sacred Raiment

RA 61424
Keep the Royal Cloak for the Hero through the postgame. The later equipment set also uses the Dragon Staff, Sun Crown, and Shield of Radiance. Retain the Cloak when changing equipment or using storage.

Leave with Outside when the treasure circuit is complete. Recover and save before beginning Boble Tower.

Final Key and Royal Cloak collections

Oracleberry: Small Medal from the occupied prison cell's stool search.

Medal King Castle: Two Small Medals and Golden Tiara.

Emblem Cave treasure floor: Small Medal and Elven Amulet.

Deepest eastern branch: Demon Hammer.

Four-face chamber: Royal Cloak after all four tiles cover the seals.

9.11 Tower of Boble: Grappling Hook, dragon statue, and floor route

The island landing and rooftop entrance

Pilot Zenithia to the mountain-enclosed island **south of Salabona, west of Telepador's continent**. Land on the small desert patch and walk toward Boble Tower. Bring the **Grappling Hook with an active member**.

Choose a fully recovered three-member party with strong protection, reliable healing, and paralysis recovery. A Hero around the high thirties or early forties has a comfortable foundation for this long journey. The Son's Barrier, Numboff, and healing make him particularly useful. Give multiple active members **Full Moon Herbs** so an available companion can treat paralysis.

The tower's dragons have dangerous physical and breath attacks. Keep the Royal Cloak on the Hero, inspect the others' elemental protection, and bring the Staff of Benediction. The wagon remains outside throughout the route.

Climb the exterior ladders to the roof. Stand by the golden ring above the roof opening and use the **Grappling Hook** to descend into the seventh floor.

The first Medal and the injured nun

Take the stairs down through the sixth floor and into the separate fifth-floor room. Open the chest for the first **Small Medal**, then leave through its door into the main fifth-floor area.

Circle the central enclosure containing the nun and descend to the fourth floor. Use the central stairs back up to reach her. She warns that two creatures have stolen the Dragon Eyes. Return down to the fourth floor and take its northeastern door.

The gold, armor, and entrance lever

Follow the passage to the third-floor exterior area overlooking the dragon statue. Continue through the northeastern door to the two stair branches.

Take the **eastern stairs** first and open the chest for **2,700 G**. Return and take the western stairs. Follow the doors and walkway around the statue's side to the first-floor treasure room. Open its chest for **Devil's Armor**, a 65-defense choice for an eligible user.

Continue east through the door and south to the lever beside the main entrance. Pull it to open the front door. The new entry makes recovery trips convenient and allows a saved return before either boss.

Follow the first floor west around to the basement stairs. Take the path north through the first basement's damage floor, avoiding the harmful tiles where the walkway permits it, and descend to the four-way junction.

The Shield and western treasure branch

The eastern branch shows Gonz across the water. Begin with the **northern branch**, follow its eastern stairs down, and open the chest for the **Shield of Darkness**. Return to the four-way junction.

Take the western branch and collect the **Elven Medicine**. Descend its stairs to the room with two chests. The **northern chest is a Mimic**. Prepare for its battle if choosing to open it. The other chest contains the tower's second fixed **Small Medal**.

Use the room's other stairs to return upward. Follow the southern route past the short dead-end stair branch, then take the next stairs south. Cross the connecting basement passage and climb the far stairs to Gonz's side of the water.

9.11.1 Gonz, Gema, and the two Dragon Eyes

Gonz and the Left Eye

Approach **Gonz** after restoring the party's HP. He has about **1,700 HP** and fights with physical attacks. Use Increase when his blows require more protection, then support the fighters with Bikill and maintain steady healing.

Victory awards **3,500 experience** and **650 G**. Open the chest behind him for the **Dragon's Left Eye**. Use the opened front door for a recovery and saving trip before the second confrontation when the party needs it.

Gema's chamber and paralysis preparation

Return to the western treasure branch. Follow the northern passage beyond the paired-chest area and take the onward stairs into Gema's separate chamber.

Recover before speaking to **Gema**. The confrontation returns the Hero to the enemy who ordered Papas's death. Gema recognizes him and begins the battle after their exchange.

Apply **Barrier** for the flames, **Increase** for physical protection, and **Bikill** for the main attacker. Maintain a dedicated recovery action as his stronger spells and breath attacks threaten the party.

Numbing Breath is the central danger. Use Numboff or Full Moon Herbs promptly while another member remains able to act. The Elven Amulet offers its wearer a useful chance of resisting paralysis. A fully paralyzed three-member party loses this battle, so spread the recovery supplies across the active members.

Gema can cast **Bounce**. Use physical attacks while his reflection is active and keep support spells directed toward the party. The healing staff helps conserve MP during the longer fight. Restore fallen members when the surviving companions can sustain the recovery turn.

After victory, Gema praises the High Priest before dying. Open his chest for the **Dragon's Right Eye**. Recover and save through the front-door shortcut before returning to the statue if needed.

Achievement Alert: Avenged (10 points)

RA 61399
Requirement: Avenge your father's death
Defeat Gema in this Boble Tower confrontation and finish his final dialogue. Check the unlock after the victory scene.

9.11.2 Dragon Orb, Zenithian Armor, and remaining tower treasure

The dragon statue's two sockets

Return to the third-floor grapple point above the statue. Use the Hook to descend onto its head.

Place the Eyes according to the **dragon's perspective**: the **Right Eye goes in the left-hand socket on the screen**, and the **Left Eye goes in the right-hand socket**. Use each Eye beside its matching socket.

The mouth opens and the tongue extends to form an entrance from the level below. Drop from the statue's side, circle back to that level's central walkway, and enter the mouth.

The Staff, Orb, and final armor objective

Descend the statue's interior stairs. Take either outer ladder down to the **Dragon Staff** chest. The staff is a **125-attack weapon for the Hero**. Its battle item effect casts Bedragon, so account for the Hero's healing role when choosing to transform him.

Achievement Setup: The Sacred Raiment

RA 61424
Keep the Dragon Staff and Royal Cloak for the Hero's postgame equipment set. Retain both when upgrading another slot or moving equipment to storage.

Climb back up and use the **central Grappling Hook point** to reach the other lower landing. Enter the doorway and follow the path around the blue floor to the **Dragon Orb**. Keep it with the party for the return to Pusan.

The Son's remaining equipment objective is the **Zenithian Armor in the Great Temple's guarded side room**. The Dragon Orb leads to the travel ability needed to reach that temple. Keep his current body armor assigned for the journey there.

Boble Tower collections

First fifth-floor treasure room: Small Medal.

Eastern stairs near the statue overlook: 2,700 G.

First-floor treasure room: Devil's Armor.

Northern basement branch: Shield of Darkness.

Western basement branch: Elven Medicine, one fixed Small Medal, and the separately guarded Mimic chest.

Gonz and Gema: Dragon's Left Eye and Dragon's Right Eye.

Statue interior: Dragon Staff and Dragon Orb.

Entrance: Front door opened by the first-floor lever.

9.12 The Master Dragon and Zenithian Bells

Return to Zenithia and speak to Pusan in the throne room. The residents are questioning the stranger's identity. Give him the **Dragon Orb** and finish the conversation.

The restored power reveals Pusan as the **Master Dragon**. He greets the legendary warrior and his family, explains the danger of the opened Demon World gates, and offers his help. Accept the **Zenithian Bells**, also called Heaven Bell or Celestial Bell.

Achievement Alert: The Master Revealed (4 points)

RA 61400
Requirement: Restore Master Dragon to his true form
Give Pusan the Dragon Orb and finish the transformation scene in Zenithia. Check the unlock after his true form is restored.

Leave the castle and use the Bells on **open outdoor ground**. The Master Dragon arrives to carry the party. His flight crosses the terrain barriers and reaches the cloud-ringed mountain holding the Great Temple on the central continent.

Before the temple visit, restore the family's HP and MP and save in a convenient town. Check the Hero's Dragon Staff and Royal Cloak, the Son's three existing Zenithian pieces, and the third human member's protection and recovery supplies.

An eastern resident in Ruraphin offers the High Priest's book for **3,000 G**. Treat that conversation purchase as a discretionary errand after budgeting for the active party's equipment and temple supplies.

Achievement Setup: Can I Have Your Autograph?

RA 61403
For the achievement route, this purchase is required. After receiving the Zenithian Bells and before entering the Great Temple, buy Ivol's Book for 3,000 G from the resident in eastern Ruraphin. Give the Book to an intended active combat member and reserve that owner's turn to use it through Item during Ivol's battle, before defeating him. Keep a normal church save before the temple until the unlock is confirmed.

Achievement Setup: Another Ancient Spell

RA 61398
During this Ruraphin stop, speak to Benett again if Chance remains unlearned. Check the Hero's spell list after the teaching conversation and confirm the unlock when the spell is actually learned.

9.13 Great Temple: entry, captivity rooms, and party restrictions

The cloud-ringed mountain and human party

Use the Zenithian Bells and fly the Master Dragon toward the **northern mountain on the central continent**. Approach the clouds around its summit to land at the Great Temple, the completed stronghold where the Hero and Henry were enslaved.

The temple approach uses **human active members**. Prepare the Hero and twins with their own weapons, armor, healing items, and paralysis treatment. Wagon companions can still provide field-menu healing between battles and gain experience, while the underground approach keeps the human combat group in front.

Restore HP and MP before landing. The underground rooms restrict Outside and Return, making a fully supplied arrival especially important. Bring the Final Key and the Staff of Benediction, and keep the wider wagon roster equipped for the later battle.

Achievement Setup: A Stronger Curse

RA 61401
Bring the Staff of Stoross with the human temple group and preserve a normal church save before landing. Use it on the wife's statue before Ramada for a safe attempt. Complete the attempt while her curse remains and before Ivol's defeat.

Achievement Setup: Can I Have Your Autograph?

RA 61403
Check that the 3,000 G purchase from eastern Ruraphin is complete and Ivol's Book is in the inventory of an intended active combat member. Use the Book through that member's Item command during Ivol's battle and check the unlock before ending the fight.

The guarded Zenithian Armor

Before entering the main assembly, take the **door on the eastern side of the entrance**. Speak to the guard who protects the legendary armor and decline to leave. He attacks as a **Snakehand**, a normal enemy at this stage.

Defeat him and collect the **Zenithian Armor**. Equip the Son with its **85 defense** and elemental and spell protection. His Sword, Shield, Helmet, and Armor now complete the four-piece equipment collection.

Achievement Alert: Power Armor (3 points)

RA 61404
Requirement: Acquire the Zenithian Armor
Defeat the guard in the eastern entrance-side room and collect the Zenithian Armor. Check the unlock after receiving it for the Son.

The assembly and the missing queen

Enter the main hall. Two guards push the party into the crowd awaiting the High Priest's address. Speak to them again until they recognize the visitors and attack as **two Dragon Warriors**. Defeat them and walk around the congregation toward the stage.

The Hero's wife stands there as a statue. Beside her, a woman claims to be **Martha**. The people have been made obedient to the temple's leaders, and their conversations provide the context for the confrontation.

Before speaking to the supposed Martha, stand beside your wife's statue and use the **Staff of Stoross through Item** on her. Finish the response and check the achievement unlock while she is still stone. This attempt is missable once Ivol's defeat breaks her curse, so complete it now before the Ramada confrontation.

Achievement Alert: A Stronger Curse (2 points)

RA 61401
Requirement: Attempt to free your wife as you were freed
Use the Staff of Stoross on your wife's statue while her curse is still in effect. Check the response and unlock before continuing the temple battles and breaking her curse.

9.13.1 Temple guardians, the high priest, and the wife's rescue

Ramada and the hidden stair

Finish the supposed Martha's conversation about Papas and Ivol. Reject her demand for allegiance and continue the exchange until the disguise breaks. She becomes **Ramada**, also called Ramanda, and attacks.

Use Increase for physical protection and Barrier against the flames. His offensive spells still call for appropriate armor and steady healing. Bikill supports the main attackers, while the staff gives its holder a useful additional recovery action.

After defeating him, check the party for a curse and use CurseOff or church treatment before continuing. The crowd regains its freedom. Speak to the rescued people, including **Gigo**, who recognizes the Hero as the guardian statue from his family's house.

Search **the ground where Ramada stood, a few steps south of the wife's statue**, to reveal the stair downward. The wife's stronger stone curse is tied to Ivol, so continue the investigation below after recovering the party.

The old captivity rooms and Demon Claw

Descend the hidden stair and the next stairs to the old captivity area. Take the southern exit, follow the steps down and west, then enter the large doorway to the north. Open the inner door to reach the multilevel corridors.

Follow the lower passage north, climb to the upper walkway, and circle around its eastern side toward the southern steps. Speak to the patrolling guard if choosing to fight him, then take the onward stairs and pass through the northern opening.

Cross the next room's upper walkway east. Descend at its far end, walk north beneath the walkway, and climb the next ladder to the western exit.

In the larger room beyond, go north and descend to the chest containing a **Demon Claw**. It is a strong weapon for a suitable claw user such as the Killer Panther. Return to the base of the arrival ladder for the next detour.

Joshua's message and the two-chest room

From that ladder's base, go west beneath the upper path, then south to the next ladder. Climb and leave through the western doorway. Follow the next room south to the chamber with two skeletons and two chests.

Examine the nearer skeleton and its wall message. **Joshua**, Maria's brother, left a final wish for his sister's happiness. His earlier help made the escape with Henry and Maria possible.

Achievement Alert: The Price of Freedom (2 points)

RA 61402
Requirement: Find out what happened to the guard that helped you escape
Examine Joshua's skeleton and read his final wall message in this chamber. Finish the message and check the unlock before leaving.

Open the chests for **Slave Clothes** and the **Shield of Ruin**. The shield is cursed and destroys the wearer's defensive protection. Keep it unequipped.

Return to the previous room. Work north and west beneath the connecting path, then climb to the upper western route. Follow that walkway around to the onward stairs, passing the patrolling guard, and descend to the chamber with the red carpet. Restore the active party before following the carpet north to the High Priest.

Ivol and the restored wagon roster

Speak to **High Priest Ivol**. He acknowledges that his efforts to prevent the legendary warrior's birth have failed and begins the confrontation. At this point, **the companions from the wagon become available for the battle**.

Keep Ivol's Book's owner active and choose **Item, then Ivol's Book**, during this battle. Use a safe early turn while another member maintains healing. Finish the item action and check the unlock before defeating Ivol. This action is missable after the fight ends.

Achievement Alert: Can I Have Your Autograph? (4 points)

RA 61403
Requirement: Use Ivol's Book in the battle with Ivol
Have the active holder actually use Ivol's Book through Item during the High Priest's battle, before his defeat. Confirm the unlock after the item action.

Use three active members at a time and rotate the wider roster when needed. A useful opening is the Hero attacking, the Son casting Barrier, and the Daughter casting Bikill on the Hero. On safe turns, put Bikill on another strong fighter and replace a support member with that fighter.

Ivol uses **Explodet**, powerful cold breath, **Bounce**, and a freezing wave that removes the party's support effects. Barrier protects against breath, while Explodet still requires sufficient HP and spell protection. Use physical attacks while his Bounce is active.

After the dispelling wave, bring the Son or another Barrier user forward to renew breath protection. Reapply Bikill to the active attackers when healing leaves a safe opportunity. Restore Increase if physical damage calls for it.

Use the Son's Healus when available or rotate in a **King Healer for HealUsAll**. The latter restores the HP of living companions throughout the active group and wagon. Replace an injured or exhausted fighter with a prepared reserve while maintaining the recovery role. The staff and carried Sap provide additional healing options.

Keep the roster's recovery resources in view through the whole battle. The available members let the party recover from a fallen active fighter and continue the attack plan.

The Ring's voice and the family reunion

After his defeat, Ivol identifies Martha's destination as the Demon World and attempts to open its gateway. His effort fails, and he leaves the **Ring of Life**. Collect it before returning through the corridors.

Achievement Alert: End of the Cult (10 points)

RA 61405
Requirement: Defeat Ivol
Defeat High Priest Ivol and finish his concluding scene. Check the victory unlock before the return through the temple corridors.

Walk back toward the assembly hall. The random encounters have ended, and the manual return follows the explored route. In the old captivity area, Martha speaks through the Ring. Answer that the Hero can hear her and finish the exchange.

She asks him to remain with his wife and children while she holds the Demon Lord behind the boundary. Continue up to the stage. The wife's stone curse breaks, and the family returns to **Granvania**.

The children greet their mother in the castle bedroom. Finish the reunion scene and the guard's message before going to Ojiron.

9.13.2 Ring of Life and preparations for the Demon World

Speak to Ojiron about the intended journey. His concern for the family accompanies the decision to continue the search for Martha.

Visit **Ruida's tavern and rebuild the human roster**. The reunion removes the travelling humans from the active party, so select the Son, Daughter, wife, or other intended human companions again. Arrange the monsters with Monster Gramps and equip every member needed for the next journey.

Retrieve the **Ring of Flames**, **Ring of Water**, and **Ring of Life** from their present owners or the depository. Keep all three with the travelling party, along with the Final Key. The rings provide the next objective in the northern Water Shrine.

An equipped **Ring of Life** restores its wearer's HP while walking and after battle rounds. Use its gradual recovery alongside the party's healing spells and carried supplies.

Recover, restock the party's healing and revival items, deposit spare gold, and record the adventure. The household has been reunited, and the next voyage continues the search beyond the boundary Martha is guarding.

Before the Demon World voyage

Great Temple side room: Zenithian Armor collected and all four pieces assigned to the Son.

Underground treasure loop: Demon Claw, Slave Clothes, and the unequipped cursed Shield of Ruin.

High Priest: Ivol defeated and Ring of Life collected.

Family: Wife restored, Granvania reunion finished, and travelling humans selected again at Ruida's tavern.

Gate items: Rings of Flames, Water, and Life carried, with the Final Key available.

Party: Three active roles covered, wagon reserves equipped, HP and MP restored, and recovery supplies assigned.

Save: Spare gold deposited and the adventure recorded.

10 Third Generation: The Demon World and Ending

The family is together again, and the search for Martha leads through the boundary she has guarded for so many years. Carry the three rings north, prepare the whole travelling roster, and follow her voice into the Demon World.

The journey ahead brings the strongest purchasable equipment, new monster companions, and a long climb through Evil Mountain. Keep the party's recovery tools distributed among available members and preserve enough resources for the final confrontations.

10.1 Water Shrine revisited and the three-ring portal

The northern silver door

Return to **El Heven**, board the ship, and sail north into the Water Shrine. Follow the main channel toward the **northern branch** that was sealed during the earlier town approach.

Carry the **Final Key** with an active member and open the silver door. Continue into the goddess chamber with the **Ring of Flames**, **Ring of Water**, and **Ring of Life** available in the party's inventories.

The three goddess statues

Approach each statue and use its ring through the owner's Item command. Place the rings as viewed from the entrance:

Left statue: Ring of Flames.

Right statue: Ring of Water.

Central statue: Ring of Life.

When all three are placed, the passage opens beyond the statues. Walk toward the northern portal to cross into the Demon World.

Martha's gift at the arrival shrine

As the party leaves the small arrival shrine, Martha speaks again. She recognizes how much the Hero has grown and gives him the **Sage's Stone** to support the journey. Finish the conversation and collect the Stone before leaving.

Used as an item in battle, the Stone provides repeatable **group healing without an MP cost**. Assign it to an active member whose turn can handle recovery while the other two attack or provide support. Stronger healing and revival remain useful alongside its regular recovery action.

The **blue portal** returns the party to the ordinary world when supplies, equipment, or recovery require a trip back. Keep its location in mind while establishing a new base in the eastern town.

The Demon World crossing

Water Shrine: Final Key used at the northern silver door.

Goddess chamber: Flames left, Water right, and Life center.

Arrival shrine: Martha's conversation finished and Sage's Stone collected.

Party: Stone assigned to an active recovery user and the return portal identified.

10.2 The Demon World overworld: routes, encounters, and recruitment

The eastern bridges and rocky passages

Leave the arrival shrine and travel **east across the bridges**. Follow the passages between the mountain ridges until the town of **Shahanna**, also called Jahanna, comes into view.

The field enemies make elemental protection and regular recovery important immediately. Great Dragons have powerful breath attacks. Bazuzus and Blizzard Hawks add breath or offensive magic, and enemy Attackbots can strike twice in a round. Concentrate damage on a dangerous member of the group and use the Sage's Stone when several companions need recovery.

The wagon is available on the field. Rotate injured or depleted members out for prepared reserves, and keep another recovery action ready when a group can inflict more damage than the Stone restores. Reach town before committing to a long training circuit.

Late recruitment choices

The Demon World fields offer **Great Dragon**, **Attackbot**, and **Gigantes** as recruitment prospects. Use ordinary field encounters for the search and assess the new member's equipment, intelligence, and current abilities before assigning it an essential role.

Update the wild-recruitment tally after each successful recruitment. Count unique species across the journey and count duplicates of a species once. Include the earlier field recruits when checking this total. Save new recruitment progress during the next town visit.

Achievement Alert: Monster Collector (10 points)

RA 61417
Requirement: Recruit sixteen unique monsters
Check the running species tally during these field recruitment trips. Confirm the unlock when sixteen unique wild monster species have been recruited. This threshold may already have been reached on an earlier route, so check the existing achievement status too.

A Great Dragon begins with Flame Breath and learns **Violent Flames at 10**, **Freezing Breath at 15**, **Burning Breath at 20**, and **Sparkling Breath at 30**. Its breath attacks make useful group coverage as it develops.

Attackbot has a **level-30 cap** and a physical role. Gigantes has a **level-7 cap** and also develops as a physical attacker. Their equipment and immediate strength determine how well they fit the current roster. Keep experienced healers and support users ready while training a new recruit.

The established companions remain suitable for completing the game. Choose recruitment as a preparation option, then continue once the active roles and reserve recovery are strong enough for the mountain.

Achievement Setup: Heroic Trainer

RA 61411
Use manageable Demon World field encounters to develop the wild-recruited roster for its own Mildrath run. Train Golem or another physical attacker alongside a King Healer or developed Slime Knight with the needed recovery spells. Inspect their HP, MP, equipment, and healing after training, and save that progress before the final climb. Prepare every intended active monster and reserve for both consecutive forms.

10.3 Shahanna: shops, inn, final equipment, and safe preparation

The protected town and its services

Shahanna's residents explain that Martha's sacred water protects their home. Several inhabitants remember life under the Demon Lord and describe the freedom her power has given them. Their gratitude connects this last refuge with the mother the Hero is searching for.

Use the inn and saving service, arrange the roster with **Monster Gramps**, and visit the **Depository** before spending the carried gold. Open the magic-locked doorway to the northeastern weapon shop with the available key.

The Hero's Dragon Staff and Royal Cloak, the Son's Zenithian set, and the party's earlier healing items already provide a substantial equipment foundation. Spend first on a vulnerable active member or a reserve whose intended job needs stronger protection.

Purchase guide: weapons

Shahanna weapon shop

Weapon	Price	Buying advice
Dragon Killer	15,000 G	90 attack with extra dragon damage for a compatible physical member.
Blizzard Sword	21,000 G	105 attack for an eligible fighter whose current weapon falls well below that strength.
Demon Spear	25,000 G	99 attack and an instant-death property for ordinary encounters and a compatible user.
Big Bowgun	37,000 G	110 attack. Compare its small advantage over cheaper choices with the wearer's equipment options.
Staff of Revival	45,000 G	A reusable Vivify action in battle for an eligible user, with a substantial purchase cost.
Flame Boomerang	13,000 G	65 attack across the enemy formation for a suitable group-clearing member.

The Hero already has a 125-attack weapon, and the Son has a strong free sword. Consider compatible monsters and the reserve fighters before replacing those assignments. Keep enough money for the protection and recovery purchases that support a long run.

Purchase guide: armor and shields

Shahanna armor shop

Equipment	Price	Buying advice
Flame Armor	15,000 G	70 defense and cold protection for a compatible body-armor wearer.
Angel's Leotard	21,000 G	70 defense and cold protection for an eligible wearer with weaker clothing.
Mirror Armor	30,000 G	80 defense with a chance to reflect spells. Account for that property in the battle plan.
Shield of Strength	25,000 G	Protection and a reusable self-healing action for a compatible shield user.
Shield of Reflection	33,000 G	55 defense and fire protection for an eligible member with a weak shield.
Great Helm	20,000 G	45 defense. Compare with existing helmets, especially the Son's free Zenithian Helmet.

Fire and cold protection are useful through the approach and final battles. Equip each intended participant, including reserve healers, and keep the free recovery items assigned when comparing expensive self-healing or revival purchases.

Purchase guide: item counter

Shahanna item shop

Item	Price	Buying advice
Fragrance Bag	80 G	An optional encounter-training aid. Use it with a recovered party and a planned route.
Bomb Stone	450 G	A consumable group-damage action for a member whose turn needs an extra offensive option.
Elven Amulet	3,000 G	Status protection for an eligible wearer handling important healing or item actions.
Hat of Wind	5,000 G	Compare with the reusable travel hat already received during the Reinhart family visit.

The town searches and outer-wall chest

Inside the town, search the barrel near the seated residents, below the priest, for a **Defense Seed**. At the inn, search the middle dresser for **Elven Medicine**. Keep the medicine for a caster who needs a substantial MP refill.

From the entrance steps, take the path west around the outside of the town wall. Follow the perimeter **north, east, then south**. Search the northern of the two outer barrels for a **Small Medal**.

Achievement Alert: Small Medal Hunter (25 points)

RA 61420
Requirement: Find 29 small medals hidden in pots, barrels, dressers, and other places
Update the searched-location medal tally at this outer-wall barrel. Check the unlock if the total has reached 29 placed search finds, including earlier pots, barrels, dressers, and other search locations. Keep the chest-medal tally separate. Monster and trapped-container battle drops contribute no progress to this search total.

Continue along this outside route to the last **Kandar Henchman**. Recover before speaking to him and use the familiar focused attack and healing plan. After victory, open his chest for the **Sands of Time**.

Achievement Alert: Kandar's Henchmen (5 points)

RA 61419
Requirement: Find and defeat all three of Kandar's Henchmen
Check all three victories after this Shahanna exterior guard falls. The other two are the Reinhart castle-grounds guard and the guard behind Duncan's Mountain Village house. Confirm the unlock when all three are defeated. Complete any missing earlier guard and save the three-victory progress.

Used during a battle, the Sands restart it from the beginning and can be used repeatedly. Keep them with an available user for an ordinary encounter that takes an expensive turn. Plan the final confrontation around the party's actual protection, healing, revival, and remaining MP.

Shahanna collections

Town barrel: Defense Seed.

Inn dresser: Elven Medicine.

Outer-wall barrel: Small Medal.

Guarded exterior chest: Sands of Time after the Kandar Henchman battle.

Services: Recover, save, deposit spare gold, arrange the roster, and finish the intended equipment purchases.

The road toward Evil Mountain

Leave Shahanna south through the rocky passages, then follow the coast north. Cross the bridges and continue northeast to the mountain entrance beyond the large swamp.

A Hero and trained combat companions in the mid-to-high forties provide a comfortable preparation target. Inspect actual HP, MP, defenses, recovery abilities, and reserve strength before choosing the final climb.

10.4 Evil Mountain: entrance, summit route, and family reunion

The entrance spikes and two trapped jars

Enter the northern doorway.

Achievement Alert: There and Back Again (2 points)

RA 61425
Requirement: Unlock all 17 return locations
After this first Evil Mountain entry, inspect the actual Return destination menu, using the field outside if needed. Check all seventeen entries: Reinhart, Oracleberry, Nunnery, Port Selmi, Ruraphin, Kabochi, Salabona, Ned's Inn, Granvania, Northern Church, El Heven, Santa Rosa, Alcapa, Faerie Village, Zenithia, Shahanna, and Evil Mountain. Unlock any missing menu entry and recheck the list and achievement status.

Follow the passage toward the first upward stairs. **Stepguard** protects the party while crossing the damaging floor patches. Keep the relevant caster's MP available for the ascent.

On the second floor, the northwestern side branch contains **two Urnite jars**. Each is a separate optional battle. Recover before opening either, and track possible battle rewards separately from the mountain's fixed treasure chests.

Follow the eastern passage around to the northwestern stairs and climb to the third floor.

The Robe of Darkness branch

At the third-floor fork, take the **southwestern branch** to its stairs. Climb into the separate fourth-floor room and open the chest for a **Robe of Darkness**.

Return to the fork and take the northwestern continuation upstairs. On that fourth-floor section, follow the southern route to the next stairs. Climb and exit south onto the mountain's exposed summit paths.

The Ogre Shield and first fixed Medal

Follow the outdoor path west and north. At the east-and-west fork, explore the eastern branch, then work north and west to the **Ogre Shield** chest. Assign it to an eligible shield wearer if it improves the current protection.

Return to the fork, go west, and take the northern stairs down to the isolated chest containing a **Small Medal**. Climb back to the summit path and enter the western cave. Follow its passage left and take the stairs to Martha.

Martha and Papas

Two **Dark Shamans** guard the Hero's mother. Restore the active party before approaching and defeat them with focused attacks and ordinary recovery.

Martha recognizes her son and welcomes the reunion she has imagined through her years of captivity. She asks the family to leave while she offers her life to seal Mildrath away. His power interrupts the prayer and strikes her down.

As she makes her final plea, Papas's voice reaches her. His spirit appears, and Martha joins him. They entrust the continuing struggle to their children and promise to watch over them before departing together.

Finish the scene.

Achievement Alert: A Mother's Love (4 points)

RA 61406
Requirement: Reunite with your mother
Defeat Martha's two guards and finish the full reunion scene with Martha and Papas. Check the unlock after their departure.

Then descend the **western stairs** or ladder and enter the adjacent cave. The remaining route begins in its arrow-floor chambers.

10.5 Sacred Pitcher, lava removal, floor loops, and navigation puzzles

The Echoing Hat and second fixed Medal

Take the cave's downward stairs to the arrow-floor room. From the landing, walk **east across the east-pointing tile** and continue along the eastern path to the chest containing the **Echoing Hat**.

Work back across the westward arrows to the other chest for the mountain's second fixed **Small Medal**. Use the stairs directly west of this chest to return upward.

The **Echoing Hat repeats its wearer's spell action**. Compare its protection with the current helmet and consider which active caster benefits from the repeated spell. Maintain the group's healing and MP plan when assigning it.

The Sun Crown and Sacred Pitcher

At the upper landing, use the arrow route that carries the party back down the nearby stairs, then climb those stairs again. This loop puts the party in position for the **right-hand, eastward arrow route**.

Follow that route, continue past the next downward stair, and work south through the connected arrow paths. Reach the two objects between the pillars and collect the **Sun Crown** and **Sacred Pitcher**, also called Holy Chamberpot.

Achievement Setup: The Sacred Raiment

RA 61424
Keep the Sun Crown with the Dragon Staff and Royal Cloak for the Hero's postgame set. Retain these three pieces until the Shield of Radiance is collected, then equip all four on the Hero with the accessory slot empty.

Keep the Pitcher with an available member. It opens the next passage and should remain accessible during the return through the arrow rooms.

The cursed sword and lava chamber

Retrace the cave route to the summit paths. Walk south, then take the western side branch before entering the next cave. Its chest contains the **Multi-Edge Sword**. The sword is cursed, so collect it while keeping the ordinary battle weapon equipped.

Enter the nearby cave with the lava pool. Martha's voice directs the Hero to use the Pitcher. Select the **Sacred Pitcher through Item** inside this room. The lava clears and exposes the stairs to the lower route.

The King Metal Helm, gold, and falling floor

Descend to the broad chamber with unusual floor tiles. Take the eastern branch for the **King Metal Helm**, then return and explore the southern branch for **3,300 G**.

The northern chest is a **Mimic**. Prepare for its optional encounter if opening it. Its battle reward remains separate from the two fixed Medal chests already collected.

After the searches, step onto the falling tiles **southwest of the arrival stairs**. The drop reaches the otherwise enclosed area below.

If the King Metal achievement is still incomplete, hunt a **King Metal** in ordinary encounters in this lower fall-only room. Keep the recovery members and physical attackers prepared through the search, then defeat a King Metal and check the unlock. Use a recovery trip when the hunt depletes the party.

Achievement Alert: Quicker than Quicksilver (5 points)

RA 61407
Requirement: Defeat a King Metal
Check the unlock after actually defeating a King Metal in battle. Use this lower fall-only room for a remaining hunt and check whether an earlier King Metal victory has already earned the achievement.

Take its stairs back up, follow the passage north to the next descending stairs, then continue north through the watching-statue corridor.

Pass the side stair and enter the moving-room chamber. The final door lies on its northern edge.

The five-move sliding-room solution

Eight rooms occupy a three-by-three grid. Initially the **bottom-center space is empty**. Stepping on a room's central tile moves that room into an adjacent empty space. Follow the connecting paths between moves.

Starting from the initial arrangement, use this complete left-side route:

1. Enter the **bottom-left room** and activate its central tile to move it **right**.
2. Enter the **middle-left room** and move it **down**.
3. Enter the **top-left room** and move it **down**.
4. Enter the **top-center room** and move it **left**.
5. Enter the **middle-center room** and move it **up** into the newly opened northern position.

Use the northern door from the final position and follow the passage toward the guardian chamber. If the rooms were moved earlier, restore the initial bottom-center vacancy and original room arrangement before following this sequence.

Achievement Alert: Sliding Puzzle (3 points)

RA 61408
Requirement: Solve the sliding puzzle
Complete the five room moves from the initial arrangement and use the opened northern route. Check the unlock after solving the puzzle.

10.6 Sage's Stone, Sands of Time, and the final treasure sweep

The two reusable battle tools

The **Sage's Stone** came from Martha at the arrival shrine. The **Sands of Time** came from Shahanna's guarded exterior chest. Check their current owners and move the Stone to the member assigned regular group recovery.

Item use consumes the holder's turn. Keep the Stone's user active when the healing action is needed, with another member ready for a stronger heal, cure, or revival. Use the Sands deliberately during ordinary encounters whose opening needs to be restarted.

Mountain collections before the guardians

At this point, account for these ten fixed finds already available on the route:

Evil Mountain treasure sweep

Early fourth-floor branch: Robe of Darkness.

Summit detours: Ogre Shield and the first Small Medal.

Lower arrow-floor chests: Echoing Hat and the second Small Medal.

Upper arrow-floor objects: Sun Crown and Sacred Pitcher.

Western outdoor branch: Unequipped cursed Multi-Edge Sword.

Below the lava passage: King Metal Helm and 3,300 G.

The **Orihalcon Fang** is the remaining fixed reward behind the guardian encounter. Keep the optional Urnite and Mimic fights separate from this chest-and-object checklist.

Assign the newly found equipment to compatible members, including reserve fighters and healers. The Echoing Hat and King Metal Helm offer different battle roles, while the Ogre Shield can strengthen an eligible participant's defense.

10.7 Final guardians and preparation for Mildrath

The two Hellbattlers and Orihalcon Fang

Follow the passage north beyond the moving-room puzzle. In the next large chamber, climb toward the raised chest and attempt to open it. **Two Hellbattlers** break through the wall and attack.

Each has about **450 HP**. Use Increase when their physical attacks require more protection, and support focused damage with Decrease and Bikill when available. Keep the recovery member ready while removing one enemy at a time.

After victory, search the chest again for the **Orihalcon Fang**. Its **115 attack** is a strong weapon for an eligible monster such as the Killer Panther. Assign it before the final preparation trip.

The last treasure-preserving save

Use **Outside**, recover in a convenient town, and **save after collecting the mountain's treasures**. That saved inventory and progress are important when the game resumes after the ending.

Restore every intended participant's HP and MP. Inspect the three active roles and the reserves, then distribute revival items, Magic Water, Elven Medicine, and available Rings of Prayer among members who can use them when needed.

Achievement Setup: A Family Matter

RA 61410
For the family-only run, store all monsters with Monster Gramps and leave Sancho and Pippin at the tavern. Choose three active members from the Hero, wife, Son, and Daughter, with the remaining family member as the human reserve. Prepare the Son's healing, the wife or Daughter's recovery items, strong physical equipment, and full HP and MP. Keep every participant and every rotation within this family pool through both forms.

Achievement Setup: Heroic Trainer

RA 61411
For the separate monster-only run, store all humans except the mandatory Hero and leave him inactive in the wagon. Use only wild-recruited monsters in the three active positions and every replacement through both forms. Prepare a physical attacker such as Golem, a developed Slime Knight or King Healer for recovery, and another protected support or damage member. Restore their HP and MP and distribute the healing, revival, and MP items among monsters. Throughout both forms, the Hero must perform no attack, healing, item, or substitute action.

After collecting all treasure and preparing the roster and supplies, record a **normal church save** and protect it from being overwritten during the boss attempts. Each restriction has its own prepared run. Reload this checkpoint before each new run, arrange the chosen eligible pool at the roster services, and restore its HP and MP. Keep the checkpoint intact for the next attempt. Confirm the intended RetroAchievements unlock after the second-form victory before any reload. Follow the ending through The End on the first completed journey to open the Bonus Dungeon.

Return to Evil Mountain and follow the opened route back to the guardian chamber. The passage through the broken wall leads to Mildrath. Recover any resources spent on the return journey before starting his dialogue.

Final battle preparation

- Assign the Sage's Stone to the regular group-recovery user and keep the Staff of Benediction accessible.
- Bring a stronger group-healing option, such as an available Healus spell or King Healer's

HealUsAll.

- Keep Barrier and attack support available through the active members or prepared reserves.
- Equip the intended reserve fighters and healers for fire, cold, and spell pressure.
- Spread revival and MP supplies across the roster.
- Save after collecting Orihalcon Fang and the other final-dungeon equipment.
- Prepare for **two consecutive boss forms** with the same recovery budget.

10.8 Mildrath's first form: tactics and summoned enemies

Establishing the three active roles

Enter the dark chamber and speak to **Mildrath**. His first form begins the final battle sequence. The wagon is available, so keep the wider roster ready to replace an injured fighter or exhausted support user.

For either restricted attempt, keep every active member and every replacement within the prepared eligible pool through both forms. Use the family recovery plan for a family run and the monster recovery plan for a monster run, with the mandatory Hero inactive throughout the latter attempt.

Start with **Barrier** for breath protection, **Increase** for physical defense, and **Bikill** on the principal attacker when the party's HP allows the support turns.

A practical three-member group has a strong physical attacker, a recovery user, and a flexible support or second attacker. The Hero and Son, when eligible for the prepared attempt, can alternate healing and physical work. A well-equipped monster, when eligible for the prepared attempt, can take the damage role while another companion operates the Stone.

Handling summons and clearing effects

Mildrath can summon **Attackbots and spellcasters** beside him. Watch the added enemies' actions and concentrate damage on a summon when it threatens recovery or prolongs the fight. Resume pressure on Mildrath after controlling the dangerous group.

His strong spells and cold breath call for regular group healing. Use the **Sage's Stone** on appropriate rounds, with stronger healing when the party needs more HP than its usual recovery provides.

When **Freezing Rays remove support effects**, renew Barrier and the useful attack boosts. Decrease can improve physical damage when it succeeds. Bring a fresh support member forward if the first one has spent too much MP to maintain the protection.

Treat Bounce as a deliberate spell-defense action within the chosen healing plan. Item recovery remains useful when arranging reflection and the party's spell actions.

Keeping resources for the transformation

Preserve sufficient MP, revival supplies, and strong group healing for the next fight. Use efficient physical damage and repeatable item recovery while the current group is stable, then spend stronger recovery when survival needs it.

After this form falls, Mildrath reveals his greater power and transforms. The second confrontation follows directly. Keep the party prepared for its opening attacks.

10.9 Mildrath's second form: healing, defenses, and sustained damage

Breath protection and stronger recovery

Apply **Barrier** promptly in the new battle. The stronger form uses devastating breath alongside **Explodet** and physical pressure. Elemental and spell protection on the equipment help the party survive while the support effects are rebuilt.

Give group recovery a regular place in the turn plan. The Stone's user can support ordinary damage, while the Hero, Son, or another prepared healer, when eligible for the selected attempt, handles a severely injured member. Rotate in King Healer for **HealUsAll** when the living roster needs a complete HP refill.

Use that King Healer rotation only in an unrestricted or monster-only run. In the family-only run, maintain the Son's healing and the wife or Daughter's item recovery, with replacements drawn from the family.

An available reserve can replace a weakened active member while the recovery role stays covered. Revive a fallen companion when the surviving group can afford the action and has enough protection for the next attacks.

Dispelling, reflection, and Meditation

Mildrath can remove the party's magical enhancements. After the clearing wave, restore Barrier first when breath pressure threatens the group, then reapply Bikill to the active fighters during safe turns.

Restore Increase after defense-lowering actions when physical damage requires it. Counter Mildrath's defensive boosts with an available reduction or the Zenithian Sword's dispelling item action.

Watch for his **Bounce**. Maintain physical damage while the reflection is active and keep offensive spells away from a reflected target. Support spells directed toward the party and carried recovery items remain part of the chosen battle plan.

His **Meditation restores a substantial amount of HP**. Keep protected, supported fighters dealing sustained damage between recovery turns. Renew their equipment and support assignments as members rotate through the active positions.

Finishing the battle

Use MP-restoring supplies on a caster before the reserve becomes too low for essential healing or protection. Let another member handle the item turn while the regular recovery user continues supporting the party.

Keep enough living members ready to cover damage and recovery through the final rounds. Steady attacks, renewed protection, and the full roster's healing tools bring the confrontation to its conclusion.

Achievement Alert: Demon Lord No More (10 points)

RA 61409
Requirement: Defeat Mildrath
Defeat both consecutive forms and check the unlock after the second-form victory. The ordinary prepared party can complete this ending run.

Achievement Alert: A Family Matter (10 points)

RA 61410
Requirement: Defeat Mildrath using only members of your family
After the second-form victory on the prepared family-only attempt, check the unlock with family members having handled both forms and all replacements. Keep all monsters stored for that run and confirm the achievement status before reloading the protected church save.

Achievement Alert: Heroic Trainer (25 points)

RA 61411
Requirement: Defeat Mildrath using only recruited monsters
After the second-form victory on the prepared monster-only attempt, check the unlock with wild-recruited monsters having handled both forms and every replacement. Keep the mandatory Hero inactive with no human attack, healing, item, or substitute action throughout both forms. Confirm the achievement status before reloading the protected church save for another separately prepared run.

10.10 Ending tour, credits, clear-state behavior, and postgame access

Zenithia and the homeward tour

After Mildrath is defeated, the family appears before the **Master Dragon in Zenithia**. He thanks them for restoring peace and offers to escort them home. Visit the castle's residents, then meet him at the entrance to begin the tour.

At each destination, finish the family conversation, visit all the familiar residents, and leave when ready for the next stop:

El Heven: The elders remember Martha and welcome the family she protected. The old couple reflect on Papas's first visit to their village.

Reinhart: Henry and Maria celebrate with the twins. Speak to Maria about Joshua's final message, then visit Dale and the other castle residents.

Santa Rosa: The village has been restored. Visit its familiar homes and residents before continuing.

Salabona: Ludman's household welcomes the family. Complete the conversations suited to the chosen marriage.

Mountain Village: Visit Duncan and finish the family's reunion there before the last flight home.

Granvania: Speak to the waiting residents and follow Sancho into the throne room.

With **Bianca**, Duncan is delighted to see his daughter and grandchildren together. In Salabona, Andy and Flora offer their congratulations.

With **Flora**, Ludman celebrates his role as the legendary warrior's grandfather. Speak to her mother for the conversation about Flora's adoption and her place in their family. In the Mountain Village, Bianca looks forward to friendship with Flora.

The Granvania celebration brings the Hero, his wife, and their children to the royal seats. The family dance and the voices of Martha and Papas close the journey as Zenithia rises and the credits begin.

The final screen and resumed save

Let the complete credits finish and **wait for the screen reading The End**. Reset after that screen appears, return to the title menu, and load the save used for the completed journey.

Ordinary adventure progress resumes from the saved state before Mildrath's defeat, with access to the Bonus Dungeon available. The post-treasure save preserves the final equipment for the continuing adventure.

The Bonus Dungeon entrance

After the completed ending, load that save and cast **Return to Evil Mountain**. From the field arrival point, walk **directly south into the swamp** to reach the Bonus Dungeon entrance.

Recover and save before exploring its deeper rooms. The full treasure route, new companions, and Estark confrontation continue in the next section.

10.11 Final-dungeon and pre-ending completion checklist

Collections and the last saved inventory

Confirm the following before beginning Mildrath's two-form encounter:

Before the ending

Arrival shrine: Sage's Stone collected and assigned to the intended battle-recovery user.

Shahanna: Defense Seed, Elven Medicine, Small Medal, and Sands of Time collected.

Early mountain: Robe of Darkness, Ogre Shield, and the first fixed Small Medal.

Arrow floors: Echoing Hat, second fixed Small Medal, Sun Crown, and Sacred Pitcher.

Lava passage: Pitcher used, cursed Multi-Edge Sword retained unequipped, King Metal Helm and 3,300 G collected.

Final rooms: Five-move puzzle completed, Hellbattlers defeated, and Orihalcon Fang collected and assigned.

Party: Three active roles covered, reserves equipped, recovery items distributed, and HP and MP restored.

Save: Final treasures and preparation recorded before returning for the boss fights.

11 Postgame and the Bonus Dungeon

The ending opens another journey beneath the swamp outside Evil Mountain. The Bonus Dungeon rewards exploration with powerful equipment and the Drum of War, then leads to the sleeping Estark in its deepest chamber.

Use the first visits to collect equipment and develop the roster. A recovered party and carefully assigned support items make the deeper return trips easier to sustain. The optional confrontation provides a new test for the family and monster companions raised through the adventure.

11.1 Bonus Dungeon entrance and access prerequisites

Loading the completed journey

Finish Mildrath's two forms, the homeward town visits, the Granvania celebration, and the credits through **The End**. Reset after that screen and load the save used for the completed game.

The ordinary adventure resumes from its pre-boss saved state, with Bonus Dungeon access available. The final treasures recorded before the ending remain useful for this next journey.

The swamp entrance

Cast **Return to Evil Mountain**. From the field arrival point, walk **directly south into the swamp** to enter the Bonus Dungeon.

The opening stair leads into a basement with several branches. The first treasure pair lies west of the arrival passage, while the onward northern route eventually reaches a locked gate.

Preparation for the first treasure circuit

Carry the **Final Key with an active member**. Restore the intended fighters and reserves, and keep Outside available for a recovery trip after collecting the early rewards.

Assign the Sage's Stone and other battle-healing items to members who can use them when needed. Keep stronger healing, revival, and MP supplies distributed across the travelling roster. The enemies are demanding enough to make a fully prepared first entry worthwhile.

Save before descending, then explore with the aim of retaining the new treasure and recording it during the next town visit.

Before entering the Bonus Dungeon

Completion: The End reached and the associated save loaded.

Entrance: Southern swamp outside Evil Mountain identified.

Key: Final Key carried by an active traveller.

Party: Active roles and reserves equipped, HP and MP restored, recovery items assigned, and departure saved.

11.2 Floor-by-floor route, branching passages, and puzzle solutions

First basement: the entrance pair and Final Key gate

From the arrival stairs, go west into the small side room. Open both chests for a **Restoration Orb** and the dungeon's fixed **Small Medal**.

Achievement Alert: Small Medal Collector (25 points)

RA 61421
Requirement: Collect 19 small medals from treasure chests
Update the chest-medal tally at this first western chest beside the Restoration Orb. Check the unlock when the journey's total reaches 19 placed chest medals, including earlier collected chest finds. Keep searched-location medals and monster or trapped-container battle drops outside this tally. The threshold may have been reached earlier.

Return to the arrival passage and continue north.

Pass the early eastern side path and follow the main route to the northern fork. The northeastern branch ends at the **first Mimic chest**. Prepare for its optional battle if choosing to open it.

Return to the fork and take the northwestern route. Continue west past the southern branch, then open the **barred gate with the Final Key** and follow the passage south into the next area.

The Shield of Radiance ledge

The next area has large holes and narrow connecting walkways. Work around the edges toward the southeastern passage. A fall reaches a lower pocket, whose stairs return to this area and provide another way to approach the correct walkway.

Follow the passage east and south to the isolated chest containing the **Shield of Radiance**.

Immediately after the pickup, equip the **Hero** with the **Sun Crown**, **Dragon Staff**, **Royal Cloak**, and **Shield of Radiance**. Empty his accessory slot, removing any Ring, armband, or Ribbon, and inspect all five equipment slots.

Achievement Alert: The Sacred Raiment (5 points)

RA 61424
Requirement: Equip the main character with the Sun Crown, Dragon Staff, Royal Cloak, and Shield of Radiance (and no accessories)
Equip the four retained pieces on the Hero as soon as this shield is collected and leave his accessory slot empty. Check the unlock with the complete set equipped.

Retrace the ledge detour and continue southwest into the area with cracked floor tiles.

Second basement treasure pocket: Drum and Sabre

Use the stairs or deliberately fall through a cracked tile to enter the lower treasure area. From the landing, cross west through the swamp to the **Drum of War** chest. Collect it and assign it to an available battle-item user before continuing.

Achievement Setup: That's Got To Hurt

RA 61426
The Drum now provides the attack boost for the single-hit procedure begun with Golem. Develop Golem to level 11 for ChargeUp, equip a strong compatible weapon, use the Drum or Bikill, then ChargeUp and attack one enemy. Check one displayed hit for at least 500 damage. Keep ordinary training, healing, and combat available during the attempt.

Return toward the landing, then explore east and north for the **Hell Sabre**, also called Hell Saber. Climb back to the cracked-floor area.

Follow the intact route south, west, and north around the holes to the northwestern stairs. Descend into the first four-way maze.

Second basement maze: the cursed sword and onward stairs

The arrival room has paths in four directions. Take the eastern branch first and open the chest for the **Sword of Decimation**. It is cursed. Keep the ordinary weapon assigned while storing this find.

Return to the starting room and use the following sequence of room exits:

1. Go **west**, then **north**.
2. Choose the **northwestern branch** and continue **north** again.
3. Go **east**, then **south**.
4. Go **east**, then **south** again.
5. At the two-torch area, take the **eastern stairs downward**.

The routes have deceptive screen connections. Keep the starting room and the two-torch passage as landmarks when returning after a detour.

Third basement maze: King Metal Armor

The next maze's arrival room has a large central block. Go **west, south, then south again** to the **King Metal Armor** chest.

Retrace **north, north, then east** to the central-block arrival room. Restore the party if the detour's encounters have used substantial HP or MP.

The upper medicine pocket and three empty chests

From the central-block room, go north and take the upward stairs. They reach a separate second-basement treasure pocket. One chest contains **Elven Medicine** and the other is the **second Mimic**. Choose the optional fight after preparing the active party.

Return down the stairs and south to the central-block arrival room. Three eastern side rooms in this maze hold **empty chests**: one east of the arrival room, one east of the northern block room, and one east of the southern block room.

For the onward route, leave the arrival room **south, then east**. The chest in that eastern room is empty, and its nearby stairs descend toward the lower swamp passage.

Fourth basement: Iron Ball and the final descent

Follow the long swamp corridor north, east, and south. At the fork, take the western route. Explore north for the **Iron Ball of Decimation** chest.

Return south one room and go west to the next stairs. They lead into the fifth basement's lava chamber. Follow the projecting walkway north to the sleeping **Estark**.

Restore the intended combat group and assign its item owners before speaking to him. The conversation provides a choice to begin the optional battle, so the approach is a convenient place to review the party first.

Bonus Dungeon route collections

Entrance side room: Restoration Orb and one fixed Small Medal.

First-floor ledge: Shield of Radiance.

Cracked-floor lower pocket: Drum of War and Hell Sabre.

First four-way maze: Unequipped cursed Sword of Decimation.

Second maze armor branch: King Metal Armor.

Upper return pocket: Elven Medicine and the separate Mimic.

Fourth basement spur: Iron Ball of Decimation.

Other containers: First Mimic at the northern entrance branch and three empty chests in the central-block maze.

11.3 Bonus treasure, the Drum of War, and unique equipment

Assigning the new equipment

Return to town after a successful treasure circuit, recover, and save the new inventory. Inspect eligible wearers and the equipment already in their slots before assigning the rewards.

Bonus equipment and battle roles

Reward	Strength	Assignment advice
Shield of Radiance	65 defense	Fire and cold protection for a compatible shield wearer.
King Metal Armor	95 defense	Strong body protection. Compare the current armor's elemental properties too.
Hell Sabre	120 attack	A powerful focused weapon for an eligible physical member with a weaker weapon.
Iron Ball of Decimation	125 attack	Whole-formation coverage for a compatible user during group encounters.
Sword of Decimation	Cursed	Retain as treasure and keep the ordinary battle weapon assigned.

The Hero's Dragon Staff already provides 125 attack, and the Son has the Zenithian Sword. The new weapons may give another active member or reserve a greater improvement. Compare the actual compatible equipment and the intended battle role.

The Drum's party-wide attack support

Used through **Item during battle**, the **Drum of War doubles the party's attack power**. It can be used repeatedly and gives the physical fighters a shared support action.

Assign it to a dependable active member and choose the item action directly when starting a prepared attack plan. A second member can apply Barrier or handle healing while the Drum's user provides offense support to the fighters.

When an opponent removes support effects, use the Drum again during a safe recovery window. Treat the Drum and Bikill as options for the same attack-boosting job when distributing the turns, and keep essential healing ahead of a repeated enhancement.

The recovery finds

Keep the **Restoration Orb** and **Elven Medicine** accessible in the party's inventory while assigning recovery supplies. Carry the Orb with an intended battle participant as a revival safeguard. The medicine provides a substantial MP refill for a depleted caster. Inspect the remaining supplies after each attempt before returning.

Continue carrying the Sage's Stone, Staff of Benediction, revival supplies, and other MP recovery alongside the new rewards. Their available users and remaining resources determine how well the party sustains the next boss attempt.

11.4 Rare companions and postgame recruitment routes

The new Bonus Dungeon prospects

The Bonus Dungeon provides recruitment encounters for **Hellbattler**, **Lionex**, and **Springer**. The repeated treasure and preparation journeys give the party opportunities to meet them while keeping a recovery stop within reach.

Hellbattler begins with **Explodet and Violent Flames**. It learns **Bounce at level 7**, **Revive at 8**, **Blazemost at 11**, **Sparkling Breath at 13**, and **Infernal Flames at 15**. Its growing spell and breath options let it cover several offensive and support jobs.

Lionex has a **level-23 cap**. It begins with Aerocross and develops Eerie Light at 8, Zap at 14, and Lightning at 20. Inspect its current strength, MP, and compatible equipment when choosing its position.

Springer has a **level-50 cap** and begins with **Upper and Decrease**. Tornado at 7 and Aerocross at 15 add offensive options to its initial defense-support role.

Other encounters and the established roster

Great Dragons, Attackbots, and Farewell Crags also appear along the postgame routes. Their existing strengths can complement the new equipment. Keep the strongest developed members available while assessing a new recruit's reliability.

A King Healer with HealUsAll, Barrier, and Revive remains valuable for the final encounter. Curer develops Revive at 23 and Healusall at 30, providing another preparation path for a recovery reserve.

Use manageable ordinary groups for training and recruitment, then return to town to arrange the roster and save progress. Choose the final combat party by its actual abilities, protection, and recovery resources.

11.5 Estark / Esterk: party setup, resistances, healing, and strategy

The sleeping opponent and preparation

Achievement Setup: Underworld Challenge

RA 61413
Prepare for a victory in 25 turns or fewer, including a count of exactly 25. Use ordinary training, strong equipment, Barrier, healing, and the Drum of War. Save the prepared party and collected treasure at a normal church. Hitoshikonomi, the early trap glitch, save-state cheating, and cheats are excluded from this challenge. Check the spoken turn count and achievement unlock after victory.

At the end of the fifth-basement walkway, speak to **Estark**, also called Esterk or Esturk. He remembers his name and asks whether the party has come to destroy him. Answer yes when ready to begin.

Estark has about **9,000 HP** and can act **twice in a round**. A Hero and developed combat companions around level 50 provide a useful preparation target. Review the actual HP, MP, equipment, and support roles before deciding that the group is ready.

Fire and cold protection are important against his strong breath. Spell protection and a healthy HP reserve help withstand Explodet. Status-protective equipment such as an Elven Amulet is useful for a member whose healing or item turn needs to remain available.

Use the first three positions for a durable attacker, a dependable recovery user, and a flexible support or second damage member. Equip the reserves for the same pressure so they are ready to replace a threatened active companion.

Estark preparation

- Restore the intended fighters and reserves before the approach, and save the bonus equipment already collected.
- Assign the Drum of War and Sage's Stone to available users, with the Staff of Benediction as another recovery option.
- Keep Barrier available through the Son, King Healer, or another developed support member.
- Bring strong group healing and reliable revival, alongside ordinary item recovery.
- Distribute Magic Water, Rings of Prayer, Elven Medicine, and revival supplies across the travelling roster.
- Check fire, cold, spell, and status protection on every member expected to enter the battle.

The opening support turns

Open with **Barrier** and the **Drum of War** when the party's condition allows both support actions. The remaining member can attack or handle an immediate injury. Choose the Drum's item command directly.

Bring the supported physical fighters forward as the lineup settles. A developed Golem, another strong monster, the Hero, or the Son can provide sustained attacks, according to the equipment and abilities currently available.

Keep one dependable recovery action in the round plan. The Sage's Stone can handle routine group damage, and the staff helps single-target recovery while preserving the caster's MP for stronger spells or revival.

Two-action pressure and the healing reserve

Estark can combine **Explodet with powerful breath** or another dangerous attack in the same round. Barrier reduces the breath portion, while the spell damage still requires sufficient HP and equipment protection.

Restore endangered companions before returning to an all-out attack turn. Keep HP well above 200 when the group's maximum HP allows it, and judge the margin against the damage the current equipment is taking.

Rotate King Healer or another strong recovery member in for a group refill when needed. An injured active fighter can move to reserve while a prepared replacement continues the offensive role. Bring a revived companion back into the lineup after its condition is suitable.

His third-eye action can put companions to sleep. Keep a functioning recovery user available through the reserves when an important active member loses its turn. The planned status protection supports that recovery continuity.

Restoring enhancements and handling reflection

Estark can clear the party's magical enhancements. Renew **Barrier** when breath pressure is the immediate threat, then use the **Drum** again on a safe turn to restore the attack plan.

Increase can help when physical blows are causing trouble. Give urgent healing priority over rebuilding an enhancement while a member is close to falling.

Watch for Estark's **Bounce**. Use physical attacks against a reflected target and account for reflection before choosing an offensive spell. The carried recovery items remain useful to their assigned active users.

Use MP supplies before the essential caster's reserve becomes too low for protection, group healing, or revival. Another member can take that item turn while the regular healer keeps supporting the party.

Victory and the spoken turn count

Maintain the protected attack and recovery pattern until Estark is defeated. Victory awards **5,000 experience** and **510 G**, with a **Small Medal** possible as a battle reward.

Estark announces how many turns the victory took, then disappears. Record the number if using the encounter as a personal performance goal. Return to town, recover, and save the retained treasure and training progress.

Achievement Alert: Until Next Time (25 points)

RA 61412
Requirement: Defeat Esturk
Defeat Estark and finish his victory dialogue. Check the unlock after the battle and retain the party's ordinary saved progress.

Achievement Alert: Underworld Challenge (25 points)

RA 61413
Requirement: Defeat Esturk in 25 turns or less (no cheating)
After victory, check Estark's announced turn count for 25 or fewer. A count of exactly 25 qualifies. Confirm the unlock from the legitimate prepared attempt before another run. Use ordinary training, the Drum, Barrier, and equipment throughout, with Hitoshikonomi, the early trap glitch, save-state cheating, and cheats excluded.

11.6 Repeat battles, challenge goals, and remaining completion tasks

Returning for another attempt

Leave the dungeon and return to Estark's chamber to face him again. The spoken victory count provides a repeatable score for improving the party's preparation and turn choices.

For **Underworld Challenge**, aim for **25 turns or fewer** on a legitimate repeat victory and confirm the RetroAchievements unlock after the spoken count. Exactly 25 turns meets the goal.

Begin with a reliable clear, then refine one part of the plan at a time. Compare the opening support turns, the Drum user's assignment, reserve transitions, MP refills, and how quickly protection is renewed after a clearing action.

Track both the successful turn count and the recovery resources used. A faster attempt can remain stable when its fighters, healing, and support are balanced.

Finishing the retained collection

Review the nine fixed rewards and the party's storage before planning another treasure trip. Keep optional Mimic rewards separate from the single placed Small Medal. The three empty maze chests complete the container search.

Use the new equipment on the compatible companions who benefit most, and save after a meaningful upgrade or recruitment result. The Drum supports ordinary training journeys as well as the repeat boss fight.

The family and monsters can also return to Mildrath with the postgame equipment for another ending tour. Restore the roster first and save the new treasure before the two-form sequence.

Postgame completion

Fixed rewards: Restoration Orb, Small Medal, Shield of Radiance, Drum of War, Hell Sabre, Sword of Decimation, King Metal Armor, Elven Medicine, and Iron Ball of Decimation.

Containers: Both Mimic locations and all three empty maze chests accounted for.

Assignments: New compatible equipment and the Drum's active user selected, with cursed gear retained safely.

Party: Intended recruitment and training progress saved, reserves equipped, and recovery roles prepared.

Boss: Estark defeated and the victory turn count recorded for any future challenge attempt.

Save: Treasure and preparation retained before another Estark battle or ending run.

12 Human and Temporary Characters

12.1 Profile fields: availability, role, attributes, spells, and equipment

Field	Lookup meaning
Availability	The generation, recruitment event, and departures that govern party access.
Role	Physical damage, healing, support, offensive magic, or field utility.
Attributes	HP and defense support survival, MP supports spells, agility affects order, and intelligence affects command reliability.
Spells	Level-learned abilities and story-earned additions. Return and Chance are event-learned by the Hero.
Equipment	Inspect the available equip list and compare power, protection, and item-use effects for the intended role.

Use the current Status values when assigning a role. The travelling roster holds eight members, with three active combat positions and five reserves where the wagon is available.

12.2 The Hero: childhood, adulthood, and event-learned spells

The Hero is available throughout the playable journey, with story intervals separating the three generations. Strong weapons, substantial HP, single-target healing, and wind magic make him a flexible front-line member. His natural spell progression continues across generations. Return comes from Benett's experiment in Ruraphin, and a later visit there adds Chance.

12.3 Bianca: childhood carryover and the adult marriage route

Bianca accompanies the Lenoire expedition during childhood and rejoins at the Mountain Village for the Waterfall Cave journey. Her childhood development carries into the reunion. Choosing her at the wedding makes her the permanent wife. Bikill, group fire spells, and later Blazemost support a magical role. Use whips for routine groups and protect her HP when assigning a casting turn.

12.4 Flora: second-generation restrictions and later progression

Flora joins at level 10 after her marriage route. During the second generation she remains at level 10 and acts under automatic control. Her level progression and ordinary party control become available in the third generation. Healmore is available at joining, and her later list includes Bikill, Blazemost, and Explodet. Ludman's gifts include 2,000 G and Water Flying Clothes on the sea journey. Budget her second-generation equipment around that delivery.

12.5 The Son: Zenithian equipment, support magic, and combat role

The Son joins at level 5 after the Hero's restoration. He can equip the Zenithian Sword, Shield, Helmet, and Armor as each becomes available. Physical damage, Increase, Barrier at 23, Revive at 27, and

Healus at 30 give him a front-line support role. Carry the Zenithian Shield for its Bounce effect and the Zenithian Sword for its battle dispelling effect.

12.6 The Daughter: offensive magic, support, and equipment

The Daughter joins at level 5 with Surround and Return. Her progression combines ice and explosion spells with Bikill at 16, Decrease at 22, and Bounce at 27. Keep a durable physical attacker beside her to exploit Bikill. Prioritize MP, protective clothing, and reusable casting equipment.

12.7 Sancho: recruitment, utility, and party role

Recruit Sancho through Ruida's tavern in Granvania during the third generation. His level-20 spells are Increase and Sleep. Later Robmagic, Beat, Sacrifice, and Confuse provide situational utility. His substantial HP and heavy weapons support physical combat. Equip agility and protection according to whether he will attack, cast Increase, or use a recovery item.

12.8 Pippin: recruitment, equipment, and physical combat

Recruit Pippin through Ruida's tavern in Granvania during the third generation. He learns no spells or special skills. His role depends on physical equipment, HP, and carried items. A strong weapon and reusable healing item let him contribute damage and emergency recovery without MP expenditure.

12.9 Temporary and AI-controlled companions

These companions have individual joining events and control rules. Their equipment and spells matter within the period in which they travel with the Hero.

12.9.1 Papas

Papas is the Hero's father and accompanies selected childhood journeys, including the initial road and the Reinhart rescue. He fights autonomously, delivers powerful physical attacks, and heals the Hero after escorted battles. His fixed level is 27, with Healmore. The Reinhart events end his party access.

12.9.2 Bella / Vera

Bella accompanies the childhood faerie-realm expedition and leaves when spring is restored. Her fixed level is 7. Heal, Decrease, Firebal, and Surround give the small expedition healing and group support. Her temporary availability ends before the Hero resumes his journey with Papas.

12.9.3 Henry

Henry joins during the childhood Reinhart rescue and travels with the Hero after their escape from captivity in the second generation. He combines physical attacks with Blaze, Decrease, Bang, and control magic. He leaves after the False Queen sequence to remain in Reinhart. His deposited belongings can be collected before departure, and later castle visits continue his family story.

12.10 Human spell-learning tables and event-dependent progression

Each numbered entry gives the character's level followed by the learned spell. Multiple spells at one level are separate additions. Event entries depend on the named story event.

Character	Complete learning sequence
Hero	4 Heal, 6 Antidote, 8 Gale, 9 Upper, 11 Healmore, 12 Identify, 14 Outside, 16 Tornado, 18 Absorb, 22 Healall, 25 Vivify, 28 Farewell, 32 Aerocross. Ruraphin experiment: Return. Later Ruraphin instruction: Chance.
Bianca	3 Blaze, 5 Surround, 7 Decrease, 8 Firebal, 12 Sleep, 13 Bikill, 15 Firebane, 17 Stepguard, 18 Bounce, 20 Blazemore, 23 Defeat, 27 Firevolt, 33 Blazemost.
Flora	10 Healmore, 11 Decrease, 12 Surround, 13 Bikill, 14 Sleep, 15 Stepguard, 16 Firebane, 17 Day-Night, 18 Bounce, 20 Blazemore, 23 Defeat, 27 Firevolt, 33 Blazemost, 37 Explodet. Levels above 10 become available in the third generation.
Son	5 Stopspell, 8 Increase, 10 Repel, 12 Healmore, 13 Firebane, 14 Numboff, 15 Stepguard, 16 Healall, 18 Identify, 20 Curseoff, 23 Barrier, 25 Zap, 27 Revive, 30 Healus, 34 Lightning, 38 Thordain.
Daughter	5 Surround, 5 Return, 9 Outside, 11 Bang, 14 Snowblast, 16 Bikill, 18 Day-Night, 20 Sleep, 22 Decrease, 24 Boom, 27 Bounce, 30 Blizzard, 32 Bedragon, 36 Explodet.
Sancho	20 Increase, 20 Sleep, 25 Robmagic, 28 Beat, 30 Sacrifice, 32 Confuse.
Pippin	No learned spells or skills.
Papas	Fixed level 27: Healmore.
Bella	Fixed level 7: Heal, Decrease, Firebal, Surround.
Henry	1 Blaze, 3 Surround, 6 Decrease, 8 Bang, 12 Confuse, 15 Repel.

12.11 Marriage comparison and family availability by generation

Period	Bianca route	Flora route
Childhood	Lenoire companion, with carried development.	Remains outside the travelling party.
Before wedding	Rejoins for Waterfall Cave.	Marriage candidate in Salabona.
After wedding	Travels and develops with the party.	Joins at 10, automatic control and level-10 limit.
Granvania	Pregnancy, birth, and kidnapping remove the wife from travel.	Same family milestones and departure.
Third generation	Twins join after the Hero's restoration. Wife returns after the Great Temple rescue.	Twins join after the Hero's restoration. Wife returns after the Great Temple rescue, with later levels and party control available.
Combat emphasis	Early carried development, Bikill, and fire magic.	Healmore, later fire magic, and Explodet at 37.

The twins have the same learning sequences on both routes. Family members can be placed in reserve or at Ruida's tavern as the current objective permits.

12.12 Supporting characters and relationship glossary

Name	Relationship or function
Martha	Hero's mother, Papas's wife, and a woman of El Heven.
Sancho	Papas's loyal household companion and the family's caretaker.
Duncan	Bianca's father, later living in the Mountain Village.
Ludman	Flora's father and the Salabona host of the marriage trials.
Andy	Flora's childhood friend and suitor.
Henry	Prince of Reinhart and the Hero's companion through captivity.
Maria	Fellow escapee, Southern Tower companion, and Henry's wife.
Joshua	Maria's brother, who helps the captives escape.
Dale	Henry's younger brother and ruler of Reinhart.
Del	Henry and Maria's son, encountered on the later Reinhart visit.
Ojiron	Papas's brother and Granvania's interim ruler.
Pusan	Travelling companion in the Torokko sequence and the Master Dragon.
Powan	Faerie Village leader, associated with the spring and later faerie visits.
Ruida	Granvania's human-party storage and retrieval contact.
Monster Gramps	Monster storage, status inspection, retrieval, and release contact.

13 Monster Recruitment and Party Planning

13.1 Recruitment unlocks, wagon ownership, and eligibility

Achievement Setup: I Don't Want Your Help

RA 61418

Missable. On this route, keep all random recruitment locked until the adult Killer Panther reunion in Section 6.2. Defer the wagon purchase and the recruitment steps below. Hero and Henry cover the Reinhart route, and the Hero continues alone after Henry leaves. Return to Oracleberry for the wagon after Kitty rejoins, then begin the species collection.

Random recruitment begins in the second generation. Buy the wagon from Oracleberry's northwest merchant at night for 300 G and speak with Monster Gramps in the southwest basement. Carry the Hero on recruitment trips and develop his level as stronger regions open. Only eligible species can join. The travelling roster holds eight members, including three active positions. Wagon access varies by dungeon and story event.

13.2 Battle resolution, enemy groups, recruitment chances, and exceptions

Win the encounter and check the post-battle joining offer. In a mixed encounter, finish the desired species last among the recruitable enemies. Defeated monsters can join through ordinary victories, and called Healers can provide additional opportunities. Escaping enemies supply no defeated candidate. Expel removes enemies from battle, so use damage to defeat a recruitment target. Scripted bosses and the Evil Mountain interior have recruitment restrictions. Use the Demon World field and Bonus Dungeon for the corresponding late recruits.

Rarity varies by species and additional copies can be harder to obtain. Difficulty descriptions are planning aids. An unsuccessful battle can be followed by another eligible encounter. Short runs with a recovery stop keep the search manageable. Preserve room through the storage service.

13.3 Guaranteed story companions and random monster recruitment

The Killer Panther joins after Lenoire in childhood. During the second generation, use Bianca's Ribbon in the cave west of Kabochi to restore his recognition and rejoin him. These are two stages of the same story companion. The other 40 catalog species use random recruitment. Named human companions follow their own story events or Ruida's recruitment service.

13.4 Intelligence, direct commands, and improving obedience

Use an intelligence value above 20 as the practical training target for dependable orders. Check Status after level gains and after each Intelligence Seed. Bianca's Ribbon raises intelligence for an eligible wearer. The Dancing Jewel's short growth schedule makes permanent intelligence improvements useful. Keep essential healing assigned to a reliable member while a new recruit develops.

13.5 Monster Gramps: storage, retrieval, capacity, and releases

The daycare holds up to 50 monsters. Sign Up deposits a companion, Pick Up retrieves one, Check displays its status, and Part releases it permanently. Deposited monsters stop gaining travelling-party experience. Check the depository for belongings transferred during storage and re-equip retrieved companions before combat. Use releases only after checking the species, level, learned abilities, and retained equipment.

13.6 Repeated species, default names, and roster organization

Keep separate records for repeated species using the displayed personal name and level. The catalog's name lists identify possible assigned names. Additional names do not indicate new species. Check both the travelling party and daycare when organizing duplicates. A second healer can supply extra MP, and a duplicate physical attacker needs a second equipment set. Reserve storage for distinct roles and scarce companions before collecting extra copies.

For the achievement milestones, record distinct species as they join and check the achievement list at the first recruit and the 5, 10, and 16 goals. Retain one of each distinct species in the travelling party or daycare until the required milestones have registered. Organize releases afterward. Keep the Kitty-first route protected until its separate reunion unlock. The adult panther event has its own alert in 6.2.

13.7 Recruitment routes by generation and region

These circuits use recovery towns as bases. The location table in Chapter 14 gives a recruitment area for every species.

13.7.1 Oracleberry, Santa Rosa, and Reinhart

Circuit	Targets and purpose
Oracleberry fields	Slime, Drakee, Brownie, and Bomb Baby. Establish a cheap second-generation roster.
Santa Rosa Cave	Slime and Hork in the deeper boat-access section. Combine recruitment with the sword and letter visit.
Reinhart fields and approach	Slime Knight, Yeti, and Dancing Needle. Add healing, breath attacks, or control.
Southern Tower	Healer, including called Healers, and Kukkle on the approach. Train a recovery or defense-support reserve.

13.7.2 Port Selmi, Kabochi, Ruraphin, and Salabona

Port Selmi's fields offer Magician and Dragon Pup. Kabochi supplies the panther reunion. Ruraphin and the Mountain Village approaches offer Puppet Man. Around Salabona, Wyvern supplies healing and breath attacks. The volcano offers Bomb Crag and Dancing Jewel. Continue the ring objectives while searching these regions, using town recovery between outings.

13.7.3 Telepador, mountain routes, and Granvania

Telepador's desert offers Big Eye, and the Medal King island offers Curer and King Slime. Around Ned's Inn and the Granvania mountain route, seek Mad Dragon, Minidemon, Messala, and Metal Babble. Granvania's fields and trial approach offer Orc King. The upper Demon Tower offers Leaonar. Orc King's Revive at 11 and Healus at 8 are particularly useful development targets.

13.7.4 El Heven, Zenithia routes, and the sea

The later sea offers Neileus. El Heven and the central-land routes offer Golem, Eliminator, and Centaurus. The Sky Tower offers King Healer. The Forest of Illusions offers Eigerhorn and Farewell Crag. Search the northern continent and Emblem Cave routes for Blizzard Hawk and Soldier Bull. Keep Return and Outside available for recovery trips during training.

13.7.5 Demon World and Bonus Dungeon

Search the Demon World fields for Attackbot, Great Dragon, and Gigantes. Lionex and Springer can be sought on late routes and in the Bonus Dungeon. Hellbattler is a Bonus Dungeon recruitment objective. Search outside Evil Mountain for eligible field encounters, and use the Bonus Dungeon for further late recruitment after clear-state access opens.

13.8 Party roles: damage, healing, support, resilience, and utility

Job	Examples	Selection test
Physical damage	Slime Knight, Panther, Golem, Attackbot, Gigantes	Weapon compatibility, attack, HP, and reliable orders.
Recovery	Healer, Curer, Wyvern, Orc King, King Healer	Current healing spells, MP, speed, and survival.
Support	Kukkle, Centaurus, Soldier Bull, King Slime	Bikill, Increase, Barrier, or revival at the required level.
Group damage	Dragon Pup, Yeti, Great Dragon, Magician, Eigerhorn	Useful breath or spell tier against the current encounters.
Resilience	Metal Babble, Dancing Jewel, Golem, Great Dragon	Species protection, equipment, HP, and the expected damage type.
Field utility	Slime, Wyvern, Neileus, Drakee	Outside, Return, Stepguard, or Day-Night while travelling.

13.9 Recommended teams for each story phase and major boss

Phase	Three active members	Useful reserve or priority
Reinhart and False Queen	Hero, Henry, Slime Knight	Healer for recovery as it develops.
Ring trials and Lava Savages	Hero, Slime Knight, reliable attacker	Wyvern or Healer. Maintain healing through group damage.
Granvania and Demon Tower	Hero, Slime Knight, Panther or Orc King	Wife for support where available. Train Orc King's Healus and Revive.

Phase	Three active members	Useful reserve or priority
Third-generation travel	Hero, Son, Golem or Slime Knight	Daughter for Bikill and travel, recovery monster for MP depth.
Buorn and Boble bosses	Hero, Son, durable attacker	Son's Barrier, Increase, and a healing reserve.
Great Temple	Hero, Son, Daughter on the approach	Equip all three humans. Ivol's battle restores roster-swapping opportunities.
Mildrath	Son, durable attacker, reliable healer	Hero, Curer or King Healer, Daughter, Great Dragon according to development.
Estark	Durable damage dealer, Barrier user, party healer	Sage's Stone, Drum of War, revival, and replacement healing MP.

Assign item users and replacement members before entering a restricted area. Repeat defense and breath protection after enemy dispelling, and keep a healing action available when changing the front line.

13.10 Level caps, training priorities, and late-game replacements

Short-cap companions mature quickly, while level-99 species have long growth schedules. The Dancing Jewel caps at 7, Metal Babble at 8, and Orc King at 30. Train for a useful ability: Curer's Revive at 23 and Healusall at 30, Wyvern's Healus at 18, King Healer's Barrier at 7 and Revive at 10, Golem's Meditate at 20, and Great Dragon's Sparkling Breath at 30. Compare present HP, agility, equipment, and MP before replacing a developed companion. The next catalog keeps the maximum-level and learning fields separate.

13.11 Rare recruits, metal companions, and realistic collection planning

Attackbot, Metal Babble, Farewell Crag, and Hellbattler are extended-search objectives. Great Dragon and King Healer can also require repeated visits. Choose a fixed number of encounters per outing and recover afterward. Metal Babble combines very high defense with low HP, so protect it while training. The recruitable metal species is Metal Babble. Ordinary Metal Slimes and Metal Kings supply experience during collection routes. Save after a valuable joining event, retain a functional story team, and use daycare capacity to preserve rare recruits.

14 Complete SNES Monster Companion Catalog

14.1 Companion profile fields

Each profile gives a usable recruitment region, growth ceiling, starting abilities, every later learning level, and a compact role. “Starts” means available when recruited. “None” means the species has no starting spell or special skill. The cap field is independent of the final learning level. Firebal and Firevolt also appear as Fireball and Firebolt. Freeze Ray also appears as Freezing Rays. These names identify the same respective abilities.

14.2 Individual monster profiles

14.2.1 Attackbot

Region and cap: Demon World fields, level 30. **Abilities:** Starts with none and learns none. **Role:** Durable physical attacker with weapon-based damage. Equip and develop its attack and defenses. Its companion profile has no learned double-action skill.

14.2.2 Big Eye

Region and cap: Telepador desert and earlier southern-tower encounters, level 20. **Abilities:** Starts with Healmore and Cold Breath. Learns 5 Build Up, 8 Dazzling Light, 10 Sweet Breath, 15 Healall. **Role:** Early recovery and group breath support, with a short growth schedule.

14.2.3 Blizzard Hawk

Region and cap: Northern continent and Emblem Cave routes, level 25. **Abilities:** Starts with Defeat, Cold Breath, Freezing Breath. Learns 8 Strange Dance 3, 15 Healus, 23 Sparkling Breath. **Role:** Cold group damage with secondary party healing.

14.2.4 Bomb Baby

Region and cap: Oracleberry fields, level 15. **Abilities:** Starts with Sacrifice. Learns 5 Body Attack. **Role:** Sacrificial damage and recoil attacks. Keep recovery available.

14.2.5 Bomb Crag

Region and cap: Volcano south of Salabona, level 20. **Abilities:** Starts with Sacrifice and Charge Up. Learns 10 Body Attack, 19 Farewell. **Role:** Emergency sacrifice or party restoration, with a durable stone body.

14.2.6 Brownie

Region and cap: Fields east of the nunnery and around Oracleberry, level 99. **Abilities:** Starts with none and learns none. **Role:** Physical specialist. Weapon upgrades and obedience determine usefulness.

14.2.7 Centaurus

Region and cap: Central-land Sky Tower approach and surrounding routes, level 50. **Abilities:** Starts with Healmore. Learns 5 Burning Breath, 9 Repel, 15 Boom, 20 Bikill, 23 Healall, 27 Barrier. **Role:** Physical and support hybrid with healing and late breath protection.

14.2.8 Curer

Region and cap: Medal King island and called healing-monster encounters, level 50. **Abilities:** Starts with Healall. Learns 3 Healmore, 8 Upper, 10 Increase, 12 Vivify, 18 Healus, 23 Revive, 30 Healusall. **Role:** Long-term recovery specialist. Train revival and party healing first.

14.2.9 Dancing Jewel

Region and cap: Salabona volcano, level 7. **Abilities:** Starts with Decrease, Confuse, Stopspell, Strange Dance 1. Learns 4 Absorb, 5 Beat, 6 Sleepmore, 7 Aerocross. **Role:** Resistant control caster. Intelligence improvements support dependable commands.

14.2.10 Dancing Needle

Region and cap: Reinhart fields, level 25. **Abilities:** Starts with Strange Dance 1. Learns 5 Strange Dance 2, 10 Sleep Attack, 15 Strange Dance 3, 20 Numbing Attack, 25 Body Attack. **Role:** MP disruption and attack-based status control.

14.2.11 Dragon Pup

Region and cap: Port Selmi fields and Southern Tower encounters, level 30. **Abilities:** Starts with Fire Breath. Learns 5 Sweet Breath, 15 Flame Breath, 28 Violent Flames. **Role:** MP-free fire damage and sleep support. Protect it during early training.

14.2.12 Drakee

Region and cap: Oracleberry and western first-continent fields, level 99. **Abilities:** Starts with none. Learns 5 Surround, 10 Sleep, 15 Day-Night, 17 Strange Dance 1, 20 Robmagic, 22 Dazzling Light, 38 Bedragon. **Role:** Early control and later field utility, with a long growth schedule.

14.2.13 Eigerhorn

Region and cap: Forest of Illusions, ceiling unsettled between 40 and 50. **Abilities:** Starts with Firebane, Tornado, Snowblast. Learns 7 War Cry, 9 Charge Up, 11 Firevolt, 13 Eerie Light, 15 Blizzard. **Role:** Broad group magic with strong physical potential. Its complete spell development through 15 is a practical training target.

14.2.14 Eliminator

Region and cap: Later northern-continent routes, including west of Alcapa, level 30. **Abilities:** Starts with none. Learns 7 Massacre, 20 Sap. **Role:** Heavy physical damage and single-target defense reduction. Massacre carries friendly-fire risk.

14.2.15 Farewell Crag

Region and cap: Forest of Illusions and late Salabona-region fields, level 20. **Abilities:** Starts with Farewell. Learns 6 Body Attack, 8 Bounce, 10 Dazzling Light, 14 Vivify, 20 Thunder. **Role:** Emergency party restoration, with revival and disruption options.

14.2.16 Gigantes

Region and cap: Demon World fields outside Evil Mountain, level 7. **Abilities:** Starts with none and learns none. **Role:** High-power physical combat with a very short development schedule.

14.2.17 Golem

Region and cap: El Heven and central-land Sky Tower routes, level 50. **Abilities:** Starts with none. Learns 8 Build Up, 11 Charge Up, 20 Meditate, 45 Thunder. **Role:** Durable physical anchor with MP-free self-recovery at 20.

14.2.18 Great Dragon

Region and cap: Demon World fields, level 60. **Abilities:** Starts with Flame Breath. Learns 10 Violent Flames, 15 Freezing Breath, 20 Burning Breath, 30 Sparkling Breath, 50 Infernal Flames. **Role:** Resilient physical attacker and strong MP-free group damage.

14.2.19 Healer

Region and cap: Southern Tower, including called Healers, level 99. **Abilities:** Starts with Heal. Learns 5 Repel, 7 Healmore, 10 Antidote, 15 Numboff, 20 Healall, 25 Healus, 30 Vivify, 36 Healusall. **Role:** Early recovery recruit with a complete long-term healing progression.

14.2.20 Hellbattler

Region: Bonus Dungeon. Its maximum-level ceiling remains unsettled. **Abilities:** Starts with Explodet and Violent Flames. Learns 5 Firevolt, 7 Bounce, 8 Revive, 11 Blazemost, 13 Sparkling Breath, 15 Infernal Flames. **Role:** Late magical and breath attacker with reliable revival access at 8. Plan its listed ability development through 15.

14.2.21 Hork

Region and cap: Santa Rosa Cave's deeper boat-access floors, level 30. **Abilities:** Starts with Lick and Poison Attack. Learns 10 Cold Breath, 15 Tempting Dance, 20 Poison Breath, 25 Deadly Poison. **Role:** High-HP physical and status support companion.

14.2.22 Killer Panther: childhood and adult story recruitment

Region and cap: Alcapa after Lenoire, then the cave west of Kabochi, level 99. **Abilities:** Starts with none. Learns 17 Charge Up, 21 War Cry, 33 Freeze Ray, 40 Thunder. **Role:** Fast physical damage and later enemy dispelling. Use Bianca's Ribbon in the Kabochi cave battle for the adult reunion.

14.2.23 King Healer

Region and cap: Sky Tower, level 20. **Abilities:** Starts with Healusall and Robmagic. Learns 5 Absorb, 7 Barrier, 10 Revive, 14 Farewell, 17 Chance, 20 Bedragon. **Role:** Full-party healing reserve with revival and breath protection. Healusall costs 36 MP, so monitor reserves closely.

14.2.24 King Slime

Region and cap: Medal King island and Telepador-area encounters, level 30. **Abilities:** Starts with Vivify. Learns 5 Increase, 10 Barrier, 12 Blazemore, 15 Revive, 18 Freeze Ray, 20 Violent Flames, 27 Blazemost. **Role:** Defense, breath protection, revival, and later group damage.

14.2.25 Kukkle

Region and cap: Fields south of the nunnery and Southern Tower approach, level 20. **Abilities:** Starts with Decrease. Learns 5 Surround, 10 Sleep, 13 Confuse, 15 Expel, 17 Increase, 18 Curseoff, 19 Stopspell, 20 Bikill. **Role:** Early group control with eventual attack and defense support.

14.2.26 Leaonar

Region and cap: Upper Demon Tower floors north of the Northern Church, level 30. **Abilities:** Starts with none. Learns 5 Surround, 9 Build Up, 12 Decrease, 15 Flame Breath. **Role:** Physical damage with group disruption and a developing breath attack.

14.2.27 Lionex

Region and cap: Demon World field routes and Bonus Dungeon, level 23. **Abilities:** Starts with Aerocross. Learns 8 Eerie Light, 14 Zap, 20 Lightning. **Role:** Strong wind and lightning magic with physical equipment potential.

14.2.28 Mad Dragon

Region and cap: Ned's Inn and southeastern-continent fields, level 40. **Abilities:** Starts with none. Learns 6 Sweet Breath, 7 Tempting Dance, 8 Flame Breath, 10 Burning Breath, 13 Deadly Poison, 15 Violent Flames. **Role:** Physical and breath damage with several MP-free control options.

14.2.29 Magician

Region and cap: Port Selmi fields, level 99. **Abilities:** Starts with Stopspell and Blaze. Learns 5 Firebal, 12 Firebane, 15 Robmagic, 19 Blazemore, 24 Absorb, 28 Firevolt. **Role:** Early fire caster with silence and MP-management options.

14.2.30 Messala

Region and cap: Granvania's southern mountain cave, level 50. **Abilities:** Starts with Stopspell and Eerie Light. Learns 6 Beat, 11 Sleepmore, 14 Blazemore, 20 Defeat, 22 Curseoff, 27 Freezing Breath, 30 Blazemost. **Role:** Status magic, single-target fire, and later cold breath damage.

14.2.31 Metal Babble

Region and cap: Granvania mountain cave and other Metal Babble encounters, level 8. **Abilities:** Starts with Firebal and Bang. Learns 3 Upper, 4 Firebane, 5 Boom, 6 Firevolt, 7 Farewell, 8 Explodet. **Role:** Very high defense and broad magical protection, with low HP. HP growth items and careful training help survival against exceptional physical hits.

14.2.32 Minidemon

Region and cap: Granvania's southern mountain cave and Ned's Inn routes, level 30. **Abilities:** Starts with Blazemore. Learns 4 Lick, 10 Confuse, 13 Sweet Breath, 17 Boom, 20 Day-Night, 23 Chance, 25 Blazemost, 28 Explodet. **Role:** Fire and explosion caster with MP-free disruption.

14.2.33 Neileus

Region and cap: Later sea encounters, especially southern waters, level 50. **Abilities:** Starts with Snowblast and Tornado. Learns 6 Bounce, 10 Return, 12 Sleep, 17 Vivify, 20 Blizzard, 23 Aerocross, 40 Thunder. **Role:** Ice and wind magic, travel, and reserve revival.

14.2.34 Orc King

Region and cap: Granvania fields and trial-route encounters, level 30. **Abilities:** Starts with Vivify. Learns 6 Beat, 8 Healus, 9 Stepguard, 11 Revive, 15 Defeat, 20 Blizzard. **Role:** Early access to reliable revival and party healing, with physical support.

14.2.35 Puppet Man

Region and cap: Ruraphin and Mountain Village approaches, level 30. **Abilities:** Starts with Strange Dance 2. Learns 6 Bounce, 10 Strange Dance 3, 15 Stopspell, 18 Absorb, 20 Repel, 23 Tempting Dance, 25 Tornado, 30 Aerocross. **Role:** MP disruption and spell support, followed by strong wind magic.

14.2.36 Slime

Region and cap: Oracleberry fields and Santa Rosa Cave, level 99. **Abilities:** Starts with none. Learns 7 Expel, 10 Increase, 15 Decrease, 18 Outside, 20 Confuse, 25 Stepguard, 30 Vivify, 45 Eerie Light, 77 Meditate, 99 Infernal Flames. **Role:** Inexpensive early support and travel utility, with distant high-level rewards.

14.2.37 Slime Knight

Region and cap: Reinhart fields and nearby dungeon encounters, level 99. **Abilities:** Starts with Heal and Robmagic. Learns 5 Healmore, 9 Antidote, 12 Bang, 18 Numboff, 20 Healall, 23 Boom. **Role:** Durable sword-and-armor attacker with single-target recovery.

14.2.38 Soldier Bull

Region and cap: Emblem Cave and northern mining-route encounters, level 30. **Abilities:** Starts with Charge Up. Learns 5 Upper, 10 Bikill, 15 Decrease. **Role:** Physical attacker with a compact attack and defense support list.

14.2.39 Springer

Region and cap: Boble island and Bonus Dungeon, level 50. **Abilities:** Starts with Decrease and Upper. Learns 7 Tornado, 15 Aerocross. **Role:** Armored physical and wind-magic hybrid.

14.2.40 Wyvern

Region and cap: Salabona fields and volcano encounters, level 60. **Abilities:** Starts with Healmore. Learns 5 Cold Breath, 10 Sleep, 12 Outside, 15 Healall, 18 Healus, 22 Freezing Breath, 24 Return, 28 Sleepmore, 31 Confuse. **Role:** Versatile healing, cold breath, and field-travel reserve.

14.2.41 Yeti

Region and cap: Reinhart fields and basement encounters, level 40. **Abilities:** Starts with War Cry. Learns 5 Cold Breath, 8 Sweet Breath, 12 Build Up, 15 Snowblast, 20 Lick, 22 Freezing Breath, 30 Blizzard. **Role:** Early cold and control support, followed by stronger group damage.

14.3 Recruitment-location and availability tables

Generation 2 includes areas first reached before the stone interval. Generation 3 includes newly opened routes and their later encounter sets. The panther's two joining events share one species entry.

Species	First period	Usable search region or event
Attackbot	3	Demon World fields.
Big Eye	2	Southern Tower encounters or Telepador desert.
Blizzard Hawk	3	Northern continent and Emblem Cave routes.
Bomb Baby	2	Oracleberry fields.
Bomb Crag	2	Salabona volcano.
Brownie	2	Nunnery and Oracleberry fields.
Centaurus	3	Central-land Sky Tower routes.
Curer	2	Medal King island and eligible called encounters.
Dancing Jewel	2	Salabona volcano.
Dancing Needle	2	Reinhart fields.
Dragon Pup	2	Southern Tower or Port Selmi fields.
Drakee	2	Oracleberry and western first-continent fields.
Eigerhorn	3	Forest of Illusions.
Eliminator	3	Northern-continent routes and fields west of Alcapa.
Farewell Crag	3	Forest of Illusions and late Salabona-region fields.
Gigantes	3	Demon World fields outside Evil Mountain.
Golem	3	El Heven and central-land fields.
Great Dragon	3	Demon World fields.
Healer	2	Southern Tower and eligible called Healers.
Hellbattler	Postgame	Bonus Dungeon.
Hork	2	Santa Rosa Cave's deeper boat-access floors.
Killer Panther	1, 2	Lenoire reward and Kabochi cave Ribbon reunion.
King Healer	3	Sky Tower.
King Slime	2	Medal King island and Telepador-area encounters.
Kukkle	2	South of the nunnery and Southern Tower approach.
Leaonar	2	Upper Demon Tower floors.
Lionex	3	Demon World routes and Bonus Dungeon.
Mad Dragon	2	Ned's Inn and southeastern-continent fields.
Magician	2	Port Selmi fields.
Messala	2	Granvania southern mountain cave.
Metal Babble	2	Granvania mountain cave and later eligible encounters.
Minidemon	2	Granvania mountain cave and Ned's Inn routes.
Neileus	3	Later sea encounters, especially southern waters.
Orc King	2	Granvania fields and trial approach.
Puppet Man	2	Ruraphin and Mountain Village approaches.
Slime	2	Oracleberry fields and Santa Rosa Cave.
Slime Knight	2	Reinhart fields and nearby dungeons.
Soldier Bull	3	Emblem Cave and northern mining routes.
Springer	3	Boble island and Bonus Dungeon.
Wyvern	2	Salabona fields and volcano.
Yeti	2	Reinhart fields and basement.

14.4 Starting abilities, learned abilities, and maximum-level tables

The complete level sequences below provide a single comparison list. An unsettled cap leaves the listed ability-learning levels usable.

Species	Cap	Starts with	Every later learning level
Attackbot	30	None	None.
Big Eye	20	Healmore, Cold Breath	5 Build Up, 8 Dazzling Light, 10 Sweet Breath, 15 Healall.
Blizzard Hawk	25	Defeat, Cold Breath, Freezing Breath	8 Strange Dance 3, 15 Healus, 23 Sparkling Breath.
Bomb Baby	15	Sacrifice	5 Body Attack.
Bomb Crag	20	Sacrifice, Charge Up	10 Body Attack, 19 Farewell.
Brownie	99	None	None.
Centaurus	50	Healmore	5 Burning Breath, 9 Repel, 15 Boom, 20 Bikill, 23 Healall, 27 Barrier.
Curer	50	Healall	3 Healmore, 8 Upper, 10 Increase, 12 Vivify, 18 Healus, 23 Revive, 30 Healusall.
Dancing Jewel	7	Decrease, Confuse, Stopspell, Strange Dance 1	4 Absorb, 5 Beat, 6 Sleepmore, 7 Aerocross.
Dancing Needle	25	Strange Dance 1	5 Strange Dance 2, 10 Sleep Attack, 15 Strange Dance 3, 20 Numbing Attack, 25 Body Attack.
Dragon Pup	30	Fire Breath	5 Sweet Breath, 15 Flame Breath, 28 Violent Flames.
Drakee	99	None	5 Surround, 10 Sleep, 15 Day-Night, 17 Strange Dance 1, 20 Robmagic, 22 Dazzling Light, 38 Bedragon.
Eigerhorn	Unsettled	Firebane, Tornado, Snowblast	7 War Cry, 9 Charge Up, 11 Firevolt, 13 Eerie Light, 15 Blizzard.
Eliminator	30	None	7 Massacre, 20 Sap.
Farewell Crag	20	Farewell	6 Body Attack, 8 Bounce, 10 Dazzling Light, 14 Vivify, 20 Thunder.
Gigantes	7	None	None.
Golem	50	None	8 Build Up, 11 Charge Up, 20 Meditate, 45 Thunder.
Great Dragon	60	Flame Breath	10 Violent Flames, 15 Freezing Breath, 20 Burning Breath, 30 Sparkling Breath, 50 Infernal Flames.
Healer	99	Heal	5 Repel, 7 Healmore, 10 Antidote, 15 Numboff, 20 Healall, 25 Healus, 30 Vivify, 36 Healusall.
Hellbattler	Unsettled	Explodet, Violent Flames	5 Firevolt, 7 Bounce, 8 Revive, 11 Blazemost, 13 Sparkling Breath, 15 Infernal Flames.
Hork	30	Lick, Poison Attack	10 Cold Breath, 15 Tempting Dance, 20 Poison Breath, 25 Deadly Poison.
Killer Panther	99	None	17 Charge Up, 21 War Cry, 33 Freeze Ray, 40 Thunder.
King Healer	20	Healusall, Robmagic	5 Absorb, 7 Barrier, 10 Revive, 14 Farewell, 17 Chance, 20 Bedragon.

Species	Cap	Starts with	Every later learning level
King Slime	30	Vivify	5 Increase, 10 Barrier, 12 Blazemore, 15 Revive, 18 Freeze Ray, 20 Violent Flames, 27 Blazemost.
Kukkle	20	Decrease	5 Surround, 10 Sleep, 13 Confuse, 15 Expel, 17 Increase, 18 Curseoff, 19 Stopspell, 20 Bikill.
Leaonar	30	None	5 Surround, 9 Build Up, 12 Decrease, 15 Flame Breath.
Lionex	23	Aerocross	8 Eerie Light, 14 Zap, 20 Lightning.
Mad Dragon	40	None	6 Sweet Breath, 7 Tempting Dance, 8 Flame Breath, 10 Burning Breath, 13 Deadly Poison, 15 Violent Flames.
Magician	99	Stopspell, Blaze	5 Firebal, 12 Firebane, 15 Robmagic, 19 Blazemore, 24 Absorb, 28 Firevolt.
Messala	50	Stopspell, Eerie Light	6 Beat, 11 Sleepmore, 14 Blazemore, 20 Defeat, 22 Curseoff, 27 Freezing Breath, 30 Blazemost.
Metal Babble	8	Firebal, Bang	3 Upper, 4 Firebane, 5 Boom, 6 Firevolt, 7 Farewell, 8 Explodet.
Minidemon	30	Blazemore	4 Lick, 10 Confuse, 13 Sweet Breath, 17 Boom, 20 Day-Night, 23 Chance, 25 Blazemost, 28 Explodet.
Neileus	50	Snowblast, Tornado	6 Bounce, 10 Return, 12 Sleep, 17 Vivify, 20 Blizzard, 23 Aerocross, 40 Thunder.
Orc King	30	Vivify	6 Beat, 8 Healus, 9 Stepguard, 11 Revive, 15 Defeat, 20 Blizzard.
Puppet Man	30	Strange Dance 2	6 Bounce, 10 Strange Dance 3, 15 Stopspell, 18 Absorb, 20 Repel, 23 Tempting Dance, 25 Tornado, 30 Aerocross.
Slime	99	None	7 Expel, 10 Increase, 15 Decrease, 18 Outside, 20 Confuse, 25 Stepguard, 30 Vivify, 45 Eerie Light, 77 Meditate, 99 Infernal Flames.
Slime Knight	99	Heal, Robmagic	5 Healmore, 9 Antidote, 12 Bang, 18 Numboff, 20 Healall, 23 Boom.
Soldier Bull	30	Charge Up	5 Upper, 10 Bikill, 15 Decrease.
Springer	50	Decrease, Upper	7 Tornado, 15 Aerocross.
Wyvern	60	Healmore	5 Cold Breath, 10 Sleep, 12 Outside, 15 Healall, 18 Healus, 22 Freezing Breath, 24 Return, 28 Sleepmore, 31 Confuse.
Yeti	40	War Cry	5 Cold Breath, 8 Sweet Breath, 12 Build Up, 15 Snowblast, 20 Lick, 22 Freezing Breath, 30 Blizzard.

14.5 Equipment groups, resistance comparisons, and party roles

Use these practical equipment families when distributing purchases and spare gear. The Equip menu determines the compatible pieces for each individual. Species protection, armor protection, defense, HP, and agility all contribute to survival. Compare the expected attack type before assigning a front-line slot.

Family	Companion examples	Equipment and role comparison
Sword and armor	Slime Knight, Attackbot, Golem, Springer, Soldier Bull, Lionex	Strong physical weapons and compatible protective armor support sustained front-line damage.
Heavy physical	Brownie, Eliminator, Gigantes, Orc King, Eigerhorn, Hellbattler	Compare individual weapon and armor compatibility. Prioritize HP and reliable damage or support.
Fang and claw	Panther, Dragon Pup, Mad Dragon, Great Dragon	Fang and claw weapons support physical damage. Breath tiers provide independent group attacks.
Small and flying	Slime, Drakee, Wyvern, Blizzard Hawk, Kukkle	Check light weapons and clothing individually. Recovery, breath damage, and utility can determine equipment priorities.
Recovery casters	Healer, Curer, King Healer, King Slime	Protective equipment and agility help healing arrive safely. Preserve MP for the chosen recovery tier.
Magic specialists	Magician, Minidemon, Neileus, Messala, Dancing Jewel	Compatible robes, hats, and reusable casting items reduce spell expenditure and support survival.
Control and bulky bodies	Big Eye, Yeti, Hork, Puppet Man, Dancing Needle, Centaurus, Leaonar	Compare individual weapon and armor access. Assign control turns alongside a reliable damage dealer.
Sacrificial bodies	Bomb Baby, Bomb Crag, Farewell Crag	Survival equipment preserves the emergency action. Recoil and sacrifice require a recovery plan.
Metal body	Metal Babble	High natural defense and broad magic protection accompany low HP. Critical physical hits remain a survival concern.

Protection comparison	Party consequence
Dancing Jewel	Strong natural defenses and magical protection make it a control candidate once its intelligence supports orders.
Great Dragon	Natural resilience complements its physical and breath roles. Maintain party healing against the actual enemy attack mix.
Golem	Substantial HP and compatible armor support physical endurance. Meditate supplies self-recovery.
Metal Babble	Ordinary physical and magical damage can be very low, while limited HP makes exceptional physical hits dangerous.
Recovery monsters	Equip for survival and turn order. A fallen healer removes both its spells and carried recovery items from the immediate plan.
Armor and shields	Water Flying Clothes protect against fire, Dragon Shield protects against breath, and Magic Armor protects against spells for eligible wearers.

14.6 Companion names and aliases

Personal names distinguish individual recruits. Species aliases help match older names to the catalog. The childhood and adult panther keep the chosen story name. Neileus also appears as Nereus, and Pippin also appears as Pippen.

Species	Personal names or species alias
Attackbot	Killer, Junchi, Musashi, Robin. Also Killer Machine.
Big Eye	Eyeleen, Gandalf, Medakich, Sachimar.
Blizzard Hawk	Blizzo, Hawk, Motchin, Torimaru.
Bomb Baby	Bagpipe, Chiochio, Nannan, Nitro.
Bomb Crag	Gansuke, Kaboom, Rocky, Yonichi. Also Bomb Rock.
Brownie	Bonk, Brown, Shigemar, Ton-ton.
Centaurus	Centas, Kaioh, Motosumi, Pakara.
Curer	Behobeho, Curebert, Curie, Takarin.
Dancing Jewel	Jewel, Marilyn, Richie, Yasu.
Dancing Needle	Capoeira, Danny, Feiba, Mitihiko.
Dragon Pup	Doran Jr, Drasky, Pyon, Ribasto.
Drakee	Drakichi, Lucky, Manabu, Miwaren.
Eigerhorn	Eiger, Nero, Ossan, Shinji.
Eliminator	Axeman, Decker, Emil, Minatar.
Farewell Crag	Cragg, Farwel, Iwao, Shigeyan.
Gigantes	Gantes, Gian, Giga, Yasuhiro.
Golem	Golemath, Ishio, Orion, Sander.
Great Dragon	Caesar, Drago, Great D, Trishi.
Healer	Genkichi, Healbert, Healie, Mr. Fuku.
Hellbattler	Batler, Hellbell, Moses, Sugiyan.
Hork	Kazuya, Robert, Ropes, Smith. Also Rotting Corpse.
Killer Panther	Borongo, Puckle, Chirol, Grolin. Childhood Baby Panther and adult Killer Panther are the same companion.
King Healer	Heal Rex, Hitoshi, Kingbert, Sadakich.
King Slime	Crown, Kazubo, King, Noririn.
Kukkle	Kukkle, Kumimin, Netch, Pico.
Leaonar	Leo, Noboru, Ryan, Simba.
Lionex	Devilra, Jonas, Nex, Raioh.
Mad Dragon	Madd, Moritake, Ragond, Ryuta.
Magician	Jumon, Melby, Merlin, Yukinov.
Messala	Buffler, Noririn, Sala, Satochin.
Metal Babble	Briskly, Metabab, Metalin, Yubo.
Minidemon	Konomi, Lucifer, Minimon.
Neileus	Ajapa, Jinji, Nereus, Umijiji. Also Nereus.
Orc King	Kuukin, Macbeth, Orcus, Yanaken.
Puppet Man	Patton, Poupee, Puppeck, Sinohara.
Slime	Akira, Sasuke, Slalin, Slibert.
Slime Knight	Arthur, Chun, Pierre, Taichi.
Soldier Bull	Brawn, Bruto, Manji, Yasunon.
Springer	Mustang, Perro, Ringer, Spur.
Wyvern	Daizou, Tetsu, Toby, Wynn. Also Kimera.
Yeti	Mihomiho, Snowman, White, Yeta.

15 Spells and Special Abilities

15.1 Alphabetical index: MP cost, targets, effects, and users

Users below are the humans and recruitable companions with the ability in their learning lists. Item effects have their own table at the end of this chapter. A cost of 0 indicates an MP-free ability. Farewell spends the caster's remaining MP and sacrifices the caster. Check Curseoff's displayed MP cost before using it. "Party" in battle means the participating allies.

Ability	MP	Target and effect	Users
Absorb	2	Self. Receive MP from qualifying spells directed at the caster.	Hero, Drakee, Dancing Jewel, Magician, King Healer, Puppet Man.
Aerocross	8	Enemy group. Strong wind damage.	Hero, Dancing Jewel, Lionex, Neileus, Puppet Man, Springer.
Antidote	2	Ally. Cure poison.	Hero, Healer, Slime Knight.
Bang	5	All enemies. Basic explosion damage.	Henry, Daughter, Metal Babble, Slime Knight.
Barrier	3	Party. Reduce fire and cold breath damage.	Son, Centaurus, King Healer, King Slime.
Beat	4	Enemy. Attempt instant death.	Sancho, Dancing Jewel, Messala, Orc King.
Bedragon	18	Self. Become a dragon with automatic dragon actions.	Daughter, Drakee, King Healer.
Bikill	6	Ally. Double ordinary physical attack damage.	Bianca, Flora, Daughter, Centaurus, Kukkle, Soldier Bull.
Blaze	2	Enemy. Basic single-target fire damage.	Bianca, Henry, Magician.
Blazemore	4	Enemy. Stronger single-target fire damage.	Bianca, Flora, King Slime, Magician, Messala, Minidemon.
Blazemost	10	Enemy. Highest single-target fire tier.	Bianca, Flora, Hellbattler, King Slime, Messala, Minidemon.
Blizzard	12	All enemies. Strong ice damage.	Daughter, Eigerhorn, Neileus, Orc King, Yeti.
Body Attack	0	Enemy and user. Heavy attack with self-damage.	Bomb Baby, Bomb Crag, Dancing Needle, Farewell Crag.
Boom	8	All enemies. Middle explosion tier.	Daughter, Centaurus, Metal Babble, Minidemon, Slime Knight.
Bounce	4	Self. Reflect qualifying spells.	Bianca, Flora, Daughter, Farewell Crag, Hellbattler, Neileus, Puppet Man.
Build Up	0	Self. Prepare increased physical damage.	Big Eye, Golem, Leaonar, Yeti.
Burning Breath	0	Enemies. Attempt paralysis.	Centaurus, Great Dragon, Mad Dragon.
Chance	20	Variable. Random battle effect.	Hero, King Healer, Minidemon.
Charge Up	0	Self. Concentrate power for a following attack.	Bomb Crag, Eigerhorn, Golem, Killer Panther, Soldier Bull.
Cold Breath	0	Enemies. Basic cold breath damage.	Big Eye, Blizzard Hawk, Hork, Wyvern, Yeti.

Ability	MP	Target and effect	Users
Confuse	5	Enemy group. Attempt confusion.	Henry, Sancho, Dancing Jewel, Kukkle, Minidemon, Neileus, Slime, Wyvern.
Curseoff	Menu	Cursed ally or equipment. Remove a curse.	Son, Kukkle, Messala.
Day-Night	3	Field. Switch day and night.	Flora, Daughter, Drakee, Minidemon.
Dazzling Light	0	Enemies. Reduce physical accuracy.	Big Eye, Drakee, Farewell Crag.
Deadly Poison	0	Enemies. Attempt severe poison.	Hork, Mad Dragon.
Decrease / Defense	4	Enemy group. Lower defense.	Bianca, Flora, Daughter, Bella, Henry, Dancing Jewel, Kukkle, Leaonar, Slime, Soldier Bull, Springer.
Defeat	7	Enemy group. Attempt instant death.	Bianca, Flora, Blizzard Hawk, Messala, Orc King.
Eerie Light	0	Enemies. Reduce resistance to magic.	Eigerhorn, Lionex, Messala, Slime.
Expel	1	Enemy group. Remove susceptible foes from battle.	Kukkle, Slime.
Explodet	15	Enemies. Highest explosion tier.	Flora, Daughter, Hellbattler, Metal Babble, Minidemon.
Farewell	All	Party. Restore fallen companions through the caster's sacrifice.	Hero, Bomb Crag, Farewell Crag, King Healer, Metal Babble.
Firebal / Fireball	4	Enemy group. Basic group fire damage.	Bianca, Bella, Magician, Metal Babble.
Firebane	6	Enemy group. Middle group fire tier.	Bianca, Flora, Son, Eigerhorn, Magician, Metal Babble.
Fire Breath	0	Enemies. Basic fire breath, also Fiery Breath.	Dragon Pup.
Firevolt / Firebolt	10	Enemy group. Highest group fire tier.	Bianca, Flora, Eigerhorn, Hellbattler, Magician, Metal Babble.
Flame Breath	0	Enemies. Improved fire breath, also Flaming Breath.	Dragon Pup, Great Dragon, Leaonar, Mad Dragon.
Freeze Ray	0	Enemies. Remove active magical enhancements. Also Freezing Rays.	Killer Panther, King Slime.
Freezing Breath	0	Enemies. Strong cold breath damage.	Blizzard Hawk, Great Dragon, Messala, Wyvern, Yeti.
Gale	2	Enemy group. Basic wind damage.	Hero.
Heal	2	Ally. Restore roughly 30–40 HP.	Hero, Bella, Healer, Slime Knight.
Healall	7	Ally. Restore all HP.	Hero, Son, Big Eye, Centaurus, Curer, Healer, Slime Knight, Wyvern.
Healmore	5	Ally. Restore roughly 70–90 HP.	Hero, Flora, Son, Papas, Big Eye, Centaurus, Curer, Healer, Slime Knight, Wyvern.
Healus	18	Party. Moderate recovery for participating allies.	Son, Blizzard Hawk, Curer, Healer, Orc King, Wyvern.
Healusall	36	Party. Restore participating allies to full HP.	Curer, Healer, King Healer.
Icebolt	3	Enemy. Basic ice-family spell.	Enemy casters.
Identify	3	Item. Inspect its nature.	Hero, Son.
Increase	3	Party. Raise physical defense.	Son, Sancho, Curer, King Slime, Kukkle, Slime.

Ability	MP	Target and effect	Users
Infernal Flames	0	Enemies. Highest fire breath tier.	Great Dragon, Hellbattler, Slime.
Lick	0	Enemy. Attempt to interrupt its action.	Hork, Minidemon, Yeti.
Lightning	15	Enemy group. Strong lightning damage.	Son, Lionex.
Massacre	0	Random combatant. Powerful blow with friendly-fire risk.	Eliminator.
Meditate	0	Self. Restore substantial HP.	Golem, Slime.
Numbing Attack	0	Enemy. Physical attack with paralysis chance.	Dancing Needle.
Numboff	2	Affected allies. Cure paralysis.	Son, Healer, Slime Knight.
Outside	8	Party. Exit an eligible dungeon.	Hero, Daughter, Slime, Wyvern.
Poison Attack	0	Enemy. Physical attack with poison chance.	Hork.
Poison Breath	0	Enemies. Attempt poison.	Hork.
Repel	4	Field. Reduce weak random encounters.	Henry, Son, Centaurus, Healer, Puppet Man.
Return	8	Party. Travel to an available registered destination.	Hero, Daughter, Neileus, Wyvern.
Revive	20	Fallen ally. Restore life and full HP.	Son, Curer, Hellbattler, King Healer, King Slime, Orc King.
Robmagic	0	Enemy. Steal usable MP.	Sancho, Drakee, King Healer, Magician, Slime Knight.
Sacrifice	1	Enemies and caster. Sacrifice the caster in a death attack.	Sancho, Bomb Baby, Bomb Crag.
Sap	3	Enemy. Lower physical defense.	Eliminator.
Sleep	3	Enemy group. Attempt sleep.	Bianca, Flora, Daughter, Sancho, Drakee, Kukkle, Neileus, Wyvern.
Sleep Attack	0	Enemy. Physical attack with sleep chance.	Dancing Needle.
Sleepmore	5	Enemies. Higher-success sleep attempt.	Dancing Jewel, Messala, Wyvern.
Snowblast	5	Enemy group. Middle ice-family attack.	Daughter, Eigerhorn, Neileus, Yeti.
Sparkling Breath	0	Enemies. Highest cold breath tier.	Blizzard Hawk, Great Dragon, Hellbattler.
Stepguard	2	Party in field. Protect against damaging ground.	Bianca, Flora, Son, Orc King, Slime.
Stopspell	3	Enemy group. Attempt to seal spellcasting.	Son, Dancing Jewel, Kukkle, Magician, Messala, Puppet Man.
Strange Dance 1	0	Enemy. Drain a small amount of MP.	Dancing Jewel, Dancing Needle, Drakee.
Strange Dance 2	0	Enemy. Stronger MP-draining dance.	Dancing Needle, Puppet Man.
Strange Dance 3	0	Enemy. Strongest MP-draining dance tier.	Blizzard Hawk, Dancing Needle, Puppet Man.
Surround	5	Enemies. Lower physical hit reliability.	Bianca, Flora, Daughter, Bella, Henry, Drakee, Kukkle, Leaonar.
Sweet Breath	0	Enemies. Attempt sleep through breath.	Big Eye, Dragon Pup, Mad Dragon, Minidemon, Yeti.

Ability	MP	Target and effect	Users
Tempting Dance	0	Enemies. Attempt to interrupt actions.	Hork, Mad Dragon, Puppet Man.
Thordain	10	Enemy. Cooperative lightning attack involving the party.	Son with participating allies.
Thunder	0	Enemies. MP-free lightning damage.	Farewell Crag, Golem, Killer Panther, Neileus.
Tornado	4	Enemy group. Middle wind tier.	Hero, Eigerhorn, Neileus, Puppet Man, Springer.
Upper	2	Ally. Raise physical defense.	Hero, Curer, Metal Babble, Soldier Bull, Springer.
Violent Flames	0	Enemies. Strong fire breath damage.	Dragon Pup, Great Dragon, Hellbattler, King Slime, Mad Dragon.
Vivify	10	Fallen ally. Chance to revive with partial HP.	Hero, Curer, Farewell Crag, Healer, King Slime, Neileus, Orc King, Slime.
War Cry	0	Enemies. Attempt to interrupt actions.	Eigerhorn, Killer Panther, Yeti.
Zap	8	All enemies. Lightning-family damage.	Son, Lionex.

15.2 Healing, revival, sacrifice, and status recovery

Need	Ability choice
One wounded ally	Heal 2 MP, Healmore 5 MP, Healall 7 MP. Choose the tier for missing HP and turn urgency.
Several wounded allies	Healus 18 MP or Healusall 36 MP. A Sage's Stone supports repeated moderate recovery.
One fallen ally	Vivify 10 MP can fail. Revive 20 MP restores full HP reliably. Carry a Leaf for an item-based alternative.
Emergency party recovery	Farewell sacrifices its user. Assign another surviving member to restore that companion afterward.
Poison	Antidote or an Antidote Herb. Severe poison requires prompt recovery.
Paralysis	Numboff or a Full Moon Herb. Staff of Stoross supplies a related item effect.
Confusion	Angel's Bell in battle, with reusable use. Keep it on a dependable active member.
Curse	Curseoff or the church's curse-removal service. Check the equipment and resulting status afterward.
Sacrificial offense	Sacrifice and Body Attack have costs in survival. Use the recovery plan before committing the turn.
Self-recovery	Meditate costs no MP and helps Golem sustain its own HP.

15.3 Offensive magic by family and target pattern

Family	Progression and MP	Target pattern
Single fire	Blaze 2, Blazemore 4, Blazemost 10	One enemy.
Group fire	Firebal 4, Firebane 6, Firevolt 10	One enemy group.
Wind	Gale 2, Tornado 4, Aerocross 8	One enemy group.

Family	Progression and MP	Target pattern
Ice	Icebolt 3, Snowblast 5, Blizzard 12	One enemy, group, then all enemies.
Explosion	Bang 5, Boom 8, Explodet 15	Broad enemy damage. Check Explodet's selected scope in the command menu.
Lightning	Zap 8, Lightning 15, Thordain 10	All enemies, group, then cooperative single-target attack.
Dragon form	Bedragon 18	Changes the caster's actions and supplies dragon damage.

Select the lowest useful tier for routine encounters. Keep sufficient MP for recovery and travel. Thordain requires the cooperating party to be available, so account for their condition and MP before committing the action.

15.4 Instant death, sleep, confusion, silence, and other control effects

Control family	Applications and limitations
Instant death	Beat targets one enemy, Defeat targets a group. Resistance can prevent success.
Removal	Expel removes susceptible enemies. Defeat a wanted recruit with damage.
Sleep	Sleep, Sleepmore, Sweet Breath, and Sleep Attack provide different delivery methods. Waking and resistance affect their value.
Confusion	Confuse changes enemy behavior. Angel's Bell supplies the allied recovery option.
Silence	Stopspell affects spellcasting. Physical actions and breath remain separate threats.
Accuracy	Surround and Dazzling Light interfere with physical attacks.
Paralysis and poison	Burning Breath and Numbing Attack attempt paralysis. Poison Attack, Poison Breath, and Deadly Poison apply poison effects.
Turn interruption	War Cry, Lick, and Tempting Dance attempt to prevent immediate actions.
MP disruption	Strange Dance tiers drain enemy MP. Robmagic transfers usable MP to the caster.

Boss susceptibility is individual. Keep healing and damage plans functional when a control attempt fails. Enemy ailments, remaining MP, and resistances determine whether another attempt is worth the turn.

15.5 Attack and defense changes, barriers, reflection, and dispelling

Ability or effect	Lookup use
Bikill	Improve a physical attacker's ordinary damage. Drum of War supplies party attack enhancement.
Upper and Increase	Improve one ally's or the active party's physical defense.
Sap and Decrease	Reduce one enemy's or a group's physical defense, subject to susceptibility.

Ability or effect	Lookup use
Barrier	Reduce fire and cold breath damage for the party. Restore it after dispelling.
Bounce	Reflect qualifying spells on the protected caster. Plan healing and support around reflection.
Absorb	Convert qualifying incoming spell energy into MP for the caster.
Eerie Light	Reduce enemy resistance to magic where effective.
Freeze Ray and Zenithian Sword	Remove enemy enhancements. Enemy dispelling can remove the party's own support effects.
Build Up and Charge Up	Prepare stronger physical damage. Consider the setup turn and the target's remaining HP.

Apply attack support to the member taking physical attack turns. Use carried items through direct orders when their timing is important. Reapply defenses according to the current enemy action mix after a dispelling turn.

15.6 Breath attacks, dances, physical skills, and monster-only abilities

Family	Complete companion-ability grouping
Fire breath damage	Fire Breath, Flame Breath, Violent Flames, Infernal Flames. Successive tiers increase damage without MP cost.
Cold breath damage	Cold Breath, Freezing Breath, Sparkling Breath. Useful for repeated group damage.
Status breaths	Sweet Breath attempts sleep, Burning Breath attempts paralysis, Poison Breath and Deadly Poison attempt poison.
MP dances	Strange Dance 1, 2, and 3 supply increasing MP disruption.
Interruption	Tempting Dance, War Cry, Lick. Their success depends on the target.
Status attacks	Sleep Attack, Numbing Attack, Poison Attack combine physical damage with a status chance.
Prepared attacks	Build Up and Charge Up spend a turn preparing power.
Risk attacks	Body Attack takes self-damage. Massacre can strike an ally.
Recovery and clearing	Meditate restores the user, Freeze Ray clears enemy magical enhancements, Dazzling Light interferes with accuracy, Eerie Light affects resistance.
Lightning skill	Thunder provides MP-free enemy damage.

Breath and dance skills remain useful when conserving MP. Check the actual learned tier, target susceptibility, and companion obedience before assigning an essential control or recovery turn.

15.7 Travel and field utility: Return, Outside, Stepguard, and time changes

Ability	Field use
Return, 8 MP	Travel to an available destination on the registered list. Roofs and scripted restrictions can prevent departure.
Outside, 8 MP	Exit an eligible dungeon. Keep the cost in reserve during exploration.
Stepguard, 2 MP	Protect the travelling party on damaging terrain while the effect lasts.
Day-Night, 3 MP	Change the time to access day or night services and events.

Ability	Field use
Repel, 4 MP	Reduce weak random encounters while travelling.
Identify, 3 MP	Inspect an item, including suspicious finds and equipment.
Curseoff	Field curse recovery when the spell and necessary MP are available.

Wyvern and Neileus add Return through levels. Slime and Wyvern add Outside. The Daughter begins her travelling availability with Return at level 5.

15.8 Event-learned spells: Return and Chance

Hero spell	Event and availability
Return	Complete Benett's Lunar Herb experiment in Ruraphin. Bring the herb back, finish his procedure, and perform the requested casting.
Chance	Return to Benett in Ruraphin later in the third-generation journey and complete his additional instruction.

These additions use events as their triggers. Chance costs 20 MP and has a variable battle outcome. Use it with recovery resources available when experimenting.

15.9 Learning-level tables for humans and monster companions

Chapter 12 contains every human level and both Hero event entries. Chapter 14 contains every companion's starting abilities, every later learning level, and the independent cap field. The following cross-character table locates common training objectives.

Objective	Learning levels across the roster
Healall	Hero 22, Son 16, Big Eye 15, Centaurus 23, Curer starts, Healer 20, Slime Knight 20, Wyvern 15.
Healus	Son 30, Blizzard Hawk 15, Curer 18, Healer 25, Orc King 8, Wyvern 18.
Healusall	Curer 30, Healer 36, King Healer starts.
Revive	Son 27, Curer 23, Hellbattler 8, King Healer 10, King Slime 15, Orc King 11.
Bikill	Bianca 13, Flora 13, Daughter 16, Centaurus 20, Kukkle 20, Soldier Bull 10.
Barrier	Son 23, Centaurus 27, King Healer 7, King Slime 10.
Increase	Son 8, Sancho 20, Curer 10, King Slime 5, Kukkle 17, Slime 10.
Bounce	Bianca 18, Flora 18, Daughter 27, Farewell Crag 8, Hellbattler 7, Neileus 6, Puppet Man 6.
Return	Hero event, Daughter 5, Neileus 10, Wyvern 24.
Outside	Hero 14, Daughter 9, Slime 18, Wyvern 12.
Stepguard	Bianca 17, Flora 15, Son 15, Orc King 9, Slime 25.
Freeze Ray	Killer Panther 33, King Slime 18.
Meditate	Golem 20, Slime 77.
Sparkling Breath	Blizzard Hawk 23, Great Dragon 30, Hellbattler 13.
Infernal Flames	Great Dragon 50, Hellbattler 15, Slime 99.

Flora's levels above 10 require her third-generation progression. Papas and Bella remain fixed temporary companions. A learned skill's final level and a species' growth ceiling occupy separate fields.

15.10 Item-cast equivalents, AI use, resistance, and reliability

Carry each item on the intended battle user and select Item for timed use. Reusable effects preserve MP, while consumables need replacement or have a breakage risk. Equipment compatibility and the item's allowed context govern use.

Item	Spell or related effect
Staff of Benediction	Healmore.
Shield of Strength	Healmore-like self-recovery when used.
Sage's Stone	Reusable moderate party healing, comparable to Healus.
Staff of Revival	Vivify, including its chance to fail.
Leaf of the World Tree	Revival with full HP. Consumed on use.
Staff of Stoross	Paralysis recovery.
Staff of Antimagic	Stopspell.
Faerie Sword	Upper.
Aeolus' Shield	Expel.
Shield of Darkness	Absorb.
Zenithian Shield	Bounce.
Zenithian Sword	Remove enemy magical enhancements.
Dragon Staff	Bedragon.
Staff of Thunder, Sword of Malice	Group fire-family attacks.
Fire Claw	Firebane.
Ice Blade	Snowblast.
Staff of Punishment	Wind-family attack.
Spear of Zeus	Lightning-family attack.
Magma Staff, Ring of Flames	Bang-family enemy damage.
Ring of Water	Snowblast-family enemy damage.
Bomb Stone	Boom-family damage, with consumable use.
Fighter's Hair	Selected ally's attack enhancement, comparable to Bikill.
Drum of War	Active-party attack enhancement.
Angel's Bell	Reusable battle confusion recovery.
Full Moon Herb, Antidote Herb	Paralysis and poison recovery respectively.
Hat of the Wind, Wing of Wyvern	Field return item effect.
Lamp of Darkness	Change day to night.
Holy Water	Suppress weak field encounters.
Ring of Prayer	Restore MP, with breakage risk.
Magic Water	Restore MP through a consumable.
Sands of Time	Restart the battle from its beginning where allowed.
Armband of Sacrifice	Death-triggered sacrificial effect, with nonboss restrictions and breakage.
Ring of Life	Wearer HP recovery while walking and after battle rounds.
Hat of Happiness	Walking MP recovery for its wearer.
Echoing Hat	Repeat the wearer's cast spell in battle.

Reliability check	Command decision
Direct orders	Assign healing, revival, item use, and dispelling deliberately in important fights.
Automatic tactics	Offensive tactics spend resources on damage. Balanced tactics mix recovery and attacks. Defensive tactics favor survival. MP-conserving tactics favor MP-free actions.

Reliability check	Command decision
Monster obedience	Check intelligence and command reliability before depending on an essential action.
Resistance	A failed status effect or reduced elemental hit changes the value of repeating that action.
Reflection	Check Bounce and reflection equipment before directing magic at the protected combatant.
MP recovery	Robmagic needs an eligible enemy MP supply. Carry recovery items for extended encounters.
Item timing	Keep the item user active and able to act. Storage and party changes can move the required item away from that user.
Dispelling	Reassess Increase, Barrier, and attack enhancements after the enemy clears them.

16 Items, Keys, and Story Objects

16.1 Alphabetical item index and acquisition cross-reference

Equipment with an item command also appears in Chapter 17. The index includes carried objects, equipped tools, and transport unlocks. Keep recovery items on the characters who will use them. A wagon inventory is accessible only where the wagon accompanies the party.

Item	Acquisition or revisit	Effect, use, and retention
Acorns of Life	Dwarves' Cave locked room, monster drops	Permanent maximum HP increase. Consumed on use.
Acorns of Magic	Southern Tower chest, other treasure	Permanent maximum MP increase. Consumed on use.
Agility Seed	Dwarves' Cave, adult Santa Rosa cave, drops	Permanent agility increase. Consumed on use.
Angel's Bell	Port Selmi, 500 G, treasure	Reusable battle cure for confusion.
Antidote Herb	Item shops, 10 G, Babble and other drops	Consumable poison cure for one ally.
Armband of Sacrifice	Casino prize, treasure	Equipped death-triggered sacrifice against ordinary enemies. Breaks on activation.
Bianca's Ribbon	Bianca's childhood farewell	Intelligence accessory and the Killer Panther reunion tool. Keep until the reunion.
Bomb Stone	Shahanna, 450 G, treasure and drops	Consumable Boom-like battle attack.
Defense Seed	Oracleberry armor-shop dresser, Shahanna barrel, drops	Permanent defense increase. Consumed on use.
Dragon Orb	Tower of Boble inner chamber	Reveals Pusan's identity. Carry back to Zenithia.
Dragon's Left Eye	Gonz in Tower of Boble	Fits the statue's right-hand screen socket. Keep for the statue puzzle.
Dragon's Right Eye	Gema in Tower of Boble	Fits the statue's left-hand screen socket. Keep for the statue puzzle.
Drum of War	Bonus Dungeon treasure	Reusable party attack boost in battle. Carry on a support character.
Elven Amulet	Emblem Cave B2, Shahanna 3,000 G	Equipped protection against status ailments. Retain as reusable equipment.
Elven Medicine	Casino 300 C, treasure and drops	Restores one character's MP fully. Consumed on use.
Faerie Horn	Faerie Queen after the forest visit	Sound at the lake flowers to reveal the Faerie Palace. Keep for access.
Fighter's Hair	Granvania pot, shops 600 G, Boss Garm drop	Reusable single-character attack boost in battle.
Final Key	Buorn victory	Reusable access to barred cells and remaining locked doors.
Flute of Spring	Ice Mansion victory	Return to the Faerie Queen to restore spring.

Item	Acquisition or revisit	Effect, use, and retention
Flying Shoes	Granvania minister's room after the abduction	Reusable travel to the northern shrine near Demon Tower.
Fragrance Bag	Oracleberry and Shahanna, 80 G	Raises field encounter frequency temporarily. Consumption and battle behavior need an item-menu check.
Full Moon Herb	Item shops, 30 G, treasure and drops	Consumable paralysis cure.
Glowing Orb	Faerie Palace	Exchange with the childhood Hero's Golden Orb. Keep until the exchange.
Golden Orb	Lenoire reward, later childhood exchange	Zenithia's missing power source. Bring the recovered orb to Pusan.
Grappling Hook	Restored Zenithia	Descend from marked hooks in Tower of Boble. Keep through the tower.
Holy Water	Item shops, 20 G	Consumable field protection against weaker encounters.
Intelligence Seed	Ice Mansion outer chest, monster drops	Permanent intelligence increase. Consumed on use.
Ivol's Book	Ruraphin vendor after Boble, 3,000 G	Optional purchase. No necessary progression use is established.
Lamp of Darkness	Ruraphin	Reusable switch from day to night.
Leaf of the World Tree	Casino, 1,000 C, treasure and drops	Consumable full-HP revival of one fallen ally.
Magic Carpet	El Heven elders	Reusable travel over suitable low terrain and water.
Magic Key	El Heven elders	Reusable access to red-framed locked doors.
Magic Water	Treasure and monster drops	Consumable MP recovery, about 10–15 MP.
Magma Staff	Sky Tower	Weapon and reusable battle tool. Use at the blocked Torokko approach.
Medical Herb	Item shops, 8 G, treasure and drops	Consumable modest HP recovery for one ally, about 20–40 HP.
Meteorite Armband	Granvania Magic Key treasury	Equipped agility multiplier. Retain and reassign between battles.
Mirror of Ra	Southern Tower	Reveal the False Queen in Reinhart. Keep until that confrontation.
Monster Lure	Item shops, 200 G, Oracleberry pot	Increases encounters. Check the item command before spending it in battle.
Papas' Letter	Adult Santa Rosa cave	Explains the search for the legendary warrior and the Zenithian equipment. Keep with story objects.
Reinhart Key	Henry during the castle investigation	Reusable key for Reinhart's locked internal access.
Restoration Orb	Bonus Dungeon B1, Great Dragon and King Healer drops	Carried revival safeguard. Exact activation, consumption, and whole-party effects are uncertain.
Ring of Flames	Volcano, Lava Men victory	Wedding requirement, elemental battle tool, and left Demon World portal socket. Retain.

Item	Acquisition or revisit	Effect, use, and retention
Ring of Life	Great Temple rescue	Wearer HP recovery while walking and during battle. Center portal socket. Retain.
Ring of Prayer	Granvania's concealed room, treasure	Repeated MP recovery, about 20 MP. May break with use.
Ring of Water	Waterfall Cave	Wedding requirement, elemental battle tool, and right portal socket. Retain.
Ruramoon Herb	Night search west of Ruraphin	Give to Bennet for his Return experiment. One quest delivery.
Sacred Pitcher	Evil Mountain family event	Use at the lava to open the final route. Keep through the mountain.
Sage's Stone	Demon World arrival gift	Reusable battle healing for the active party, about 50–60 HP each.
Sands of Time	Shahanna treasure	Restarts the current battle. Retain as a reusable recovery tool.
Sap of the World Tree	Faerie Palace second-floor pool	Consumable full-party HP recovery. Arrange revival separately.
Ship	Wedding handover at Port Selmi	Transport unlock. Use coastlines and inner-sea routes.
Silk Veil	Mountain Village wedding errand	Wedding object and +30 helmet. Retain through the ceremony.
Silver Orb	Zenithia	Existing companion to the missing Golden Orb. No separate replacement hunt is required.
Small Medal	Searches, chests, selected monster drops	Exchange at the Medal King's castle. Spent medals leave the inventory.
Stone of Life	Treasure and monster drops	Carry on the protected character against instant-death magic. Treat as expendable protection.
Strength Seed	Demon Tower entrance treasure, monster drops	Permanent strength increase. Consumed on use.
Symbol of Royalty	Cave of Trials	Present at Granvania to establish the Hero's royal claim. Keep through coronation.
Thieves' Key knowledge	Dwarves' Cave	Learned opening ability for its door class. Keep the opening knowledge through its quest.
Torch	Lenoire kitchen	Illuminate the castle's dark passage. Keep through the ghost quest.
Wagon	Oracleberry, 300 G	Party transport unlock with eight total traveling roster places. Available in compatible areas.
Wayfarer's Map	Oracleberry night merchant, 1,000 G	Reusable world-map display.
Wing of Wyvern	Item shops, 25 G, treasure and drops	Consumable return to the last visited town from the field.
Zenithian Bells	Master Dragon	Reusable airborne transport summon after the Boble quest.

16.2 Healing, status cures, revival, and MP-restoration consumables

Medical Herbs cover early single-target recovery. Antidote Herbs cure poison and Full Moon Herbs cure paralysis. A Leaf of the World Tree revives one ally, while Sap of the World Tree restores party HP. Keep a leaf on someone who can survive the same attack that defeats the healer. Elven Medicine restores one character's MP fully, so reserve it for a depleted healer in a long dungeon or boss fight. Magic Water supplies a smaller refill. The Ring of Prayer can refill MP repeatedly until it breaks. Its breakage makes a second recovery supply valuable.

16.3 Seeds, acorns, permanent growth, and allocation planning

Acorns increase maximum HP or MP. Seeds increase strength, agility, defense, or intelligence. Allow for small, variable gains within the 1–5-point span, with exact per-item bounds uncertain. Choose recipients by role. HP helps fragile active healers, MP helps sustained spellcasting, and strength helps regular physical attackers. Agility helps a healer act before incoming damage. Intelligence helps a monster approach reliable command control. Favor companions you intend to retain.

16.4 Battle items, reusable effects, limited uses, and breakage

The Use command costs a turn. Assign each reusable tool to an active character whose ordinary action can be spared. Consumables, breakable tools, and equipped effects have different handling, even when their results resemble spells.

16.4.1 Sage's Stone, Drum of War, and Sands of Time

The Sage's Stone supplies free party healing in battle. Receive it on entering the Demon World and move it to a dependable support user. The Bonus Dungeon's Drum of War boosts the active party's physical offense. Refresh the boost after a dispelling attack. Do not budget a second multiplicative bonus from adding Bikill to an already boosted attacker. The Sands of Time come from Shahanna and restart a battle, making them useful when an opening round leaves the party unable to stabilize.

16.4.2 Rings, stones, waters, bells, and situational tools

The Ring of Flames and Ring of Water supply reusable elemental attacks. The Ring of Life restores its wearer's HP while walking and during battle. Keep all three for the portal. Angel's Bell is a reusable battle confusion cure. A Bomb Stone is an expendable attack. A Stone of Life belongs in the inventory of the character it protects. Holy Water is field encounter control. Fighter's Hair boosts one attacker. The Armband of Sacrifice activates when its equipped wearer dies and breaks in the process, with ordinary enemies as its intended targets.

16.5 Keys and access progression

Key access accumulates across the adventure. Revisit locked rooms when a new key arrives, using the route and treasure checklists in Chapters 5, 8, and 9.

16.5.1 Thieves' Key knowledge, Reinhart Key, Magic Key, and Final Key

Learn Thieves' Key knowledge in the Dwarves' Cave during the faerie quest. Henry supplies the Reinhart Key for his castle. El Heven supplies the Magic Key for red-framed doors. Defeating Buorn supplies the Final Key for barred cells and the remaining locked access. The Final Key opens the Medal King's barred treasure and prison revisits. Check Reinhart, Granvania, shrines, and El Heven's locked rooms as their access becomes available.

16.6 Childhood and faerie-realm objects

Chapter 4 places these objects in their original routes. Preserve Bianca's Ribbon during the later party changes so the adult reunion can be resolved.

16.6.1 Torch, Golden Orb, Flute of Spring, and Bianca's Ribbon

The Torch opens Lenoire's dark route. Lenoire's ghost quest gives the Golden Orb, which is lost in the childhood confrontation. The Flute of Spring ends the Ice Mansion crisis when returned to the Faerie Queen. Bianca's Ribbon later lets the Hero identify himself to the Killer Panther. Its intelligence benefit also gives it an equipment role.

16.7 Wedding, royal, and rescue objects

Chapters 6 and 7 contain the corresponding collection routes and story handovers.

16.7.1 Papas' Letter, Mirror of Ra, wedding rings, and Silk Veil

Papas' Letter accompanies the Zenithian Sword in adult Santa Rosa. The Mirror of Ra reveals the impostor queen. Retrieve the Ring of Flames from the Volcano and the Ring of Water from Waterfall Cave before the marriage decision. Collect the Silk Veil in Mountain Village for the ceremony. Keep the elemental rings after the wedding for their battle use and later portal placement.

16.7.2 Symbol of Royalty, Flying Shoes, and Ring of Life

The Symbol of Royalty completes the Cave of Trials objective. Search the minister's room after the Granvania abduction for Flying Shoes, then use them to reach the Demon Tower approach. The Ring of Life follows the Great Temple rescue and completes the three-ring portal set.

16.8 Zenithia and Demon World objects

Chapter 9 contains the forest, palace, Orb exchange, Boble, and Great Temple routes. Chapter 10 contains the portal and Sacred Pitcher route.

16.8.1 Magma Staff, faerie horn, orbs, Grappling Hook, and Dragon Eyes

Use the Sky Tower's Magma Staff to clear the Torokko entrance. Bring a child to the forest, obtain the Faerie Horn, and sound it at the lake flowers. Take the Glowing Orb from the palace into the childhood visit and exchange it for the Golden Orb. Return the Golden Orb to Zenithia. The Grappling Hook permits marked descents in Boble. Gonz gives the Left Eye and Gema the Right Eye. Place the Right Eye in the left screen socket and the Left Eye in the right screen socket.

16.8.2 Dragon Orb, Zenithian Bells, and Sacred Pitcher

The inner Boble chamber holds the Dragon Orb. Bring it to Pusan, then receive Zenithian Bells for Master Dragon travel. Evil Mountain's family event provides the Sacred Pitcher. Its lava use permits the descent toward the final battles.

16.9 Maps, wagon, vehicles, and non-inventory unlocks

The Wayfarer's Map is a reusable orientation tool. The 300 G wagon enables the expanded traveling roster in areas that admit it. The wedding ship opens sea routes. El Heven's Magic Carpet crosses suitable open terrain and water, with mountains and blocked landing areas limiting its route. Restored Zenithia travels to Boble for the hook approach. Zenithian Bells provide later airborne travel. These unlocks have route-specific boarding, landing, and party-access rules.

16.10 Where to obtain, retain, use, or revisit each key object

Follow four collection circuits. Childhood covers Torch, Golden Orb, Flute, and Ribbon. Early adulthood covers Letter, Reinhart Key, Mirror, and both wedding rings. The royal and reunion routes cover Symbol, Shoes, Map, Carpet, and Magic Key. Zenithia through Evil Mountain covers Horn, replacement Orb exchange, Hook, Eyes, Dragon Orb, Bells, Final Key, Ring of Life, Sage's Stone, Sands, and Pitcher. Keep reusable tools on accessible users, retain the three portal rings, and spend medals only after choosing the next reward. Granvania's concealed room contains the Ring of Prayer, Naughty Underwear, and Hat of Happiness as three separate finds.

17 Weapons, Armor, Shields, Helmets, and Accessories

17.1 Catalog fields: power, prices, locations, users, and special effects

Power is the equipment's attack or defense contribution. G denotes gold, C casino coins, and M medals spent. A dash means a shop price or additional property is unconfirmed. Treasure and drop entries are acquisition routes, with random drops carrying no guaranteed yield. Price and power ranges preserve uncertain entries. User restrictions and confirmed sets follow the catalogs. An item-command spell is separate from an effect triggered by attacking or wearing the item.

17.2 Complete weapon catalog

Weapon	ATK	Buy / cost	Acquisition and special effect
Bamboo Pole	5	50 G	Santa Rosa, Alcapa. Also called Bamboo Spear.
Battle Axe	45	4,000 G	Mountain Village, Telepador, Chizod. Soldier Bull drop.
Big Bowgun	110	37,000 G	Shahanna. Also listed as Big Blowgun.
Big Mallet	10	220 G	Adult Alcapa. Big Eye drop.
Bladed Boomerang	25	1,500 G	Oracleberry, Port Selmi, Granvania. All enemies.
Blizzard Sword	105	21,000 G	Shahanna. Ice damage.
Boomerang	15	420 G	Alcapa, Faerie Village, Reinhart, Oracleberry. All enemies.
Broad Sword	33	2,000 G	Adult Reinhart, Port Selmi, Ruraphin, Salabona, Mountain Village.
Bronze Knife	12	150 G	Alcapa. Demon Candle and Light Boy drops.
Chain Cross	28	1,200 G	Reinhart, Oracleberry, adult Alcapa, Salabona. Enemy-group attack.
Chain Sickle	27	900 G	Oracleberry, adult Alcapa. Keep the 27-attack entry distinct from the 28-attack Chain Cross.
Chain Whip	24–28	900 G	Reinhart, Oracleberry, adult Alcapa, Salabona. Enemy group.
Club	9	60 G	Port Selmi. Ramada drop.
Copper Sword	13	270 G	Santa Rosa, Alcapa, Faerie Village, Reinhart.
Cypress Stick	2	10 G	Santa Rosa.
Demon Claw	90	–	Great Temple treasure. Galba and Golba drops. May poison.
Demon Hammer	70	–	Emblem Cave treasure. Golden Golem drop.
Demon Spear	99	25,000 G	Shahanna. Chance of instant death.
Dragon Killer	90	15,000 G	Northern Church, adult Santa Rosa, Shahanna. Extra dragon damage.

Weapon	ATK	Buy / cost	Acquisition and special effect
Dragon Staff	125	–	Inner Tower of Boble chamber. Hero's weapon. Item casts Bedragon.
Faerie Sword	85	–	Forest of Illusion treasure. Grondepth and Izlar drops. Item casts Upper.
Falcon Sword	67	30 M	Medal King exchange. Two attacks.
Flame Boomerang	65	13,000 G	Shahanna. All enemies.
Flame Claw	53	4,700 G	Chizod, Granvania. Blue Eater drop. Item casts Firebane.
Fruit Knife	6	50 G	Adult Alcapa.
Gringham Whip	100	250,000 C	Oracleberry casino. Enemy group.
Hell Sabre	120	–	Bonus Dungeon treasure. Hellbattler drop.
Ice Blade	70	9,000 G	Northern Church, adult Santa Rosa, El Heven. Item casts Snowblast.
Iron Ball of Decimation	125	–	Bonus Dungeon treasure. All enemies.
Iron Claw	19	550 G	Reinhart, adult Alcapa, Kabochi. Several beast drops.
Iron Staff	22	850 G	Reinhart.
Killer Earring	35	10,000 C	Oracleberry casino. Two attacks.
King Metal Sword	130	50,000 C	Oracleberry casino. Also called Metal King or Medal King Sword.
Magma Staff	63	–	Sky Tower treasure. Item casts Bang and clears the Torokko approach.
Morning Star	45	3,000 G	Port Selmi, Salabona, Telepador, Chizod. Enemy group.
Multi-Edge Sword	99	–	Evil Mountain treasure. Cursed, user receives part of inflicted damage.
Oak Cudgel	9	130 G	Santa Rosa, Alcapa.
Orihalcon Fang	115	–	Evil Mountain treasure. Mechaban drop. Beast weapon.
Papas' Sword	40	–	Killer Panther reunion cave. Take after using Bianca's Ribbon.
Poison Needle	1	2,900 G	Adult Reinhart, Kabochi, Mountain Village, Northern Church, Santa Rosa. Possible instant death.
Poison Knife / Paralysis Knife	24	900 G	Third-generation Santa Rosa. Paralysis property, distinct from the 1-attack instant-death needle.
Saw Blade	27	1,200 G	Ruraphin, Telepador. Lizardman and Sea Dog drops.
Sharpened Bone	6	70 G	Santa Rosa. Capala Naga drop. Also called Pointed Bone.
Sledge Hammer	30	1,800 G	Port Selmi, Ruraphin, Mountain Village, Granvania.
Snake Sword	42	3,900 G	Ruraphin, Mountain Village, Granvania. Gargoyle and Snakehand drops.
Spear of Zeus	85	13,500 G	Northern Church, adult Santa Rosa. Item casts Lightning.
Staff of Antimagic	40	–	Volcano treasure. Wight King drop. Item casts Stopspell.

Weapon	ATK	Buy / cost	Acquisition and special effect
Staff of Benediction	0	–	Torokko Mines, return stair from the third basement to the isolated second-basement chest. Reusable Healmore in battle.
Staff of Force	55	2,500 G	Telepador, El Heven. Phoenix drop. Uses MP for attack power.
Staff of Punishment	35	–	Hidden room on the eastern mountain descent. Item casts Tornado.
Staff of Revival	66	45,000 G	Shahanna. Item casts Vivify, with its revival failure risk.
Staff of Stoross	60	–	Daughter's rescue equipment. Item cures paralysis.
Staff of Thunder	29	–	Faerie Palace treasure. Dead Emperor drop. Item casts Firebal.
Steel Fang	35	2,000 G	Adult Reinhart, Ruraphin, Salabona, Telepador, Granvania.
Steel Whip	20–45	7,400 G	El Heven. Enemy group. Check displayed ATK before buying.
Stone Axe	20	700 G	Adult Reinhart, Port Selmi. Eliminator and Kandar drops.
Stone Fang	12	240 G	Faerie Village, Reinhart, Oracleberry. Baby Newt drop.
Sword of Decimation	95	–	Bonus Dungeon treasure. Cursed all-enemy weapon. Doom Sword naming may refer to this entry.
Sword of Malice	45	4,400 G	Salabona, Mountain Village, Telepador, Chizod. Item casts Firebane.
Sword of Miracles	100	16 M	Medal King exchange. Heals user for part of attack damage.
Sword of Slumber	55	6,300 G	Chizod, Granvania, El Heven. May put target to sleep.
Sword of Temptation	70	9,800 G	El Heven. May confuse target.
Thorn Whip	18	350 G	Alcapa. Beast Master and Evil Plant drops. Enemy group.
War Hammer	60	6,500 G	Northern Church, adult Santa Rosa, El Heven.
Zenithian Sword	110	–	Adult Santa Rosa cave. Son's weapon. Item removes enemy magical effects.
Zombie Killer	80	11,500 G	Northern Church, adult Santa Rosa. Extra undead damage. Also called Zombie Sword.

17.2.1 Single-target weapons and character restrictions

Ordinary swords, axes, fangs, claws, hammers, and staves attack one target unless an effect is specified. The Chain Sickle belongs in this single-target group. The Zenithian Sword belongs to the Son. The Dragon Staff belongs to the Hero. Beast weapons and human weapons have distinct eligibility, which the Equip menu checks per character. A high attack value alone does not establish eligibility.

17.2.2 Whips, boomerangs, repeated attacks, and unusual damage effects

Whips and the Morning Star strike an enemy group. Boomerangs and the Iron Ball of Decimation strike across the enemy formation. Falcon Sword and Killer Earring attack twice. Poison Needle and Demon Spear offer instant-death chances, which bosses and resistant targets can defeat. Sword of Miracles returns part of inflicted damage as HP. Multi-Edge Sword also injures its user. Dragon Killer and Zombie Killer specialize against their named target families. Compare practical damage over a full turn, especially against armored enemies.

17.2.3 Weapon-cast spells and reusable support tools

Carry Staff of Benediction for Healmore, Staff of Revival for Vivify, Staff of Stoross for paralysis recovery, Faerie Sword for Upper, and Zenithian Sword for dispelling enemy effects. Offensive tools include Magma Staff, Staff of Punishment, Staff of Thunder, Staff of Antimagic, Ice Blade, Flame Claw, Sword of Malice, and Spear of Zeus. Dragon Staff's Bedragon changes the user's battle role. Keep a healer available while it is used.

17.3 Complete body-armor catalog

Body armor	DEF	Buy / cost	Acquisition and special effect
Angel's Leotard	70	21,000 G	Shahanna. Cold protection.

Zenithian Helm	50	–	Telepador. Son's helmet.

17.6 Complete accessory catalog

Accessory	Power / cost	Acquisition and property
Armband of Sacrifice	– / 5,000 C	Casino, Kabochi hidden chest, Demon Tower. Death-triggered sacrifice, breaks on activation.
Bianca's Ribbon	Intelligence / –	Childhood farewell. Monster intelligence and Panther reunion. Exact increase unconfirmed.
Elven Amulet	Status / 3,000 G	Emblem Cave B2 treasure and Shahanna. Protects against status ailments.
Meteorite Armband	Agility doubled / –	Granvania Magic Key treasury. Useful on a healer or item user.
Ring of Flames	– / –	Volcano victory. Wedding and portal object with elemental item attack.
Ring of Life	HP recovery / –	Great Temple rescue. Walking and round-end recovery for wearer.
Ring of Water	– / –	Waterfall Cave. Wedding and portal object with elemental item attack.

The Ring of Prayer is an inventory MP tool, cataloged in Chapter 16. Exact accessory defense contributions and recovery amounts are unconfirmed.

17.7 Human and monster equipment-compatibility matrices

These are confirmed eligibility sets. Unlisted cells are unresolved. Before buying, give the item to the intended character and open Equip. Check both the selectable item and the resulting statistic. A shop's character indicator can provide an earlier check. Restore the previous equipment after testing a cursed object only through the church's curse service.

Human	Confirmed weapon set	Confirmed body set	Confirmed shield / head set
Hero	Papas' Sword, Dragon Staff, Iron Ball of Decimation	Royal Cloak	King Metal Shield, Helm of Wisdom
Bianca	Gringham Whip	Princess Robe	Scale Shield, Hat of the Wind, Echoing Hat
Flora	Exact weapon set unresolved	Water Flying Clothes	Exact shield and head sets unresolved
Son	Zenithian Sword	Zenithian Armor	Zenithian Shield, Zenithian Helm
Daughter	Faerie Sword	Silk Bisuche	Scale Shield, Golden Tiara, Echoing Hat
Henry	Check Equip for individual purchases	Check Equip for individual purchases	Transfer possessions before departure
Sancho	Individual sets unresolved	Individual sets unresolved	Check Equip before expensive upgrades
Pippin	Individual sets unresolved	Individual sets unresolved	Check Equip before expensive upgrades
Papas	Guest's fixed battle equipment	Guest's fixed battle equipment	No endgame allocation
Bella	No player-managed equipment	No player-managed equipment	No inventory transfers

Monster family	Verified eligibility rule or set
Slime	Boomerangs and slime-specific clothing. Verify each later armor and weapon upgrade.
Drakee	Boomerangs with a wider light-equipment selection than Slime.
Slime Knight	Heavy weapons and armor. Confirmed King Metal Sword, Mystic Armor, King Metal Shield, Helm of Wisdom.
Dragon Pup	Claw weapons. Other slots require the Equip check.
Killer Panther	Claws and fangs. Confirmed Demon Claw, Orihalcon Fang, Water Flying Clothes, Iron Helm.
Golem	Broad heavy-equipment selection. Confirmed King Metal Sword, Demon Armor, Shield of Darkness, Helm of Wisdom. Avoid the curse when selecting the body piece.
King Healer	Confirmed King Metal Sword, Magic Armor, Magic Shield, Silk Hat.
Soldier Bull	Broad armor selection with a narrower weapon selection. Check each weapon.
Blizzard Hawk	Light-equipment restrictions. Check each named piece.
Other recruitable families	Exact item-by-family matrices are unconfirmed. Use Equip for each weapon, body, shield, helmet, and accessory.

The remaining families are Attackbot, Big Eye, Bomb Baby, Bomb Crag, Brownie, Centaurus, Curer, Dancing Jewel, Dancing Needle, Eigerhorn, Eliminator, Farewell Crag, Gigantes, Great Dragon, Healer, Hellbattler, Hork, Kukkle, Leaonar, Lionex, Mad Dragon, Magician, Messala, Metal Babble, Minidemon, Nereus, Orc King, Puppet Man, Springer, Wyvern, and Yeti. Their recruitability does not establish a shared equipment set. Zenithian equipment is reserved for the Son. Royal Cloak and Dragon Staff are the Hero's restricted endgame pieces.

17.8 Cursed equipment, drawbacks, removal, and sale restrictions

Rogue Armor removes reliable control. Demon Armor is cursed, with its 85 defense distinct from ordinary 65-defense Devil's Armor. Multi-Edge Sword returns damage to the user. Sword of Decimation, also encountered under Doom Sword naming, is a cursed group weapon. Shield of Ruin reduces defense to zero. Satan Helm is cursed. Use a church's curse-removal service before trying to replace cursed equipment. Check the inventory afterward before budgeting a replacement or a sale. A missing buy price does not establish a sale restriction. Story and Zenithian pieces should be retained for their quests and assigned users. Exact sale prices and item-by-item destruction rules are unconfirmed.

17.9 Elemental protection, status protection, and special properties

For fire-heavy routes, compare Water Flying Clothes, Dragon Mail, Magic Shield, Dragon Shield, and Shield of Reflection. For cold-heavy routes, compare Angel's Leotard, Flame Armor, Flame Shield, and Dragon Shield. Royal Cloak, Zenithian Armor, and Princess Robe offer broader protection. Spell-focused defenses include Sage's Robe, Wizard's Robe, Magic Armor, Dress of Radiance, and Robe of Darkness. Mirror Armor reflects some spells, so keep item-based recovery available when assigning it. Golden Tiara, Elven Amulet, and King Metal Shield help against status ailments. Barrier remains useful against dangerous breaths. Mystic Armor's round recovery, Hat of Happiness's walking MP recovery, and Echoing Hat's repeated casting each address different resource demands.

17.10 Zenithian equipment: acquisition, eligibility, and checklist

The Son's four-piece set

Piece	Power	Acquisition and command
Sword	110	Adult Santa Rosa cave. Item removes enemy magical effects.
Shield	60	Salabona wedding reward. Item casts Bounce.
Helm	50	Telepador recognition visit with the Son.
Armor	85	Great Temple. Elemental and spell protection.

Store the Sword until the Son joins. Collect his Helmet during the third-generation Telepador visit. Emblem Cave supplies the Hero's Royal Cloak. The Great Temple supplies the remaining Zenithian Armor. Check all four Equip slots before the final route.

17.11 Casino prizes, Medal King rewards, unique finds, and monster drops

Casino equipment includes Killer Earring at 10,000 C, King Metal Sword at 50,000 C, and Gringham Whip at 250,000 C. The Armband of Sacrifice costs 5,000 C. Recovery prizes include Elven Medicine and Leaf of the World Tree. Medal purchases are Combat Pajamas at 5 M, Mysterious Bolero at 10 M,

Sword of Miracles at 16 M, Mystic Armor at 21 M, Falcon Sword at 30 M, and King Metal Shield at 43 M. Each exchange spends the medals. Golden Tiara is in the barred treasury.

Unique endgame finds include Royal Cloak in Emblem Cave, Dragon Staff in Boble, Princess Robe in Faerie Palace, and King Metal Helm and Orihalcon Fang in Evil Mountain. Bonus Dungeon adds King Metal Armor, Shield of Radiance, Hell Sabre, Iron Ball of Decimation, and the cursed Sword of Decimation. Random alternatives include Metal Dragon's King Metal Armor, Mechaban's Orihalcon Fang, Hellbattler's Hell Sabre, Lionex's Shield of Darkness, and Evil Clown's Echoing Hat. Chapter 18 gives the complete drop reverse index.

17.12 Recommended upgrades by generation, role, and budget

Budget window	Allocation priorities
Childhood, under 500 G per piece	Buy one strong Hero weapon, preserve healing supplies, and improve Bianca's survival for Lenoire. Boomerang costs 420 G. Leather Armor costs 180 G.
Early adulthood, 300–1,500 G	Reserve 300 G for the wagon. A 1,500 G Bladed Boomerang and 1,000 G Breastplate are useful purchases when eligible. Reuse Henry's departing gear.
Wedding routes, 3,000–6,500 G	Buy for the active trio. Morning Star costs 3,000 G, Flame Claw 4,700 G, and Sword of Slumber 6,300 G. Keep MP recovery for Lava Men.
Granvania, 4,700–8,800 G	Improve a beast's claw and a front-line defender, then collect the free Swordedge Armor and concealed-room tools. Dress of Radiance costs 8,800 G.
Third generation, 9,000–15,000 G	Equip the Son's free Zenithian set as collected. Choose Ice Blade, protective robes, or Dragon Killer for eligible users. El Heven and Faerie Village cover major protection upgrades.
Final route, 13,000–45,000 G	Spread defense and healing tools over the active trio. Flame Boomerang costs 13,000 G. Staff of Revival costs 45,000 G and retains Vivify's failure risk.
Postgame, collected gear	Prioritize survival through two-action turns and a reliable Drum user. Reassign strong finds to eligible retained companions.

17.13 Endgame and postgame loadouts for each party member

Member or role	Loadout and practical allocation
Hero	Dragon Staff, Royal Cloak, King Metal Shield, Helm of Wisdom. Carry revival and MP recovery. Reassign Meteorite Armband to the healer when earlier recovery matters.
Son	Zenithian Sword, Armor, Shield, and Helm. Carry a leaf and a backup cure while providing Barrier and healing.
Daughter	Faerie Sword, Silk Bisuche, Scale Shield, Golden Tiara. Carry Staff of Benediction or Sage's Stone. Echoing Hat is an eligible repeated-casting alternative.
Bianca	Gringham Whip, Princess Robe, Scale Shield, Hat of the Wind. Echoing Hat is an eligible casting alternative. Use a free support-tool turn when her spell damage is less valuable.
Flora	Water Flying Clothes is a verified body option. Assign the best menu-confirmed weapon, shield, and helmet. Keep recovery tools accessible.

Member or role	Loadout and practical allocation
Sancho	Choose the best eligible collected pieces through Equip. Use a recovery or Drum turn when his physical attack is less urgent.
Pippin	Choose the best eligible collected attack and protection pieces. Carry a leaf so recovery has another user.
Slime Knight	King Metal Sword, Mystic Armor, King Metal Shield, Helm of Wisdom. A durable healing and physical role.
Golem	King Metal Sword and Helm of Wisdom with eligible protection and Shield of Darkness. Substitute uncursed armor for Demon Armor.
King Healer	King Metal Sword, Magic Armor, Magic Shield, Silk Hat. Preserve MP and carry a leaf on a different member.
Killer Panther	Orihalcon Fang, Water Flying Clothes, Iron Helm. Demon Claw is the earlier weapon option.
Other retained monsters	Use the strongest confirmed eligible weapon and route-specific protection. Give free healing or Drum duties to a reliable active user.
Henry, Papas, Bella	Their earlier roles end before final-party assembly. Henry's deposited possessions can be reused. Papas and Bella receive no endgame allocation.

18 Enemy Bestiary, Encounters, and Treasure Drops

18.1 Bestiary fields: names, HP, rewards, drops, behavior, and locations

The catalog gives enemy HP, EXP, gold, and a possible item drop. Drops are random unless a scripted event explicitly gives an object. R marks a recruitable species. P marks the story Panther encounter. These flags describe recruitment eligibility, with encounter restrictions discussed below. A question mark leaves a conflicting statistic unspecified. Alternate spellings are normalized, including Balloon, Dark Shaman, Dead Emperor, Minidemon, Mechaban, and Springer. The encounter indexes locate the enemies without repeating their statistics. Exact encounter probabilities, resistance percentages, and drop odds are unconfirmed.

18.2 Alphabetical enemy catalog

18.2.1 Enemies A–F

Enemy	HP	EXP	G	Possible drop
Assault Trooper	60	86	42	Breastplate
Attackbot (R)	169	700	74	Swordedge Armor

Nereus (R)	100	230	110	Shell Hat
Night Wisp	17	9	10	Medical Herb
Octoleech	73	95	37	Dancer's Clothes
Ogre Head	109	390	112	Acorns of Magic
Orc	85	125	55	Fur Coat
Orc King (R)	84	235	65	Fur Coat
Orc Lv. 20	950	350	300	Fur Coat
Owlbear	41	45	40	Iron Shield
Phoenix	95	280	63	Staff of Force
Picky	30	41	32	Wing of Wyvern
Plesiosaur	120	210	59	Acorns of Life
Puppet Man (R)	52	78	30	Dancer's Clothes
Putregon	300	800	53	Poison Needle
Ramada	1,800–2,000	8,500	800	Club
Rampone	128	390	98	Monster Lure
Red Eater	120	370	80	Full Moon Herb
Rogue Armor	57	65	50	Rogue Armor

18.2.4 Enemies S–Z

Enemy	HP	EXP	G	Possible drop
Saruslord	135	376	95	Defense Seed
Satan Helm	115	314	135	Satan Helm
Sea Dog	80	113	45	Saw Blade
Sergeinus	410	1,500	300	Ogre Shield
Shadow Satan	115	252	60	Acorns of Magic
Shield Hippo	88	202	120	Iron Shield
Silver Devil	140	403	100	Elven Medicine
Skeleton	42	30	19	Copper Sword
Skullgon	200	450	55	Shield of Ruin
Skull Serpent	15	7	6	Medical Herb
Skunker	28	15	16	Wing of Wyvern
Slime, early (R)	7	1	1	Medical Herb
Slime, fusion encounter	53	24	18	Medical Herb
Slime Knight (R)	40	37	22	Bronze Armor
Snakebat	63	80	33	Full Moon Herb
Snakehand	131	370	82	Snake Sword
Snow Queen	600	650	200	Wing of Wyvern
Soldier Bull (R)	143	335	90	Battle Axe
Spiked Hare	27	20	15	Fur Hood
Spiny	22	15	13	Medical Herb
Springer (R)	175	515	98	Broad Sword
Stoneman	120	176	195	Stone of Life
Thorny	7	2	2	Medical Herb
Tonguella	85	99	35	Fragrance Bag

Enemy	HP	EXP	G	Possible drop
Tonguelord	110	180	35	Intelligence Seed
Tortragon	30	48	55	Defense Seed
Trick Bag	31	10	55	Wing of Wyvern
Troglodyte	22	11	10	Bamboo Pole
Trumpeter	115	155	60	Strength Seed
Tunneler	35	21	9	Medical Herb
Unholy Soldier	85	270	63	Breastplate
Urnite	500	250	158	Small Medal
Walking Statue	100	85	70	Defense Seed
Whackamole	18	6	3	Medical Herb
Whip Man	65	50	60	Agility Seed
Wight King	250	777	5	Staff of Antimagic
Wizard	48	45	47	Magic Water
Wyvern (R)	65	110	?	Wing of Wyvern
Wyvern Lv. 35	800	450	350	Wing of Wyvern
Yeti (R)	48	49	37	Holy Water
Zaile	160	105	50	Magic Water
Zombie Knight	143	301	40	Blood Mail

18.3 Overworld encounter tables by region and generation

These pools locate field enemies and training areas. Terrain and story progress can change an area's formation. Use the corresponding walkthrough chapter for approach and recovery access.

Generation and region	Encounter pool and important distinctions
Childhood, Vista approach	Slime, Green Worm, Longneck Weasel. A fixed opening fight and Papas's assistance govern the first trip.
Childhood, Alcapa field	Big Rat, Baby Panther, Horned Rabbit, Green Worm, Whackamole, Drakee, Babble.
Childhood, forest formations	Healer, Goblin Rat, Blaze Lizard, Mad Plant, Tunneler, Dancing Needle, Longneck Weasel, Magician, Skunker, Baby Newt, Slime Knight.
Childhood, Faerie Village field	Babble, Gapplin, Healer, Mad Plant, Troglodyte, Magician, Cactus Ball, Skull Serpent.
Early adulthood, nunnery to Oracleberry	Gas Mink, Baby Newt, Slime, Brownie. The wagon enables recruitment after the required Oracleberry preparations.
Early adulthood, Reinhart field	Slime Knight, Yeti, Dancing Needle. These are recruitment routes with town recovery nearby.
Second generation, Port Selmi approaches	Magician and Dragon Pup recruit routes. Check the local dungeon pool when crossing into Kabochi's cave.
Second generation, Ruraphin field	Puppet Man, Ghoul, Demighoul, Death Parrot, Mortha, Metal Rider, Demon Toadstool, Emparther, Bandit Wolf. Rogue Soldier naming also occurs, with its numeric identity unresolved.
Second generation, south of Ruraphin	Killer Panther, Big Sloth, Demighoul, Gregor, Assault Trooper, Puppet Man.
Second generation, Salabona field	Beast Master, Metal Hunter, Assault Trooper, Tonguella, Lancer, Demighoul, Gregor.

Generation and region	Encounter pool and important distinctions
Second generation, Volcano approach	Bomb Crag, Lancer, Demighoul, Wyvern, Dark Mammoth. Wyvern and Bomb Crag are recruit targets.
Second generation, Medal King island	Slime, Babble, Curer, King Slime, Healer, Metal Slime, Orc.
Second generation, Great Desert	Flamer, Kemkemubeth, Orc, fusion Slimes, Curer, Mud Looper. King Slime may form from the fusion group.
Second generation, Ned's Inn	Elder Mage, Mad Dragon, Trumpeter, Kemkemubeth. The inn supports repeat training.
Second generation, Granvania field	Magiwyvern, Stoneman, Cursed Mask, Trumpeter, Messala, Orc King.
Third generation, El Heven region	Dentasaurus, Shadow Satan, Eliminator, Golem. Nearby field and ruined-tower routes support heavy companion recruitment.
Third generation, forest approach	Farewell Crag, Skullgon, Silver Devil, Izlar. The forest interior adds Eigerhorn, Ogre Head, Rampone, and Dancing Jewel.
Third generation, northern country	Blizzard Hawk recruit route north of Reinhart, with Emblem Cave and Boble providing additional late encounter routes.
Third generation, Demon World field	Metal Dragon, Bazuzu, Blizzard Hawk, Attackbot, Great Dragon, Gigantes, Golden Golem, Bazocks, Evil Spirit, King Tortragon, Infernavis, Metal Babble, Metal Slime.

18.4 Dungeon encounters by floor and route

Dungeon slice	Encounter index and hazards
Childhood Santa Rosa, 1F–B2	Slime and digging creatures, with Drakee and Horned Rabbit on deeper routes. Floor-specific identities for some digging-creature names remain uncertain.
Lenoire, upper route to basement	Drakee, Longneck Weasel, Babble, Big Rat, Skull Serpent, Night Wisp. Ghost and Demon Candle on the lower route. Walking Statue and four Candles are fixed fights.
Dwarves' Cave	Spiny, Blaze Lizard, Troglodyte, Night Wisp, Skunker, Larva King, Gapplin, Whackamole. Lower routes add harder formations.
Ice Mansion, 1F–B1	Drakeema, Spiked Hare, Capala Naga, Magician. Zaile and Snow Queen are consecutive bosses.
Childhood eastern cave	Healer, Baby Newt, Brownie, Skeleton, Clay Doll, Dark Eye, Trick Bag, Slime Knight, Capala Naga. Papas supports the rescue route.
Adult Santa Rosa, 1F–B4	Slime, Brownie, Clay Doll, Light Boy, Skeleton, Owlbear, Tortragon, Hork. Metal Slime appears on the deeper boat-access route.
Reinhart basement, B1–B2	Slime Knight, Hork, Yeti, Tortragon, Wizard, Kukkle, Inspector. The courtyard Dragon Pups are fixed.
Southern Tower, 1F–4F	Skeleton, Healer, Slime Knight, Trick Bag, Metal Slime, Dragon Pup, Bandit Wolf, Inspector, Evil Plant, Tortragon, Wizard, Big Eye, and armored foes. Summoned Healers provide another recruit opportunity.
Panther cave, B1–B3	Magician, Metal Slime, Big Eye, Evil Plant, Metal Rider, Mudslough, Mystery Doll, Big Sloth, Baby Panther, Death Spark, Assault Trooper. Reunion uses the Ribbon.
Salabona tunnel	Big Eye, Ghoul, Snakebat, Death Spark, Mudslough.

Dungeon slice	Encounter index and hazards
Volcano, B1–B3	Beast Master, Curer, Wyvern, Bomb Crag, Mud Looper, Dancing Jewel, Metal Slime, Horse Devil, Snakebat, Flamer, Metal Hunter, Lancer. Three Lava Savages guard the ring.
Waterfall Cave, B1–B9	Gasling, Curer, Mud Looper, Lancer, Dancing Jewel, Snakebat, Tonguella, Octoleech, Marzon, Metal Slime, Orc, Beast Master, Lil' Eel. Recovery and recruitment must account for the long return.
Western mountain, cliffs and 1F–2F	Lintbloom, Duck Kite, Mad Dragon, Elder Mage, Dead Emperor, Metal Hunter. Thanatos Soldier naming has unresolved numeric correspondence.
Eastern mountain, 11F–1F	Flamer, Mad Dragon, Dead Emperor, Lintbloom, Duck Kite, Minidemon. Lower descent adds Metal Babble, Messala, Magiwyvern, Tonguelord. Mimics occupy trapped chests.
Cave of Trials, B1–B3	Gabott, Jelly Man, Cursed Mask, Devil Dancer, Metal Babble, Orc King, Messala. Orc King's revival prolongs fights.
Demon Tower, lower floors	Metal Babble, Minidemon, Messala, Magiwyvern, Tonguelord, Cursed Mask, Orc King, Devil Dancer. Fixed guards and jar traps interrupt the route.
Demon Tower, upper floors	Shield Hippo, Hawk Man, Duck Kite, Leaonar, Balloon. Two Mamoo and Balloon can summon Curers at the switch. The summit has Orc Lv. 20, Wyvern Lv. 35, then Jami.
Water Shrine	Zombie Knight, Blizag, Necromancer, Mother Octo, Man O'War. Ship and wagon follow the water route.
Sky Tower, lower to upper route	Balloon, Shadow Satan, Golem, Lizardman, Phoenix, Centaurus, Jelly Man, King Healer, Behemoth. Upper route adds Eliminator, Unholy Soldier, Gargoyle, Soldier Bull.
Torokko, B1–B4	Izlar, Satan Helm, Great Mamoo, Soldier Bull, Zombie Knight. Deeper route adds Dragon Warrior and Saruslord.
Forest of Illusion	Farewell Crag, Eigerhorn, Ogre Head, Rampone, Dancing Jewel. Bring a child for faerie access.
Emblem Cave, upper route	Barbarossa, Boss Garm, Lizardman, Zombie Knight, Saruslord, Izlar, Moon Face, Phoenix, Blue Eater, Evil Master, Red Eater, Satan Helm.
Emblem Cave, deepest seals	Metal Babble, Goopi, Gargoyle, Soldier Bull, Silver Devil. Cover the four faces to stop the seal-room encounters. Moon Face's Chance can destroy a stable party.
Tower of Boble, upper floors	Dragon Warrior, Snakehand, Blizzard Hawk, Skullgon, Golden Golem. The hook determines initial access.
Tower of Boble, lower and basement routes	Black Dragon, Ogre Head, Grendel, Silver Devil, Farewell Crag, Eigerhorn, Metal Dragon, Springer. Golem can be summoned. Gonz and Gema guard the Eyes.
Great Temple, B1–B3	Black Dragon, Evil Clown, Evil Spirit, Springer, Dark Shaman, Metal Dragon, Barbarossa. Humans form the approach party. Ivol summons the full roster.
Evil Mountain	Bazuzu, Lionex, Springer, Evil Spirit, Jelly Man, Dark Shaman, Flare Dragon, Great Dragon, Evil Clown, Galba, Golba, Putregon, Metal Babble, Metal Slime, Manuhan, Wight King, King Metal, Gigantes, Attackbot, Moon Face. Urnites and Mimic are container fights.
Bonus Dungeon, B1–B5	Hellbattler, Farewell Crag, Springer, Evil Spirit, Great Dragon, Lionex, Mechaban, King Metal, Evil Clown, Putregon, Metal Slime, Metal Babble, Jelly Man, Flare Dragon, Attackbot, Manuhan, Sergeinus. Two Mimics are separate from fixed rewards.

Exact floor boundaries for every species and every formation are unconfirmed. Combined pools identify route bands where a narrower boundary is unavailable.

18.5 Sea encounters and vehicle-dependent access

Water route	Encounter pool and access
Salabona borrowed boat	Octoleech, Glubglub, and a shell creature listed as Tamategai. Its numeric correspondence is uncertain. Bianca opens the watergate route.
Wedding ship, inner ocean	Octoleech, Glubglub, Plesiosaur, Marzon, Ghost Captain, Sea Dog, Man O'War, and the shell-creature entry.
Later outer ocean	Marzonician, Captain Kook, Sea Dog, with Nereus on later sea recruit routes.
Water Shrine river cave	Zombie Knight, Blizag, Necromancer, Mother Octo, Man O'War. Land detours contain treasure and return to the boat.
Magic Carpet	Appropriate open water and low land can be crossed without ordinary sailing encounters. Mountains and landing obstructions limit access.
Zenithia and Master Dragon	Required for particular airborne approaches. Entering a dungeon restores its own encounter and party-access rules.

18.6 Metal enemies: locations, escape behavior, and training tactics

Metal training lookup

Enemy	HP	EXP	Routes
Metal Slime	5	1,350	Adult Santa Rosa, Southern Tower, Panther cave, Volcano, Waterfall Cave, late routes.
Metal Babble	7	10,050	Eastern mountain's lower descent, Trials, Demon Tower, Emblem Cave's deepest route, Demon World and Bonus Dungeon.
King Metal	7	30,010	Evil Mountain and Bonus Dungeon.

Metals can flee before the party acts and resist ordinary spell damage. Use fast physical attackers and repeat-hit weapons when eligible. An instant-death weapon's chance is a possibility, with no guaranteed kill rate here. Clean up dangerous supporting enemies when they threaten the attempt. Choose a route with nearby healing and a party that can handle its ordinary pool. Metal Hunter, Metal Rider, Metal Dragon, and Mechaban have their own ordinary statistics and rewards. Metal Babble is the recruitable member of the three high-EXP metal entries.

18.7 Mimics, trapped chests, summoned enemies, and fixed encounters

Man-Eater Chest has 90 HP, Mimic 400, Demon Jar 200, and Urnite 500. Each can drop a Small Medal. A monster in a chest or jar is a battle reward opportunity. Its item is separate from the route's guaranteed treasure. Demon Tower, Boble, Evil Mountain, and Bonus Dungeon contain such encounters. Carry instant-death safeguards and revival supplies before opening containers on long routes.

Summoning can add Healers in the Southern Tower, Curers at Demon Tower's switch guards, Golems in Boble, and dangerous reinforcements in the final battle. Kill a healer or reviver when it sustains the enemy formation. Slime fusion creates a King Slime encounter. Fixed fights also include Lenoire's statue

and Candles, the slave guards, Reinhart's Dragon Pups, Port Selmi's bandits, tower sentries, Kandar's guards, Great Temple sentries, two Dark Shamans at Martha's plateau, and two Hellbattlers at the final treasure. Chapter 19 indexes their recovery demands.

18.8 Drop tables and item-to-monster reverse index

This reverses every catalog drop, including ordinary enemies and boss entries. A boss's possible medal is separate from its key object or guarded chest. Use the encounter indexes to choose a repeatable route. HP and reward variants remain separate in the alphabetical catalog.

Drop	Enemies
Acorns of Life	Dragon Pup, Flare Dragon, Ganesha, Kemkemubeth, Mudslough, Plesiosaur
Acorns of Magic	Imposter, Laughing Grass, Mad Plant, Ogre Head, Shadow Satan
Agility Seed	Goblin Rat, Great Mamoo, Longneck Weasel, Mamoo, Metal Slime, Whip Man
Angel's Bell	Balloon
Antidote Herb	Babble, Demon Toadstool, Gabott, Gasling
Armband of Sacrifice	Bazuzu
Bamboo Pole	Troglodyte
Battle Axe	Soldier Bull
Big Mallet	Big Eye
Blood Mail	Zombie Knight
Bomb Stone	Bomb Baby, Bomb Crag, Manuhan
Breastplate	Assault Trooper, Lancer, Metal Rider, Unholy Soldier
Broad Sword	Dragon Warrior, Hawk Man, Springer
Bronze Armor	Slime Knight
Bronze Knife	Demon Candle, Light Boy
Chain Mail	Grendel
Club	Ramada
Copper Sword	Bandit Wolf, Skeleton
Dancer's Clothes	Devil Dancer, Octoleech, Puppet Man
Defense Seed	Bazocks, Clay Doll, Grabshell, Killer Shell, Mud Looper, Mystery Doll, Saruslord, Tortragon, Walking Statue
Demon Claw	Galba, Golba
Demon Hammer	Golden Golem
Devil's Armor	Eigerhorn, Evil Master
Echoing Hat	Evil Clown
Elven Medicine	Evil Spirit, Silver Devil
Faerie Sword	Grondepth, Izlar
Fighter's Hair	Boss Garm
Flame Claw	Blue Eater
Fragrance Bag	Lintbloom, Tonguella
Full Moon Herb	Man O'War, Necrodain, Red Eater, Snakebat
Fur Coat	Orc, Orc King, Orc Lv. 20
Fur Hood	Spiked Hare
Hat of the Wind	Blizzard Hawk, Infernavis
Helm of Wisdom	Moon Face
Hell Sabre	Hellbattler

Drop	Enemies
Holy Water	Ghost, Gregor, Yeti
Intelligence Seed	Flamer, Green Worm, Mad Dragon, Metal Hunter, Tonguelord
Iron Claw	Killer Panther ordinary encounter, Leaonar, Marzon
Iron Mask	Cursed Mask
Iron Shield	Behemoth, Mortha, Owlbear, Shield Hippo
King Metal Armor	Metal Dragon
Leaf of the World Tree	Barbarossa, Curer, Ghoul, King Slime
Leather Hat	Blaze Lizard, Horned Rabbit
Leather Loincloth	Emparther
Magic Water	Centaurus, Death Spark, Elder Mage, King Tortragon, Lava Savage, Magician, Wizard, Zaile
Medical Herb	Big Rat, Cactus Ball, Dark Eye, Demighoul, Drakee, Evil Apple, Glubglub, Gophecada, Healer, Kukkle, Larva King, Night Wisp, Skull Serpent, both Slime entries, Spiny, Thorny, Tunneler, Whackamole
Monster Lure	Brownie, Horse Devil, Mother Octo, Rampone
Ogre Shield	Sergeinus
Orihalcon Fang	Mechaban
Piece of Cloth	Baby Panther, Hork
Poison Needle	Putregon
Pot Cover	Minidemon
Restoration Orb	Great Dragon, King Healer
Ring of Prayer	Dancing Jewel, Messala, Necromancer
Rogue Armor	Rogue Armor
Satan Helm	Satan Helm
Saw Blade	Lizardman, Sea Dog
Scale Shield	Gas Mink
Shell Hat	Nereus
Shield of Darkness	Lionex
Shield of Ruin	Skullgon
Silk Hat	Blizag, Ghost Captain
Small Medal	Buorn, Demon Jar, Estark, Gema at Boble, Gonz, Ivol, Jelly Man, Kandar Henchman, King Metal, Man-Eater Chest, Metal Babble, Mimic, Urnite
Snake Sword	Gargoyle, Snakehand
Staff of Antimagic	Wight King
Staff of Force	Phoenix
Staff of Thunder	Dead Emperor
Stone Axe	Eliminator, Kandar
Stone Fang	Baby Newt
Stone of Life	Farewell Crag, Stoneman
Strength Seed	Big Sloth, Black Dragon, Boss Ghost, Dark Mammoth, Dentasaurus, Gigantes, Golem, Marzonician, Trumpeter
Swordedge Armor	Attackbot
Thorn Whip	Beast Master, Evil Plant
Wayfarer's Clothes	Drakeema
Wing of Wyvern	Death Parrot, Duck Kite, Gapplin, Goopi, Inspector, Lil' Eel, Magiwyvern, Picky, Skunker, Snow Queen, Trick Bag, Wyvern, Wyvern Lv. 35

Drop	Enemies
Wizard's Robe	Dark Shaman
Wooden Hat	Dancing Needle
Zombie Mail	Captain Kook

18.9 Recruitable flags and differences between enemy and companion data

The R flag covers 40 randomly recruitable species. The reunion Panther is the additional story companion. Recruitment needs the wagon and the Oracleberry preparations. Select a route that permits recruitment, defeat the desired species through a suitable battle finish, and allow for repeated attempts. A species present as a fixed guardian or summoned reinforcement can have different eligibility from its normal field encounter. Evil Mountain's battles are unsuitable for planning recruit attempts, with the Bonus Dungeon providing Hellbattler, Lionex, and Springer opportunities.

Enemy HP, actions, drops, and rewards describe the opponent. Companion growth, learned skills, equipment, and maximum level have their own data. In particular, an enemy Attackbot can act twice without establishing two actions for an allied Attackbot. A hostile healer's current spell use does not establish a companion's learning level. The ordinary Killer Panther and reunion encounter also have different purposes. Use the companion development reference for skills and the verified eligibility sets in Chapter 17 for gear.

18.10 Boss entries and variant encounters

Boss Ghost, Zaile, Snow Queen, Imposter, Lava Savage, Kandar, Orc Lv. 20, Wyvern Lv. 35, Jami, Buorn, Gonz, Boble Gema, Ramada, Ivol, both Mildrath forms, and Estark have dedicated fight notes in Chapter 19. Childhood Gema is scripted. The reunion Panther is resolved with the Ribbon. Kandar Henchmen recur at guarded treasures. Ordinary Orc and Wyvern statistics are separate from their tower variants. Boss Garm is an ordinary encounter despite its name. Keep the script's reward chest separate from a random battle drop.

19 Boss and Scripted-Battle Strategy Compendium

19.1 Strategy format: access, party, equipment, patterns, and recovery

Choose the active trio before a dungeon that excludes the wagon. Refill HP and MP before speaking to a boss or opening a guarded chest. Put recovery items on more than one survivor and give each reusable tool to an accessible user. The table indexes bosses and scripted fights, with detailed routes in the linked walkthrough chapters. HP is per enemy. A question mark marks an unsafe estimate or a stage-dependent value. Chapter 18 supplies EXP, gold, and possible drops. Scripted victories, recruitment resolutions, and defeats have their own outcomes.

Fight	HP	Access / route	Pattern, counter, and critical hazard
Opening Slimes	7 each	Childhood, Chapter 4	Opening encounter leads to Papas's assistance.
Walking Statue	100	Lenoire	Physical pressure. Bianca's defense-lowering support helps the Hero.
Four Demon Candles	20 each	Lenoire trap	Clear the group and heal before returning to the balcony.
Boss Ghost	195–200	Lenoire balcony	Sap and Blaze. Surround, defense support, attacks, and stocked herbs.
Zaile	160	Ice Mansion	Robmagic and healing. Preserve enough recovery for Snow Queen immediately afterward.
Snow Queen	600	Ice Mansion	Cold, physical attacks, self-healing, and charged attacks. Heal after group damage.
Childhood Gema	1,024	Eastern cave exit	Scripted defeat. Preserve scarce consumables for later use. Papas's confrontation proceeds automatically.
Two Whip Men	65 each	Captivity, Chapter 5	Hero and Henry lack their former equipment. Focus damage and heal as needed.
Two Dragon Pups	52 each	Reinhart courtyard	Fixed ordinary enemies. Clear them before the castle investigation.
False Queen / Imposter	350	Reinhart throne route	Fire breath and summons. Remove disruptive support, then focus the queen.
Port Selmi bandits	?	Tavern, Chapter 6	Fixed ordinary fight. Concentrate attacks and collect the farmer's payment.
Killer Panther reunion	1,024	Cave west of Kabochi	Hero uses Bianca's Ribbon. Resolve the recognition event and collect Papas' Sword.
Three Lava Men	400 each	Volcano	Three fire-breath users. Focus one until defeated and maintain recovery.

Fight	HP	Access / route	Pattern, counter, and critical hazard
Kandar and Shield Hippo	600 / 88	Trials, Chapter 7	Kandar heals, Hippo guards. Focus Kandar and retain MP for the return.
Demon Tower Leaonar	93	Entrance warp	Fixed physical guard. Clear it without spending the summit's recovery reserve.
Two Hawk Men	75 each	Demon Tower warps	Fixed guards. Remove one quickly to reduce incoming damage.
Leaonar and Orc King	93 / 84	Demon Tower route	Orc King's healing and revival can extend the fight. Target the support threat.
Two Mamoo and Balloon	91 / 119	Demon Tower switch	May summon Curers. Clear healing support before it restores the formation.
Orc Lv. 20	950	Demon Tower summit	Defense reduction and physical attacks. Increase and focused damage.
Wyvern Lv. 35	800	Demon Tower summit	Breath and Snowblast with recovery pressure. Refill before continuing.
Jami / Jahmi	?	Demon Tower summit	Initial barrier. Defend through its removal, then attack with sustained healing.
Kandar Henchmen	500	Reinhart, Mountain Village, Shahanna	Three separate guarded-treasure fights. Heal first, focus attacks, then open each chest.
Buorn / Bohen	?	Salabona tower, Chapter 9	Heavy physical damage, breath, lightning, and defense boosts. Barrier, Increase, and offensive support.
Gonz	1,700	Tower of Boble	Physical attacker. Increase and boosted fighters. Left Eye chest follows.
Boble Gema	?	Tower of Boble	Fire and paralysis. Barrier, Numboff access, Full Moon Herbs, and status protection.
Armor-room Snakehand	131	Great Temple	Fixed ordinary guardian. Defeat it and equip the Son's Zenithian Armor.
Two Dragon Warriors	123 each	Great Temple crowd	Humans on the approach. Clear the fixed guards and heal before Ramada.
Patrolling Snakehands	131	Great Temple basement	Repeat ordinary guard encounters. Preserve MP for Ivol.
Ramada / Ramanda	1,800–2,000	Great Temple stage	Physical attacks and Blizzard. Increase, recovery, and a curse check after the dialogue.
Ivol	?	Great Temple deepest room	Full roster summoned. Explodet, breath, Bounce, and dispelling. Rotate healers and rebuild support.
Two Dark Shamans	170 each	Martha's plateau, Chapter 10	Fixed ordinary enemies. Clear and restore resources for the remaining descent.
Two Hellbattlers	450 each	Final guarded treasure	Strong ordinary enemies. Heal before opening, then collect Orihalcon Fang.
Mildrath, first form	?	Evil Mountain final room	Spell, breath, dispelling, and summoned allies. Free healing and focused removal of support enemies.

Fight	HP	Access / route	Pattern, counter, and critical hazard
Mildrath, second form	?	Immediate second battle	Stronger group damage, Meditate, Bounce, and dispelling. Rotate survivors and retain sufficient offense.
Estark / Esterk	9,000	Bonus Dungeon, Chapter 11	Two actions, powerful breath and spells, sleep, Bounce, and dispelling. Barrier, Drum, and strong recovery.
Container and rock fights	90–500	Relevant dungeon treasure routes	Man-Eater Chest, Bomb Crag, Demon Jar, Mimic, Urnite. Carry death and paralysis safeguards.

19.2 First-generation battles

Party access changes between the Hero and Bianca's Lenoire visit, the Hero and Panther's faerie quest with Bella, and Papas's eastern rescue route. Chapter 4 contains the routes and early purchase choices. Stock herbs before each boss sequence and keep the Hero able to recover the party.

19.2.1 Lenoire ghost boss

Lookup: Chapter 4, Lenoire Castle. The Hero and Bianca fight the Walking Statue, four Demon Candles, and Boss Ghost at different points. Restore HP between the fixed fights. Boss Ghost uses Sap and fire magic. Have Bianca apply available defense-lowering or accuracy-disrupting support, then contribute spells or attacks. The Hero attacks while healing becomes his priority whenever another hostile action could defeat an ally. Reapply defensive support if Sap makes physical hits dangerous. Keep herbs on both characters so one user's MP or turn order does not decide the fight.

19.2.2 Zaile and the Ice Mansion boss

Lookup: Chapter 4, Ice Mansion. Zaile has 160 HP and can heal or drain MP. Use efficient physical damage and save resources for Snow Queen's 600 HP fight immediately afterward. The Hero and Panther supply the dependable attack and recovery plan, with Bella providing temporary battle support. Snow Queen uses cold damage, physical attacks, and healing. A deep breath signals a stronger attack, so recover or defend vulnerable allies before the next blow. Bring herbs to cover MP drain and repeated group damage. The Flute of Spring is the quest objective after victory.

19.2.3 Gema and the childhood scripted confrontation

Lookup: Chapter 4, eastern cave rescue. This Gema encounter advances through defeat and Papas's automatic intervention. A large stock of rare recovery items cannot change its required story outcome. Keep the battle's scripted nature in mind when deciding what to spend. Gonz and Jami appear in Papas's confrontation as story participants. Their later battles have their own statistics and player-controlled strategies.

19.3 Second-generation battles

The Hero and Henry begin adulthood with limited equipment. The wagon and recruited companions later expand the traveling roster, while many dungeon fights still depend on the chosen active trio. Chapters 5, 6, and 7 contain the corresponding approach and recovery points.

19.3.1 False Queen

Lookup: Chapter 5, Reinhart and the Southern Tower. Carry the Mirror of Ra back from the tower and restore the party before revealing the Imposter. The Hero, Henry, and a prepared companion can handle her 350 HP. Fire breath damages the group and summoned helpers can interfere with magic or healing. Remove a helper when its support prolongs the fight, then return concentrated damage to the queen. Henry's available support and a healing companion reduce the Hero's recovery workload. Check Henry's deposited equipment after he leaves.

19.3.2 Killer Panther reunion: resolution without defeating it

Lookup: Chapter 6, Kabochi and the western cave. Put Bianca's Ribbon in the Hero's inventory before entering the encounter. Have the Hero use it on the Panther and allow the recognition event to resolve. Other active members can defend while the item is used. The reunion restores the childhood companion to the roster and makes Papas' Sword available. The ordinary field Panther's stats and drop belong to a separate catalog entry.

19.3.3 Lava Men

Lookup: Chapter 6, Volcano. Prepare the Hero and two developed companions before reaching the Ring of Flames. All three Lava Savages have 400 HP and can damage the full active party with fire. Heal at the dungeon's recovery point, then enter with enough MP for repeated healing. Concentrate attacks on one Savage until it falls, reducing the number of possible breath attacks each round. A healing Slime Knight and a developed Wyvern are useful role choices. Keep the Hero free to heal when the other recovery user cannot keep pace. Spread damage across all three only when the group attack still produces a timely first defeat.

19.3.4 Kandar and the Cave of Trials confrontation

Lookup: Chapter 7, Cave of Trials. The wife stays in Granvania for this route, so prepare companions for the Hero's active trio. Kandar has 600 HP and the Shield Hippo 88. Kandar can heal, while the Hippo's guarding can reduce physical damage. Focus Kandar and use available defense support if healing pressure rises. Keep enough resources for the walk back because Outside remains sealed until the entrance portion. The Symbol of Royalty is retained for coronation.

19.3.5 Demon Tower gatekeepers and Jami

Lookup: Chapter 7, Demon Tower. Flying Shoes reach the approach shrine. Leaonar, Hawk Men, Orc King, Balloon, Mamoo, jars, and Mimics add resource demands before the summit. Clear summoned Curers when they sustain the switch guards. Avoid arriving at the summit with the same low HP left by the flame-statue traps.

Orc Lv. 20 has 950 HP, hits physically, and reduces defense. Use Increase and concentrated damage. Wyvern Lv. 35 has 800 HP and uses breath and Snowblast. Refill after each gatekeeper. Jami begins behind a story barrier that makes attacks ineffective. Defend and maintain survival until the wife removes it, then switch to attack support and healing. Preserve enough MP for the exposed phase. Exact HP is left unspecified for this staged fight. The stone transformation follows the completed fight.

19.4 Third-generation battles

Develop the children before the harder fights. The Son's Barrier at level 23 and the Daughter's Bikill at 16 and Decrease at 22 provide useful preparation targets. Use the Hero's recovery spells and item tools alongside their roles. Companion alternatives depend on the approach's party restrictions.

19.4.1 Buorn / Bohen

Lookup: Chapter 9, Salabona's seal shrine and tower. Inspect the sealed pot and complete Ludman's tower event, with the active trio prepared before the confrontation. Hero, Son, and Daughter are a practical team when their support spells are learned. Buorn combines heavy physical attacks, breath, lightning, and defensive boosts. Start with Barrier and Increase, then boost the physical attackers. Counter his raised defense through the Daughter's available defense reduction. Keep recovery ahead of the next damaging turn, especially while support spells are being established. Claim the Final Key after victory and revisit barred treasure routes. Exact HP and a guaranteed reserve-party rotation are unconfirmed.

19.4.2 Gonz and Gema at the Tower of Boble

Lookup: Chapter 9, Tower of Boble. Open the tower's main door during the first descent so town recovery is convenient between attempts. Use a carefully supplied active trio and carry the Grappling Hook. Gonz has 1,700 HP and relies on physical attacks. Increase and boosted fighters shorten the fight while a healer handles damage. Take the Left Eye from his chest.

Gema demands stronger recovery and paralysis safeguards. Barrier reduces breath pressure and Increase helps physical survival. Keep Numboff available through the Son or another qualified caster, with Full Moon Herbs on more than one character. An Elven Amulet helps reduce status risk. Total-party paralysis can end an otherwise healthy attempt. Avoid assigning every cure to one vulnerable user. The Right Eye follows victory. Put the Right Eye in the statue's left screen socket and the Left Eye in the right screen socket. The inner room's Dragon Staff and Dragon Orb complete the route.

19.4.3 Great Temple guardians and high priest

Lookup: Chapter 9, Great Temple. Use humans for the approach. The Snakehand guarding the Zenithian Armor has 131 HP. Two Dragon Warriors at the crowd have 123 HP each. Patrolling Snakehands add optional fixed fights below. Equip the recovered armor on the Son before the deeper battles.

Ramada's stage encounter combines physical attacks with possible Blizzard. Use Increase and keep healing available. Check the party for curses after the false-Martha dialogue and recover before descending. Defensive debuffs are unreliable against this fight, so concentrate on dependable physical damage and support. Use the 1,800–2,000 HP range for planning.

Ivol summons the traveling roster before combat, permitting swaps. His dangerous sequence includes Explodet, cold breath, Bounce, and dispelling rays. Maintain Barrier, healing, and attack support, then rebuild the vital effects after dispelling. Keep physical offense available while Bounce is active. Rotate a healthy healer into the trio before another strong group attack can defeat it. Use wagon members as a recovery reserve and leave a survivor able to revive a fallen healer. The Ring of Life follows victory. Retrieve it and complete the exit and family reunion before assembling the next party at Ruida's.

19.5 Final-dungeon encounters and both Mildrath forms

Lookup: Chapter 10, Evil Mountain. Two Dark Shamans guard Martha's plateau, with 170 HP each. Two Hellbattlers guard the Orihalcon Fang, with 450 HP each. Restore the active party before those fixed encounters and again before entering Mildrath's room. These guardians are ordinary enemy fights within a story route.

First form uses powerful magic, cold breath, dispelling, and summoned Evil Clowns or Attackbots. Use the Sage's Stone, a separate spell healer, Barrier, and physical attack support. Remove reinforcements when their actions destabilize recovery. Enemy Attackbots can act twice. Keep enough MP and consumables for the immediately following form.

Second form adds stronger group damage and Meditate recovery, with Bounce and dispelling still disrupting plans. Reapply Barrier after it is removed and restore attack boosts once survival is stable. Sage's Stone healing may need a strong spell heal in the same recovery cycle. Rotate healthy reserve members before a nearly defeated character becomes the sole remaining healer. Sustained damage must overcome the boss's self-recovery. Check for reflected magic before choosing offensive spells. Exact final-form HP is left unspecified. Keep a leaf and MP recovery on independent users, and treat Farewell as an emergency recovery action that sacrifices its caster. The carried Restoration Orb's exact activation and consumption remain uncertain.

19.6 Estark / Esterk and repeat postgame challenges

Lookup: Chapter 11, Bonus Dungeon. Wait for The End, load the completed game's pre-boss save, and use the swamp entrance south of Evil Mountain. Carry the collected Drum of War and distribute the Sage's Stone, revival supplies, and MP recovery among active users. The Bonus Dungeon's ordinary enemies and two Mimics can consume resources before Estark.

Estark has 9,000 HP and two actions per round. His dangerous combinations include Explodet and powerful fire or cold breath. He also uses Bounce, dispelling, and sleep pressure. Start with Barrier and the Drum. Restore them after dispelling while preserving a healing turn. Status-protective equipment reduces the risk of the only healer losing an action. Plan recovery for the full two-action turn, with 200 HP a useful caution threshold and stronger recovery whenever equipment or recent damage makes that unsafe. Use the Sage's Stone alongside group healing when one tool cannot keep pace. Rotation and available revival matter more than committing a weakened trio for another attack.

Victory gives 5,000 EXP and 510 G, with a possible Small Medal. Estark reports the turn count. Leaving and returning permits repeat attempts. The count is a personal performance measure, with no verified extra prize or recruitment reward attached. Sleep susceptibility, exact elemental weaknesses, and multiplicative stacking of Drum and Bikill are unconfirmed, so the core plan uses dependable physical damage and recovery.

19.7 Low-resource recovery plans and common causes of failed attempts

Failure point	Recovery plan
Healer defeated	Another survivor uses a leaf, Vivify, or Revive as available. Staff of Revival casts Vivify and can fail. Keep revival on multiple users.
MP nearly exhausted	Use Magic Water, Elven Medicine, or a Ring of Prayer. Free item healing can bridge the refill turn. A Prayer Ring may break.
Paralysis or confusion	Use Full Moon Herb or Numboff for paralysis and Angel's Bell for confusion. Separate these tools from the same vulnerable inventory.
Support dispelled	Restore Barrier and immediate recovery first, then offensive support. Repeat dispelling makes timing more important than filling every possible buff.
Enemy Bounce	Use physical attacks and item healing. Check reflected-spell risk before selecting a magical attack or debuff.
Two-action damage spike	Enter the turn with enough HP for both actions. Combine free healing with a stronger spell or rotate an endangered member where reserves are available.
Early bosses with few tools	Stock herbs on both controlled characters. Spend a turn defending a fragile ally while the other heals.
Jami barrier	Maintain survival until the scripted removal. Reserve attack resources for the exposed phase.
Summoned healer or reviver	Remove the support enemy when it undoes progress. Restore party HP before resuming concentrated boss damage.
Cursed or unsuitable gear	Recover through the church and recheck Equip. Protection, control, and eligibility affect the loadout's practical value.
Trio depleted in a wagon-free dungeon	Retreat through the opened shortcut and refill in town. Choose the next trio and redistribute its recovery inventory before re-entry.
Final two-form attrition	Keep second-form resources in reserve while clearing the first. Retain a second recovery user and enough offense to overcome Meditate.
Opening collapse	Use Sands of Time when available to restart the battle with a workable opening plan. Confirm the party's tool holders before trying again.

20 Small Medals and Medal King Rewards

20.1 Medal collection, exchange rules, rewards, and planning

The Medal King takes carried Small Medals into an account. Each exchange spends its listed cost. The island southeast of Telepador is reachable by ship after marriage. See 7.2 for the visit and exchange.

Reward	Medals	Use
Combat Pajamas	5	Body armor for a compatible wearer.
Mysterious Bolero	10	Recovers MP from some incoming magical damage.
Sword of Miracles	16	Restores some HP from physical damage dealt.
Mystic Armor	21	Restores the wearer's HP after battle turns.
Falcon Sword	30	Two strikes per attack action for a compatible wearer.
King Metal Shield	43	High defensive protection for a compatible wearer.

A 20-medal balance becomes four after buying the Sword of Miracles. Reserve 21 for Mystic Armor when recurring recovery is the priority. Check equipment eligibility before exchanging. Keep medals, purchased rewards, and remaining balance as separate collection entries.

20.2 Chronological location checklist

Phase key: II is adulthood, III is the family reunion, and Post is the cleared-game return. Each square records a fixed find. The route column identifies the existing walkthrough section.

Search and chest achievement counters

S rows identify the 29 fixed searches for Small Medal Hunter, and C rows identify the 19 fixed chests for Small Medal Collector. Check each location once and count the completed boxes in its category. The row numbers identify locations, while the actual collection order can vary. Enemy drops and spent balances are separate from these two counters.

All listed finds through	Searches	Chests
Chapter 5	2 / 29	0 / 19
Chapter 6	13 / 29	1 / 19
Chapter 7	22 / 29	8 / 19
Chapter 8	25 / 29	9 / 19
Chapter 9	28 / 29	16 / 19
Chapter 10	29 / 29	18 / 19
Chapter 11	29 / 29	19 / 19

20.2.1 Early adulthood and the Reinhart region

Find	Place	Container and access	Route
S01/29	☐ Alcapa	II, pot in the storyteller's room behind the inn bar.	5.5
S02/29	☐ Reinhart	II, storage-room pot through the Reinhart Key door.	5.6

20.2.2 Port Selmi, Kabochi, Ruraphin, and Salabona

Find	Place	Container and access	Route
S03/29	☐ Port Selmi	II, lighthouse dresser above the ladder.	6.1
S04/29	☐ Port Selmi	II, eastern flower patch beside the church.	6.1
S05/29	☐ Kabochi	II, elder's upstairs pot.	6.2
S06/29	☐ Kabochi	II, ground in the upper-left corner of the underground shop and church.	6.2
S07/29	☐ West Kabochi Cave	II, ground north of the skeleton beside the campfire.	6.2
S08/29	☐ Ruraphin	II, upstairs inn pot.	6.3
S09/29	☐ Ruraphin	II, pot in the sunken area west of the church.	6.3
S10/29	☐ Rumor Inn	II, well at the roadside inn north of Salabona.	6.4
C01/19	☐ Ruraphin South Cave	II, eastern side-branch chest beyond the passage guard.	6.4
S11/29	☐ Salabona	II, dresser in Andy's house south of the inn.	6.5
S12/29	☐ Mountain Village	II, barrel in the inn's basement tavern.	6.7
S13/29	☐ Mountain Village	II, right-hand grave marker outside.	6.7

20.2.3 Mountain routes, Granvania, Cave of Trials, and Demon Tower

Find	Place	Container and access	Route
C02/19	☐ Western mountain	II, cliff-branch chest after the 550 G detour.	7.4
S16/29	☐ Western mountain	II, underground pot beside the separate Demon Jar.	7.4
C03/19	☐ Western mountain	II, western chest in the upper cave before Chizod.	7.4
S17/29	☐ Chizod	II, barrel in the basement shopping area.	7.5
C04/19	☐ Eastern mountain	II, southwestern side-branch chest below the first pool.	7.6
C05/19	☐ Eastern mountain	II, fixed chest in the middle-route pair with a Mimic.	7.6
C06/19	☐ Eastern mountain	II, exterior lower-ledge chest through the western doorway.	7.6
S18/29	☐ Granvania	II, far northeast ground corner of the royal-room terrace.	7.7
S19/29	☐ Granvania	II, town-floor pot west of the church.	7.7
S20/29	☐ Granvania	II, eastern bathing-room dresser on the soldier floor.	7.7
C07/19	☐ Cave of Trials	II, chest on the northern side branch of the entry route.	7.8
S21/29	☐ Demon Tower	II, western pot in the first teleported treasure room.	7.11

Find	Place	Container and access	Route
C08/19	☐ Demon Tower	II, chest beside the World Tree Leaf in the upper rock room.	7.11
S22/29	☐ Demon Tower	II, pot in the isolated room reached from Corridor Switch One.	7.11

20.2.4 Sea routes, shrines, El Heven, and key-gated revisits

Find	Place	Container and access	Route
S14/29	☐ Desert Oasis	II, pot at the oasis on Telepador's desert continent, ship access.	7.1
S15/29	☐ Telepador	II, well in the lower garden near Isis's chambers.	7.3
S23/29	☐ Gigo / Jijo's house	III, dresser in the mother's bedroom on the southeastern island.	8.5
S24/29	☐ Farthest Shrine	III, ground immediately below the bucket beside the well, northern continent's eastern peninsula.	8.5
C09/19	☐ Water Shrine	III, chest at the northward end of the eastern water branch.	8.6
S25/29	☐ El Heven	III, pot in the old couple's room.	8.7
S28/29	☐ Oracleberry prison	III, Final Key bars, occupied cell floor immediately left of its inmate.	9.10
C12/19	☐ Medal King Castle	III, first medal chest behind the Final Key bars.	9.10
C13/19	☐ Medal King Castle	III, second medal chest behind the same bars. The third chest holds a Golden Tiara.	9.10
C14/19	☐ Emblem Cave	III, Final Key access, eastern treasure-floor branch chest.	9.10

20.2.5 Zenithia routes, Tower of Boble, and Great Temple

Find	Place	Container and access	Route
C10/19	☐ Sky Tower	III, fourth-floor exterior walkway chest on the western ascent.	9.1
C11/19	☐ Torokko Mines	III, first-basement chest in the early treasure detour.	9.3
S26/29	☐ Forest of Illusions	III, jar in the dwarf's hillside home, child in the party.	9.5
S27/29	☐ Zenithia	III, dresser in the grandson's second-floor room.	9.8
C15/19	☐ Boble Tower	III, first isolated fifth-floor room chest after the rooftop descent.	9.11
C16/19	☐ Boble Tower	III, southern chest in the western basement pair. The northern chest is a Mimic.	9.11

The Great Temple's five fixed finds are indexed in 23.4 and 9.12. Record its trapped-container battles separately from this medal list.

20.2.6 Demon World, Evil Mountain, and Bonus Dungeon

Find	Place	Container and access	Route
S29/29	☐ Shahanna	III, barrel beside the outer wall.	10.3
C17/19	☐ Evil Mountain	III, isolated summit-detour chest down the northern stairs west of the fork.	10.4
C18/19	☐ Evil Mountain	III, western chest in the lower arrow-floor room opposite the Echoing Hat.	10.5
C19/19	☐ Bonus Dungeon	Post, entrance's western side-room chest beside the Restoration Orb.	11.2

20.3 Searchable objects, fixed rewards, and enemy-drop medals

Collection type	Recording rule
Placed finds	Check the individual square after searching its pot, barrel, dresser, chest, flowers, well, or ground tile.
Mimic battle reward	Record after victory and the reward message. Mountain, tower, and Bonus traps are separate encounters.
Man-Eater Chest / jar	Record a medal only when the battle awards one. The container's encounter and its reward are separate checks.
Other enemy drops	Add the displayed medal to the balance. Repeat encounters can provide further drops.
Exchange	Record the reward and subtract its cost from the balance. Previously spent medals remain part of collection progress.

20.4 Location-to-map index and the final collection audit

Map / place group	Walkthrough lookup
Alcapa, Reinhart basement	5.5–5.6, first two location squares.
Marriage continent	6.1–6.7, town searches, West Kabochi and southern passage maps.
Desert and mountain crossing	7.1, 7.3–7.7, western and eastern Mountain Cave maps.
Trial and Demon Tower	7.8, 7.11, northern spur, teleported room, rock room, switch room.
Sea and Final Key circuit	8.5–8.7, 9.10, Water Shrine and Emblem Cave maps.
Zenithia restoration	9.1, 9.3, 9.5, 9.8, 9.11, Sky Tower, mines, forest and Boble maps.
Demon World and postgame	10.3–10.5, 11.2, Evil Mountain and Bonus Dungeon maps.

Medal collection closeout

- ☐ Recheck every unmarked location in 20.2, carrying the Final Key for barred rooms.
- ☐ Retrieve stored medals, deposit carried medals, and record the displayed balance.
- ☐ Record each purchased reward and each observed enemy-drop medal separately.

20.5 Version-specific Mimic encounters

Optional early-DeJap-patch repeat method: save at a church before opening a known Mimic or Man-Eater Chest. After a surviving party wins, leave the room, re-enter, and examine the same chest. Some early patches allow another battle. A critical-hit finish can permanently clear the trap. Record only medals actually awarded. Compatibility with v2.01F is unconfirmed. See 22.9 for the compact trial procedure.

21 Casino, Shops, and Resource Planning

21.1 Oracleberry casino access, coins, stakes, and prize exchange

Oracleberry's casino is available from early adulthood and remains open at night. Buy coins at the entrance for **20 G each**. Reserve the **300 G wagon purchase**, equipment, inn fees, and revival money before funding wagers. Coins buy the six prizes in 21.5. See 5.3.2.

Stake check	Before confirming
Purchased coins	10 coins cost 200 G, 100 cost 2,000 G, and 1,000 cost 20,000 G.
Slime race	Select the offered two-slime pairing, coin wager, and posted odds.
Slot machine	Check its displayed coin unit and inserted coin count. Their product is the spin's total stake.
Monster arena	Select the contestant, posted odds, and coin wager. Confirm the displayed maximum before using a maximum bet.
Session limit	Choose a coin-loss limit and a prize target before the first wager. Save the ordinary adventure before entering.

21.2 Slime races

Slime-race lookup

Field	Rule
Entrants	Five slimes race.
Selection	Bet on the two slimes that occupy first and second place using the counter's pairing choices.
Stake / return	The counter takes the selected coin stake. A winning pairing pays according to its posted odds.
Control	The race runs automatically after the wager. A short-priced pair can still lose.

21.3 Slot machines

Slot-machine lookup

Field	Rule
Stake	Choose the machine, inspect its coin unit, and insert the intended number of coins.
Spin	Start the reels after checking the total coin debit.
Win	Matching symbols on an activated winning line pay the machine's displayed award.
Budget	Higher coin units commit more of the balance per spin. Use the displayed paytable when comparing machines.

21.4 Monster arena betting

Arena lookup

Field	Rule
Selection	Choose a monster and coin stake before the fight.
Odds	The board gives that contestant's payout odds. Confirm the return before accepting the wager.
Battle	The contestants fight automatically. Spell choices, targets, and damage can change the winner.
Settlement	Collect the displayed winnings after a successful wager. Review the next board before staking them again.
Risk	A maximum wager risks the full displayed stake. Keep the intended prize balance available for exchange.

21.5 Prize catalog, acquisition priorities, and equipment tradeoffs

Prize	Coins	Purpose and tradeoff
Elven Medicine	300	Substantial MP recovery, retain for a long dungeon or boss caster.
Leaf of the World Tree	1,000	Consumable revival, give to an available backup member.
Armband of Sacrifice	5,000	Wearer's death triggers a sacrificial attack against ordinary enemies.
Killer Earring	10,000	Two-hit weapon for a compatible user, compare with current attack and protection needs.
King Metal Sword	50,000	130 attack, also called Medal King Sword. Useful for an eligible active physical attacker.
Gringham Whip	250,000	100 attack with group coverage for a compatible wearer. Consider the target group and current weapon.

Buying the sword's coins outright costs 1,000,000 G. The whip's coins cost 5,000,000 G. Assign free equipment from chapters 5–11 before committing to a large coin target. Check the Equip menu for the intended recipient. Keep revival and MP recovery available after the exchange.

21.6 Ordinary-play budgeting versus optional emulator-assisted methods

Ordinary achievement attempts

Use ordinary game saves, the casino's normal controls, and earned coins for the achievement route. Keep emulator-state trials separate from Hardcore progress and the two goals whose requirements say no cheating. Preserve the normal pre-marriage and pre-boss church files before any optional experiment.

Choice	Compact procedure
Ordinary play	Save at a church, reserve travel and recovery gold, purchase a bounded coin allowance, and stop at the chosen loss limit or prize target.

Choice	Compact procedure
Optional save/load trial	Keep the church save. Place an arena wager, save a separate state before battle, watch the result, and manually load that state to retry a loss. Finish the trial after a chosen number of attempts. See 22.10.
Result to check	Confirm the actual coin balance and exchanged prize in the adventure being kept. Repeatedly loading an identical outcome can repeat that outcome.

21.7 Town-by-town weapon, armor, and item shop inventories

Each row identifies an existing **complete priced stock table**. I, II, and III denote childhood, adulthood, and the family reunion. G is gold. Coin and medal exchanges are in 21.5 and 20.1.

Town	Stock table / section	Currency and access
Santa Rosa	Weapon shop, 4.2	G, I, first town visit.
Alcapa	Weapon shop, 4.4	G, I, before Lenoire.
Alcapa	Armor shop, 4.4	G, I.
Alcapa	Item shop, 4.4	G, I.
Faerie Village	General store inside the inn, 4.7	G, I, Bella's faerie route.
Faerie Village	Armor shop, 4.7	G, I.
Reinhart	Weapon shop, 4.10	G, I, before Henry's kidnapping.
Reinhart	Traveling armor merchant, 4.10	G, I, castle visit.
Reinhart	Item shop, 4.10	G, I.
Oracleberry	Weapon shop, 5.3	G, II onward, daytime.
Oracleberry	Small armor counter, 5.3	G, II onward, daytime.
Oracleberry	The other armor shop, 5.3	G, II onward, daytime.
Oracleberry	Item shop, 5.3	G, II onward.
Alcapa	Weapon shop, 5.5	G, II onward, adult stock.
Alcapa	Armor shop, 5.5	G, II onward.
Alcapa	Item shop, 5.5	G, II onward.
Reinhart	Weapon shop, 5.6	G, II onward, adult stock.
Reinhart	Item and light-equipment counter, 5.6	G, II onward.
Port Selmi	Weapon shop, 6.1	G, II onward, western-continent landing.
Port Selmi	Armor shop, 6.1	G, II onward.
Port Selmi	Item and special-equipment counter, 6.1	G, II onward.
Kabochi	Underground general store, 6.2	G, II onward, underground shop and church.
Ruraphin	Daytime weapons, 6.3	G, II onward, day.
Ruraphin	Nighttime armor, 6.3	G, II onward, night.
Ruraphin	Daytime item shop, 6.3	G, II onward, day.
Salabona	Weapon shop, 6.5	G, II onward.
Salabona	Armor shop, 6.5	G, II onward.
Salabona	Item shop, 6.5	G, II onward.
Mountain Village	Weapon counter, 6.7	G, II onward, ship up Salabona's river.
Mountain Village	General store, 6.7	G, II onward.
Telepador	Weapon shop, 7.3	G, II onward, desert and ship route.

Town	Stock table / section	Currency and access
Telepador	Armor shop, 7.3	G, II onward.
Chizod	Weapon shop, 7.5	G, II onward, mountain crossing.
Chizod	Armor shop, 7.5	G, II onward.
Granvania	Weapon shop, 7.7	G, II onward, eastern mountain descent.
Granvania	Armor shop, 7.7	G, II onward.
Granvania	Item and monster-equipment counter, 7.7	G, II onward.
Northern Church	Northern Church weapon choices, 8.5	G, III, ship access.
El Heven	Weapon shop, 8.7	G, III, Water Shrine passage.
El Heven	Armor shop, 8.7	G, III.
Santa Rosa	Third-generation Santa Rosa weapons, 8.8	G, III, renewed town service.
Faerie Village	Third-generation Faerie Village armor, 9.6	G, III, forest route with a child.
Shahanna	Shahanna weapon shop, 10.3	G, III, three-ring portal and Demon World.
Shahanna	Shahanna armor shop, 10.3	G, III.
Shahanna	Shahanna item shop, 10.3	G, III.

21.8 Day/night availability, marriage-route support, and special vendors

Visit	Access / benefit
Oracleberry night stall	Wagon for 300 G, later Wayfarer's Map for 1,000 G from the same merchant. Visit after dark, 5.3 and 6.3.
Ruraphin shop cycle	Weapons and items by day, armor at night. Rest or use an available time-changing spell or item, 6.3.
Marriage preparations	Mountain Village supplies the Silk Veil. Return to Salabona for the ceremony and Ludman's wedding gifts, 6.9.2–6.9.3.
Flora's support	Ludman's route provides additional 2,000 G and Water Flying Clothes deliveries during the journey to Granvania, 7.1 and 7.3.
Bianca's route	Keep her travelling equipment available until the Granvania pregnancy scene. Check her possessions when she rejoins, 6.9 and 7.7.
Medal King depository	Retrieve stored medals and equipment before exchanging. Final Key bars guard two medals and the Golden Tiara, 7.2 and 9.10.

21.9 Gold, experience, healing costs, and efficient purchase routes

Budget stage	Purchase and recovery route
Early adulthood	Wagon first, free Oracleberry clothing, then one useful weapon or armor upgrade. Train near the inn and church, 5.3.
Kabochi request	1,500 G advance and remaining 1,500 G after resolving the panther trouble. Assign Papas' Sword before buying its replacement, 6.1–6.2.
Mountains	Reserve recovery before the crossing. Collect 550 G on the west and 1,500 G, 270 G, and 1,600 G on the east, 7.4–7.6.
Reunion	Assign the Son's Zenithian Sword and Shield, open Granvania's 3,000 G Magic Key chest, then compare El Heven armor, 8.3 and 8.7–8.8.

Budget stage	Purchase and recovery route
Late game	Royal Cloak and Boble's Dragon Staff reduce replacement costs. Compare free protection and reusable healing with Shahanna's prices, 9.10–9.11 and 10.3.
Experience / fees	Select manageable encounters near recovery. Check the inn and church's current quoted fee before confirming, 2.7 and 3.9–3.10.

21.10 Banks, retained valuables, sale decisions, and late-game funding

Bank and purchase checks

- ☐ Deposit spare gold in 1,000 G increments before dangerous travel. Banked gold survives defeat.
- ☐ Retain Bianca's Ribbon, keys, rings, travel objects, reusable healing tools, and collection equipment.
- ☐ Retrieve equipment deposited with stored companions before buying a duplicate.
- ☐ Check eligible wearers and the shop's actual sale quote before selling a spare item.
- ☐ Equip the full intended boss roster, fund recovery, then spend the remaining late-game budget.

22 Secrets, Side Quests, and Optional Objectives

22.1 Reinhart revisits, family rewards, and travel privileges

Objective	Trigger / reward	Route
Henry's wedding visit	After Return, revisit Henry and Maria in Reinhart and finish the household conversations before the southern road.	6.4
Henry's son	III, bring the children, follow Del's prank through Henry's old hidden stairs, then return upstairs for the Hat of the Wind.	8.4
Guarded Reinhart chest	III, defeat the western-grounds Kandar Henchman for cursed Demon Armor.	8.4
Duncan's family visit	III, introduce the children, then defeat the guard behind his Mountain Village house for Silk Bisuche.	8.4
Western passage	Henry's restored household opens the southern road's guard permission.	6.4
Ludman's ship	After marriage and the wedding rewards, identify the Hero to the Port Selmi ship guard by day.	6.9.3–6.10

22.2 Ruraphin follow-up, Benett's experiments, and Chance

Experiment	Requirements / result	Route
Return	II, agree to help Benett, search the glowing Rura Moon Herb on the western peninsula at night, deliver it, and complete the requested test. Hero learns Return, 8 MP.	6.3
Chance	III, revisit Benett after the family reunion and finish his conversation. Hero learns Chance, 20 MP, with unpredictable battle effects.	8.8
Travel preparation	Keep the Lamp of Darkness available for the herb, then reserve Return MP for recovery trips.	2.4, 2.10

22.3 Medal King Island, optional sea stops, and newly opened doors

Stop / key	Collection or service	Route
Desert and Medal King	Ship after marriage, oasis medal, Telepador searches and Helmet test, Medal King exchange and depository.	7.1–7.3
Gigo's house	III, mother's bedroom dresser medal.	8.5
Farthest Shrine	III, Intelligence Seed jar, ground medal below the well bucket, downstairs Stone of Life.	8.5
Magic Key, Granvania	3,000 G and Meteorite Armband in the room near the depository.	8.8
Magic Key, Port Selmi	Thorn Whip and Acorn of Life behind the inn-stage dressing area's eastern door.	8.8

Stop / key	Collection or service	Route
Magic Key, Alcapa	Ask the bar woman for passage, then collect 15 G and Stone Fang behind the magic door.	8.8
Final Key, Oracleberry	Barred occupied cell's ground medal and prisoner conversation.	9.10
Final Key, Medal King	Two medal chests and Golden Tiara behind the treasury bars.	9.10

22.4 Buorn / Bohen: timing, sealed-jar events, and Final Key access

Stage	Requirement / completion check	Route
Wedding inspection	Flora's route includes Ludman's earlier jar errand. Retain the subsequent III-generation visit as a separate event.	6.9.3
Red-jar report	III, speak to Ludman, use the Magic Key at the island shrine northwest of Salabona, inspect the red jar, and report back.	9.9
Watchtower trigger	Restore and save before speaking to Ludman atop the Tower of Viewing. Prepare Hero, Son, and Daughter.	9.9
Support milestones	Son's Barrier 23, Daughter's Bikill 16 and Decrease 22, staff healing and revival supplies.	9.9
Reward	After victory, open the appeared chest for the Final Key and return to Ludman. Save before the barred-door circuit.	9.9–9.10

22.5 Emblem Cave / Cave of Seals and the Royal Cloak

Check	Access / fixed find	Route
Entrance	Northwest of Santa Rosa and east of Lenoire. Carry Final Key with an active traveller. Wagon stays outside.	9.10
Treasure floor	Southern branches hold a Small Medal and Elven Amulet. The easternmost branch continues downward.	9.10
Deepest side branch	Eastern chest holds Demon Hammer.	9.10
Altar	Push all four tiles onto the four faces. Royal Cloak appears after the chamber's seals are covered.	9.10
Equipment	Hero's Royal Cloak gives 90 defense and fire, cold, and spell protection.	9.10

22.6 Hidden mountain-path treasure and the Staff of Punishment

Eastern mountain detour

Landmark	Check
1,600 G branch	From the lower junction, take the eastern stair route and climb through the connected rooms.
Upper Mimic room	Continue upward from the gold chest. Walk east through the apparent wall on this floor.
Hidden chest	Take the Staff of Punishment, a reusable Tornado battle-item action for an appropriate user.
Exit	Retrace to the gold room's descent for Granvania. Full route and other finds are in 7.6.

22.7 Optional recruits, unique equipment, and reusable support items

Objective	Place / use	Route
Killer Panther reunion	Use Bianca's Ribbon during the West Kabochi Cave confrontation. Retain the name chosen in childhood.	4.5.2, 6.2.1
Medal island companions	Curer and King Slime provide developing recovery and support.	7.2
Late field companions	Golem and Eliminator add physical roles. Use eligible regional battles and roster space.	8.8
Demon World companions	Great Dragon, Attackbot, and Gigantes are late recruitment goals.	10.2
Bonus companions	Hellbattler, Lionex, and Springer. Full species checklist is in 23.6.	11.3
Travel and support	Hat of the Wind, Lamp of Darkness, Angel's Bell, Fighter's Hair, and equipment item actions.	2.4, 3.3, 7.5, 8.4
Torokko healing staff	Staff of Benediction, reusable Healmore in battle for an available user.	9.3
Demon World recovery	Sage's Stone after arrival, reusable battle healing.	10.1
Battle restart	Sands of Time in Shahanna's guarded exterior chest.	10.3
Postgame support	Drum of War from the Bonus treasure pocket, assigned to an active battle-item user.	11.2–11.3

22.8 Inventory-order Easter egg: requirements and effects

Keep shortcut trials off the achievement route

Continue the achievement journey with the normal equipment and recruitment rules. The six-item critical/recruitment configuration and early-patch trap repetition belong on a separate trial file. Use normal combat and training for That's Got To Hurt and Underworld Challenge, whose requirements explicitly say no cheating.

Optional six-item configuration. Its compatibility and effects in v2.01F are unconfirmed. The Hero's inventory configuration is exactly the following six items, in this order, with every item unequipped and all other items transferred to another owner or the depository:

Hero inventory order

Slot	Item
1	Cypress Stick
2	Sharpened Bone, also called Pointed Bone
3	Hat of Happiness
4	Club
5	Saw Blade
6	Cloak of Evasion

The claimed effects are critical physical attacks and recruitment of eligible monsters after battle. Keep a separate ordinary save before trying the configuration. Recruitment and damage results in that trial must be checked directly. The Hat of Happiness is in Granvania's concealed three-chest room, 7.7. Equipment stock is indexed in 21.7.

22.9 Version-specific Mimic encounters

Optional early-patch trap trial

1. ☐ Keep a separate church save before a known trapped chest.
2. ☐ Win one encounter and record its actual reward.
3. ☐ Leave the room, re-enter, and examine the same chest once.
4. ☐ Record whether another battle occurs. A critical-hit finish can end early-patch repetition.
5. ☐ End the trial and retain the intended save. v2.01F repetition is unconfirmed.

Known locations include West Kabochi Cave, Volcano Cave, the eastern mountain, Demon Tower, Boble Tower, Evil Mountain, and the Bonus Dungeon. Use their trapped-container entries in 23.4. Bonus has one placed medal and two distinct Mimic encounters, 11.2.

22.10 Emulator save-state casino methods, clearly separated from normal play

Opt-in manual arena save/load

1. ☐ Save the adventure at a church and retain that file.
2. ☐ Choose one arena board, contestant, and affordable coin stake.
3. ☐ Save a separate state after the wager and before the battle.
4. ☐ Watch the result. Manually load the trial state after a loss if continuing.
5. ☐ Stop after the chosen attempt limit, confirm the coin balance, exchange the intended prize, and save the adventure being kept.

An identical restored state can produce an identical result. Choose a new wager or end the trial when repeats continue. The ordinary casino rules and prize costs remain in 21.1–21.5.

22.11 Postgame secrets and version-specific misconceptions

Objective	SNES completion record
Cleared-game access	Finish Mildrath and the ending, wait for The End, then reset and load the pre-boss adventure. Enter the southern swamp beneath Evil Mountain, 10.10 and 11.1.
Bonus treasure	Nine fixed finds, two Mimics, and three empty chests. Keep the fixed medal and battle rewards separately checked, 11.2.
Estark	Record the game's own victory turn count and repeat it as a personal challenge, 11.4–11.6.
Completion record	Keep the collected equipment, recruited species, and native Estark turn score with the saved adventure being retained.

23 Completion Checklists and Efficient Routes

23.1 Before leaving childhood: treasures, companions, and irreversible events

Before Henry's cave rescue

- ☐ Finish the childhood finds in 4.12 and the I-phase entries in 23.4, including the empty dungeon chests and Henry's prank chest.
- ☐ Deliver the Flute of Spring, complete the faerie return, and collect the herbalist's Handwoven Cape.
- ☐ Name the panther, retain Bianca's Ribbon, and transfer useful possessions before Bianca leaves.
- ☐ Collect Reinhart's Acorn of Magic and the northeast cave's five finds before Henry's prison area.
- ☐ Keep a separate childhood church save before the scripted confrontation, 4.11–4.12.

23.2 Before marriage and before the second-generation transition

Gate	Completion checks
☐ Before marriage	Resolve Kabochi with the Ribbon, take Papas' Sword, learn Return, visit Henry's wedding household, collect both elemental rings, and decide the bride route. Save in Salabona, 6.2–6.9.
☐ After wedding	Silk Veil, 2,000 G, Zenithian Shield, returned rings, and Port Selmi ship permission. Flora's jar inspection belongs here, 6.9.3–6.10.
☐ Before royal events	Transfer needed possessions from the wife before Granvania's audience. Search the concealed three-chest room, royal terrace, town pots, and soldier-room dresser, 7.7.
☐ Before Jami	Complete the trial, Flying Shoes search, Demon Tower treasure loops, and both switches. Recheck 7.12 and save before the final tower battles.

23.3 Third-generation unlock and backtracking checklist

Reunion circuit

- ☐ Arrange Hero, twins, Sancho, Pippin, and stored monsters at Granvania, 8.1–8.2.
- ☐ Assign the Son's Sword and Shield, finish Henry's son and both guarded family rewards, 8.3–8.4.
- ☐ Search Gigo's house and Farthest Shrine, then cross Water Shrine to El Heven, 8.5–8.7.
- ☐ Collect Magic Key and Carpet, clear Granvania, Port Selmi, and Alcapa's magic rooms, and learn Chance, 8.8.
- ☐ Take the Zenithian Helmet from Telepador, then prepare the Sky Tower route, 8.9–8.10.

23.4 Every town and dungeon treasure checklist

Check a place after every listed find and its linked route checklist is complete. Used supplies and handed-over event objects count as collected. I, II, III, and Post retain the phase meanings in 20.2. Services and travel-only stops have explicit visit checks. Chapter 20 supplies each individual fixed-medal container.

Area / phase	Treasure or visit check	Route
☐ Opening ship, I	Cabin-dresser Medical Herb.	4.1
☐ Vista Port, I / II	Childhood landing and daytime adult departure for Port Selmi.	4.1, 5.10
☐ Santa Rosa town	I, Leather Hat, two Herbs, Strength Seed, later Handwoven Cape. II, northern-house Intelligence Seed.	4.2, 4.9, 5.4
☐ Santa Rosa Cave, I	Herb, 50 G, Leather Shield, Wayfarer's Clothes.	4.3
☐ Santa Rosa Cave, II	850 G, Agility Seed, Breastplate, Lamp of Darkness, Strength Seed, Leather Loincloth, Zenithian Sword, Papas' Letter.	5.4
☐ Alcapa	I, Defense Seed and Wing. II, inn medal. III Magic Key, 15 G and Stone Fang behind the bar.	4.4, 5.5, 8.8
☐ Lenoire Castle	Wing, two Herbs, Torch, Golden Orb, empty chest. Walking Statue reward recorded separately.	4.5
☐ Faerie Village	I, Holy Water and Flute handover. III, Horn of the Fairies and returning armor service.	4.7–4.9, 9.6
☐ Dwarves' Cave	25 G, 100 G, Agility Seed, Secrets of the Key, 120 G, Acorn of Life.	4.7
☐ Ice Mansion	Intelligence Seed, 5 G, Wing, empty chest, Boomerang, Flute of Spring. Boss rewards separate.	4.8
☐ Reinhart Castle	I, Acorn of Magic and prank chest. II, Steel Fang, Shell Hat, Reinhart Key, 1,200 G, Acorn of Life, Half Plate Armor, medal. III, Hat of the Wind and guarded Demon Armor.	4.10, 5.6, 8.4
☐ Thieves Cave	180 G, Antidote Herb, Strength Seed, Monster Lure, Elven Medicine. Finish searches before Henry's rescue.	4.11
☐ Great Temple captivity	II, escape with Henry and Maria. Preserve the subsequent nunnery reward check.	5.1

Area / phase	Treasure or visit check	Route
☐ Nameless Nunnery	Maria's 1,000 G and later Maria escort for the Southern Tower.	5.2, 5.7
☐ Oracleberry	Pot Cover, Monster Lure, Defense Seed, Silk Robe, Silver Barrette, wagon and map. III Final Key, occupied-cell ground medal.	5.3, 6.3, 9.10
☐ Southern Tower	650 G, Scale Shield, Acorn of Magic, Magic Water, Mirror of Ra.	5.8
☐ Port Selmi	Two medals, 100 G, 50 G, Silk Apron, 1,500 G advance. III Magic Key, Thorn Whip and Acorn of Life.	6.1, 8.8
☐ Kabochi	Armband of Sacrifice, Strength Seed, Leather Hat, Magic Water, two medals, remaining 1,500 G job payment.	6.2
☐ West Kabochi Cave	Ground medal, Stone Axe, Iron Helm, reunited panther, Papas' Sword. Man-Eater Chest separately.	6.2
☐ Ruraphin	Two medals, Wing, Acorn of Magic, Agility Seed, Herb, Magic Water, Return errand, III Chance visit.	6.3, 8.8
☐ Lunar Herb peninsula	Nighttime glowing-ground Rura Moon Herb and delivery to Benett.	6.3
☐ Rumor Inn / Shrine	Well medal and recovery stop.	6.4
☐ Ruraphin South Cave	Eastern detour's medal chest and Henry-gated passage.	6.4
☐ Salabona	Iron Shield, medal, Intelligence Seed, Silver Barrette, wedding 2,000 G and Zenithian Shield.	6.5, 6.9
☐ Volcano Cave	450 G, Staff of Antimagic, Iron Helm, Defense Seed, 1,500 G, Ring of Flames. Trapped chest separately.	6.6
☐ Mountain Village	Strength Seed, Herb, two medals, Silk Veil, Bianca's river help. III guarded Silk Bisuche. Demon Jar separately.	6.7, 6.9.2, 8.4
☐ Waterfall Cave	Robe of Serenity, Elven Medicine, 1,200 G, Ring of Water.	6.8
☐ Desert Oasis	Pot medal.	7.1
☐ Medal King Castle	Exchange and depository. III Final Key, two medals and Golden Tiara.	7.2, 9.10
☐ Telepador	Wing, Defense Seed, well medal. III Zenithian Helmet. Kitchen jar encounter separately.	7.3, 8.9
☐ Ned's Inn	Save and recover before the mountain crossing.	7.1, 7.4
☐ Western mountain	550 G, Ring of Prayer, three fixed medals, rest event adding five Hero strength. Flora's clothing delivery where applicable.	7.4
☐ Chizod	Monster Lure, Fighter's Hair, barrel medal.	7.5
☐ Eastern mountain	1,500 G, Rogue Armor, Leaf, three fixed medals, 270 G, Bomb Stone, 1,600 G, Staff of Punishment, Wing, Stone of Life, Agility Seed. Three Mimics and two Man-Eater Chests separate.	7.6
☐ Granvania	Sancho's Acorn of Life and Boxer Shorts. Royal Stone of Life, Lace Bisuche, Defense Seed, terrace medal. Town Intelligence and Strength Seeds, pot and bath medals. Hidden Ring of Prayer, Naughty Underwear, Hat of Happiness. Flying Shoes. III Magic Key, 3,000 G and Meteorite Armband.	7.7, 7.10, 8.8
☐ Cave of Trials	Small Medal, Swordedge Armor, Symbol of Royalty.	7.8
☐ Northern Shrine	Flying Shoes landing, recovery and Demon Tower approach.	7.10

Area / phase	Treasure or visit check	Route
☐ Demon Tower	Wizard's Robe, Strength Seed, three fixed medals, Armband of Sacrifice, 880 G, Magic Water, Zombie Mail, Leaf, Wing. Two Mimics, Demon Jar, and Bomb Crags separately. Both switches.	7.11–7.12
☐ Northern Church	Recover, save, and inspect the weapon counter.	8.5
☐ Gigo / Jijo's house	Mother's bedroom dresser medal and family conversation.	8.5
☐ Farthest Shrine	Intelligence Seed jar, ground medal below the water bucket, downstairs Stone of Life.	8.5
☐ Water Shrine	Satan Helm, fixed medal, El Heven exit. III Final Key, three-ring chamber.	8.6, 10.1
☐ El Heven	Defense Seed, pot medal, Magic Key, Magic Carpet.	8.7
☐ Sky Tower	Eastern branch Leaf, exterior-walkway medal, upper Magma Staff.	9.1
☐ Torokko Mines	950 G, medal, Acorn of Life, 750 G, Magic Water, Staff of Benediction, Pusan's rescue.	9.2–9.3
☐ Zenithia	Golden Orb restoration, grandson's dresser medal, fireplace-room Hook, western-pool Sap, castle controls, later Bells.	9.4, 9.8, 9.12
☐ Forest of Illusions	Dwarf's jar medal, Elven Medicine, Faerie Sword, 1,500 G. Bring a child for the faerie route.	9.5
☐ Faerie Palace	Staff of Thunder, Princess Robe, Queen's Glowing Orb, painting access.	9.6
☐ Childhood Santa Rosa visit	Exchange Glowing Orb for Golden Orb with the young Hero, then return to the palace.	9.7
☐ Sealed-jar shrine	Flora wedding inspection where applicable, III Magic Key red-jar report.	6.9.3, 9.9
☐ Tower of Viewing	Buorn defeated and appeared Final Key chest opened.	9.9
☐ Emblem Cave	Medal, Elven Amulet, Demon Hammer, Royal Cloak after all four final seals.	9.10
☐ Boble Tower	Two fixed medals, 2,700 G, Devil's Armor, Shield of Darkness, Elven Medicine, both Dragon Eyes, Dragon Staff, Dragon Orb. Separate Mimic, opened entrance.	9.11
☐ Great Temple, III	Zenithian Armor, Demon Claw, Slave Clothes, Shield of Ruin, Ring of Life. Wife restored and humans selected again.	9.13
☐ Demon World arrival	Three-ring portal completed and Martha's Sage's Stone collected.	10.1
☐ Shahanna	Defense Seed, Elven Medicine, outer barrel medal, guarded Sands of Time.	10.3
☐ Evil Mountain	Robe of Darkness, Ogre Shield, two fixed medals, Echoing Hat, Sun Crown, Sacred Pitcher, Multi-Edge Sword, King Metal Helm, 3,300 G, Orihalcon Fang. Trapped battles separately.	10.4–10.6
☐ Bonus Dungeon	Restoration Orb, one fixed medal, Shield of Radiance, Drum of War, Hell Sabre, Sword of Decimation, King Metal Armor, Elven Medicine, Iron Ball of Decimation. Two Mimics and three empty chests.	11.2–11.3
☐ Overworld and sea	Complete ship, carpet, castle, and dragon access checks. Regional recruits are in 23.6, field and sea encounters in chapter 18.	2.9–2.10, 10.2

23.5 All Small Medals and reward selections

Medals and exchange choices

- ☐ Complete every fixed-location square in 20.2 and the Final Key barred-room circuit.
- ☐ Record optional trapped-container rewards and other observed enemy drops separately.
- ☐ Combat Pajamas, 5 medals. ☐ Mysterious Bolero, 10.
- ☐ Sword of Miracles, 16. ☐ Mystic Armor, 21.
- ☐ Falcon Sword, 30. ☐ King Metal Shield, 43.
- ☐ Check the remaining account balance and save after the exchanges being kept.

The six reward costs total 125 medals. Each purchase spends its cost. Treat collecting all reward types as a continuing collection goal with actual drops and the current account balance recorded.

23.6 All recruitable monster types and story companions

Check a species after recruiting and retaining it in the travelling roster or Monster Gramps' storage. **Cap** is its maximum level. The last column gives a concrete training goal, including useful goals below that cap. Full profiles and spell ladders are in 14.2 and 14.4.

Species	Cap	Recruitment check	Development goal
☐ Attackbot	30	Demon World fields.	Physical specialist, inspect gear and command reliability.
☐ Big Eye	20	Telepador region, also West Kabochi route.	Healall 15.
☐ Blizzard Hawk	25	Northern Reinhart region.	Healus 15, Sparkling Breath 23.
☐ Bomb Baby	15	Oracleberry surroundings.	Body Attack 5, plan Sacrifice use.
☐ Bomb Crag	20	Volcano region.	Farewell 19.
☐ Brownie	99	East of the Nunnery.	Physical growth and suitable equipment.
☐ Centaurus	50	Sky Tower / ruined tower.	Bikill 20, Barrier 27.
☐ Curer	50	Medal King Island.	Revive 23, Healusall 30.
☐ Dancing Jewel	7	Volcano Cave region.	Aerocross 7, check intelligence for commands.
☐ Dancing Needle	25	Reinhart surroundings.	Strange Dance 3 at 15, Body Attack 25.
☐ Dragon Pup	30	Port Selmi surroundings.	Violent Flames 28.
☐ Drakee	99	Oracleberry surroundings.	Day-Night 15, Bedragon 38.
☐ Eigerhorn	40	Forest of Illusions.	Firevolt 11, Blizzard 15.
☐ Eliminator	30	Alcapa's western region.	Massacre 7, Sap 20.
☐ Farewell Crag	20	Fields outside the Volcano.	Vivify 14, Thunder 20.
☐ Gigantes	7	Fields outside Evil Mountain.	Physical specialist and eligible equipment.
☐ Golem	50	III fields and Sky Tower region.	Meditate 20, Thunder 45.
☐ Great Dragon	60	Demon World fields.	Sparkling Breath 30, Infernal Flames 50.

Species	Cap	Recruitment check	Development goal
☐ Healer	99	Southern Tower, including summoned encounters.	Healusall 36.
☐ Hellbattler	15	Bonus Dungeon random encounters.	Revive 8, Infernal Flames 15.
☐ Hork	30	Adult Santa Rosa Cave's deeper route.	Poison Breath 20, Deadly Poison 25.
☐ Killer Panther	99	Named childhood companion, Ribbon reunion in West Kabochi Cave.	War Cry 21, Thunder 40.
☐ King Healer	20	Sky Tower / ruined tower.	Barrier 7, Revive 10, Chance 17.
☐ King Slime	30	Medal King Island.	Revive 15, Blazemost 27.
☐ Kukkle	20	South of the Nunnery.	Curseoff 18, Bikill 20.
☐ Leaonar	30	Upper Demon Tower random encounters.	Decrease 12, Flame Breath 15.
☐ Lionex	23	Bonus Dungeon.	Zap 14, Lightning 20.
☐ Mad Dragon	40	Ned's Inn surroundings and mountain route.	Violent Flames 15.
☐ Magician	99	Port Selmi surroundings.	Firevolt 28.
☐ Messala	50	Eastern Mountain Cave south of Granvania.	Freezing Breath 27, Blazemost 30.
☐ Metal Babble	8	Eligible regional random encounters, including eastern mountain.	Explodet 8.
☐ Minidemon	30	Eastern Mountain Cave.	Chance 23, Explodet 28.
☐ Neileus	50	Later sea encounters.	Return 10, Thunder 40.
☐ Orc King	30	East of Granvania.	Healus 8, Revive 11.
☐ Puppet Man	30	Mountain Village surroundings.	Tempting Dance 23, Aerocross 30.
☐ Slime	99	Santa Rosa Cave and early fields.	Outside 18, Infernal Flames 99.
☐ Slime Knight	99	Reinhart surroundings.	Healmore 5, Healall 20.
☐ Soldier Bull	30	Mines and Zenithia-route encounters.	Bikill 10, Decrease 15.
☐ Springer	50	Bonus Dungeon.	Aerocross 15.
☐ Wyvern	60	South of Salabona.	Healus 18, Return 24.
☐ Yeti	40	Reinhart surroundings.	Cold Breath 5, Snowblast 15, Blizzard 30.

Human and temporary companions

- ☐ Hero, Son, Daughter, Sancho, and Pippin arranged through Granvania's party service, 8.1–8.2.
- ☐ Chosen wife restored after the Great Temple and selected again at Ruida's tavern, 9.13.
- ☐ Bianca childhood, Papas, Bella, and Henry story participation completed, 4.1–5.9 and 12.9.
- ☐ Panther's childhood naming and adult Ribbon reunion completed, 4.5.2 and 6.2.1.

23.7 All unique equipment, key objects, and reusable battle tools

Each equipment or object group is complete when every named member has been obtained. Event handovers count as completed. Keep the battle tools with available users. Catalogs and equipment compatibility are in chapters 16–17. Medal and casino collections use 20.1 and 21.5.

Object / equipment check	Acquisition or retained-use index
☐ Torch and Golden Orb	Lenoire, 4.5. Later recover the powered Golden Orb through 9.7.
☐ Secrets of the Key	Dwarves' Cave, 4.7, learned door-opening knowledge.
☐ Flute of Spring	Ice Mansion and Powan handover, 4.8–4.9.
☐ Bianca's Ribbon	Childhood departure and adult panther recognition, 4.5.2 and 6.2.1.
☐ Papas' Letter and Sword	Adult Santa Rosa Cave and West Kabochi reunion, 5.4 and 6.2.
☐ Reinhart Key	Dale's household, 5.6.
☐ Mirror of Ra	Southern Tower, 5.8.
☐ Wagon and Wayfarer's Map	Oracleberry night merchant, 5.3 and 6.3.
☐ Rura Moon Herb	Night peninsula search and Benett handover, 6.3.
☐ Rings of Flames and Water	Volcano and Waterfall Cave, 6.6 and 6.8, later three-ring portal.
☐ Silk Veil	Mountain Village before the ceremony, 6.9.2.
☐ Symbol of Royalty	Cave of Trials, 7.8.
☐ Flying Shoes	Chancellor's dresser after the kidnapping, 7.10.
☐ Magic Key and Carpet	El Heven, 8.7.
☐ Final Key	Buorn's victory chest, 9.9.
☐ Magma Staff	Sky Tower upper chest, mountain-barrier use, 9.1–9.2.
☐ Horn of the Fairies	Powan's III-generation gift, palace-lake use, 9.6.
☐ Glowing Orb	Faerie Queen's gift, childhood exchange, 9.6–9.7.
☐ Grappling Hook	Zenithia's fireplace-room dresser, Boble access, 9.8 and 9.11.
☐ Both Dragon Eyes	Gonz's Left Eye and Gema's Right Eye, statue sockets, 9.11.
☐ Dragon Orb and Bells	Boble statue interior, then Pusan's transformation and Zenithian Bells, 9.11–9.12.
☐ Ring of Life	Ivol's defeat, temple exit conversation, portal use, 9.13 and 10.1.
☐ Sacred Pitcher	Evil Mountain arrow chamber and lava removal, 10.5.
☐ Staff of Stoross event	Hero's restoration from stone, 8.1. The restoration scene accounts for the staff.
☐ Zenithian Sword	Adult Santa Rosa Cave, then Son's equipment, 5.4 and 8.3.
☐ Zenithian Shield	Wedding reward, Son's equipment, 6.9.3 and 8.3.
☐ Zenithian Helmet	Telepador collection with the Son, 8.9.
☐ Zenithian Armor	Great Temple's guarded entrance side room, 9.13.
☐ Royal Cloak	Emblem Cave four-seal altar, 9.10.
☐ Dragon Staff	Boble interior chest, Hero weapon and Bedragon action, 9.11.
☐ Demon Hammer and Shield of Darkness	Emblem Cave's deepest eastern branch and Boble's northern basement branch, 9.10–9.11.
☐ Swordedge Armor and Devil's Armor	Cave of Trials chest and Boble first-floor treasure room, 7.8 and 9.11.
☐ Rare clothing collection	Robe of Serenity in Waterfall Cave, Princess Robe in Faerie Palace, Naughty Underwear in Granvania's concealed room, 6.8, 9.6, and 7.7.
☐ Hat of Happiness	Granvania's hidden three-chest room, walking MP recovery, 7.7.
☐ Golden Tiara	Medal King's Final Key treasury, 9.10.
☐ Meteorite Armband	Granvania Magic Key room, 8.8.

Object / equipment check	Acquisition or retained-use index
☐ Staff of Punishment	Eastern mountain's hidden wall passage, Tornado action, 7.6.
☐ Staff of Antimagic	Volcano chest, Stopspell action, 6.6.
☐ Staff of Thunder	Faerie Palace basement, Firebane action, 9.6.
☐ Staff of Benediction	Torokko return stairs, reusable Healmore action, 9.3.
☐ Sword of Malice / Flame Claw	Priced stock in 21.7, item-cast attacks in 17.2.3.
☐ Faerie Sword	Forest of Illusions chest, equipment and item action in 17.2.3, 9.5.
☐ Shield of Strength	Faerie Village or Shahanna purchase, reusable self-healing, 9.6 and 10.3.
☐ Staff of Revival	Shahanna's 45,000 G weapon purchase, reusable Vivify, 10.3.
☐ Sage's Stone	Martha's Demon World arrival gift, repeatable battle group-healing, 10.1.
☐ Drum of War	Bonus cracked-floor pocket, party attack support, 11.2–11.3.
☐ Sands of Time	Shahanna guarded exterior chest, battle restart, 10.3.
☐ Angel's Bell	Supply stock indexed in 21.7, repeatable battle confusion recovery, 3.3.
☐ Hat of the Wind	Henry's son reward, reusable field travel, 8.4.
☐ Fighter's Hair	Chizod find, selected attacker support, 7.5 and 3.3.
☐ Lamp of Darkness	Adult Santa Rosa Cave, day-to-night field use, 5.4.
☐ Sap and Rings of Prayer	Replenishable Zenithia pool Sap, 9.8. Prayer rings in western mountain and Granvania, 7.4 and 7.7, with breakage possible.
☐ Family guarded equipment	Reinhart Demon Armor and Mountain Village Silk Bisuche, 8.4.
☐ Cursed treasure collection	Rogue Armor, Satan Helm, Demon Armor, Shield of Ruin, Multi-Edge Sword, Sword of Decimation. Acquisition in 23.4, curse removal in 2.7 and 17.8.
☐ Evil Mountain equipment	Robe of Darkness, Ogre Shield, Echoing Hat, Sun Crown, King Metal Helm, Orihalcon Fang, 10.4–10.6.
☐ Bonus equipment and Orb	Shield of Radiance, Hell Sabre, King Metal Armor, Iron Ball of Decimation, Restoration Orb, 11.2.
☐ Casino prize collection	Elven Medicine, Leaf, Armband of Sacrifice, Killer Earring, King Metal Sword, Gringham Whip, with prices in 21.5.
☐ Medal reward collection	Six separately checkable rewards in 23.5, prices in 20.1.

23.8 Spell progression, event spells, and companion level-cap goals

Progression check	Completion target
☐ Hero	Return through Benett's nighttime herb experiment, 8 MP. Chance through the III-generation follow-up, 20 MP. Complete the level-learned list in 12.2 and 12.10.
☐ Bianca	Record childhood levels and her adult spell list. Check carryover and selected-wife availability in 12.3 and 12.10.
☐ Flora	Record her available spell list after joining and after the temple reunion, 12.4 and 12.10.
☐ Son	Barrier 23 is a concrete Buorn milestone. Complete the healing, revival, and support ladder in 12.5 and 12.10.
☐ Daughter	Bikill 16 and Decrease 22 support the Buorn party. Complete her offensive and support ladder in 12.6 and 12.10.
☐ Sancho	Complete utility and learned spell checks in 12.7 and 12.10.

Progression check	Completion target
☐ Pippin	Develop the physical role and equipment in 12.8. His progression has no spell-learning ladder.
☐ Monster milestones	Record each species' acquired abilities against 14.4 and 15.9. The 41 cap and milestone entries in 23.6 give distinct training goals.
☐ Field utility	Confirm Return, Outside, Stepguard, and available time changes with actual owners and MP reserves, 15.7.
☐ Battle-tool equivalents	Assign healing, revival, dispelling, and attack-support item owners, 15.10 and 23.7.

Reaching every listed monster cap is an optional training goal. A useful healing, revival, or breath milestone can complete that member's intended role earlier. Check the actual learned abilities before assigning essential battle recovery.

23.9 Before Mildrath and before entering the Bonus Dungeon

Final battle and cleared-game return

- ☐ Restore the wife, select travelling humans again, and carry all three rings and Final Key, 9.13.
- ☐ Set Flames left, Water right, Life center at the portal and collect Sage's Stone, 10.1.
- ☐ Complete Shahanna and Evil Mountain's fixed finds, equip Orihalcon Fang appropriately, and record treasure before Mildrath, 10.11.
- ☐ Restore the whole intended boss roster, assign multiple recovery users, and keep the pre-boss church save.
- ☐ Finish both forms and the ending, wait for The End, then reset and load the saved adventure, 10.10.
- ☐ Carry Final Key and enter the southern swamp below Evil Mountain for Bonus access, 11.1.

23.10 Postgame completion, repeat challenges, and optional personal goals

Postgame goals

- ☐ Complete the Bonus nine-find checklist, both separate Mimics, and all three empty chests, 11.2.
- ☐ Assign Drum of War and the new equipment to the intended users, then save the collected inventory.
- ☐ Recruit and retain Hellbattler, Lionex, and Springer as desired, 11.3.
- ☐ Defeat Estark and record the game's displayed victory turn count, 11.4–11.5.
- ☐ For a repeat challenge, record party, equipment, opening support, recovery supplies, and the next native turn score.
- ☐ Finish remaining species, item, medal reward, and level goals against 23.5–23.8.

23.11 Suggested save checkpoints and recovery routes

Keep a previous-phase slot when preserving an earlier route matters. Each row is an ordinary church save or a return to an available church after the named event. Optional state trials in 22.9–22.10 use a separate trial record.

Save checkpoint	Recovery route / contents to retain	Route
☐ Childhood rescue	Santa Rosa or Reinhart church before entering the northeast cave, collected childhood inventory.	4.10–4.12
☐ Adult restart	Nunnery, then Oracleberry's church, wagon funds and first recruited roster.	5.2–5.3
☐ Marriage decision	Salabona inn and church before choosing the bride, both rings and completed region searches.	6.9
☐ Mountain departure	Port Selmi before sailing and Chizod's church before the eastern descent, bride's useful possessions.	7.1, 7.5
☐ Royal trial	Granvania church before the trial, then again after the trial and castle treasure searches.	7.7–7.9
☐ Demon Tower	Granvania before Flying Shoes, record completed tower finds after a recovery return.	7.10–7.12
☐ Family reunion	Granvania after humans and monsters are arranged, then El Heven after key and carpet collection.	8.2, 8.7
☐ Buorn	Salabona church before Ludman's watchtower conversation and after the Final Key chest.	9.9
☐ Boble	Recover through a Return destination after opening the front door, retain Cloak, both Eyes, Staff and Orb.	9.10–9.11
☐ Great Temple	Granvania before dragon departure, then after wife restoration and roster reselection.	9.13
☐ Mildrath	Shahanna after the mountain treasure run, full roster restored, before both final forms.	10.7–10.11
☐ Estark	Shahanna before Bonus entry and after collecting its equipment, retain the cleared-game return and personal turn record.	11.1–11.6

Achievement completion index

Use the local alert for the exact action and its preceding setup notes. Missable entries have an early warning before their story window closes. Keep the protected church files until both marriage branches and the separate restricted boss attempts have registered.

24 World Map, Towns, Services, and Travel Routes

24.1 Overworld map, region names, and location index

The central continent links Santa Rosa, Alcapa, Reinhart, Oracleberry, and Vista Port. Port Selmi opens the western road through Kabochi and Ruraphin to Salabona. The southern desert leads to Telepador, while the eastern mountain crossing leads through Chizod to Granvania. El Heven occupies the northeastern landmass. The Demon World has its own field route between the ring portal, Shahanna, and Evil Mountain.

For travel commands and recovery, see Chapter 2. The route descriptions in Chapters 4 and 5 cover the early central-continent crossings.

Region	Location index	Access and route reference
Central northern country	Santa Rosa, Alcapa, Lenoire, Reinhart, Thieves Cave, Emblem Cave	Childhood roads, later ship or carpet for Emblem Cave. Sections 4.2–4.11, 5.4–5.6, 9.10.
Central southern coast	Vista Port, Oracleberry, Nameless Nunnery, warp shrine, Southern Tower	Escape coast and roads. Reinhart's warp connection shortens the mirror journey. Sections 4.1, 5.2–5.3, 5.7–5.10.
Western mainland	Port Selmi, Kabochi, West Kabochi Cave, Ruraphin, Rumor Shrine, passage to Salabona	Scheduled crossing to Port Selmi, then roads. Sections 6.1–6.4.
Western river country	Salabona, Volcano Cave, Mountain Village, Waterfall Cave, western jar shrine	Road to Salabona, borrowed boat after Flames, Bianca opens the watergate. Sections 6.5–6.9, 9.9.
Southern desert	Oasis, Telepador	Ship landing, then desert walk. Helmet first tested by Hero, later collected for Son. Sections 7.1–7.3, 8.9.
Southeastern mountains	Ned's Inn, western ascent, Chizod, eastern descent	Accessible coastal landing, marsh, mountain paths. Sections 7.4–7.6.
Granvania country	Granvania, Cave of Trials, Northern Church, Demon Tower	Mountain descent first, ship and Flying Shoes later. Sections 7.7–7.11, 8.1–8.5.
Northern sea and islands	Gigo's house, Farthest Shrine, Water Shrine	Ship. Farthest Shrine is on the northern continent's eastern peninsula, north of El Heven. Sections 8.5–8.6.
El Heven country	El Heven, lake, Torokko Mines, sunken Zenithia	Ship through Water Shrine's southern exit. Magma Staff opens mines south of town. Sections 8.7, 9.2–9.4.
Central tower and lake	Sky Tower, Faerie Palace lake	Carpet to open plains, walk to tower. Horn used at lake's lily pad. Sections 9.1, 9.6–9.7.
Western hidden forest	Forest of Illusions, route to Faerie Village	Carpet east from Salabona, clear landing, bridges, child in active party. Sections 9.5–9.6.
Faerie realm	Faerie Village, Dwarves Cave, Ice Mansion	Childhood stair in Santa Rosa. Adult return through forest guide. Sections 4.6–4.9, 9.5–9.6.

Region	Location index	Access and route reference
Southwestern enclosed island	Tower of Boble, west of Telepador's continent	Flying Zenithia, clear desert landing, rooftop Hook entry. Section 9.11.
Central summit	Great Temple	Master Dragon reaches cloud-ringed mountain. Section 9.13.
Demon World	Arrival shrine, Shahanna, Evil Mountain, Bonus Dungeon	Final Key and three-ring portal. Clear game for southern-swamp bonus entrance. Sections 10.1–10.7, 11.1.

24.2 Travel-unlock and access-dependency diagrams

Main travel dependencies

Unlock chain	Next connection
Escape → Oracleberry	Night wagon purchase and Monster Gramps visit → recruitment → Reinhart restoration → Vista crossing.
Return → marriage	Benett's Lunar Herb experiment → Flames → borrowed boat → Bianca and watergate → Water → wedding ship.
Ship → Granvania	Telepador and Ned's Inn → Chizod crossing → royal trial → Flying Shoes → Demon Tower.
Reunion → Zenithia	Water Shrine → El Heven's key and carpet → Sky Tower's Magma Staff → carts and Pusan → missing Orb.
Orb → dragon	Child-guided forest → Horn → Palace painting and Orb exchange → flying castle and Hook → Boble Eyes and Dragon Orb → Bells.
Final route	Buorn → Final Key. Dragon → Great Temple and Life Ring. Key plus three rings → Demon World → Mildrath → Bonus Dungeon.

The Final Key side route can be completed during the Zenithia errands. Sections 8.10 and 9.9–9.10 describe its dependencies and useful backtracking.

24.3 Ports, landings, Return points, carpet limits, and dragon access

Connection	Departure or landing	Travel rule
Vista Port to Port Selmi	Visit the restored Reinhart region's harbor	Scheduled crossing before owning a ship. Section 5.10.
Salabona river boat	Borrow after delivering Flames	Bianca opens Mountain Village's gate. Sail through the waterfall entrance. Sections 6.6–6.8.
Wedding ship	Port Selmi handover	Sail accessible sea lanes and land on usable coast. Initial optional stops include Oasis and Medal King Island. Sections 6.9.3, 7.1–7.2.
Eastern mountain landing	Ned's Inn	Walk north across marsh to ascent. Chizod links the two mountain maps. Sections 7.4–7.6.
Third-generation ship	Granvania coast	Gigo's island and Farthest Shrine are detours before Water Shrine. Section 8.5.

Connection	Departure or landing	Travel rule
El Heven lake	Southern Water Shrine channel	Ship enters the enclosed lake. Leave by ship or Return before launching carpet on open ground. Sections 8.6–8.7.
Carpet	Open plains and water	Trees, hills, and mountains constrain the route. Land outside tower, forest, and lake entrances. X opens the map. Section 2.9.
Zenithia	Orb chamber control tile	Restored Orb permits flight across terrain. Land fully on Boble island's desert patch before walking. Section 9.8.
Master Dragon	Bells used outdoors	Crosses terrain barriers and reaches Great Temple's summit. Section 9.12.
Return	Available destinations in the current spell list	8 MP. Visit eligible stops to register them. Zenithia joins the list after discovery, Evil Mountain supplies the bonus approach. Sections 2.10, 9.4, 11.1.
Outside and Wing	Escape-permitted dungeon, then outdoor ground	Outside costs 8 MP. Wing returns to the last town. Reserve 16 MP for Outside plus Return by one caster. Section 2.10.
Demon World portal	Water Shrine northern silver door	Flames left, Water right, Life center. Blue arrival portal supplies the return crossing. Section 10.1.

24.4 Town and settlement profiles

24.4.1 Vista Port, Santa Rosa, and Alcapa / Alkapa

Vista Port: Central southern harbor, opening voyage and adult crossing to Port Selmi. The opening ship has one cabin Medical Herb. **Santa Rosa:** Childhood home and cave base, with Sancho's free rest and church. Household finds are Leather Hat, two Medical Herbs, and Strength Seed. The rescued herbalist later offers Handwoven Cape. Adult ruins add a village Intelligence Seed, the lower cave, and later weapon stock. **Alcapa:** West of Santa Rosa. Inn dressers hold Defense Seed and Wing of Wyvern in childhood, an adult pot holds Small Medal. The Hero and Bianca alone can revisit the inn's marriage scene. Stock and searches: 4.1–4.4, 4.6, 5.4–5.5, 8.8.

24.4.2 Reinhart, Nameless Nunnery, and Oracleberry

Reinhart: Northeast of Santa Rosa. Childhood chapel dresser has Acorn of Magic. Adult boat entry, prison, key, treasury, and mirror event restore the castle. Henry's later family visit gives Hat of the Wind and guarded treasure errands. **Nameless Nunnery:** Southeast coast, free recovery and saving after escape, Maria's tower-access stop, and 1,000 G gift. **Oracleberry:** Southern central-continent hub with casino, deposits, and monster storage. Search for Silk Robe, Silver Tiara, Monster Lure, Pot Cover, and Defense Seed. Buy wagon for 300 G at night, then Wayfarer's Map for 1,000 G on the merchant's later offer. Final Key opens the prison medal search. Sections 4.10, 5.2–5.3, 5.6–5.9, 8.4, 9.10.

24.4.3 Port Selmi, Kabochi, and Ruraphin

Port Selmi: Western harbor and roster hub. Church flowers hold Small Medal and 100 G, lighthouse dresser Small Medal, inn searches Silk Apron and 50 G. Kabochi request pays 1,500 G in advance. **Kabochi:** Farming village south of port, daytime underground shop and church. Elder's pot and shop corner each hold a medal. Hidden stairs near water lead to Armband of Sacrifice, other searches give Strength Seed, Leather Hat, and Magic Water. Ribbon identifies the panther in the western cave, completion pays another 1,500 G. **Ruraphin:** Northwest road town. Two medals, Wing of Wyvern, Acorn of Magic, Agility Seed, Medical Herb, and Magic Water accompany Benett's nighttime experiment. Lunar Herb lies southwest on the field. Later visits offer Chance and an optional 3,000 G book. Sections 6.1–6.4, 8.8, 9.12.

24.4.4 Salabona and Mountain Village

Salabona: Southwestern marriage base. Search inn Iron Shield, Andy's dresser medal, guesthouse Intelligence Seed, and Flora's Silver Barrette. Wedding gifts include Zenithian Shield and 2,000 G. The later jar investigation leads to Buorn and Final Key. **Mountain Village:** North of Salabona beside the river gate. Bianca and Duncan occupy the northern home. Search grave and inn-basement barrel medals, Strength Seed, and Medical Herb. The Demon Jar is a separate encounter. Bianca opens the gate, the village supplies the Silk Veil. Stock and event order: 6.5, 6.7, 6.9, 9.9.

24.4.5 Telepador, desert stops, and Medal King Castle

Telepador: Southern desert castle west of the Oasis. Wing of Wyvern, Defense Seed, and queen's well medal are placed finds. Kitchen Demon Jar is an encounter. Isis tests the Hero with Zenithian Helmet, the Son later receives it. **Oasis:** Coastal desert recovery stop and pot medal. **Medal King Castle:** Island east of Telepador, prize exchange and depository. Final Key opens two medal chests and Golden Tiara. Flora's courier supplies 2,000 G on the desert leg. Sections 7.1–7.3, 8.9, 9.10.

24.4.6 Chizod / Chizot, mountain stops, and Granvania

Ned's Inn: Eastern coastal landing, rest and save before the mountain. **Chizod:** Bridge village between ascent and descent. Mandatory overnight scene, shops and church. Finds are Monster Lure, Fighter's Hair, and Small Medal. **Granvania:** Royal home beyond descent, with shops, inn, church, depository, and later human and monster roster services. Sancho's house holds Acorn of Life and Boxer Shorts. Castle finds include Stone of Life, Lace Bisuche, Defense Seed, Intelligence Seed, Strength Seed, and three medals. Walk through the wall beside the stairs for the concealed Ring of Prayer, Naughty Underwear, and Hat of Happiness chests. Chancellor's dresser yields Flying Shoes after kidnapping. Magic Key later opens 3,000 G and Meteorite Armband. Sections 7.4–7.10, 8.1–8.2, 8.8.

24.4.7 Northern Church, small shrines, and El Heven

Northern Church: Flying Shoes arrival base with rest, saving, and stronger weapons. **Rumor Shrine:** Roadside recovery and saving south of Ruraphin, well medal. **Farthest Shrine:** Northern continent's eastern peninsula, Intelligence Seed pot, bucket-side ground medal, downstairs Stone of Life. **Gigo's house:** Southeastern island, mother's dresser medal. **El Heven:** Northern enclosed lake town entered through Water Shrine. Old couple's pots hold Defense Seed and medal, lower paths hold Magic Key and Magic Carpet. Speak to four elders. Sections 6.4, 8.5–8.7.

24.4.8 Faerie Village, Faerie Palace, and Zenithian Castle

Faerie Village: Childhood stair access, Holy Water pot, shops, inn, and church. Adult forest route requires a child, Powan supplies Horn, armor stock improves. **Faerie Palace:** Lake north of Sky Tower, small boat to lily pad and Horn reveal. Church, Staff of Thunder and Princess Robe basement chests, Queen's Glowing Orb, and painting exchange. **Zenithian Castle:** Mines arrival and Return point. Restored Orb opens flight, grandson's dresser medal, fireplace-room Grappling Hook, and western pool's replenishable Sap of the World Tree. Sections 4.7, 9.4–9.8.

24.4.9 Shahanna and the Demon World

Arrival shrine: Ring portal terminus, Sage's Stone gift and blue return portal. **Shahanna:** East across bridges from arrival, local rest, saving, depository, and Monster Gramps. Magic lock protects the weapon-shop entrance. Search town Defense Seed, inn Elven Medicine, outer barrel medal, and guarded Sands of Time chest. To reach Evil Mountain, leave south, follow coast north, cross bridges, and continue northeast past swamp. Sections 10.1–10.3.

24.5 Service matrix: shops, inns, churches, banks, and monster storage

Recovery and saving entries name the usable local service. The final column gives a convenient deposit or roster stop for the trip. Priced stock is in the cited walkthrough sections.

Stop	Shop lookup	Rest and save	Deposits and roster
Vista Port	Supplies in nearby towns, 4.1	Santa Rosa base	Oracleberry on adult trip.
Santa Rosa	Childhood 4.2, later 8.8	Sancho first, herbalist inn later, church	Oracleberry.
Alcapa	Childhood 4.4, adult 5.5	Inn and church	Oracleberry.
Reinhart	Childhood 4.10, adult 5.6	Town inn and church	Oracleberry, Henry's possessions deposited there.
Nameless Nunnery	Prepare at Oracleberry	Free recovery and saving, 5.2	Oracleberry.
Oracleberry	Shops and casino, 5.3	Inn and church	Local bank and Monster Gramps.
Port Selmi	Weapons, armor, items, 6.1	Inn and church	Church-basement bank, Gramps south of lighthouse.
Kabochi	Daytime general store, 6.2	Inn and underground church	Port Selmi.
Ruraphin	Shops, 6.3	Inn and church	Local depository, Port Selmi for monsters.
Rumor Shrine	Road supplies, 6.4	Rest and saving	Ruraphin or Port Selmi.
Salabona	Weapons, armor, items, 6.5	Inn and church	Port Selmi roster hub.
Mountain Village	Local stock, 6.7	Inn and church	Port Selmi before ship departure.
Desert Oasis	Travel supplies, 7.1	Oasis rest stop	Medal King depository.
Telepador	Weapons and armor, 7.3	Inn and church	Medal King depository.
Medal King Castle	Medal exchange, 7.2	Use desert recovery circuit	Local depository.
Ned's Inn	Prepare before landing	Inn and priest, 7.4	Deposit before sea journey.

Stop	Shop lookup	Rest and save	Deposits and roster
Western mountain rest	Treasure, 7.4	Old woman's stay, strength event	Carry supplies from Ned's Inn.
Chizod	Weapons and armor, 7.5	Inn and northern church	Granvania after descent.
Granvania	Castle-town stock, 7.7	Inn, church, Sancho	Local bank, later Ruida and Monster Gramps.
Northern Church	Weapons, 8.5	Inn and upstairs church	Granvania.
Farthest Shrine	Search supplies, 8.5	Resume voyage to El Heven	Granvania before sailing.
Gigo's house	Household search, 8.5	Use Granvania voyage base	Granvania.
El Heven	Weapons and armor, 8.7	Inn and saving	Granvania by Return.
Faerie Village	Childhood 4.7, armor 9.6	Inn and church	Return to ordinary-world roster hub.
Faerie Palace	Two basement finds, 9.6	Church, village for rest	Granvania or Oracleberry.
Zenithian Castle	Restored searches, 9.8	Sap pool, town for MP and saving	Granvania by Return.
Shahanna	Six weapons, six armor offers, four items, 10.3	Inn and saving	Local depository and Monster Gramps.

24.6 Generation changes, day/night differences, and key-gated searches

Change	Search or service consequence	Walkthrough
Childhood departure	Transfer Bianca's supplies, collect Ribbon, finish the four early cave chests and faerie finds before Henry's rescue.	4.5.2, 4.12.
Adult Santa Rosa	Village ruins, herbalist inn, boat to lower cave, Papas' hiding place.	5.4.
Night Oracleberry	Wagon merchant and later map offer. Ordinary shops need a daytime visit.	5.3.
Reinhart restoration	Key rooms, Mirror event, Henry leaves. Retrieve deposited possessions. Later Del visit and Hat reward.	5.6–5.10, 8.4.
Ruraphin experiment	Night Lunar Herb search teaches Return. Later Benett follow-up offers Chance when event dialogue is ready.	6.3, 8.8.
Wedding and mountain	Ship handover, veil, gifts, optional Bianca inn scene, Flora deliveries.	6.9, 7.1, 7.4.
Granvania succession	Chancellor room opens for Flying Shoes. After reunion, Ruida arranges humans and Gramps monsters.	7.9–7.10, 8.2.
Magic Key circuit	Granvania 3,000 G and Meteorite Armband, Port Selmi theatre Thorn Whip and Acorn of Life, Alcapa bar 15 G and Stone Fang, Oracleberry prison approach.	8.8.

Change	Search or service consequence	Walkthrough
Final Key circuit	Oracleberry cell medal, Medal King two medals and Tiara, Emblem Cave, Water Shrine silver door, Bonus gate.	9.10, 10.1, 11.2.
Temple rescue	Rebuild human travelling roster after Granvania reunion, retrieve all rings from current owners or storage.	9.13.2.
Clear-state access	Reach The End, reset, load associated pre-boss save, enter swamp south of Evil Mountain.	10.10, 11.1.

25 Dungeon Atlas, Puzzles, and Treasure Routes

25.1 Atlas conventions: floors, entrances, exits, switches, and treasure

Floor descriptions distinguish entrance level, upper rooms, basements, exterior ledges, and isolated return pockets. Screen connections in mazes can lead to different rooms from the apparent bearing. A **fixed-find set** includes placed chests, pots, dressers, ground searches, and event objects within the profile. Trapped containers and possible battle drops have their own entry. Doors require the listed key, learned unlocking secret, switch, or event. Use the corresponding walkthrough for the full route and battle plan.

25.2 First-generation maps

25.2.1 Santa Rosa Cave, including the adult revisit

Floors and access: Entrance and two childhood basement levels, deeper boat-access basements in adulthood. Push the rescue rock clear. Adult upper-floor walking changes the corresponding obstruction below. Poisonous enemies and stronger lower groups require treatment and MP reserves. **Fixed finds:** Childhood Medical Herb, 50 G, Leather Shield, Wayfarer's Clothes. Adult 850 G, Agility Seed, Breastplate, Lamp of Darkness, Strength Seed pot, Leather Loincloth dresser, Zenithian Sword, Papas' Letter. The village Intelligence Seed belongs to the town search. **Encounters:** Lower-cave Hork recruitment and Metal Slimes. **Route:** 4.3 and 5.4–5.4.1 in Chapters 4 and 5.

25.2.2 Lenoire / Linoire Castle

Floors and access: Exterior climb to upper entrance, descending bedrooms and dark rooms, kitchen basement and throne approach. Front door opens from inside, grave search restores Bianca, kitchen Torch lights the dark room. Hidden pot passage and trapdoor redirect the climb. **Fixed finds:** Wing of Wyvern, two Medical Herbs, Torch, Golden Orb after boss. One upper chest is empty. **Encounters:** Optional Walking Statue can yield Defense Seed, Boss Ghost guards the event reward. **Route:** 4.5–4.5.2 in Chapter 4.

25.2.3 Dwarves Cave

Floors and access: Entrance branch, intermediate drop and stairs, large lower branching floor, lowest locked treasure room. Poison ground and explosive enemies call for recovery. Learn Secrets of the Key in the lowest north chest, then open the adjacent large door. **Fixed finds:** 25 G, 100 G, Agility Seed, Secrets of the Key, 120 G, Acorn of Life. **Route:** 4.7 in Chapter 4.

25.2.4 Ice Mansion

Floors and access: Outdoor chest, sliding entrance floor, separate recovery and treasure basements, upper boss floor. Learned unlocking secret opens entrance. Holes fall to recovery basement, wall stops determine slide direction. **Fixed finds:** Outdoor Intelligence Seed, basement 5 G and Wing of Wyvern, upper Boomerang and Flute of Spring. One treasure-basement chest is empty. **Encounters:** Zaile then Snow Queen, possible Magic Water and Wing battle rewards respectively. **Route:** Full slide sequences in 4.8, Chapter 4.

25.2.5 Thieves Cave / Reinhart Cave

Floors and access: Upper bridges and kidnappers' rooms, lower passages and boat channels, prison landing. Papas opens Henry's cell. Finish collection before rescue and scripted exit confrontation. Poison enemies make Antidote useful. **Fixed finds:** 180 G, Antidote Herb, Strength Seed, Monster Lure, Elven Medicine. Last two require boat detours. **Encounters:** Kidnappers and the story-controlled Gema confrontation. **Route:** 4.11–4.12 in Chapter 4.

25.3 Reinhart, regional side quests, and marriage maps

25.3.1 Reinhart Castle basement

Floors and access: Boat entry beneath drawbridge, upper passage and lower prison, courtyard and castle treasury. Search pedestal control, eastern descent bypasses locked door, marked tile opens shortcut. Dale gives Reinhart Key upstairs. Treasury floor damages walkers. **Fixed finds:** Basement Steel Fang and Shell Hat. Connected key circuit adds Reinhart Key, 1,200 G, Acorn of Life, Half Plate Armor, storage-pot Small Medal. **Encounters:** Two fixed Dragon Pup guards. **Route:** 5.6 in Chapter 5.

25.3.2 Southern Tower

Floors and access: Five floors, split fourth-floor branches and exterior drop. Maria's prayer opens entrance. Use northeastern first stairs, collect northeastern fourth-floor jar detour, cross top gap on far-left walkway line. Falls return to lower connections. **Fixed finds:** 650 G, Scale Shield, Acorn of Magic, Magic Water jar, Mirror of Ra. **Encounters:** Metal Slimes and knight-summoned Healers. **Route:** 5.7–5.8 in Chapter 5.

25.3.3 Ruraphin South Cave

Floors and access: Northern entrance corridor and lower southern-exit passage. Resolve soldier's Henry invitation, take southeastern chest branch, then western route to exit stairs. No key puzzle on the passage. **Fixed finds:** One Small Medal chest. Rumor Shrine well medal is outside this map. **Route:** 6.4 in Chapter 6.

25.3.4 West Kabochi Cave

Floors and access: Upper fork and campfire search, lower panther chamber. Follow the descending route with Bianca's Ribbon in an available inventory, use it during the panther encounter. **Fixed finds:** Small Medal near campfire, Stone Axe, Iron Helm, Papas' Sword at the panther's position.

Encounters: One Man-Eater Chest with possible medal reward, story panther reunion. **Route:** 6.2–6.2.2 in Chapter 6.

25.3.5 Volcano Cave

Floors and access: Entrance bridges, staff-and-helm floor, lower seed-and-gold floor, separate recovery basement and ring chamber. Stepguard covers walkable lava. Healing tile restores active HP and MP, rotate reserves through it. **Fixed finds:** 450 G, Staff of Antimagic, Iron Helm, Defense Seed, 1,500 G, Ring of Flames. **Encounters:** One Man-Eater Chest, three Lava Savages at ring, Dancing Jewel and summoned Curer prospects. **Route:** 6.6–6.6.1 in Chapter 6.

25.3.6 Waterfall Cave

Floors and access: Entrance descent, bridge rooms, drop-linked exterior ledge, deep eastern treasure basement and hidden ring room. Bianca opens river gate before entry. Pale shallow water is walkable, holes connect ledge detours to return stairs. **Fixed finds:** Robe of Serenity, Elven Medicine, underwater 1,200 G, Ring of Water behind falls. **Puzzle cue:** First drop and southern door reach robe, eastern stair spur reaches medicine, beach opening reaches ring. **Route:** 6.7–6.8 in Chapter 6.

25.4 Mountain crossing, royal trials, and rescue maps

25.4.1 Mountain Cave, west side

Floors and access: Exterior ascent ledges, underground pot and rest rooms, upper cave to Chizod. Marsh and poisonous approaches favor Stepguard. Branch before resting for ring and medals. **Fixed finds:** 550 G, Ring of Prayer, three Small Medals, Hero's 5-point strength event from overnight stay. Flora's courier gives Water Flying Clothes on this route. **Encounters:** One Demon Jar in pot room. **Route:** 7.4 in Chapter 7.

25.4.2 Mountain Cave, east side

Floors and access: High Chizod-side descent, exterior drops, third-floor return branch, lower stair spurs, upper return loop and final ledge. Drops and stairs serve different treasure branches. Re-enter behind lower medal ledge and climb to main third floor for 270 G. Walk east through apparent wall on upper Mimic floor for hidden staff. **Fixed finds:** 1,500 G, three Small Medals, cursed Rogue Armor, Leaf of the World Tree, 270 G, Bomb Stone, 1,600 G, Staff of Punishment, Wing of Wyvern, Stone of Life, Agility Seed. **Encounters:** Three Mimics, two Man-Eater Chests, Metal Babble and caster recruits. **Route:** 7.6 in Chapter 7.

25.4.3 Cave of Trials

Floors and access: Four-door entrance, reservoir basement, plate room, lowest pillar trial. Enter and exit far-right door, then second from left. Boulder below latch stops reservoir current, left bird plate opens stairs, search broken western pillar and step on new tile. Escape magic is restricted on the initial return. **Fixed finds:** Small Medal, Swordedge Armor, Symbol of Royalty. **Encounters:** Kandar and Shield Hippo ambush. **Route:** 7.8 in Chapter 7.

25.4.4 Demon Tower

Floors and access: Basement and multiple entrance wings, teleporter rooms, spear floor, exterior treasure loop, flame floor and upper rock room, switch chambers and guardians. Start right entrance. Left spring supplies leader HP recovery. Spears reveal with movement, drop boulders from above to block dragon-head jets, operate both corridor switches for bridge. Wagon stays outside. **Fixed finds:** Wizard's Robe, Strength Seed, three Small Medals, Armband of Sacrifice, 880 G, Magic Water, Zombie Mail, Leaf of the World Tree, Wing of Wyvern. **Encounters:** One Demon Jar, two Mimics, Bomb Crag rocks, fixed teleporter guards, Level 20 Orc, Level 35 Wyvern, Jami. **Route:** 7.10–7.12, including 7.11.1–7.11.2, Chapter 7.

25.5 Third-generation travel, Zenithia, and temple maps

25.5.1 Water Shrine: El Heven route and ring portal

Floors and access: Ship channels and dry treasure landings on one water level. Southern exit reaches El Heven lake. Northern silver door requires Final Key. Shallow channels are navigable, deeper-looking blocked water defines walls. **Fixed finds:** Cursed Satan Helm and one Small Medal. Portal chamber uses Flames left, Water right, Life center. Sage's Stone gift is at Demon World arrival shrine. **Route:** 8.6 and 10.1 in Chapters 8 and 10.

25.5.2 Emblem Cave / Cave of Seals

Floors and access: Entrance gate and successive seal basements, southern treasure branches, deepest four-face altar. Final Key opens gate, wagon stays outside. Stone tiles cover exposed monster faces and stop local encounters, all four deepest faces must be covered. Preserve pushing room behind each tile. **Fixed finds:** Small Medal, Elven Amulet, Demon Hammer, Royal Cloak. **Encounters:** Moon Face Chance, Eaters, Sauruslords. **Route:** 9.10 in Chapter 9.

25.5.3 Sky Tower

Floors and access: Seven-floor climb with separate eastern and western lower branches and exterior upper walkways. Carpet to clear northern plains, walk across approach, wagon outside. Eastern second-floor detour gets Leaf, western climb gets medal and staff. **Fixed finds:** Leaf of the World Tree, Small Medal, Magma Staff. **Encounters:** King Healer, Centaurus, Soldier Bull recruitment and dangerous healer groups. **Route:** 9.1 in Chapter 9.

25.5.4 Torokko Mines / Trolley Cave

Floors and access: Track basements, second-floor isolated treasure pocket reached from third, final submerged connection to Zenithia. Use Magma Staff outside rock barrier south of El Heven. Set both first-floor gap switches, use left cart to set the later right-cart route, release Pusan's loop lever. Satan Helm enemies can curse, wagon stays outside. **Fixed finds:** 950 G, Small Medal, Acorn of Life, 750 G, Magic Water, Staff of Benediction. **Route:** 9.2–9.4 in Chapter 9.

25.5.5 Forest of Illusions

Floors and access: Connected woodland screens, dwarf's home, sword trail, campfire and southern gold hollow. Child required in active party. From entrance clearing go east, south, north for sword trail. Face space right of campfire and Talk, then follow child and guide. **Fixed finds:** Small Medal pot, Elven Medicine dresser, Faerie Sword, 1,500 G. **Encounters:** Eigerhorns and Farewell Crags. **Route:** 9.5 in Chapter 9.

25.5.6 Tower of Boble

Floors and access: Roof entry into seventh floor, split fifth-floor nun room, statue-level third-floor paths, first-floor entrance lever, branching basements and statue interior. Castle to island, Hook at roof ring. Pull entrance lever before boss circuits. Final Eye placement uses dragon's perspective, Right Eye in left screen socket and Left Eye in right. **Fixed finds:** Two Small Medals, 2,700 G, Devil's Armor, Shield of Darkness, Elven Medicine, Dragon's Left Eye, Dragon's Right Eye, Dragon Staff, Dragon Orb. **Encounters:** One Mimic, Gonz and Gema, paralysis breath and reflection. **Route:** 9.11–9.11.2 in Chapter 9.

25.5.7 Great Temple

Floors and access: Summit side room and assembly hall, hidden stage stair, captivity basements, upper walkways and lower ladders, priest's carpeted chamber. Dragon-only summit approach, humans active on approach, wagon supplies field recovery. Search Ramada's former standing tile for stair, Final Key opens deeper route, escape magic restricted. Ivol restores access to wider battle roster. **Fixed finds:** Zenithian Armor, Demon Claw, Slave Clothes, cursed Shield of Ruin, Ring of Life. **Encounters:** Snakehand armor guard, two Dragon Warriors, Ramada, Ivol. **Route:** 9.13–9.13.2 in Chapter 9.

25.6 Final and postgame dungeon maps

25.6.1 Evil Mountain

Floors and access: Entrance ascent to summit, separate fourth-floor robe branch, post-reunion arrow rooms, Pitcher-cleared lava room, falling-floor pocket, sliding-room grid and final chambers. Stepguard for damage tiles. Arrow-stair loop aligns eastward Pitcher route. Use Pitcher inside lava room. Drop southwest of arrival stairs. From initial grid with bottom-center vacancy, move rooms $7 \to 8$, $4 \to 7$, $1 \to 4$, $2 \to 1$, $5 \to 2$, numbering positions left to right, top to bottom. **Fixed finds:** Robe of Darkness, Ogre Shield, two Small Medals, Echoing Hat, Sun Crown, Sacred Pitcher, cursed Multi-Edge Sword, King Metal Helm, 3,300 G, Orihalcon Fang after guardians. **Encounters:** Two Urnite jars, one Mimic, two Dark Shamans, Fang guardians, Mildrath's two forms. **Route:** 10.4–10.9 in Chapter 10.

25.6.2 Bonus Dungeon

Floors and access: Five basements, first-floor ledge and Final Key gate, cracked-floor treasure pocket, second and third maze basements, fourth swamp corridor, fifth lava walkway to Estark. Enter swamp directly south of Evil Mountain after clear-state reload. First maze onward sequence is west, north, northwest, north, east, south, east, south. From third-floor central block go west, south, south for armor, retrace north, north, east. Onward route is south then east. **Nine fixed finds:** Restoration Orb, Small Medal, Shield of Radiance, Drum of War, Hell Sabre, cursed Sword of Decimation, King Metal Armor,

Elven Medicine, Iron Ball of Decimation. **Other containers:** Two Mimics, three empty chests east of central, northern, and southern block rooms. **Encounters:** Hellbattler, Lionex, Springer recruitment, Estark. **Route:** 11.1–11.5 in Chapter 11.

25.7 Treasure, Small Medal, key-object, and encounter overlays

Text overlay	Placed-object index	Separate encounter index
Childhood	Key secret at Dwarves Cave, Torch and Orb at Lenoire, Flute at Ice Mansion.	Walking Statue, Zaile, Snow Queen, scripted cave finale.
Adult central region	Papas' Letter and Zenithian Sword in Santa Rosa, Reinhart Key and storage medal, Mirror at Southern Tower.	Hork and summoned Healer recruitment, fixed castle guards, False Queen.
Marriage region	Kabochi campfire medal and Papas' Sword, passage medal, volcano Flames, waterfall Water.	Panther reunion, volcano Man-Eater Chest and Lava Savages.
Mountain and trial	West three medals, east three medals, trial one medal. Ring of Prayer, hidden Punishment staff, Symbol.	West Demon Jar, east three Mimics and two Man-Eaters, Kandar.
Demon Tower	Three placed medals, both switches, robe, seed, armband, 880 G, water, mail, Leaf, Wing.	Demon Jar, two Mimics, Bomb Crags, teleporter guards and three bosses.
Zenithia routes	Water Shrine one medal, Sky one, Torokko one, Forest one, Emblem one, Boble two. Magma Staff, Benediction staff, Royal Cloak, Eyes, Dragon Orb.	Moon Faces, curse enemies, Boble Mimic and Eye bosses.
Temple and finale	Armor and Life Ring, Evil Mountain two medals and eleven fixed finds. Sage's Stone at arrival, Sands at Shahanna.	Temple guardians, two Urnites, mountain Mimic and final guardians.
Postgame	One placed medal among nine fixed rewards. Drum, Radiance Shield, Armor, Sabre and Iron Ball.	Two Mimics, rare recruits and Estark, with three empty containers recorded.

Town medals and key rooms are indexed in Section 24.6. Each dungeon profile supplies its complete fixed-find set. Add battle rewards to a separate count when planning Medal King purchases.

25.8 Text routes and additional locations

Additional route	Search or action	Walkthrough
Opening ship and Vista	Cabin Medical Herb, speak through voyage, first field battle.	4.1.
Reinhart warp shrine	Storage stairs connect castle with southern nunnery route, use daytime return passage.	5.6–5.8.
Lunar Herb field	Southwest of Ruraphin, nighttime shining plant, return to Benett.	6.3.
Rumor Shrine and Oasis	Well medal at first, pot medal at second.	6.4, 7.1.
Mountain Village gate	Bianca joins and opens river route, later collect Silk Veil.	6.7, 6.9.2.

Additional route	Search or action	Walkthrough
Granvania concealed room	Wall beside stairs leads to three chests, Hat of Happiness supplies walking MP recovery.	7.7.
Jar shrine and Buorn tower	Inspect western shrine jar, report its changed color, prepare at Salabona's lookout tower.	9.9.
Faerie Palace painting	Hero carries Glowing Orb, exchange with child near Santa Rosa church, exit town to return.	9.6–9.7.
Zenithia fireplace and pool	Hook dresser beyond fireplace, replenishable Sap in western pool room.	9.8.
Demon World arrival and town wall	Sage's Stone gift at shrine, guarded Sands reached around Shahanna's outer wall.	10.1, 10.3.

26 Name Cross-Reference and Glossary

26.1 People, family relationships, and temporary companions

Person or lookup name	Relationship and place in the journey
Hero	Player-named son of Papas and Martha, husband of Bianca or Flora, father of the twins, king of Granvania.
Papas and Martha	Hero's parents. Papas travels with him in childhood. Martha, also Maasa, comes from El Heven and is captive in the Demon World.
Sancho	Papas' household companion, childhood recovery host, later Granvania recruit.
Bianca and Duncan	Childhood friend and possible bride, daughter of Duncan. Adult home is Mountain Village.
Flora, Ludman, Andy	Flora is Ludman's daughter and possible bride. Andy is her childhood friend. Ludman, also Rudaman or Rudman, sponsors ring quest and ship.
Henry and Dale	Reinhart princes and brothers. Henry shares captivity and escape, Dale rules when Henry returns.
Maria and Joshua	Siblings from captivity. Joshua helps escape, Maria joins the tower journey and later marries Henry. Joshua also appears as Yoshua.
Del	Henry and Maria's son, encountered in the third-generation Reinhart visit.
Ojiron and Doris	Papas' brother and Hero's uncle, with Ojiron's daughter Doris at Granvania. Ojiron also appears as Oziron.
Pippin	Granvania soldier and third-generation recruit, also Pippen.
Son and Daughter	Player-named twins. Son is the Zenithian warrior, Daughter supplies offensive and support magic.
Bella	Temporary faerie companion in childhood, also Vera. Later found in Faerie Village.
Powan and Luna	Faerie Village's ruler and palace-route informant. Powan also appears as Bowan.
Isis	Queen of Telepador, also Aisis. Keeps Zenithian Helmet for its rightful wearer.
Erik and Sofia	Royal ghosts at Lenoire, also Eric and Sophia. Their graves mark the Golden Orb reward.
Pusan	Passenger rescued from looping cart, revealed as Master Dragon after Dragon Orb is returned.
Benett	Ruraphin experimenter, also Bennet. Teaches event spells.
Gema and Gonz	Papas' persecutor and his associate, later guardians of Boble's Right and Left Eyes respectively.
Jami	Demon Tower captor, also Jahmi or Centarsus. Turns the royal couple to stone.
Ramada	Great Temple disguise encounter, also Ramanda. Hidden stair lies at his former position.
Ivol	Great Temple's High Priest, also Ibuul. Defeat yields Ring of Life and frees the queen.
Mildrath	Demon Lord at Evil Mountain, also Mirudraas. Final battle has two forms.
Estark	Bonus Dungeon's sleeping opponent, also Esterk.

Person or lookup name	Relationship and place in the journey
Gigo	Boy from the island statue household, also Jijo. Later rescued from Great Temple.

26.2 Towns, dungeons, regions, and vehicles

Lookup name	Aliases or identifying landmark	Location lookup
Santa Rosa	Santa Rose, Santorez	Central home and cave, 4.2–4.3, 5.4.
Alcapa	Alkapa, Arukapa	West of Santa Rosa, 4.4, 5.5.
Lenoire Castle	Linoire, Lenule, Linule, Renul	Haunted castle, 4.5.
Reinhart	Rainhat, Reinhart Castle	Northeast castle and boat basement, 4.10, 5.6.
Vista Port	Vista Harbor	Central southern harbor, 4.1, 5.10.
Oracleberry	Oracle Valley, Oracle Berry	Wagon and casino hub, 5.3.
Port Selmi	Port Selumi	Western mainland harbor, 6.1.
Kabochi	Kobochi	Farming village south of port, 6.2.
Ruraphin	Rulafen	Benett's town, 6.3.
Salabona	Sarabona	Ludman's town, 6.5.
Mountain Village	Watergate village, Duncan's village	North of Salabona, 6.7.
Telepador	Telpador, Telepo desert	Southern desert castle, 7.3, 8.9.
Chizod	Chizot	Mountain bridge village, 7.5.
Granvania	Granbania, Glanvania	Southeastern royal home, 7.7.
El Heven	Elheaven, Elhebun, El Heaven	Northeastern enclosed lake, 8.7.
Shahanna	Jahanna	Demon World refuge, 10.3.
Nameless Nunnery	Coastal nunnery, convent	Escape and Maria's base, 5.2, 5.7.
Small travel stops	Rumor Shrine, Desert Oasis, Ned's Inn	Roadside, desert coast, eastern mountain landing, 6.4, 7.1, 7.4.
Northern Church	Northern Shrine	Flying Shoes arrival and tower base, 7.10, 8.5.
Farthest Shrine	Northern eastern-peninsula shrine	Bucket search and downstairs chest, 8.5.
Medal King Castle	Medal King's Palace, Medal King Island	Island prize counter and depository, 7.2.
Faerie Village	Fairy Village, Land of the Elves	Childhood stair or child-guided forest, 4.7, 9.6.
Faerie Palace	Faerie Castle, Fairy Palace	Misty lake and painting, 9.6–9.7.
Zenithian Castle	Zenithia, Zenethia, underwater palace	Mines terminus and flying castle, 9.4, 9.8.
Dwarves Cave and Ice Mansion	Dwarf Cave, Ice Palace	Faerie-realm key and flute routes, 4.7–4.8.
Thieves Cave	Reinhart Cave, northeast cave	Childhood boat rescue, 4.11.
Southern Tower	Tower south of Nunnery, Tower of God	Mirror of Ra route, 5.8.
West Kabochi Cave	Western Cave, Demons Nest	Panther and Papas' Sword, 6.2.
Ruraphin South Cave	Salabona Tunnel, Cave to Salabona	Passage medal, 6.4.
Volcano and Waterfall caves	Death Volcano, river waterfall	Wedding ring dungeons, 6.6, 6.8.
Mountain Cave	Chizod ascent, Granvania descent	Two atlas profiles, 7.4, 7.6.

Lookup name	Aliases or identifying landmark	Location lookup
Cave of Trials	Ordeal Cave	Symbol of Royalty, 7.8.
Demon Tower	Demon's Tower	Spear and dragon-head tower, 7.11.
Water Shrine	Water Cave, Sea Temple, Tunnel to El Heven	Ship passage and ring portal, 8.6, 10.1.
Emblem Cave	Cave of Seals, Royal Cloak Cave	Northwest of Santa Rosa, 9.10.
Sky Tower	Tower of the Sky	Magma Staff climb, 9.1.
Torokko Mines	Trolley Cave, Tlokko Cave, Cave of Zenithia	Mine carts and Pusan, 9.3.
Forest of Illusions	Forest of Illusion, Elf Forest, Forest Maze	Child sees guide beside fire, 9.5.
Tower of Boble	Boble Tower, Tower of Bobble	Enclosed southwestern island, 9.11.
Great Temple	Grand Temple, Dorei, slave temple	Dragon-access summit, 9.13.
Evil Mountain and Bonus Dungeon	Final mountain, southern swamp dungeon	Demon World and postgame, 10.4–10.9, 11.1–11.5.
Wagon and ship	Caravan, wedding ship, borrowed river boat	Roster and sea travel, 5.3, 6.6, 6.9.3.
Carpet, castle, dragon	Magic Carpet, flying Zenithia, Master Dragon	Open-ground flight, castle controls, Bells, 8.7, 9.8, 9.12.

26.3 Monster species and default companion names

Use the species to find its cap, abilities, and recruitment region in Section 27.4. The listed companion names identify members of that species in the roster. The panther's chosen name belongs to its story reunion.

Species	Companion-name lookup
Attackbot	Killer, Junchi, Musashi, Robin.
Big Eye	Eyeleen, Gandalf, Medakich, Sachimar.
Blizzard Hawk	Blizzo, Hawk, Motchin, Torimaru.
Bomb Baby	Bagpipe, Chiochio, Nannan, Nitro.
Bomb Crag	Gansuke, Kaboom, Rocky, Yonichi.
Brownie	Bonk, Brown, Shigemar, Ton-ton.
Centaurus	Centas, Kaioh, Motosumi, Pakara.
Curer	Behobeho, Curebert, Curie, Takarin.
Dancing Jewel	Jewel, Marilyn, Richie, Yasu.
Dancing Needle	Capoeira, Danny, Feiba, Mitihiko.
Dragon Pup	Doran Jr, Drasky, Pyon, Ribasto.
Drakee	Drakichi, Lucky, Manabu, Miwaren.
Eigerhorn	Eiger, Nero, Ossan, Shinji.
Eliminator	Axeman, Decker, Emil, Minatar.
Farewell Crag	Cragg, Farwel, Iwao, Shigeyan.
Gigantes	Gantes, Gian, Giga, Yasuhiro.
Golem	Golemath, Ishio, Orion, Sander.
Great Dragon	Caesar, Drago, Great D, Trishi.
Healer	Genkichi, Healbert, Healie, Mr. Fuku.
Hellbattler	Batler, Hellbell, Moses, Sugiyan.

Species	Companion-name lookup
Hork	Kazuya, Robert, Ropes, Smith.
Killer Panther	Borongo, Tirol, Puckul, Geregere.
King Healer	Heal Rex, Hitoshi, Kingbert, Sadakich.
King Slime	Crown, Kazubo, King, Noririn.
Kukkle	Kukkle, Kumimin, Netch, Pico.
Leaonar	Leo, Noboru, Ryan, Simba.
Lionex	Devilra, Jonas, Nex, Raioh.
Mad Dragon	Madd, Moritake, Ragond, Ryuta.
Magician	Jumon, Melby, Merlin, Yukinov.
Messala	Buffler, Noririn, Sala, Satochin.
Metal Babble	Briskly, Metabab, Metalin, Yubo.
Minidemon	Konomi, Lucifer, Minimon.
Neileus / Nereus	Ajapa, Jinji, Nereus, Umijiji.
Orc King	Kuukin, Macbeth, Orcus, Yanaken.
Puppet Man	Patton, Poupee, Puppeck, Sinohara.
Slime	Akira, Sasuke, Slalin, Slibert.
Slime Knight	Arthur, Chun, Pierre, Taichi.
Soldier Bull	Brawn, Bruto, Manji, Yasunon.
Springer	Mustang, Perro, Ringer, Spur.
Wyvern	Daizou, Tetsu, Toby, Wynn, also Mechi in party lookup.
Yeti	Mihomiho, Snowman, White, Yeta.

26.4 Spell names and aliases

MP values and target patterns distinguish similarly named spell families. See Section 3.3 for item actions and Section 3.4 for status and reflection handling.

Name or family	Alias lookup	Effect and MP
Blaze, Blazemore, Blazemost	Single-target flame family	One enemy, increasing strength, 2 / 4 / 10 MP.
Firebal, Firebane, Firevolt	Fireball, Firebolt for last tier	Enemy group flame family, 4 / 6 / 10 MP.
Bang, Boom, Explodet	Explosion family	Broad enemy damage, 5 / 8 / 15 MP.
Snowblast, Blizzard	Cold spell family	Group or broad cold damage, 5 / 12 MP.
Gale, Tornado, Aerocross	Wind spell family	Enemy group wind damage, 2 / 4 / 8 MP.
Zap, Lightning, Thordain	Lightning spell family	Lightning attacks, 8 / 15 / 10 MP, Thordain uses party cooperation.
Heal, Healmore, Healall	HealMore, HealAll	Single-ally recovery, 2 / 5 / 7 MP, Healall fills HP.
Healus, Healusall	HealUs, HealUsAll	Group healing, 18 / 36 MP, upper tier fills living companions' HP.
Vivify, Revive	Revival spells	10 MP uncertain revival, 20 MP dependable full-HP revival.
Antidote, Numboff, Curseoff	AntiDote, NumbOff, CurseOff	Poison, paralysis, curse recovery respectively. Antidote and Numboff cost 2 MP each.
Upper, Increase	Single and group defense buffs	2 / 3 MP, protection from physical attacks.

Name or family	Alias lookup	Effect and MP
Sap, Decrease	Defense as a spell name	Lower one enemy or group defense, 3 / 4 MP.
Bikill	BiKill, attack boost	One ally's attack boost, 6 MP.
Barrier	Breath protection	Fire and cold breath reduction, 3 MP.
Bounce	Spell reflection	Reflection on recipient, 4 MP. Account for reflected healing.
Absorb	MP absorption ward	Gain MP from incoming spells, 2 MP.
Robmagic	RobMagic	Steal enemy MP, 0 MP.
Stopspell	StopSpell	Attempt spell sealing, 3 MP.
Surround	Accuracy disruption	Reduce enemy hit chance, 5 MP.
Sleep, Sleepmore	Stronger sleep attempt	Group sleep attempts, 3 / 5 MP.
Confuse	Confusion spell	Disrupt enemy control, 5 MP.
Beat, Defeat	Instant-death family	One enemy or enemy group, 4 / 7 MP. Resistance determines success.
Expel	Enemy-removal spell	Remove susceptible enemy group, 1 MP.
Return, Outside	Travel and dungeon escape	8 MP each, subject to access and escape rules.
Repel, Stepguard	Encounter and terrain wards	4 MP weak-encounter ward, 2 MP damage-floor protection.
Day-Night, Identify	DayNight, appraisal	Change time or inspect item, 3 MP each.
Bedragon	BeDragon	Transform caster, 18 MP. Account for lost access to ordinary healing actions.
Chance	Random-effect spell	20 MP, event-learned by Hero, also learned by certain monsters.
Sacrifice, Farewell	Self-sacrificial actions	Damage enemies or revive allies at caster's expense, 1 MP or remaining MP respectively.
Breath and dance abilities	Fiery / Fire, Flaming / Flame Breath	Monster special actions, usually MP-free. Check named tier, target and learned level.

26.5 Items, equipment, key objects, and naming collisions

Item lookup	Alias or collision	Identity check
Poison Knife	Also Poison Needle	24 attack, paralysis, 900 G at Mountain Village or later Santa Rosa.
Poison Needle	Same displayed-name collision	1 attack, possible instant kill, 2,900 G at adult Reinhart or Kabochi.
Devil's Armor and Demon Armor	Similar names	Devil's Armor is ordinary 65-defense Boble gear. Demon Armor is cursed, guarded at Reinhart.
Rogue Armor	Roaming Armor	Cursed mountain ledge armor, control drawback.
Sword of Decimation	Cursed bonus sword	Different from Iron Ball of Decimation, the 125-attack broad weapon.
Multi-Edge Sword	Multi-Edged Sword	Cursed Evil Mountain outdoor chest.
Hell Sabre and Orihalcon Fang	Hell Saber, Orichalcum Fang	120-attack bonus sword and 115-attack mountain Fang.

Item lookup	Alias or collision	Identity check
King Metal equipment	Metal King equipment	Sword is 130 attack, bonus Armor 95 defense, final Helm 70 defense. Shield uses medal exchange.
Swordedge Armor	Blade Armor, Swordedge Mail	Trial reward, returns part of physical damage.
Princess Robe	Princess Armor	Faerie Palace basement body equipment.
Lace and Silk Bisuche	Bustier spellings	Distinct body pieces, Lace 35 defense, Silk 60.
Echoing Hat, Sun Crown	Echo Hat, Crown of the Sun	Spell repeat hat and protective crown from arrow route.
Angel's Leotard	Angel Leotard	70 defense, cold protection.
Magma, Antimagic, Punishment staves	Staff of Antimagic also AntiMagic	Mountain-barrier tool, Stopspell item, Tornado item respectively.
Benediction and Revival staves	Benidiction spelling	Reusable Healmore and Vivify battle actions respectively.
Staff of Stoross	Stross Staff	Story recovery from petrification.
Lunar Herb	Rura Moon Herb	Night field plant for Benett's Return experiment.
Flute of Spring, Silk Veil	Spring flute, wedding veil	Faerie handover and marriage object.
Golden, Glowing, Silver Orbs	Gold Orb and matching replica	Golden Orb powers Zenithia, Glowing Orb serves painting exchange, Silver stays at pedestal.
Dragon Eyes and Dragon Orb	Left Eye, Right Eye	Left from Gonz, Right from Gema, Orb from statue interior.
Flames, Water, Life Rings	Fire Ring, Hydro Ring	Wedding rings and priest's ring, used at three portal statues.
Unlocking secret and keys	Secrets of the Key, Thieves' Key knowledge	Learned childhood locks, Reinhart-specific key, red-frame Magic Key, barred-door Final Key.
Mirror, Pitcher, Bells	Mirror of Ra, Holy Chamberpot, Heaven / Celestial Bell	Truth event, lava removal, Master Dragon call.
Hook, Horn, Shoes	Grappling Hook, Faerie Horn, Winged Shoes	Boble descent, Palace reveal, Northern Church transport.
Lamp, Map, Carpet	Lamp of Darkness, Wayfarer's Map, Magic Carpet	Night change, field map, constrained open-ground flight.
Bianca's Ribbon	Panther recognition ribbon	Story reunion tool and intelligence accessory.
Medical Herb and Elven Medicine	Herb, Elven recovery medicine	Ordinary HP recovery and valuable MP refill respectively.
Magic Water and Ring of Prayer	MP recovery items	Water is consumed, repeated Ring use can break it.
Leaf and Sap of World Tree	World Tree Leaf / Sap	Leaf revives one ally, Sap restores party HP and refills from Zenithia pool after use.
Restoration Orb and Stone of Life	Revival safeguard and death ward	Carry Orb for revival contingency, Stone of Life guards against instant death.

Item lookup	Alias or collision	Identity check
Full Moon Herb and Angel's Bell	Paralysis herb, confusion bell	Herb treats paralysis, Bell is reusable in battle for confusion.
Drum and Fighter's Hair	Drum of War, attack-boost item	Party and selected-ally attack support respectively.
Meteorite and Sacrifice armbands	Meteorite Armband, Armband of Sacrifice	Double wearer agility, or explosion on equipped wearer's death against ordinary enemies.
Seeds and Acorns	Defense Seed / Defense, Acorns of Life / Magic	Permanent attributes or maximum HP / MP, distinct from defense-lowering spell.
Small Medal and medal rewards	Combat Pajamas, Mysterious Bolero, Mystic Armor	Spent currency at Medal King, rewards have different costs and roles.

26.6 Alternate names for lookup

Fast disambiguation

Lookup string	Resolve to
Borongo, Pierre, Slalin	Killer Panther, Slime Knight, Slime. Species determines progression.
Kimera, Beak Eye, Hoimi Slime	Wyvern, Big Eye, Healer.
Behoma Slime, Slime Behomazun	Curer and King Healer respectively.
Arm Lion, Soldier Blue	Leaonar and Soldier Bull respectively.
Killer Machine, Golden Dragon	Attackbot and Great Dragon respectively.
Lone Metal, Hagure Metal	Metal Babble. Metal Slime is a separate enemy.
Kandata, Kandar	Trial ambusher. Kandar Henchmen guard separate optional treasures.
Royal Cloak Cave, Underwater Palace	Emblem Cave and submerged Zenithia respectively.
Dragon Ring	Ring of Life when used for the third portal statue.
Poison Needle, Devil / Demon	Confirm attack, price, curse, and effect with the collision table before purchase or equipment.

27 Quick Reference Tables

27.1 Story milestones and next-objective lookup

Current milestone	Next objective	Walkthrough
Opening voyage	Cabin herb, Santa Rosa rescue, Alcapa and Bianca.	4.1–4.4.
Lenoire cleared	Orb and panther, Ribbon, Santa Rosa faerie stair.	4.5–4.6.
Faerie winter	Dwarves unlocking secret, Ice Mansion flute, return spring.	4.7–4.9.
Henry kidnapped	Finish childhood finds, boat rescue and exit event.	4.10–4.12.
Escape at nunnery	Oracleberry wagon, monster roster, adult Santa Rosa sword and letter.	5.1–5.4.
Reinhart investigated	Dale's key, Maria, Mirror of Ra, False Queen.	5.6–5.9.
Port Selmi request	Kabochi panther, Ruraphin Return, road to Salabona.	6.1–6.4.
Ring challenge	Flames, Bianca and gate, Water, veil and wedding.	6.5–6.9.
Wedding ship	Desert stops, Ned's Inn, Chizod crossing, Granvania.	7.1–7.7.
Royal trial complete	Coronation, twins, missing queen, Flying Shoes and Demon Tower.	7.8–7.11.
Hero restored	Rebuild roster, family rewards, Water Shrine and El Heven.	8.1–8.7.
Key and carpet	Magic-door circuit, Son's Helmet, Sky Tower and Magma Staff.	8.8–8.10, 9.1.
Pusan and missing Orb	Child in forest, Horn and Palace, painting exchange.	9.3–9.7.
Zenithia restored	Hook, Buorn and Final Key, Royal Cloak, Boble Eyes and Orb.	9.8–9.11.
Master Dragon revealed	Bells, Great Temple, Life Ring, family reunion and roster reset.	9.12–9.13.
Three rings assembled	Northern silver door, portal, Sage's Stone, Shahanna.	10.1–10.3.
Mountain summit reached	Pitcher, final finds and puzzle, Fang guardians, Mildrath.	10.4–10.9.
The End reached	Reset and reload, southern swamp, bonus rewards and Estark.	10.10, 11.1–11.5.

27.2 Keys, travel unlocks, and access requirements

Unlock	Acquire	Use
Secrets of the Key	Dwarves Cave, 4.7	Childhood ordinary locks and Ice Mansion entrance.

Unlock	Acquire	Use
Reinhart Key	Dale, 5.6	Castle treasury, storage and warp-route doors.
Maria's prayer	Nunnery return, 5.7	Southern Tower entrance.
Wagon	Oracleberry night merchant, 300 G, 5.3	Reserve roster, recruitment after Gramps visit.
Return and map	Benett's Herb event, merchant's later 1,000 G map, 6.3 / 5.3	Registered travel destinations and field location lookup.
River boat and gate	Flames delivered, Bianca joins, 6.6–6.7	Waterfall Cave.
Wedding ship	Wedding and Port Selmi identity confirmation, 6.9.3	Inner sea, desert, islands and mountain landing.
Flying Shoes	Chancellor's dresser, 7.10	Northern Church and Demon Tower approach.
Magic Key and carpet	El Heven lower-path chests, 8.7	Red-frame locks, open plains and water crossings.
Magma Staff	Sky Tower, 9.1	Open mines south of El Heven.
Child and Horn	Forest guide and Powan, 9.5–9.6	Faerie Village return and Palace lake reveal.
Golden Orb	Glowing Orb painting exchange, 9.7	Restore Zenithia and flight controls.
Hook	Zenithia fireplace room, 9.8	Boble roof and statue descents.
Final Key	Buorn victory, 9.9	Prison bars, Medal King treasury, Emblem gate, Water Shrine door, Bonus gate.
Dragon Orb and Bells	Boble statue, Pusan, 9.11–9.12	Master Dragon and Great Temple approach.
Life Ring and portal	Ivol, then three statue handovers, 9.13 / 10.1	Flames left, Water right, Life center.
Sacred Pitcher	Evil Mountain arrow route, 10.5	Clear lava room.
Bonus access	The End and associated save reload, 11.1	Swamp directly south of Evil Mountain, Final Key inside.

27.3 Human and monster spell-learning summaries

Numbers in the human table are learning levels. Monster starting abilities and selected milestones appear with every species in Section 27.4. Chapter 3, especially Sections 3.3–3.8, covers command reliability, roles, and reserve access.

Human	Strategic learning milestones	Role and access
Hero	Heal 4, Antidote 6, Upper 9, Healmore 11, Outside 14, Healall 22, Vivify 25, Aerocross 32. Return and Chance through Benett events.	Permanent fighter and recovery anchor.
Bianca	Blaze 3, Decrease 7, Sleep 12, Bikill 13, Firebane 15, Stepguard 17, Bounce 18, Blazemore 20, Blazemost 33.	Childhood partner, river journey, possible wife, rescued later.
Flora	Healmore 10, Decrease 11, Bikill 13, Stepguard 15, Firebane 16, Day-Night 17, Bounce 18, Blazemost 33, Explodet 37.	Possible wife, second-generation growth limited at 10, later growth after rescue.

Human	Strategic learning milestones	Role and access
Henry	Blaze 1, Surround 3, Decrease 6, Bang 8, Confuse 12, Repel 15.	Escape and Reinhart companion, leaves after restoration.
Son	Increase 8, Healmore 12, Numboff 14, Stepguard 15, Healall 16, Curseoff 20, Barrier 23, Revive 27, Healus 30, Lightning 34, Thordain 38.	Zenithian fighter, healer and breath support.
Daughter	Return 5, Outside 9, Snowblast 14, Bikill 16, Decrease 22, Boom 24, Bounce 27, Blizzard 30, Bedragon 32, Explodet 36.	Travel, support and offensive magic.
Sancho	Increase and Sleep 20, Robmagic 25, Beat 28, Sacrifice 30, Confuse 32.	Third-generation physical and utility recruit at Ruida.
Pippin	No learned spells.	Third-generation physical recruit at Ruida.
Papas and Bella	Papas knows Healmore. Bella starts with Heal, Decrease, Firebal, Surround at fixed level 7.	Temporary companions. Papas acts autonomously, Maria's temporary role supplies tower access.

Carry revival and ailment items on more than one active member. Son's Barrier arrives at 23, Daughter's Bikill at 16 and Decrease at 22. Their learning schedules determine readiness for the later boss circuit.

27.4 Monster level caps, recruitment regions, and party roles

Start means an ability already known on joining. Recruitment regions identify ordinary encounters or summons where applicable. The three active positions and five reserves give eight travelling members where wagon access permits. Stored companions need to rejoin the travelling roster for experience. Intelligence 20 is the usual command-reliability target.

Species	Cap	Recruitment region	Role and selected abilities
Attackbot	30	Demon World fields	Physical fighter, no learned spells. Assess allied actions from its own battle behavior.
Big Eye	20	Telepador country	Start Healmore and Cold Breath, Healall 15. Early recovery and breath.
Blizzard Hawk	25	North of Reinhart	Start Defeat and cold breaths, Healus 15, Sparkling Breath 23.
Bomb Baby	15	Oracleberry country	Start Sacrifice, Body Attack 5. Situational sacrificial specialist.
Bomb Crag	20	Volcano region	Start Sacrifice and Charge Up, Farewell 19. Emergency reserve.
Brownie	99	Nunnery and central roads	Physical fighter, no learned spells.
Centaurus	50	Sky Tower country	Start Healmore, Bikill 20, Healall 23, Barrier 27. Hybrid support.
Curer	50	Medal King Island, Beast Master summons	Start Healall, Healmore 3, Upper 8, Increase 10, Vivify 12, Healus 18, Revive 23, Healusall 30.
Dancing Jewel	7	Volcano	Start Decrease, Confuse, Stopspell and dance, Aerocross 7. Improve obedience before assigning essential support.

Species	Cap	Recruitment region	Role and selected abilities
Dancing Needle	25	Reinhart country	Start Strange Dance, Sleep Attack 10, Numbing Attack 20, Body Attack 25.
Dragon Pup	30	Port Selmi country	Start Fire Breath, Sweet Breath 5, Flame Breath 15, Violent Flames 28.
Drakee	99	Oracleberry country	Sleep 10, Day-Night 15, Robmagic 20, Bedragon 38. Utility and magic.
Eigerhorn	See text	Forest of Illusions	Start Firebane, Tornado, Snowblast, Firevolt 11, Blizzard 15. Offensive hybrid.
Eliminator	30	Later central and northern fields	Massacre 7, Sap 20. Strong physical role with risky group action.
Farewell Crag	20	Later volcano and forest routes	Start Farewell, Bounce 8, Vivify 14, Thunder 20. Sacrificial recovery.
Gigantes	7	Demon World near Evil Mountain	Physical fighter, no learned spells. Short growth track.
Golem	50	Northern fields and Sky Tower region	Build Up 8, Charge Up 11, Meditate 20, Thunder 45. Durable attacker.
Great Dragon	60	Demon World fields	Start Flame Breath, Violent Flames 10, Freezing Breath 15, Sparkling Breath 30, Infernal Flames 50.
Healer	99	Southern Tower, summoned by knights	Start Heal, Healmore 7, Numboff 15, Healall 20, Healus 25, Vivify 30, Healusall 36.
Hellbattler	15	Bonus Dungeon	Start Explodet and Violent Flames, Firevolt 5, Bounce 7, Revive 8, Blazemost 11, Sparkling Breath 13, Infernal Flames 15.
Hork	30	Adult Santa Rosa lower cave	Start Lick and Poison Attack, Cold Breath 10, Tempting Dance 15, Deadly Poison 25.
Killer Panther	99	Story Alcapa, West Kabochi reunion	Charge Up 17, War Cry 21, Freeze Ray 33, Thunder 40. Physical attacker.
King Healer	20	Sky Tower	Start Healusall and Robmagic, Barrier 7, Revive 10, Chance 17. High-MP recovery reserve.
King Slime	30	Medal King Island	Start Vivify, Increase 5, Barrier 10, Revive 15, Blazemost 27. Hybrid reserve.
Kukkle	20	South of Nunnery	Start Decrease, Increase 17, Curseoff 18, Bikill 20. Support bird.
Leaonar	30	Upper Demon Tower	Build Up 9, Decrease 12, Flame Breath 15. Physical hybrid.
Lionex	23	Bonus Dungeon	Start Aerocross, Eerie Light 8, Zap 14, Lightning 20. Offensive magic.
Mad Dragon	40	Ned's Inn and mountain approach	Sweet Breath 6, Flame Breath 8, Burning Breath 10, Violent Flames 15. Physical and breath.
Magician	99	Port Selmi country	Start Blaze and Stopspell, Firebane 12, Robmagic 15, Firevolt 28. Early offensive magic.
Messala	50	Eastern mountain descent	Start Stopspell and Eerie Light, Defeat 20, Curseoff 22, Freezing Breath 27, Blazemost 30.
Metal Babble	8	Eastern descent and later metal routes	Start Firebal and Bang, Farewell 7, Explodet 8. Exceptional defense, fragile HP.

Species	Cap	Recruitment region	Role and selected abilities
Minidemon	30	Eastern mountain descent	Start Blazemore, Boom 17, Day-Night 20, Chance 23, Blazemost 25, Explodet 28.
Neileus / Nereus	50	Later sea encounters	Start Snowblast and Tornado, Bounce 6, Return 10, Vivify 17, Blizzard 20.
Orc King	30	Granvania and trial region	Start Vivify, Healus 8, Stepguard 9, Revive 11, Blizzard 20. Recovery hybrid.
Puppet Man	30	Mountain Village country	Start Strange Dance 2, Bounce 6, Stopspell 15, Aerocross 30. Dance and spell support.
Slime	99	Central country and Santa Rosa Cave	Increase 10, Decrease 15, Outside 18, Stepguard 25, Vivify 30, Infernal Flames 99.
Slime Knight	99	Reinhart country	Start Heal and Robmagic, Healmore 5, Antidote 9, Numboff 18, Healall 20, Boom 23. Durable healing fighter.
Soldier Bull	30	Mines and Sky Tower routes	Start Charge Up, Upper 5, Bikill 10, Decrease 15. Physical support.
Springer	50	Bonus Dungeon	Start Upper and Decrease, Tornado 7, Aerocross 15. Flexible support fighter.
Wyvern	60	South of Salabona	Start Healmore, Cold Breath 5, Outside 12, Healall 15, Healus 18, Freezing Breath 22, Return 24.
Yeti	40	Reinhart country	Start War Cry, Cold Breath 5, Snowblast 15, Freezing Breath 22, Blizzard 30. Cold offense and disruption.

Eigerhorn's reported cap is 40 or 50. Its listed strategic spell progression is complete by level 15. Check its displayed experience-to-next-level when planning a maximum-level goal. Monster elemental tolerances also affect survivability, compare actual battle damage alongside equipment protection.

27.5 Equipment compatibility, upgrades, and resistance priorities

Wearer or role	Known equipment path	Priority
Hero	Papas' Sword, Royal Cloak, Dragon Staff	40-attack childhood inheritance, free 90-defense protected cloak, 125-attack staff.
Son	Zenithian Sword, Shield, Helmet, Armor	Sword from Santa Rosa, Shield wedding, Helmet Telepador, Armor Great Temple. Full set supports later tank and healer role.
Daughter	Faerie Sword, Princess Robe, Golden Tiara	Forest, Palace, Medal King locked treasury. Protect support turns and spell MP.
Wife and robe users	Water Flying Clothes, compatible robes and headgear	Fire resistance matters on breath routes, 55 defense on clothes. Check item eligibility before buying.
Killer Panther	Stone Fang, Steel Fang, Flame Claw, Demon Claw, Orihalcon Fang	Develop focused damage with found fangs and compatible claws. Armor and HP determine boss readiness.

Wearer or role	Known equipment path	Priority
Slime Knight	Broad Sword, suitable heavy armor and shields	Healing fighter benefits from defense and spell/breath protection alongside attack.
Slime	Compatible Boomerang and species gear	Early broad attacks, later support. Species-specific body slots constrain purchases.
Recovery item holder	Staff of Benediction, Sage's Stone, carried revival	Item action uses holder's turn. Choose dependable active user and reserve backup.
Fire-pressure fights	Water Flying Clothes, Royal Cloak, Zenithian set, compatible shields	Match protection to wearer and flame attack, keep Barrier user ready.
Cold-pressure fights	Flame Armor, Flame Shield, Angel's Leotard, Radiance Shield	Stronger defense alone can trade away useful cold reduction.
Spell-pressure fights	Magic Armor, Sage's Robe, Royal Cloak, Zenithian Armor	Spell protection helps against Explodet and concentrated magic.
Reflection and status	Mirror Armor, Bounce, Elven Amulet, Stone of Life	Reflection changes targeting, amulet supports resistance, carried death ward and cures supply contingency.
Bonus upgrades	King Metal Armor, Radiance Shield, Hell Sabre, Iron Ball	95 defense, 65 defense, 120 attack, 125 attack respectively. Assign largest practical upgrade among compatible users.

Inspect Equip with the intended wearer before spending. Sword, whip, fang, claw, robe, and shield compatibility varies by species. Hat of Happiness restores walking MP, Mystic Armor and Ring of Life supply gradual HP recovery. Keep cursed Rogue Armor, Demon Armor, Shield of Ruin, Multi-Edge Sword, and Sword of Decimation unequipped during ordinary preparation.

27.6 Boss preparation, status counters, and reusable-item lookup

Boss or pressure	Preparation	Counter and route
Boss Ghost	Two healthy children, herbs, upgraded protection	Keep Hero healing, Bianca's support and attacks as safe. 4.5.1.
Zaile and Snow Queen	Prepare for consecutive fights and group cold	Recover before second battle, Upper for blows, sustained healing. 4.8.
False Queen	Three dependable members and Mirror event resolved	Manage summoned helpers and preserve a recovery turn. 5.9.
Lava Savages	Fire protection, cold options, refill chamber	Focus one guardian at a time, share healing, rotate prepared reserves. 6.6.1.
Kandar and Hippo	Full recovery before return ambush	Defense buffs, remove smaller guard when its blocking delays damage. 7.8.
Tower guardians and Jami	Three prepared entrants, revival, MP reserves	Heal between guards. Parry and recover through Jami barrier, attack after queen breaks it. 7.11.1–7.11.2.
Buorn	Healus or strong recovery, fire protection, Barrier	Renew defense after reductions, use Bikill and steady physical damage. 9.9.

Boss or pressure	Preparation	Counter and route
Gonz and Gema	Cloak, Barrier, healing staff, multiple Full Moon Herbs	Gonz physical defense plan. Gema paralysis cures immediately, physical damage through Bounce. 9.11.1.
Ramada and Ivol	Prepared humans, equipped wagon healers, revival	Search stair after Ramada. Ivol restores roster swaps, renew Barrier and attack boost after freezing wave. 9.13.1.
Mildrath, both forms	Eight useful travellers, Stone, strong healing, MP and revival	Handle summons, maintain recovery, renew erased buffs, rotate depleted members. 10.8–10.9.
Estark	Fire and cold protection, Drum, full-group healer, revival	Two-action damage demands recovery first, then safe support and focused attacks. 11.5.
Paralysis, poison, confusion	Cures on multiple active members	Full Moon Herb / Numboff, Antidote, reusable battle Angel's Bell respectively.
Curse and instant death	Curseoff or church, revival, carried Stone of Life	Preserve healthy acting member and immediate revival option.
Reflection and dispelling	Physical attackers, spare support turns	Track Bounce recipients, refresh needed buffs after removal.

Reusable battle actions

Tool	Use
Staff of Benediction, Sage's Stone	Healmore to one ally, or group HP recovery, without holder MP expenditure.
Drum of War, Fighter's Hair	Party attack boost, or selected ally's attack boost. Assign the support turn around healing needs.
Staff of Revival	Vivify, with its revival uncertainty.
Shield of Strength	Wearer's Healmore action.
Antimagic, Punishment, Thunder staves	Stopspell, Tornado, Firebane item actions respectively.
Flames and Water Rings	Firebane and Blizzard battle attacks respectively.
Zenithian Shield and Sword	Bounce and removal of enemy support effects respectively.
Dragon Staff	Bedragon transformation, account for Hero's healing responsibility.
Sands of Time	Restart ordinary battle from beginning, assigned in Shahanna outer-wall reward.

Use Drum or Bikill for the attack-boosting job and refresh after dispelling. Carry Restoration Orb as a revival safeguard, with additional revival and MP recovery ready. Exact Orb consumption and full-roster recovery effects remain uncertain.

27.7 Small Medal rewards, casino prizes, and high-value purchases

Reward or purchase	Cost	Practical priority
Combat Pajamas	5 medals	40-defense body option for compatible wearer.
Mysterious Bolero	10 medals	37 defense and MP recovery from some incoming magic.
Sword of Miracles	16 medals	100 attack, restores HP from damage. Early value for compatible physical member.
Mystic Armor	21 medals	75 defense and gradual battle HP recovery.

Reward or purchase	Cost	Practical priority
Falcon Sword	30 medals	67 attack and two-hit action, compare strong wearer's damage.
King Metal Shield	43 medals	70-defense shield, plan remaining spent balance.
Elven Medicine	300 coins	Valuable MP refill for a long boss attempt.
Leaf of the World Tree	1,000 coins	Emergency single-ally full-HP revival.
Armband of Sacrifice	5,000 coins	Deliberate ordinary-encounter sacrifice plan.
Killer Earring	10,000 coins	Two-hit weapon for compatible user.
King Metal Sword	50,000 coins	130-attack optional sword.
Gringham Whip	250,000 coins	100-attack powerful group whip, substantial coin goal.
Wagon and Map	300 G / 1,000 G	Night merchant purchases with lasting roster and navigation value.
Magic Shield	3,400 G	Early protective upgrade, compare Port Selmi, Ruraphin, Telepador, Chizod stock.
Flame Claw	4,700 G	53 attack and Firebane item action, useful panther upgrade.
Water Flying Clothes	14,800 G	55 defense and fire protection. Flora has a mountain courier gift.
Flame Armor and Shield	15,000 G / 17,000 G	Cold protection, later Faerie Village choices.
Shield of Strength	25,000 G	Defensive slot and reusable self-heal, compare free healing staff.
Elven Amulet	3,000 G	Status protection, Emblem Cave supplies a free one.
Staff of Revival	45,000 G	Reusable Vivify, budget protection and reliable recovery first.

Medal purchases spend the stated amount. Record placed medals separately from monster drops. Casino coins cost 20 G each, keep gambling money separate from travel, equipment, and recovery funds. Shop inventory and buying advice remain in Sections 4.2–4.10, 5.3–5.6, 6.1–6.7, 7.3–7.7, 8.5–8.8, 9.6, and 10.3.

27.8 Shops, safe recovery points, and final completion checklists

Journey stage	Recovery and shopping base	Departure check
Childhood	Sancho, Alcapa inn, Faerie Village	Transfer Bianca items, Ribbon, all early finds before rescue. 4.12.
Escape and mirror	Nunnery free rest, Oracleberry roster and deposits	Wagon, sword and letter, key rooms, five tower finds. 5.10.
Marriage route	Port Selmi, Kabochi inn, Ruraphin, Salabona	Panther and Sword, Return, six volcano finds, four waterfall finds, veil and ship. 6.10.
Volcano circuit	Chamber tile restores active HP and MP	Rotate reserves through recovery before Lava Savages. 6.6.

Journey stage	Recovery and shopping base	Departure check
Mountain crossing	Ned's Inn, old woman's stay, Chizod	Six placed mountain medals, hidden staff, all eastern traps counted separately. 7.12.
Royal rescue	Granvania, Northern Church, tower leader-HP spring	Secret three chests, trial objects, shoes, both bridge switches, three tower medals. 7.12.
Reunion and key circuit	Granvania roster, El Heven, Santa Rosa	All four El Heven finds, Magic rooms, Son's Helmet, active travel spells. 8.10.
Zenithia and Boble	Ordinary-world inns, Zenithia Sap pool, opened Boble front door	Staffs, Horn, Orb, Hook, Final Key, Cloak, ten Boble finds. 9.10–9.12.
Temple and family	Fully recover before dragon landing, Granvania after reunion	Armor, underground treasure, Life Ring, reselect humans, retrieve three rings. 9.13.2.
Demon World	Shahanna inn, saving, bank and Monster Gramps	Stone assigned, Sands collected, eleven mountain objects, pre-boss save. 10.11.
Bonus preparation	Return or Outside to town after treasure circuit	Nine fixed rewards, two Mimics, three empty chests, Drum and reserve recovery. 11.2–11.5.
Final collection review	Compare species and dungeon indexes, medal balance and stored equipment	Recruit goals, level caps, unique gear, event spells, saved final and postgame progress. 11.6.

For a recovery trip, keep escape MP available, cure ailments, restore HP and MP, recover stored gear needed by the new roster, deposit spare gold, and record the adventure. Battle defeat halves carried gold while banked gold remains protected. A final completion check includes childhood handovers, both wedding rings and Life Ring, all four Zenithian pieces, every dungeon's placed finds, chosen medal rewards, companion species goals, and Estark victory. The resumed save and recorded collection state provide the basis for repeat attempts.
